

# KPMG Powered Evolution

## Drive future transformation

enabled by Workday

### Staying ahead in a changing world

You have accomplished the hard part. Your Workday transformation is largely complete and you are looking forward to realising the benefits of your new-look business function. As you migrate to 'business as usual', the project team is re-deployed and, finally, you are ready to move on. In doing so, you may become distracted from your transformation goals. **This would risk undermining all of the gains you've worked so hard to achieve.**

### The challenge

Evolving regulatory changes, disruptive technologies, process improvements, and new market opportunities are likely to pose further challenges as your business moves forward.

Failing to keep up with the times could lead to your Workday platform becoming tomorrow's legacy system and your current leading practices begin to lag behind advancements of the future.

Retaining and fully utilising the skilled resources required for your transformation provides a particular challenge. Important bi-annual updates for your Workday platform need to be understood and implemented efficiently. But maintaining a dedicated team with particular skills and know-how that is only required every 6 months is not cost-effective to your business.

Deriving ongoing value from your transformation requires a more agile approach.

### The solution

**KPMG Powered Evolution** delivers tested Workday capability combined with the leading practices and processes needed to help you remain flexible and agile in a world of evolving requirements.

Delivered through a highly-knowledgeable and effective multi-tier global delivery network, providing local and market insight, Powered Evolution offers the right blend of Workday skills and resources to support the ongoing change necessary to keep your business driving forward.

New features from cloud SaaS providers are often not deployed. Only **16%** of respondents adopted **50%** or more new features. Access the complete survey findings [here](#).
