Guide to annual reports Illustrative disclosures 2024-2025

(Updated April 2025)

KPMG.com.au

Driving clarity in financial reporting

Investors and regulators have been raising concerns about the clarity of financial reporting. Alongside this, artificial intelligence has fundamentally changed the face of communication, impacting confidence and trust. Maintaining stakeholders' confidence and trust is high on the agenda for all companies, with clarity of reporting playing a key role.

A company's annual reporting contains three key areas that provide insights into the business model and strategy: the Operating and Financial Review (OFR), the financial statements, and the sustainability disclosures. Companies may face direct challenge from investors, regulators and other report users if these insights are not connected.

To achieve connectivity, it is crucial that companies are both compliant with relevant standards and are connecting the dots between financial and non-financial information. This is especially important when reporting on issues that create volatility for the company's prospects, such as climate change and uncertain times.

The current economic conditions are marked by ongoing impacts of fluctuating interest rates and inflation, increased market volatility, and heightened geopolitical risk. These uncertainties bring numerous issues and risks for companies, including shifts in consumer demand, disrupted supply chains, staff shortages and increased operational costs. These factors contribute to an ever-changing business environment. Increasingly, the effects of climate change are shaping our landscape, prompting stakeholders to focus on how entities are reflecting the risks and opportunities they are facing and the strategic decisions they have made in transitioning to a low-carbon economy. In this complex environment, effective and clear communication continues to be critical.

In the OFR, stakeholders expect entities to provide a holistic view of their business, including their performance and future strategic plans. ASIC regularly calls for the OFR to complement the financial report and tell the story of how the company's businesses are performing. It should provide explanations for underlying drivers of results, financial position, material business risks, and their impact on strategies and future prospects. Importantly, forward-looking information should be based on reasonable assumptions, and the market should be updated through continuous disclosure if circumstances change.

Within the financial statements, it remains critical for entities to clearly explain key judgements made and estimates used in making them. Uncertain market and economic conditions may result in a wider range of reasonable assumptions informing estimates of asset and liability values. Disclosing significant judgements, sources of estimation uncertainty, key assumptions, and sensitivities is vital to assist stakeholders in understanding the connectivity between the front part of the annual report and the financial statements.

Significant developments and complex changes have also occurred in the global tax landscape to promote tax integrity and transparency. This includes the ongoing implementation of global minimum tax reform that could have a substantial impact on multinational groups. The financial reporting impacts of these developments, along with newly effective accounting and regulatory requirements are summarised on our <u>What's new?</u> page.

The global trend towards sustainability reporting continues, with an aim to increase its prominence and connectivity with financial reporting. In Australia, the climate-related disclosures legislation *Treasury Laws Amendment (Financial Market Infrastructure and Other Measures) Act 2024* was passed, and received Royal Assent in September 2024. The new requirements will be mandatory on a phased approach, with the first wave of entities reporting from financial years beginning 1 January 2025. In line with this, the Australian Accounting Standards Board has released the first globally aligned Australian Sustainability Reporting Standards, AASB S1 *General Requirements for Disclosure of Sustainability-related Financial Information* (available for voluntary adoption) and AASB S2 *Climate-related Disclosures* (a mandatory standard). Our Australian and Global sustainability reporting resource centres offer practical guidance to assist entities prepare for these changes.

With the finalisation of AASB S2, we recommend companies use this as a basis for any voluntary reporting of climaterelated risks and opportunities in any reporting periods leading up to mandatory application by the company. ASIC continues to highlight its expectations on sustainability-related disclosures and greenwashing, and the publishing of sustainability-related statements that are well-founded and clearly backed by strategic plans and investments. Notably, ASIC is taking regulatory actions as a result of its greenwashing surveillance activities.

Given Australia's alignment with IFRS® Accounting Standards, minimal changes have been made to the source document prepared by our international colleagues. Australian-specific disclosures have been added where applicable, and navigation bookmarks and links are available to facilitate identification of the changes and disclosures that entities should consider.

We trust you find this *Example Public Company Limited Guide to annual reports – illustrative disclosures* a valuable resource in your annual report preparation. If you require further information on the content of this publication or need assistance in the application of Australian Accounting Standards, please contact your KPMG professional.

How to use this guide

The purpose of this publication is to help you in preparing annual financial reports in accordance with Australian Accounting Standards, which are International Financial Reporting Standards (IFRS Accounting Standards) developed by the International Accounting Standards Board (IASB[®] Board) as adopted by the AASB for for-profit entities.

It illustrates one possible format for financial statements for a fictitious multinational corporation involved in general business (Example Public Company Limited).

This publication relates to both annual financial years ending 31 December 2024 and 30 June 2025 and reflects standards and interpretations that have been issued by the AASB as at 31 August 2024 and that are required to be applied by an entity with an annual reporting period beginning on 1 January 2024 and 1 July 2024 ('currently effective requirements'). The early adoption of standards or amendments to standards that are effective for annual reporting periods beginning after 1 January 2024 ('forthcoming requirements') is not illustrated.

Although it is not exhaustive, this guide illustrates the disclosures required by IFRS Accounting Standards for one hypothetical corporation, merely for illustrative purposes and, as such, largely without regard to materiality.

This guide should not be used as a boilerplate template. The preparation and presentation of financial statements require the preparer to exercise judgement, in terms of the choice of accounting policies, the ordering of notes to the financial statements, how the disclosures should be tailored to reflect the entity's specific circumstances, and the relevance of disclosures considering the needs of the users.

In April 2025, this guide has been updated to illustrate disclosures related to the *Consolidated entity disclosure statement* (CEDS) which were amended and approved in December 2024. The changes are mandatory for financial years beginning on or after 1 July 2024 (i.e. financial years ending on or after 30 June 2025). Under Australian content, the *Consolidated entity disclosure statement* has been updated to reflect the amendments.

Navigating this guide

If you are using this guide for the first time:

Given Australia's close alignment to IFRS Accounting Standards, a substantial portion of Example Public Company Limited has been based on the illustrative disclosures publication prepared by our international colleagues based on 'pure' IFRS Accounting Standards.

However to illustrate additional Australian specific disclosure and alternative presentation methods that are commonly used in Australia, a separate section, has been included, just before the main financial statements. A clear cross-reference to the Australian section is included on affected international pages.

Australian specific disclosure is shown in section one Australian content.

Illustrative disclosure based on IFRS Accounting Standards is shown in section two Guide to annual financial statements.

This hypothetical corporation (the 'Group') used in this publication has been applying the Accounting Standards for some time – i.e. it is not a first-time adopter. If you are preparing your first set of annual financial statements, that include an explicit and unreserved statement of compliance with IFRS Accounting Standards, you are considered a first time adopter. For more information on first time adoption, see Chapter 6.1 in the 21st edition 2024/25 of our publication Insights into IFRS.

If you are recurring user of this guide:

We direct you to our <u>What's new</u> page, which contains a summary of all new or revised accounting standards and regulatory changes that have been reflected in Example Public Company Limited since the previous edition of this guide and references to other resources in the guide that you might find useful to your financials statement preparation for the current period.

Materiality considerations

Materiality is relevant to the presentation and disclosure of the items in the financial statements. Preparers need to consider whether the financial statements include all of the information that is relevant to understanding an entity's financial position at the reporting date and its financial performance during the reporting period.

Preparers also need to take care not to reduce the understandability of an entity's financial statements by obscuring material information with immaterial information or by aggregating material information that is different by nature or function. Individual disclosures that are not material to the financial statements do not have to be presented – even if they are a minimum requirement of a standard. Preparers need to consider the appropriate level of disclosure based on materiality for the reporting period.

Specific guidance on materiality and its application to the financial statements is included in paragraphs 29–31 of AASB 101 *Presentation of Financial Statements*. In addition *Making Materiality Judgements (AASB Practice Statement 2)* provides practical guidance on how to apply the concept of materiality in the preparation of financial statements.

INTRODUCTION

Further KPMG guidance

We also have a number of accompanying tools and publications that can be used to assist you in the preparation of your annual report and helping you to report financial information in the most meaningful way. These materials and more, can be accessed from our <u>Financial</u> <u>Reporting Centre</u> site, which contains a number of other valuable references and resources.

Whether you are new to IFRS Accounting Standards or a current user, you can find digestible summaries of recent developments, detailed guidance on complex requirements, and practical tools such as illustrative disclosures and checklists.

What's new?

The following Standards are effective for the first time when preparing Tier 1 general purpose financial statements for annual reporting periods ending 31 December 2024 and 30 June 2025:

Australian Accounting Standards

Supplier Finance Arrangements (Amendments to AASB 7 and 107)

Classification of Liabilities as Current or Non-Current (Amendments to AASB 101) and Non-current Liabilities with Covenants (Amendments to AASB 101)

Lease Liability in a Sale and Leaseback (Amendments to AASB 16)

Fair Value Measurement of Non-Financial assets of Not-for-Profit Public Sector Entities (Amendments to AASB 13) 1

The Group applied *Supplier Finance Arrangements (Amendments to AASB 7 and 107)* for the first time in the current year. The amendments introduce new disclosures to help users of the financial statements to assess the effects of supplier finance arrangements on an entity's liabilities, cash flows and liquidity risk. See Notes 29 and 32(C)(iii) for illustrative disclosures about supplier finance arrangements entered into by the Group. For further information, see our article.

