

# Enterprise risk management Middle East survey

January 2025

KPMG Lower Gulf Limited

## Foreword

In an era marked by rapid change and unprecedented complexity, the landscape of enterprise risk management (ERM) is evolving at an extraordinary pace. The Middle East, with its unique blend of local dynamics and global influences, presents distinct challenges and opportunities for businesses across various industries.

As we launch the KPMG 2024 enterprise risk management survey in collaboration with the UAE Internal Auditors Association, our goal is to gain a comprehensive understanding of the key risks facing organizations in the Middle East. This year, we have gathered insights from risk professionals and industry leaders across the UAE, Kingdom of Saudi Arabia and Oman to explore the overarching trends impacting decision-making and strategic planning, as well as the nuanced, industry-specific challenges that require tailored risk management approaches. By analyzing the responses, we aim to illuminate the primary risk factors influencing organizational resilience and growth in the region.

We hope this report serves as a valuable resource for navigating the complexities of ERM in today's dynamic risk landscape.

### Methodology

The survey was launched in March 2024 and conducted through September 2024. During this period, we gathered over 100 responses from various industries and the public sector, providing a rich foundation for our analysis.

Our approach was designed to capture a range of perspectives across different sectors, ensuring a comprehensive understanding of the risk landscape in the Middle East. Respondents were asked to assess a range of risks, rating each on a likelihood and impact scale from 1 to 5. Likelihood refers to the probability or chance for a risk event to occur. A rating of 1 suggests that the risk is highly unlikely to occur, whereas a rating of 5 indicates that the risk is almost certain to occur. Impact reflects the potential consequences or severity of a risk event on the organization if it were to occur. A rating of 1 implies that the impact would be minimal or negligible, while a rating of 5 signifies a catastrophic effect on the organization.

By evaluating each risk based on the above criteria, we can assess the overall risk landscape, prioritizing those that are most critical for strategic focus and management. This approach not only allows us to gauge the perceived possibility and severity of each risk but also facilitates the prioritization of risks based on their average ratings. We have identified risks that are viewed as most critical by aggregating these scores, providing valuable insights into the areas that demand immediate attention and tailored risk management strategies.

The next page summarizes the demographics of the survey participants. This detailed breakdown highlights the breadth and depth of the insights gathered, enabling us to contextualize the findings and understand the specific perspectives that shaped our analysis. By examining the responses across different sectors and regions, we can better appreciate the unique challenges and opportunities that organizations face in navigating the complexities of ERM in this dynamic environment.

# **Oil and gas**

Emerging risks in the oil and gas sector include geopolitical shifts that can disrupt supply chains and operations. The threat of explosions, natural disasters and hazardous waste–such as oil spills–poses both safety and environmental challenges. Additionally, the sector faces pressure to embrace digital technologies swiftly, while changes in customer preferences for low-carbon solutions and rising legal risks add further complexity to business operations.

op risks	<b>=</b> L	ikelihood 📃 I	Impact
eopolitical changes leading supply chain disruptions	4.21 4.07

Industry breakdown

### Travel, leisure and tourism

Key risks for the travel, tourism, and leisure sector include geopolitical instability and health crises, such as outbreaks of infectious diseases, which can restrict travel. Data privacy breaches and security lapses pose significant reputational and legal risks. Rising inflation and cost of living may reduce consumer spending, and failure to adopt automation or sustainability practices could affect customer satisfaction and loyalty.

#### **Top risks** Geopolitical changes causing instability, 4.42 restrictions and travel safety challenges 4.58 Guest data privacy violations and security lapses 4.33 4.00 leading to severe legal and reputational consequences Not prioritizing sustainability in decision-making, 3.92 4.42 impacting customer demand and experience Rising inflation and cost of livina. 3.67 4.33 leading to reduced consumer spending

Inability to focus on automation, emerging technology and AI

Outbreak of infectious diseases, leading to travel restrictions

Imposing higher costs and taxes on consumers, negatively impacting their experience

Likelihood Impact

3.75 4.08 3.75 3.92 3.58 3.83

### Fast moving consumer goods (FMCG)

Shifting consumer preferences towards sustainable and ethical products may affect demand in the FMCG sector. Increased competition from the rise of e-commerce and alternative market channels could also pose challenges, while negative publicity and concerns about product safety or quality may damage brand reputation. Furthermore, new market entrants and changing customer loyalties could impact market share and profitability.

op risks	Likelihood Impact
Changes in demand due to evolving4.09consumer preferences4.45	
Increased competition on e-commerce 4.09 and alternative market channels 4.18	
Negative publicity on social media platforms <b>3.91</b> <b>4.36</b>	
Product safety and quality concerns 4.09	
New market entrants causing shifts in4.00consumer preferences between brands4.18	
Changes in consumer preferences to ethical, sustainable and eco-friendly products3.91 4.27	
Introducing new taxes, impacting margins 3.73 and overall demand 3.55

Industry breakdown

## Retail

Risk in the retail sector is driven by the rapid adoption of new business models, such as e-commerce, which impacts traditional brick-and-mortar stores. Pressure to offer the lowest prices may also affect margins, while supply chain disruptions can lead to product shortages. Additionally, organizations that fail to meet diverse consumer preferences or maintain high product quality are likely to lose market share and face customer complaints.