The Group also applied *Classification of Liabilities as Current or Non-Current (Amendments to AASB 101)* and *Non-current Liabilities with Covenants (Amendments to AASB 101)* for the first time in the current year. The amendments clarify certain requirements for determining whether a liability is classified as current or non-current and introduce new disclosures for non-current loan liabilities that are subject to covenants within 12 months after the end of the reporting period. Adopting the amendments resulted in a change in the accounting policy for classifying liabilities that can be settled in a Group entity's own shares. See Note 5 for illustrative disclosures explaining the nature and effect of this change. In addition, see Note 28(B) for illustrative disclosures about the Group's non-current loans that are subject to covenants. For further information, see our article.

The Group does not have any other transactions that are affected by the other newly effective accounting standards and amendments.

Throughout the guide, a double black line running down the left margin of the text highlights major changes effective for the first time for BOTH annual reporting periods ending 31 December 2024 and 30 June 2025. The double black line in the left margin also highlights major changes in terms of what was illustrated in the previous 2024 edition of this guide.

Tax transparency measures in Australia

The Australian Federal Government passed the *Treasury Laws Amendment (Making Multinationals Pay Their Fair Share – Integrity and Transparency) Act 2024* (Act) on 27 March 2024 and received Royal Assent on 8 April 2024. The Act addresses tax transparency measures for multinational groups and includes requirements for Australian public companies (listed and unlisted) to disclose information on each of their subsidiaries, including details on their tax residence, in their financial reports. The Act amends the *Corporations Act 2001*. Minor clarifications were enacted in relation to these disclosures in December 2024.

This guide illustrates required disclosures. Under Australian content, a new statement, Consolidated entity disclosure statement – separate to the notes to the financial statements – is included and the Directors' declaration has been amended for required wording. See our Reporting Update (<u>25RU-02</u> | <u>Consolidated Entity Disclosure</u> <u>Statement</u>) for further details of the requirement.

In April 2025, this guide was updated to illustrate CEDS disclosures amended by the *Treasury Laws Amendment* (*Fairer for Families and Farmers and Other Measures*) Act 2024, which passed both houses of parliament on 28 November 2024 and received Royal Assent on 10 December 2024. The amendments apply for financial years commencing on or after 1 July 2024, i.e. annual financial reports for 30 June 2025 and onwards.

IFRS Interpretation Committee agenda decisions

Agenda decisions are a way of making a statement about why a change in the requirements of an IFRS Accounting Standard or an interpretation of that requirement does not need to be issued. They often include explanatory information that is intended to provide guidance for the consistent application of IFRS Accounting Standards. As a result, final agenda decisions form part of the guidance of the IFRS Accounting Standards. They must be followed to claim compliance with IFRS Accounting Standards.

These amendments only apply to Not-for-Profit Public Sector Entities and does not affect the application of AASB 13 for other entities.

Appendices

What's New? | 3

Notes

Any changes in accounting that arise from the application of final agenda decisions are accounted for as a change in accounting policy in accordance with AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors,* i.e. change is applied retrospectively. AASB 108 requires specific disclosures to be made in respect of changes in accounting policies.

Our IFRIC Agenda Decisions publication provides an outline of the recent tentative and final agenda decisions issued by IFRIC. Final IFRIC agenda decisions must be applied in Australia.

Climate-related financial reporting impacts

All entities are facing climate-related risks and opportunities and are making strategic decisions in response – including around their transition to a low-carbon economy. These climate-related risks and strategic decisions could impact their financial statements and metrics.

Investors and regulators need to understand how climate-related risks and opportunities have affected and will affect an entity's financial position and performance. Although financial statements are not the only source of information about climate-related matters – entities are also expected to provide more comprehensive disclosures in the front part of the annual report or elsewhere – they play an important role. Australian Accounting Standards do not refer explicitly to climate-related risks or matters, but they implicitly require relevant disclosures in the financial statements when climate-related matters considered in preparing the financial statements are material.

Our <u>Clear on climate reporting hub</u> provides guidance on the potential financial statement impacts of climate-related matters. See especially our:

- Talkbook Are you clear on climate reporting in the financial statements?
- Article and talkbook Net-zero commitments.
- Article Have you disclosed the impacts of climate-related matters clearly?

For an illustration of the climate-related impact on the Group's financial statements, see Note 16(C) related to biological assets, Notes 21(G) and 38 related to property, plant and equipment, Note 22(C) related to impairment testing and Notes 22(E), 30(B), 31(D) and 44(G) related to emissions schemes.

An entity may face direct challenge from investors, regulators and other report users if the Operating and Financial Review (OFR), financial statements and sustainability disclosures are not connected. To achieve connectivity in annual reports, and tell a connected story, an entity joins the disclosure dots between the front part of the financial report (e.g. OFR and sustainability disclosures) and the financial statement notes and ensures the different components of the front part disclosures are themselves connected. Connectivity is especially important when reporting on issues that create volatility for the entity's prospects, such as climate-related risks and opportunities and other uncertainties. For more about connectivity, see our <u>Connected reporting web page</u>.

Australian sustainability reporting framework

The first Australian Sustainability Reporting Standards (ASRS) have been approved by the Australian Accounting Standards Board (AASB). They comprise:

- AASB S1 General Requirements for Disclosure of Sustainability-related Financial Information a voluntary standard
- AASB S2 *Climate-related Disclosures* a mandatory standard.

AASB S1 and AASB S2 are effective for annual reporting periods beginning 1 January 2025 and are applicable for both profit and not-for-profit entities. A three-phased implementation approach will require reporting of climate-related financial disclosures for annual reporting periods beginning 1 January 2025 for 'Group 1 entities', with implementation for other entities commencing in subsequent periods.

This publication does not include illustrative disclosures in relation to the Australian sustainability reporting framework. For further information, see our Reporting Update (24RU-12 | Australian Sustainability Reporting legislation and <u>standards finalised</u>). Our <u>Australian</u> and <u>Global</u> sustainability reporting resource centres also offer practical guidance to assist entities prepare for these changes.

Standards issued but not yet effective

Appendix I provides a comprehensive list of new accounting standards and amendments, distinguishing between those that are effective for an entity with an annual reporting period beginning on 1 January 2024 and those with a later effective date.

Annual Financial Report

Example Public Company Limited

S153-S155 Reg 1.0.07 ABN 14 004 152 682 30 June 2025

Corporate governance statement

The Corporate Governance Principles and Recommendations (Fourth Edition) (Principles and Recommendations) apply to all ASX listed entities, regardless of its legal form (i.e. company, managed investment scheme or stapled entity), whether it was established in Australia or whether it is internally or externally managed. Whilst the *Principles and Recommendations* are designed to achieve good corporate governance outcomes and meet reasonable investor expectations, the ASX Corporate Governance Council acknowledges that different entities may legitimately adopt a range of corporate governance practices.

As such, the *Principles and Recommendations* are not mandatory for listed entities nor do they prescribe practices that an entity must adopt. However, where the Board of a listed entity chooses not to follow a particular recommendation, it must explain why – the 'if not, why not' approach – including the period for which a recommendation was not followed, explanation and any alternative governance practices adopted in lieu. Where a particular recommendation has been followed for only part of the year, the part of the year for which it has been followed must be disclosed. It is not sufficient to state that there have been no changes to the practices previously reported.

The ASX Corporate Governance Council (Council) released the consultation draft for a proposed fifth edition of the ASX Corporate Governance Principles and Recommendations (Fifth Edition) on 27 February 2024. The Council is targeting release of the final version in early 2025, with the expectation the Fifth Edition will take effect for an entity's first full financial year commencing on or after 1 July 2025.

A listed entity has flexibility to make its corporate governance disclosures on its website or in its annual report. Where an entity chooses to provide its corporate governance statement on its website, it must lodge a copy of the statement at the same time the annual report is lodged with the ASX, thus ensuring the ASX has a permanent record at its effective date each year, regardless of an entity's website changes (Listing Rule 4.7.4). In addition, the annual report needs to include the website address of where the corporate governance statement can be found.

The corporate governance statement must also specify the date at which it is current (which must be the entity's balance date or later) and state that it has been approved by the board.

The *Principles and Recommendations* reflect a 'best practice' view of appropriate corporate governance standards that other entities may find useful when framing its own corporate governance policies and practices.

Corporate governance statement (continued)

Appendix 4G

Appendix 4G *Key to disclosures Corporate Governance Council Principles and Recommendations* identifies and locates corporate governance disclosures by providing a key to where each can be found; and to assist entities with its corporate governance disclosure obligations by providing a documented verification process (Listing Rule 4.7.3).

A listed entity is required to complete and lodge an Appendix 4G at the same time it lodges its annual report with the ASX.

Approach in Example Public Company Limited

There are a number of common disclosures required in the corporate governance statement by the ASX *Listing Rules* and those required by the *Corporations Act 2001* in the Directors' report. To avoid duplication, a clear cross-reference may be made from the corporate governance statement to the location of the disclosure in the Directors' report. Alternatively, the directors' report could include components of the corporate governance statement by reference, provided the corporate governance statement is included with the financial statements and it is permitted by *ASIC Corporations (Directors' Report Relief) Instrument 2016/188*.

The corporate governance statement should not form part of the financial report upon which the company's auditor expresses an opinion, except to the extent that it includes an audited remuneration report. This would only occur when the corporate governance statement is presented within the Directors' report, because the remuneration report required by S300A must be located in the Directors' report.

As the facts and circumstances are specific to an entity as to how it has followed the *Principles and Recommendations*, this publication does not include an illustrative corporate governance statement. For those entities opting to provide their corporate governance statement on their website, the example below illustrates how the corporate governance statement could be appropriately referenced from the annual report to the entity's website.

"Example Public Company Limited maintains the highest standards of corporate governance in accordance with the ASX Corporate Governance Principles and Recommendations (4th edition). For the financial year 30 June 2025, Example Public Company Limited's Corporate Governance Statement together with the ASX Appendix 4G as applicable to the Corporate Governance Statement is available at examplepubliccompanylimited.com.au/CorporateGovernance and a copy of the statement has been lodged with the ASX."

B – Number of meetings held during the time the director held office during the year

Ms K Nguyen has only attended four of the seven directors' meetings held during the financial year due to illness.

For the year ended 30 June 2025

5 Principal activities

The principal activities of the Group during the course of the financial year were the manufacture and sale of paper and forestry (cultivation of pine trees and the sale of wood as well as related services).

In November 2024, the Group sold its entire Packaging division, a separate reportable segment (see Note 6 to the consolidated financial statements). The Group was committed to a plan to sell this division due to a strategic decision to change the direction of the Group in late 2024.

There were no other significant changes in the nature of the activities of the Group during the year.

Objectives

The Group's objectives are to:

- increase the return on equity to 15 percent in the next financial year and to 20 percent by the end of the 2027 financial year
- · reduce the number of employee strike incidents in the next financial year
- improve the retention rate of our outstanding people resources to 85 percent by 30 June 2028 for those employees with five years or more service
- retain 90 percent of all customers on a year-to-year basis and increase customer satisfaction with our service to an average rating of 'high' for all industry segments
- reduce our carbon footprint, working toward Australia's target emission reduction of 43% in emissions by 2030 and net zero climate goals by 2050.

In order to meet these objectives the following targets have been set for the 2026 financial year and beyond:

- grow market share for existing business and increase revenue and operating activities of at least 10 percent per annum
- reduce operating costs by five percent per annum over the next two years
- consider further strategic alliances through joint ventures to minimise the risks to the Group
- complete 90 percent of contracts within their target timeframe
- further develop the management team by establishing a leadership programme
- reduce Scope 1 and Scope 2 GHG emissions by 50% in next 2 years through investment in sustainable technologies and renewable energy.

Introduction

Appendices

For the year ended 30 June 2025

S300(1)(a),(b)

S300(1)(a)

S300(1)(b)

7 Dividends

Dividends paid or declared by the Company to members since the end of the previous financial year were:

Declared and paid during the year 2024	Cents per share	Total amount \$'000	Date of payment
Final 2024 ordinary	25.97	805	31 August 2024
Final 2024 preference	25.03	438	31 August 2024
Total amount		1,243	

Declared after end of year

After the balance sheet date the following dividends were proposed by the directors. The dividends have not been provided and there are no income tax consequences.

	Cents per share	Total amount \$′000	Date of payment
Final ordinary	27.92	892	31 August 2025
Final preference	25.03	438	31 August 2025
Total amount		1,330	

The financial effect of these dividends has not been brought to account in the consolidated financial statements for the year ended 30 June 2025 and will be recognised in subsequent financial reports.

Preference shares are classified as a liability and distributions paid are recognised as interest expense^a.

Dividends have been dealt with in the financial report as:	Note	\$'000
Dividends	26(C)	1,243
Interest expense ^a	28	51
Noted as a subsequent event	26(C)	1,330

Notes

a. Distributions paid on shares presented as financial liabilities and recognised as interest expense need to be disclosed under S300(1). The requirements of the *Corporations Act 2001* override those of Accounting Standards. The potential for confusion may be overcome by analysing the dividend disclosure contained in the directors' report (or financial report) between those amounts dealt with as a distribution of equity and any amounts accounted for as interest.

andices

For the year ended 30 June 2025

S299(1)(d) IAS 10.21 (a), (b)

8 Events subsequent to reporting date^{*}

At the end of July 2025 the Group announced its intention to implement a cost-reduction programme and to take further measures to reduce costs. Additionally, to enable the Group to adapt its size to today's market conditions, it intends to reduce the Group's workforce by 400 positions worldwide by 30 June 2026, by means of non-replacement wherever possible. The Group expects the restructuring associated with the reduction in positions to cost between \$600,000 and \$850,000 in the year ending 30 June 2026 and 2027.

Subsequent to 30 June 2025, one of the Group's major trade customers went into liquidation following a natural disaster in August 2025 that damaged its operating plant. Of the \$100,000 owed by the customer, the Group expects to recover less than \$10,000. No additional allowance for impairment has been made in these consolidated financial statements.

On 10 July 2025, one of the premises of Oy Kossu AG, having a carrying amount of \$220,000, was seriously damaged by fire. Surveyors are in the process of assessing the extent of the loss, following which the Group will file a claim for reimbursement with the insurance company. The Group is unable to estimate the incremental costs relating to refurbishment and temporary shift of production to other locations (in excess of the reimbursement expected).

As reported in the condensed interim financial statements on 22 January 2025, the Group announced its intention to acquire all of the shares of ABC Company for \$6,500,000. On 4 July 2025, the Group's shareholders approved the transaction and the Group is now awaiting approval from regulatory authorities before proceeding with the acquisition. Management anticipates that this approval will be received by October 2025.

On 23 September 2025, an increase in the Netherlands corporate tax rate from 25 to 30 percent was substantively enacted, effective from 1 January 2026. This increase does not affect the amounts of current or deferred income taxes recognised at 30 June 2025. However, this change will increase the Group's future current tax charge accordingly. If the new tax rate were applied to calculate taxable temporary differences and tax losses recognised as at 30 June 2025, the effect would be that net deferred tax assets would increase by \$27,000 (see Note 14).

Other than the matters discussed above, there has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years.

9 Likely developments

The Group will continue to pursue its policy of increasing the profitability and market share of its major business sectors during the next financial year. This will require further investment in areas such as manufacturing and sale of paper, which have performed well over recent years and offer sound opportunities for future development.

Further information about likely developments in the operations of the Group and the expected results of those operations in future financial years has not been included in this report because disclosure of the information would be likely to result in unreasonable prejudice to the Group.

IAS 10.21(a),(b)

a. Preparers should ensure that events identified in the directors' report are also included in a note to the financial statements and vice versa. Refer to Note 41 in the consolidated financial statements.

© 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. Liability limited by a scheme approved under Professional Standards Legislation.

S299(1)(e)

S299A(1)(c) S299(3) RG 247.76-78

For the year ended 30 June 2025

10 Environmental regulation

The Group's operations are subject to significant environmental regulation under both Commonwealth and State legislation in relation to its manufacture of paper and forestry activities.

The Group is committed to achieving a high standard of environmental performance. It has established an Environmental Management Committee to focus on this area of operating performance. The committee is responsible for the regular monitoring of environmental exposures and compliance with environmental regulations.

As part of this process the committee is responsible for:

- setting and communicating environmental objectives and quantified targets
- monitoring progress against these objectives and targets
- implementing environmental management plans in operating areas which may have a significant environmental impact
- identifying where remedial actions are required and implementing action plans
- regular monitoring of licence requirements, with performance against licence conditions reported to the various State regulators on a regular basis.

To enable it to meet its responsibilities, the committee has established a regular internal reporting process. Environmental performance is reported from each site up through management to the committee on a regular basis. On a quarterly basis the committee reports to the audit committee who then report to the board on the Group's environmental performance. Compliance with the requirements of environmental regulations and with specific requirements of site environmental licences was substantially achieved across all operations with no instances of non-compliance in relation to licence requirements noted.

Based on the results of enquiries made, the board is not aware of any significant breaches during the period covered by this report.

Furthermore, the Group's strategy for identifying, managing and responding to climate-related risks and opportunities are disclosed in accordance with the forthcoming AASB S2 Climate-related disclosures and are set out on page [x] of the Annual report^a.

11 Directors' interests^b

The relevant interest of each director in the shares, debentures, interests in registered schemes and rights or options over such instruments issued by the companies within the Group and other related bodies corporate, as notified by the directors to the ASX in accordance with S205G(1) of the Corporations Act 2001, at the date of this report is as follows:

	Example Public Company Limited					
	Ordinary shares	Options over ordinary shares	Rights over ordinary shares			
Mr F D Adair	1,000	-	-			
Mr G S Andrews	33,280	200,000	80,000			
Ms HW James	2,820	-	-			
Ms K Nguyen	5,000	-	-			

The AASB issued AASB S2 Climate-related disclosures in September 2024. Entities are encouraged to voluntarily adopt the core pillars (based on the TCFD recommendations) in preparation for mandatory sustainability reporting which is being phased in over the next three years. See our Resource centre on the financial reporting impacts of climate change and developments in sustainability reporting.

Although not specified, S300 should be read as if the information is to be disclosed as at the date of the directors' report. This disclosure could be included in the remuneration report (see Section 20.6). However, where the number held at the date of the report differs to the number held at the reporting date, or the definition of 'relevant interest' results in a different number, all numbers will need to be disclosed.

S300(6)(e)

S300(1)(f)

S300(7)

All options were granted in previous financial years. No options have been granted since the end of the previous financial year.