#### **Top risks** Likelihood Impact Challenges from the rapid adoption of new 4.57 3.86 business models such as e-commerce Geopolitical changes impacting trading 4.00 4.29 partnerships and alliances Lowest prices or best bargains leading 4.00 4.29 to pressure on margins and cashflows Supply chain disruptions leading 4.29 3.86 to product shortages Failure to cater to personal preferences 3.71 4.29 resulting in loss of market share 4.00 Superior in-store experiences by competitors 3.86 Risks of not maintaining high product 3.86 3.86 and service quality, leading to customer complaints

# **Education**

The education sector faces significant challenges due to the growing need to develop digital strategies, particularly within higher education institutions. Outdated teaching methods and research practices could limit students' job prospects, while a shortage of academic staff presents operational risks. Additionally, institutions must explore ways to diversify their income streams and adapt to a skills-based employment model to stay competitive.

#### **Top risks**

Likelihood Impact

Increased pressure to develop a digital strategy 4.08 for transformation in higher education institutions 4.08 Outdated teaching and research resulting 4.25 3.92 in employment challenges for students Inability to maintain, grow and diversify 4.00 3.92 income streams 3.75 Shortage of academic staff and teachers 4.17 Increasing annual operating cash flows 3.83 3.83 in higher education institutions Difficulty to attract and retain talent, 3.75 3.83 particularly in senior levels 3.42 Prioritizing skills over degrees 3.50

## Healthcare

In healthcare, emerging risks include regulatory challenges related to non-compliance with laws and ethical standards, such as pharmaceutical fraud and intellectual property violations. Access to healthcare remains a major concern, especially when costs are not covered by insurance. Additionally, changing patient preferences driven by demographic shifts require rapid adoption of digital solutions, while attracting and retaining skilled personnel is becoming more difficult. Top risks

Non-compliance with laws, rules, regulations, prescribed practices or ethical standards within jurisdiction of operation, including the use of certain chemicals and materials

## Insurance

The insurance sector faces risks from fluctuations in asset values which could lead to significant financial losses. Price sensitivity and intense competition impact margins, while gaps between actual claims and reserving assumptions create financial uncertainty. Digitizing the insurance lifecycle and adopting big data analytics are critical for staying competitive, while evolving regulations and risks from uncertain events add complexity to the industry.

op risks		Likelihood	Impact
uctuations in the value of invested assets	4.00 4.00		
ompetition driven by a high degree price sensitivity	4.08 3.92		
gnificant gaps between actual claims d reserving assumptions	3.92 4.08

urance fraud by third parties	3.85 3.69	_	

Industry breakdown

## **Telecom**

Emerging risks for the telecom industry include the threat of data breaches and cyberattacks that could expose sensitive customer information. Operational complexities are increasing due to integrated business models, and regulatory challenges may disrupt services. Rising competition and the need for digital transformation add pressure on telecom companies, while attracting and retaining skilled talent remains a constant challenge.

#### **Top risks** Likelihood Impact 4.00 Data breaches exposing sensitive customer data 4.80 Integrated business models leading 4.00 4.60 to operational complexities Non-compliance with laws, rules, regulations, 4.80 prescribed practices or ethical standards 3.80 within jurisdiction of operation 3.60 Rising competition in the telecom sector 4.40 4.20 Falling short in embracing rapid digital adoption 3.603.60 Increasing cyber-attacks and security threats 4.20 3.80 Difficulty to attract and retain talent 3.80

Industry breakdown

# **Financial services**

Key risks in the financial services sector include increasing cyberattacks, fraud, and competition from new fintech entrants. Growing credit risks and challenges in diversifying into green finance products may affect financial stability. Additionally, reputational damage from mis-selling financial products or failing to treat customers fairly poses a significant threat.

Top risks		Likelihood	Impac
Difficulty to attract and retain talent	4.25 4.00	_	
Increasing cyber attacks and security threats	3.69 4.13	-	
Competition arising from new financial technology (fintech)	4.06 3.69	_	
Fraud targeting financial institutions' call centers	3.81 3.88	-	
Increased credit risks, including loss associated with borrowers	3.50 4.19	-	
Inability to diversify into green finance products	3.81 3.69	-	
Reputation damage from not treating customers fairly and mis-selling financial products	4.00 3.50	_

# Manufacturing

Emerging risks in the manufacturing sector include regulatory challenges that could lead to legal disputes over non-compliance with environmental and safety standards. Tight product launch schedules may result in operational errors, while fluctuating raw material prices affect profit margins. The growing demand for sustainable and socially responsible manufacturing, combined with global supply chain disruptions and protectionist trade barriers, makes it more difficult to stay competitive. Top risks

Likelihood Impact

Non-compliance with laws, rules, regulations, 4.00 prescribed practices or ethical standards within 5.00 jurisdiction of operation Tight product launch schedules leading 4.33 4.33 to manufacturing errors Safety hazards in manufacturing threatening 4.33 4.33 workers' health and productivity Increased demand for sustainable 4.00 4.00 and socially responsible manufacturing 3.67 Fluctuations in raw material prices impacting margins 3.67 Protectionism leading to trade barriers 4.00 3.33 and market access issues Global supply chain constraints leading 3.67 3.00 to operational disruptions