At the date of this report unissued shares of the Group under option are:

Expiry date	Exercise price	Number of shares ^b
1 July 2027	\$10.00	200,000
1 July 2033	\$10.50	200,000
		400,000

All unissued shares are ordinary shares of the Company.

All options expire on the earlier of their expiry date or termination of the employee's employment. In addition, the ability to exercise the options is conditional on the Group achieving annual growth in operating profit of at least five percent each year over three years. Further details about sharebased payments to directors and KMP are included in the remuneration report in Section 20.

These options do not entitle the holder to participate in any share issue of the Company or any other body corporate.

Shares issued on exercise of options

During or since the end of the financial year, the Group issued ordinary shares of the Company as a result of the exercise of options as follows (there are no amounts unpaid on the shares issued):

Number of shares	Amount paid on each share
5,000	\$10.00

13 Indemnification and insurance of officers and auditors

Indemnification

The Company has agreed to indemnify the following current directors^a of the Company, Mr F D Adair, Mr G S Andrews, Mr B Q Barton, Ms H W James, Ms K Nguyen, Ms C C Martinez and Ms N Stevens and the following former directors, Mr A Brown, Mr R O Stephens, Mr K Wall and Ms V M Thomas against all liabilities to another person (other than the Company or a related body corporate) that may arise from their position as directors of the Company and its controlled entities, except where the liability arises out of conduct involving a lack of good faith. The agreement stipulates that the Company will meet the full amount of any such liabilities, including costs and expenses.

The Company has also agreed to indemnify the current directors of its controlled entities for all liabilities to another person (other than the Company or a related body corporate) that may arise from their position, except where the liability arises out of conduct involving a lack of good faith. The agreement stipulates that the Company will meet the full amount of any such liabilities, including costs and expenses.

Under the terms of an agreement entered into in April 2018, the Company has agreed to indemnify certain senior executives for all liabilities to another person (other than the Company or a related body corporate) that may arise from their position in the Company and its controlled entities, except where the liability arises out of conduct involving a lack of good faith. The senior executives in question are the general managers of each of the Group's operating divisions. The agreement stipulates that the Company will meet the full amount of any such liabilities, including legal fees.

During the year, a claim for breach of contract was brought against Mr A Smith, a former senior executive of the Company. The claim related to a contract signed by him in his former capacity as an executive officer. Under the terms of an indemnity agreement entered into during Mr Smith's term as an officer, the Company agreed to indemnify senior executives against all claims and legal costs arising from the discharge of their duties, except where the liability arises out of conduct involving a lack of good faith. Total costs of \$45,000 were incurred during the year by the Company on behalf of Mr Smith.

Under the terms of an agreement entered into in April 2019, the Company has agreed to indemnify their former auditors, LMN, for all liabilities to another person (other than the Company or a related body corporate) that may arise from their position as auditor, except where the liability arises out of conduct involving a lack of good faith. The agreement stipulates that the Company will meet the full amount of any such liabilities, including legal fees.

XYZ Limited, who allegedly relied upon the 2019 Independent Audit Report and acquired an interest in the Company, subsequently brought an action in the current year against the former auditors, LMN, alleging that certain contingent liabilities were not adequately disclosed in the financial report. Under the terms of the indemnity agreement, the Company incurred costs of \$50,000 being the costs incurred by LMN in mounting a successful defence.

13 Indemnification and insurance of officers and auditors (continued)

Insurance premiums^a

Since the end of the previous financial year the Company has paid insurance premiums of \$36,000 in respect of directors' and officers' liability and legal expenses' insurance contracts, for current and former directors and officers, including senior executives of the Company and directors, senior executives and secretaries of its controlled entities. The insurance premiums relate to:

- costs and expenses incurred by the relevant officers^b in defending proceedings, whether civil or criminal and whatever their outcome
- other liabilities that may arise from their position, with the exception of conduct involving a wilful breach of duty or improper use of information or position to gain a personal advantage.

The premiums were paid in respect of the following officers of the Company and its controlled entities:

- premiums totalling \$18,000 were paid in respect of the following current directors of the Company: Mr F D Adair, Mr G S Andrews, Mr B Q Barton, Ms H W James, Ms K Nguyen, Ms C C Martinez and Ms N Stevens
- premiums totalling \$8,000 were paid in respect of the following former directors of the Company: Mr A Brown, Mr R O Stephens, Mr K Wall and Ms V MThomas
- premiums totalling \$4,000 were paid in respect of those officers of the Company holding the position of general manager of operating divisions
- premiums totalling \$6,000 were paid in respect of the directors, senior executives and secretaries of the Company's controlled entities.

The insurance policies outlined above do not contain details of the premiums paid in respect of individual officers of the Company.

S300(9)

a.

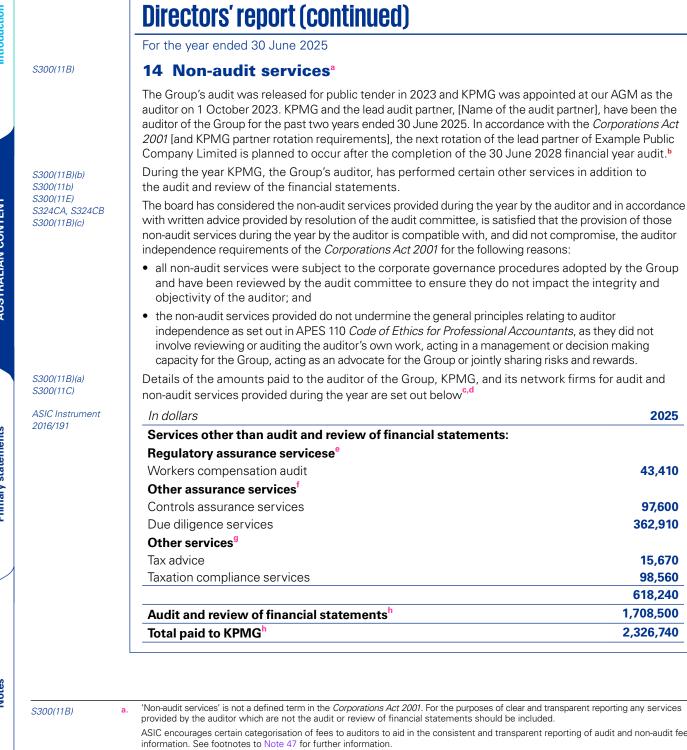

b.

The nature of the liability and the amount of the insurance premiums paid do not have to be disclosed where such disclosure is prohibited by the contract itself. Where these details are not disclosed, it is recommended to make a statement to this effect. For example:

The directors have not included details of the nature of the liabilities covered or the amount of the premium paid in respect of the directors' and officers' liability and legal expenses' insurance contracts, as such disclosure is prohibited under the terms of the contract.

Either the name of the officer or the class of officer to which the officer belongs or belonged must be disclosed.

S300(9)(a)

provided by the auditor which are not the audit or review of financial statements should be included. ASIC encourages certain categorisation of fees to auditors to aid in the consistent and transparent reporting of audit and non-audit fee An entity that has not included details of non-audit services in the directors' report but specifies that this information may be found in this note to the financial statements, discloses the amount for each non-audit service in that note in order to comply with the S300(11B)(a) S300(11C)(b) Corporations Act 2001 requirements. This disclosure is provided for illustrative purposes only. Although not required, it is the best practice to disclose auditor tenure, of both the auditor and the lead partner, in the annual financial report. S300(11B)(a) Comparative information is not required. C. Although it is not required, we encourage entities to split fees from assurance services from fees for non-assurance services. d. We also encourage assurance services to be further split between "regulatory assurance services" and "other assurance services". This disclosure is provided for illustrative purposes only. Regulatory assurance services are those that are required under legislation and are performed by the auditor, for example, Form FS 71 for an AFS licensee, workers compensation, APRA reports, US Sarbanes-Oxley Act of 2002 Section 404, franchising code of conduct and retirement villages. f.

97,600 362,910

15.670

98,560 618,240 1,708,500

2,326,740

Other assurance services are fees for other assurance and agreed-upon-procedures services such as those required under contractual arrangements. Examples include, assurance on revenue information relevant to a royalty agreement, sustainability assurance reporting and capital raisings.

KPMG has defined other services as services that do not fall within regulatory or other assurance services e.g. tax advice, tax g. compliance, consulting.

The amount paid for audit services and the total amount paid to auditors are not required to be disclosed in the directors' report. It is included to allow an assessment of the level of audit to non-audit fees paid to the auditor during the year.

ASIC Instrument

18 Lead auditor's independence declaration

The Lead auditor's independence declaration is set out on page [xxx]^a and forms part of the directors' report for the financial year ended 30 June 2025.

19 Rounding off

The Group is of a kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and in accordance with that Instrument, amounts in the consolidated financial statements and directors' report have been rounded off to the nearest thousand dollars, unless otherwise stated.

a. KPMG considers separate presentation for the lead auditor's independence declaration to be preferable due to the difficulty in determining the placement of the declaration in the directors' report to ensure it is clear that the audit partner is only providing sign off in relation to the declaration rather than the entire directors' report, to enable it to be on KPMG letterhead and therefore to facilitate improved reporting of the information to the users.

20 Remuneration report – audited^{a,b,c,d}

S300A(1), S300A(1A)

S300A(1)(a)

S300A(1A)

S300A(1)(e)(i)

An entity's remuneration report discusses the specific facts and circumstances of its remuneration practices. The approach in Example Public Company Limited is to present a framework for the remuneration report setting out the discussion required and providing illustrations of how some of the requirements could be disclosed in tabular format to comply with the more quantitative disclosure requirements.

Our <u>Insights into Remuneration Reporting</u> - KPMG's practical guide to Remuneration Reporting provides guidance to help companies prepare Remuneration Reports that are effective communication tools and aspire to align with best practice.

20.1 Principles of compensation – audited^b

[Provide a discussion of the board policy for determining the nature and amount of remuneration of the key management personnel. The headings set out below provide one framework that an entity may wish to consider as a guide. An entity tailors the disclosure to its facts and circumstances of its remuneration practices.]

Compensation packages include a mix of fixed and variable compensation, and short and long-term performance-based incentives.

The table below represents the target remuneration mix for group executives in the current year. The short-term incentive is provided at target levels, and the long-term incentive amount is provided based on the value granted in the current year.

		At	risk
	Fixed remuneration	Short-term incentive	Long-term incentive
CEO	50%	30%	20%
CFO, COO	60%	20%	20%
Other executives	75%	25%	-

Fixed compensation

[Discuss the composition of fixed compensation and the frequency and basis of review, including a discussion of non-cash benefits.]

00004(0)		
S300A(2)	a.	The directors' report of a listed disclosing entity that is a company must include a remuneration report.
S308(3C)	b.	The entire remuneration report must be audited for compliance with S300A. Using the word 'audited' within each section header of the remuneration report is one example of how the audited information might be distinguished from the unaudited disclosures contained in the directors' report. Another method could be to label each audited page as audited, so long as the end of the audited material is obvious to the reader.
S250R(2),(3) S300A(1)(g)	C.	The remuneration report of a listed company is subject to a non-binding vote of adoption by shareholders at the AGM. Where 25 percent or more of the votes cast at the most recent AGM were against adoption of that report, the subsequent remuneration report must include an explanation of the board's action in response, or if the board does not propose any action, the board's reasons for inaction.
RG 230	d.	Some companies disclose alternative remuneration amounts that are measured and/or allocated to annual reporting periods on a basis that is not entirely consistent with the Corporations Act requirement to use accounting standards when disclosing remuneration amounts. For example, alternative equity compensation presented might be amounts determined in the year of vesting based on the value at vesting date, rather than the grant date fair value being spread over the vesting period. These disclosures are in addition to the statutory disclosures that are measured in accordance with the accounting standards. Such companies should consider the requirements of RG 230 so that the additional, alternative disclosures are not misleading to users.

For the year ended 30 June 2025

20 Remuneration report – audited (continued)

20.1 Principles of compensation – audited (continued)

Performance-linked compensation

[If an element of remuneration is dependent on the satisfaction of a performance condition, provide a detailed summary of the performance condition, including:

• explanation of why the performance condition was chosen

Modifications to the terms of share-based payment transactions

modified during the reporting period disclosure is required]

- a summary of the methods of assessment of satisfaction of the performance condition and why that method of assessment was chosen
- if the performance condition involves comparison of factors external to the company, a summary of those factors, including the identities of companies or index if such factors relate to the performance of such other company or index.

Include discussion of any discretion to reduce the performance-based elements of remuneration, including any discretion that has been applied in the current year, or a statement such as "The remuneration committee has not exercised such discretion in the current year."

Practice is to differentiate performance-linked compensation between short-term and long-term incentive schemes.]

Reg 2M.3.03(1) Item 12
Awards issued in the current year
[The terms and conditions of each grant of a cash bonus, performance related bonus, or share-based
payment compensation benefit made to a person, whether part of a specific contract for services
are patterned in disclosed. In

payment compensation benefit made to a person, whether part of a specific contract for services or not, affecting compensation in the reporting period or a future reporting period is disclosed. In our view, disclosures should also include details of any other relevant features which may impact the remuneration the KMP will ultimately be entitled to such as Board discretion or other terms. This information is often included in the discussion of performance linked compensation.]

Awards issued in the previous years

[The terms and conditions of each award issued under legacy plans should be included in the Remuneration Report if they continue to impact the current and future years' remuneration. In our view, disclosures should also include details of any other relevant features which may impact the remuneration the KMP will ultimately be entitled to such as Board discretion or other terms.]

[If the terms of share-based payment transactions granted as compensation have been altered or

Reg 2M.3.03(1) Item 14'

S300A(1)(ba)(i)

Consequences of performance on shareholder wealth

[An entity provides a discussion of the relationship between the remuneration policy and the company's performance, specifically dealing with the matters illustrated below.^a]

In considering the Group's performance and benefits for shareholder wealth, the remuneration committee have regard to the following indices in respect of the current financial year and the previous four financial years.^b

S300A(1)(ba) When an element of remuneration includes a performance condition that involves comparing the company against (iv)(B) one or more other companies, a company discloses that list of other companies. Some companies use a published index of companies or a subset of such an index in setting their performance conditions, such as the ASX 50 or the ASX 100 excluding specified industries. Other companies use a specific basket of worldwide competitor companies. Disclosure of the comparator companies does not always need to name the actual companies, but should be specific enough to enable a user to arrive at the actual list of companies. This may involve disclosing the name of the published index of companies (e.g. 'ASX 100 companies'), naming the index and the specific exclusions (e.g. 'ASX 100 companies excluding those in the financial services and extractive industries'), or listing the individual companies in the comparator group. Cross referencing to a list that is not contained in the remuneration report will not achieve compliance with the Corporations Act 2001 requirements. S300A(1AB)(c) b. In determining the consequences of the company's performance on shareholder wealth in a financial year, the company must also have regard to any return of capital by the company to its shareholders during the year that involves: the cancellation of shares in the company, and a payment to holders of those shares that exceeds the price at which shares in that class are being traded at the time when the shares are cancelled.

For the year ended 30 June 2025

20 Remuneration report – audited (continued)

20.1 Principles of compensation – audited (continued)

	2025	2024	2023	2022	202
Profit attributable to owners of the company	\$7,055,000	\$5,623,000	\$2,447,000	\$2,039,000	\$1,700,000
Dividends paid	\$1,243,000	\$571,000	\$310,000	\$300,000	\$300,00
Operating income growth	7.4%	6.2%	5.8%	6.1%	6.8%
Change in share price	\$0.15	\$0.20	\$0.10	\$0.05	\$0.0
Return on capital employed	35.1%	24.8%	9.2%	8.5%	8.6%

Profit is one of the financial performance targets considered in setting the Short Term Incentive (STI). Profit amounts have been calculated in accordance with Australian Accounting Standards. Operating income is operating profit as reported in the statement of profit or loss.

Service contracts

[Where the person is employed by the company under a contract: the duration of the contract, the periods of notice required to terminate the contract, and the termination payments provided for under the contract are disclosed.

For each contract for services between the KMP and the disclosing entity (or any of its subsidiaries), such further explanations are disclosed as are necessary in addition to those prescribed in S300A(1)(ba) and Regulation 2M.3.03(1) Item 12 to provide an understanding of how the amount of compensation in the current reporting period was determined, and how the terms of the contract affect compensation in future periods.]

Services from remuneration consultants

The remuneration committee engaged Marshall Associates (Marshall) as remuneration consultant to the board to review the amount and elements of the key management personnel remuneration and provide recommendations in relation thereto.

In addition to the remuneration recommendations, Marshall provided the following other services to the Company throughout the year:

- summarised the key terms and conditions of each contract for services to enable the remuneration committee to assess whether the terms and conditions are consistent across different parts of the business
- advice in relation to the embodiment of risk in the assessment of performance for the vesting of remuneration awards
- expatriate compliance services.

Marshall was paid \$35,000 for the remuneration recommendations in respect of reviewing the amount and elements of remuneration.

Marshall was paid \$12,500 in total for all other services.

The engagement of Marshall by the remuneration committee was based on a documented set of protocols that would be followed by Marshall, members of the remuneration committee, and members of the key management personnel for the way in which remuneration recommendations would be developed by Marshall and provided to the board.

The protocols included the prohibition of Marshall providing advice or recommendations to key management personnel before the advice or recommendations were given to members of the remuneration committee and not unless Marshall had approval to do so from members of the remuneration committee.

20 Remuneration report – audited (continued)

20.1 Principles of compensation - audited (continued)

Services from remuneration consultants (continued)

These arrangements were implemented to ensure that Marshall would be able to carry out its work, including information capture and the formation of its recommendations, free from undue influence by members of the key management personnel about whom the recommendations may relate.

The board is satisfied that the remuneration recommendations were made by Marshall free from undue influence by members of the key management personnel about whom the recommendations may relate.

The board undertook its own inquiries and review of the processes and procedures followed by Marshall during the course of its assignment and is satisfied that its remuneration recommendations were made free from undue influence.

These inquiries included arrangements under which Marshall was required to provide the board with a summary of the way in which it carried out its work, details of its interaction with key management personnel in relation to the assignment and other services, and respond to questioning by members of the board after the completion of the assignment.

Non-executive directors

S300A(1)(h)(vi)

S300A(1)(h)(viii)

S300A(1)(a)

[Non-executive directors' remuneration arrangements are usually separately described.]

Total compensation for all non-executive directors, last voted upon by shareholders at the 2021 AGM, is not to exceed \$400,000 per annum and is set based on advice from external advisors with reference to fees paid to other non-executive directors of comparable companies. The base fee for the Chairperson is \$100,000 per annum. Base fees for other directors are \$50,000 per annum.

Directors' base fees cover all main board activities and membership of one committee. Nonexecutive director members who sit on more than one committee receive an additional payment of \$2,000 per day for meetings attended.

Non-executive directors do not receive performance-related compensation and are not provided with retirement benefits apart from statutory superannuation.

Notes in relation to Directors' and executive officers' remuneration table

A. The short-term incentive bonus is for performance during the respective financial year using the criteria set out on page [x]. The amount was finally determined on 7 August 2025 (2024: 8 August 2024) after performance reviews were completed and approved by the remuneration committee.

B. The fair value of the options is calculated at the date of grant using the Black Scholes option-pricing model and allocated to each reporting period evenly over the period from grant date to vesting date. The value disclosed is the portion of the fair value of the options recognised as an expense in each reporting period.
C. The fair value of performance rights with the relative TSR condition is calculated at the date of grant using the Monte-Carlo simulation model, taking into account the impact of the TSR condition and the lack of dividends during the vesting period. The fair value of performance rights with the operating income growth condition is calculated using the Black-Scholes option pricing model, taking into account the lack of dividends during the vesting period. The value disclosed is the portion of the fair value of the rights recognised as an expense in each reporting period.

S300A(1)(c)	a.	Remuneration disclosures are only required for the current year Key management personnel (KMP) of the consolidated entity (or for the Company where consolidated financial statements are not required). Disclosure for former KMP who were not KMP for any portion of the current year are not required, although they remain included in disclosures in notes to the financial statements.
Reg 2M.3.03(1) Items 7, 8, 9 and 11	b.	The table excludes the following components of compensation which should be separately included where applicable: long-term incentives distributed in cash, post-employment benefits other than superannuation, shares and units, cash-settled share-based payment compensation and share-based payments giving a choice of equity- or cash-settlement.
Reg 2M.3.03(4)	C.	Quantitative disclosures must be recognised, measured and classified in accordance with applicable Australian Accounting Standards. The relevant accounting standards are generally AASB 119 <i>Employee Benefits</i> and AASB 2 <i>Share-based Payments</i> . Where appropriate a footnote should be included to explain an unusual quantitative disclosure, such as, a negative share-based payment expense which arises where AASB 2 requires reversal of amounts previously expensed.
Reg 2M.3.03(2)	d.	In a remuneration report, comparative information is only required for amounts of remuneration required by Items 6, 7, 8, 9 and 11 of Corporations Regulation 2M.3.03(1). Comparative information for other remuneration report disclosures (e.g. narratives and other qualitative information) is not required.

D. In accordance with AASB 119 Employee Benefits, annual leave is classified as an other long term employee benefit.

Directors of the Group have exercised their discretion to allow the Finance Director to receive these awards despite not having completed the Ε. requisite service period. On termination of employment the Company accelerated the vesting period and recognised the full share-based payment expense. While the full share-based payment expense has been recognised for all unvested equity, the awards may or may not vest subject to the original performance hurdles.⁹

There is no explicit requirement to disclose total KMP remuneration, however this is a common disclosure and may be

Reg 2M.3.03(3)	f.	The <i>Corporations Act 2001</i> requires the relevant individuals to be disclosed, regardless of whether they retired during the year. Hence, if an executive meets the definition of a KMP for only part of the current year, this executive would be included in the KMP disclosures, for the period the executive met the KMP definition. This would be the case regardless of whether the executive is still KMP at yearend. For example, a manager of a subsidiary is promoted during the year. On promotion, the manager meets the definition of a KMP. Before year end, the parent entity sells this subsidiary. The consolidated financial statements would include disclosures about this manager for the period the manager met the definition of KMP – from promotion until sale of subsidiary. However, in the following year, disclosures for this individual could be deleted from the Remuneration report.
Reg 2M.3.03(1) Item 14(c)(iii), (d)	g.	In a remuneration report, when compensation has been altered or modified, which may be due to Board discretion, disclosure should be made for the new terms and conditions that affect the vesting or exercise of an option or other right. Companies may also want to consider explaining the Board's reasons for exercising that discretion.
Reg 2M.3.03(1) Item 11	h.	Share based payment remuneration is to be separately disclosed for equity settled and cash settled share-based payment transactions. Equity settled share based payment transactions are to be further separated between (i) shares and units and (ii) options and rights.

useful to a shareholder.

e.

For the year ended 30 June 2025

20 Remuneration report – audited (continued)

20.3 Analysis of bonuses included in remuneration – audited^a

Details of the vesting profile of the short-term incentive cash bonuses awarded as remuneration to each director of the Company, and other key management personnel are detailed below.

		Short-term incentive bo	nus
	Included in remuneration \$ (A)	% vested in year	% forfeited in year (B)
КМР			
KMP name	102,500	95%	5%

- (A) Amounts included in remuneration for the financial year represent the amount related to the financial year based on achievement of personal goals and satisfaction of specified performance criteria. The remuneration committee approved these amounts on 7 August 2025.
- (B) The amounts forfeited are due to the performance or service criteria not being met in relation to the current financial year.

20.4 Equity instruments – audited^b

All rights and options refer to rights and options over ordinary shares of Example Public Company Limited, which are exercisable on a one-for-one basis under the executive share plan (ESP).

20.4.1 Right and options over equity instruments granted as compensation - audited

Details on rights and options over ordinary shares in the Company that were granted as compensation to each key management person during the reporting period and details on options that vested during the reporting period are as follows:

Options^c

Options granted

No options were granted during 2024.

Options		Fair value per option at grant date	Exercise price per option		Number of options vested during
vested	Grant date	\$	\$	Expiry date	2024-25
KMP name	1 July 2022	5.60	10.10	1 July 2032	100,000

Rights

Rights granted	Number of rights granted during 2024-25	Vesting condition	Grant date	Fair value at grant date \$	Expiry date
KMP name	20,000	Operating income	1 July 2024	10.10	1 July 2034
	20,000	Relative TSR	1 July 2024	8.50	1 July 2034

Reg 2M.3.03(1) Item 15(b)(vi) All rights and options expire on the earlier of their expiry date or termination of the individual's employment. The rights vest and options are exercisable three years from grant date. In addition to a continuing employment service condition, vesting is conditional on the Group achieving certain performance hurdles. Details of the performance criteria are included in the long-term incentives discussion on page [x]. For rights granted in the current year, the earliest vesting date is 1 July 2027.

Reg 2M.3.03(1) Item 12	a.	Disclosures are required for each grant of each type of cash bonus, performance-related bonus or share-based payment to each person that affects remuneration in the current or future periods.
Reg 2M.3.03(3)	b.	Disclosures related to equity instruments under Items 15 to 16 must be separated into each class of equity instrument, identifying each class by the name of the issuing entity, the class of equity instrument, and if the instrument is an option or right, the class and number of equity instruments for which it may be exercised.
S300(1)(d)	C.	Include details of options granted to KMP only. Details of options granted to officers who are among the five most highly remunerated officers of the Company or the Group but are not KMP are separately disclosed in the Directors' report - see Note 12.

20 Remuneration report – audited (continued)

20.4 Equity instruments – audited (continued)

Reg 2M.3.03(1) Item 16 20.4.2 Exercise of options granted as compensation – audited

During the reporting period, the following shares were issued on the exercise of options previously granted as compensation:

	Number of shares ^a	Amount paid \$/share
KMP name	5,000	10.00

There are no amounts unpaid on the shares issued as a result of the exercise of the options in the

Reg 2M.3.03(1) Item 16(d)

Reg 2M.3.03(1) Item

16(a), (c)

Reg 2M.3.03(1) Item 12(a)-(b),(e)-(g) 20.4.3 Details of equity incentives affecting current and future remuneration – audited

Details of vesting profiles of the rights and options held by each key management person of the Group are detailed below.

	Instrument		Grant date	% vested in year	% forfeited in year (A)	Financial years in which grant vests	Maximum value yet to vest (B) ^b
KMP name	Options	100,000	1 July 2022	100%	-%	1 July 2024	N/A
	Options	100,000	1 July 2023	-%	-%	1 July 2026	N/A
	Rights	40,000	1 July 2024	-%	-%	1 July 2027	80,000

(A) The percentage forfeited in the year represents the reduction from the maximum number of instruments available to vest due to performance criteria not being achieved.

(B) The maximum value of share rights yet to vest is determined based on the amount of the grant date fair value that is yet to be expensed. The minimum value of share rights yet to vest is nil since the shares will be forfeited if the vesting conditions are not met.

20.4.4 Analysis of movements in equity instruments – audited^c

S300A(1)(e)(ii)-(iii)

The value of rights or options over ordinary shares in the Company granted and exercised by each key management person during the reporting period is detailed below.

	Granted in year \$ (A)	Value of rights or options exercised in year \$ (B)
KMP name	372,000	-

IFRS 2.7

- (A) The value of rights granted in the year is the fair value of the rights calculated at grant date. The total value of the rights granted is included in the table above. This amount is allocated to remuneration over the vesting period (i.e. in years 1 July 2024 to 1 July 2027).
 - (B) The value of options exercised during the year is calculated as the market price of shares of the Company as at close of trading on the date the options were exercised after deducting the price paid to exercise the option.

Reg 2M.3.03(1) Item 16(b)	a.	If the number of options or rights exercised differs from the number of equity instruments issued, the number of options or rights exercised is also disclosed.
Reg 2M.3.03(1) Item 12(h)	b.	Estimates of the maximum and minimum possible total value of the bonus or grant (other than option grants) for financial years after the financial year to which the report relates is required to be disclosed.
S300A(1)(e)	C.	This disclosure requirement refers specifically to "options" rather than more generically to equity instruments or "options and rights." It is not clear whether an entity is required to include other forms of share-based payments in these disclosures. In our view, an entity should choose whether to interpret "options" strictly and limit disclosures to only options, or to interpret "options" more widely and include the values of all forms of share-based payments.

Appendices

For the year ended 30 June 2025

20 Remuneration report – audited (continued)

20.4 Equity instruments – audited (continued)

20.4.5 Options and rights over equity instruments^a

The movement during the reporting period, by number of rights and options over ordinary shares in Example Public Company Limited held, directly, indirectly or beneficially, by each key management person, including their related parties, is as follows:

	Held at 1 July 2024	Granted as compen- sation	Exercised	Lapsed	Forfeited	Held at 30 June 2025	Vested during the year	Vested and exercisable at 30 June 2025 ^b
Options								
KMP name	250,000	-	-	50,000 ¹	-	200,000	100,000	100,000
Rights								
KMP name	-	40,000	-	-	-	40,000	-	-

¹ Options that lapsed during the year were granted during the financial year ended 30 June 2021.

Payments to persons before taking office - audited 20.5

[insert details of any payment made as part of the consideration for the person agreeing to hold office including the monetary value and date of payment]

20.6 Key management personnel transactions^c – audited

Loans to key management personnel and their related parties^d

Details regarding loans outstanding at the end of the reporting period to key management personnel and their related parties, where the individual's aggregate loan balance exceeded \$100,000 in the reporting period, are as follows:

	Balance 1 July 2024 \$	Balance 30 June 2025 \$	Interest not charged \$	Highest balance in period \$	
KMP name	102,000	78,000	9,786	187,000	
		me] during the year e e] repaid \$109,000 of			

Details regarding the aggregate of all loans made, guaranteed or secured by any entity in the Group to key management personnel and their related parties, and the number of individuals in each group as at 30 June 2025, are as follows:^e

	Opening balance \$	Closing balance \$	Interest not charged \$	Number in group at 30 June 2025
Total for key management personnel and their related parties	132,000	78,000	10,796	2

No interest is payable on the loans, and the loans are repayable in cash in full 12 months after the issue date.

Reg 2M.3.03(3)	a.	This disclosure is separated into each class of equity instrument, identifying each class by the name of the issuing entity, the class of equity instrument, and if the instrument is an option or right, the class and number of equity instruments for which it may be exercised.
Reg 2M.3.03(1)Item 17(h)	b.	Options and rights vested and unexercisable at the end of the reporting period are, where relevant, disclosed.
Reg 2M.3.03(1) Items 17-24	c.	Individual disclosures about equity transactions, loans and other transactions are required in a remuneration report. Disclosures about these

other transactions with KMP, in the aggregate, are still included in the notes to financial statements. Some level of duplication may be required to comply with both AASB 124 and the Corporations Act

Loan disclosures do not include loans involved in transactions that are in substance options, including non-recourse loans to purchase shares. Reg 2M 3 03(3A) Such loans should be included in disclosures as options.

	with KMP and their relate	ed parties were no n	ne Group during the year. The nore favourable than those a ons to non-key managemen	available, or which m	night reasonably be		
<i>Reg 2M.3.03(3B)</i> From time to time, directors of the Group, or their related entities, may purchase goods from the Group. The purchases are on the same terms and conditions as those entered into by other Group employees or custor are trivial or domestic in nature.							
	Movements in share	es ^{b,c}					
Reg 2M.3.03(1) Item 18(a),(c)-(e)	The movement during the reporting period in the number of ordinary shares in Example Public Company Limited held, directly, indirectly or beneficially, by each key management person, including their related parties, is as follows:						
		Held at 1 July 2024	Received on exercise of options	Other changes*	Held at 30 June 2025 ^d		
	KMP name	1,000	-	4,000	5,000		
	* Other changes represent shares that were purchased or sold during the year						
	Change in directors after 30 June 2025 ^e						
Reg 2M.3.03(1) Item 4,5	Ms V MThomas has retired as an Independent Non-Executive Director on 5 July 2025. Ms Natalia Stevens was appointed as an Independent Non-Executive Director on the same date.						
S298(2)	This Directors' report is made out in accordance with a resolution of the directors:						
	F D Adair						
	Director						
		(City) t	his day of	202	5.		

Reg 2M.3.03(1) Items 22-24	a.	Details of each type of transaction between the disclosing entity and a KMP, or any KMP related party, are disclosed. However, disclosure is not required for transactions that meet the following criteria:
Reg 2M.3.03(3B)		 the transaction occurs within a normal employee, customer or supplier relationship on terms and conditions no more favourable than those that it is reasonable to expect the entity would have adopted if dealing at arms-length with an unrelated person; and
		b. information about the transaction does not have the potential to affect adversely decisions about the allocation of scarce resources made by users of the financial statements, or the discharge of accountability by the key management person; and
		c. the transaction is trivial or domestic in nature.
		This disclosure exemption is only available for other transactions covered by Reg 2M.3.03(1) Items 22-24.
Reg 2M.3.03(1) Items 18	b.	The disclosures related to the movements in equity instruments should be done in relation to each type of equity instrument.
Reg 2M.3.03(1) Items 18	C.	When an individual ceased to be a KMP before the end of the reporting period, entities should clearly disclose the basis for the end of period number of shares disclosed. It may be appropriate to indicate 'n/a' at period end, explaining that the individual was not a KMP at that date.
		Similar consideration should be given in relation to the beginning balance for individuals who became KMP during the reporting period.
Reg 2M.3.03(1) Items 18(f)	d.	Separate disclosure of the number of equity instruments held nominally at the end of the reporting period is made.
Reg 2M.3.03(1) Items 4 and 5	e.	If there has been a change in the chief executive officer, director or other key management person or executive during or since the end of the current reporting period, disclose the name of each person involved in the change, the position involved, and the date on which the change occurred.

5 1.60	Non-current assets ^f		49,846	50,495	52,921
	Total assets		112,860	90,013	86,344

IAS 1.10	a.	An entity may also use other titles – e.g. 'balance sheet' – as long as the meaning is clear and the title not misleading.
Insights 2.8.50.110	b.	When comparatives are restated, in our view, although it is not specifically required by the Accounting Standards, labelling the comparatives as restated is necessary to highlight that the comparatives are not the same as the financial statements published previously.
IAS 1.10(f), 40A	C.	The Group has presented a third statement of financial position as at the beginning of the preceding period, because the correction of errors (see Note 43) has a material effect on the information in the statement.
IFRS 16.47(a), 48	d.	The Group has presented right-of-use assets that do not meet the definition of investment property within 'property, plant and equipment' – i.e. the same line item in which it presents underlying assets of the same nature that it owns. Alternatively, an entity may choose to present right-of-use assets separately in the statement of financial position. Right-of-use assets that meet the definition of investment property are presented within 'investment property'.
Insights 7.10.40.50	e.	In our view, derivative assets and liabilities should be presented in separate line items in the statement of financial position if they are significant.
IAS 1.60–61	f	The Group has made a current/non-current distinction in the statement of financial position. An entity may present its assets and liabilities broadly in order of liquidity if such a presentation provides information that is reliable and more relevant. Our publication <u>Guide to annual financial statements – Illustrative disclosures for banks (December 2023)</u> provides an example presentation of assets and liabilities in order of liquidity.
IAS 1.66, Insights 3.1.30	g.	The Group has classified certain intangible assets (emission allowances) as current (see Note 22(E)) because they are expected to be realised within 12 months of the reporting date. An entity needs to apply the requirements in IAS 1 in determining whether to classify intangible assets as current or non-current.
IFRS 15.B21, BC367	h.	IFRS 15 <i>Revenue from Contracts with Customers</i> and other standards do not specify where assets for rights to recover products from customers with regards to sales with a right of return should be presented. The Group has included these assets within 'inventories' and disclosed them separately in the notes (see Note 17).
IAS 1.54–55, IFRS 15.105, 109, A, BC320-BC321,	i.	Although it is not specifically required, the Group has presented in the statement of financial position line items related to contract assets and contract liabilities. For further guidance on applying the requirements in IAS 1 for classification of contract assets and contract liabilities as current or non current, see 4.2.510 in <u>Insights into IFRS</u> .
Insights 4.2.510		Although this guide uses the terms 'contract assets' and 'contract liabilities', an entity may also use other terms.
IAS 1.66, Insights 3.1.30	j.	The Group has classified prepayments as current because they relate to the purchase of inventories and are expected to be realised within 12 months of the reporting date. An entity needs to apply the requirements in IAS 1 in determining whether to classify prepayments as current or non-current.

	Total equity		45,222	35,366	29,562
	* The comparative information is restated on a		on of orrors Soo	Noto 12	

* The comparative information is restated on account of correction of errors. See Note 43

The notes on pages 71 to 235 are an integral part of these consolidated financial statements.

The Group has presented lease liabilities within 'loans and borrowings'. Alternatively, an entity (a lessee) may choose to

		present lease liabilities separately from other liabilities in the statement of financial position.
IFRS 15.55	L.	The Group has presented its refund liabilities under IFRS 15 as 'trade and other payables'. The Group's returns policy offers only an exchange for another good – i.e. the Group does not offer a cash refund. Therefore, refund liabilities do not meet the definition of a financial liability in IAS 32 <i>Financial Instruments: Presentation</i> . If a refund liability or a liability related to a repurchase agreement meets the definition of a financial liability in IAS 32, then it is subject to the disclosure requirements in IFRS 7 <i>Financial Instruments: Disclosures</i> .
Insights 3.1.10.30, 7.10.35.70–100, IU 12-20	m.	The Group has presented amounts owed for the purchase of goods or services but related to a supplier finance arrangement within 'trade and other payables' because it considers that the nature and function of these payables is not different from other trade payables and therefore, does not warrant a separate presentation on the face of the statement of financial position. In our view, regardless of whether the original trade payable is derecognised, an entity should consider the appropriate presentation of amounts related to supplier finance arrangements in the statement of financial position. The Group has disclosed those amounts separately in the notes. See Note 29.
Insights 7.10.310.10, 30 -40, IAS 1.29, IFRS 7.8(e)(ii)	n.	There is no specific guidance in the Accounting Standards on the presentation of embedded derivatives and the related host contracts. The Group has presented its separable embedded derivative liability related to certain convertible notes together with the host contract on the basis that the host and the embedded derivative are subject to the same contract. However, as the separable embedded derivative is mandatorily measured at FVTPL, it is disclosed separately in the notes (see Note 32(A)).

AS 1.10A	a.	The Group has elected to present comprehensive income using a 'one-statement' approach. F	or an illustratio	on of the altern	ative 'two-			
	b.	statement' approach, see Appendix II.						
AS 1.82 FRS 15.113, AS 1.29–30, 85, nsights 4.2.560.25	с.	IAS 1 requires the separate presentation of specific line items in the statement of profit or loss. The Group has not presented certain line items because during the reporting period it did not have events or transactions to be reflected in those line items. See footnotes (c) and (d) below for specific considerations related to separate presentation of line items in the statement of profit or loss. In our view, an entity is not required to present revenue from contracts with customers as a separate line item in the statement of profit loss and may aggregate it with other types of revenue considering the requirements in IAS 1. However, in providing a separate disclosure of revenue from contracts with estatement of profit or loss – we believe that an entity should not include amounts that do not fall in the scope of IFRS 15 (see Note 8).						
AS 1.82(a), nsights 7.10.70.20	d.	The Group has presented interest income on financial assets that are subsequently measured at income' because it does not consider it as part of its revenue-generating activities. If the interest interest method, constituted revenue, then the entity would be required to separately present statement of profit or loss and OCI. IAS 32.33, Insights 7.3. 750.10-20

1.

a.

The Accounting Standards do not mandate a specific method of presenting treasury shares within equity. However, local laws may prescribe the allocation method. Therefore, an entity needs to take into account its legal environment when choosing how to present its own shares within equity. An entity needs to choose a presentation format, to be applied consistently to all treasury shares. The Group has elected to present the total cost of treasury shares as a separate category of equity.

Attributable to owners of the Company

The notes on pages 71 to 235 are an integral part of these consolidated financial statements.

b. Amounts transferred to the profits reserve characterise profits available for distribution as dividends in future years and reflects the amounts transferred by individual entities in the Group and is therefore not necessarily equivalent to the consolidated Group profit for the year.

IAS 1.78(e), 79(b), 108, Insights 4.5.900.20 Generally, IFRS 2 Share-based Payment does not address whether an increase in equity recognised in connection with a share-based payment transaction should be presented in a separate component within equity or within retained earnings. In our view, either approach is allowed under the Accounting Standards. The Group has elected to present such increase in retained earnings.

Notes

The Group has elected to present cash flows from operating activities using the direct method, disclosing major classes of gross cash a. receipts and payments related to operating activities. Alternatively, an entity may present operating cash flows using the indirect method.

There is no specific guidance in the Accounting Standards on the classification of cash flows from supplier finance arrangements. However, b. in our view it is the nature of the activity, rather than the classification of the related item in the statement of financial position, that primarily determines the classification of the cash outflow. Furthermore, in our view, in determining the appropriate classification an entity should apply judgement and assess whether a single cash outflow or multiple cash flows occur for the entity. The Group presents a single cash outflow for the payments made to the bank because it considers the payment to a supplier by the bank not to be a cash transaction of the Group. The Group classifies its cash outflows for payments made to the bank within operating activities because it views the principal nature of these payments as related to the purchase of goods and services. There may be other acceptable approaches depending on the legal form and structure of supplier finance arrangements. The Group has provided disclosure to enable understanding of the effects of its supplier finance arrangement on its financial position, financial performance and cash flows (see Note 29 and Note 32(C)(iii)

IAS 7.6, 11, Insights 2.3.20.11

IAS 7.18-19

7.10–11, 43,

IU 12-20

IFRS 7.31, 33-34,

B11F, IG18A, IAS

44F-44H, Insights

2.3.190.90-120,

The Group has classified cash flows related to emissions certificates (current intangible assets) within operating activities because they relate to the Group's principle revenue-generating activities and the assets are not considered long-term in nature. The emissions certificates are expected to be realised within 12 months of the reporting date by surrendering them to the government to settle the annual emissions obligation (see Note 22(E)). In determining the classification of cash flows, an entity considers the nature of the activity to which they relate.

IFRS 16.50, IAS	d.	The Group has classified:
7.17(e)		 cash payments for the principal portion of lease payments as financing activities;
		 cash payments for the interest portion as operating activities consistent with the presentation of interest payments chosen by the Group (see footnote (e) below); and
		 short-term lease payments and payments for leases of low-value assets as operating activities.
IAS 7.31, Insights 2.3.50.10-20	e.	The Accounting Standards require cash flows from interest and dividends received and paid to be disclosed separately. In our view, such disclosure is required in the statement of cash flows, rather than in the notes. In the absence of specific guidance in IFRS Accounting Standards, an entity chooses an accounting policy, to be applied consistently, for classifying interest and dividends paid as either operating or financing activities, and interest and dividends received as investing activities, and eash flows from interest paid as operating activities, cash flows from interest received an dividends received as investing activities, and cash flows from dividends paid as financing activities. Interest paid includes the interest portion of the lease liabilities. See footnotes (d) above and (f) below
Insights 2.3.50.38	f.	In our view, an entity should choose an accounting policy, to be applied consistently, to classify cash flows related to capitalised interest as follows:
		• as cash flows from investing activities if the other cash payments to acquire the qualifying asset are reflected as investing activities; or
		 consistently with interest cash flows that are not capitalised (which has been applied by the Group)
		The Group has presented capitalised interest consistently with interest cash flows that are not capitalised.
IAS 7.10, IFRS 5.33(c), Insights 5.4.220.50	g.	The Group has elected to present a statement of cash flows that analyses all cash flows in total – i.e. including both continuing and discontinued operations; amounts related to discontinued operations by operating, investing and financing activities are disclosed in Note 7(B). However, in our view cash flows from discontinued operations may be presented in ways in which the requirements of IFRS 5 <i>Non-current Assets Held for Sale and Discontinued Operations</i> and IAS 7 regarding cash flow presentation may be met.
IAS 7.10-11, Insights 2.3.20.11	h.	There is no specific guidance in IFRS Accounting Standards on the classification of cash flows from the receipt of government grants. Cash flows should be classified based on the nature of the activity to which they relate. The Group has classified cash flows related to asset- related grants as investing activities and those related to income related grants as operating activities because this reflects the nature of the related activities.

IAS 1.16,10.17

IAS 1.51(d)-(e) ASIC Instrument 2016/191

1. Reporting entity

Example Public Company Limited (the 'Company') is domiciled in Australia.

The Company's registered office is at [address]. These consolidated financial statements comprise the Company and its subsidiaries (together referred to as the 'Group').

The Group is a for-profit entity and is primarily involved in manufacturing paper and paper-related products, cultivating trees and selling wood (see Note 6(A)).

2. Basis of accounting^a

The consolidated financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards adopted by the Australian Accounting Standards Board and the *Corporations Act 2001*. The consolidated financial statements comply with International Financial Reporting Standards adopted by the International Accounting Standards Board. They were authorised for issue by the Board of Directors on [date].

Details of the Group's accounting policies, including changes thereto, are included in Note 44 and Note 5.

3. Functional and presentation currency

These consolidated financial statements are presented in dollars which is the Company's functional currency. The Group is of a kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and in accordance with that instrument, amounts in the consolidated financial statements and directors' report have been rounded off to the nearest thousand dollars, unless otherwise stated.

AASB 1048

IAS 1.16

a. Compliance with Australian Interpretations is required by AASB 1048 Interpretation and Application of Accounting Standards. A statement of compliance with Australian Accounting Standards therefore includes a statement of compliance with Australian Interpretations.

An entity whose financial statements and notes comply with all IFRS Accounting Standards requirements must make an explicit and unreserved statement of such compliance in the notes. **Entities that comply with Australian Accounting Standards are not automatically in compliance with IFRS Accounting Standards, particularly** where the Australian specific exemptions for not-for-profit and public sector entities are utilised.

Technically, there is no requirement to state that an entity does not comply with IFRS Accounting Standards.

IFRS 16.50, The Group has classified · cash payments for the principal portion of lease payments as financing activities; IAS 7.17(e) cash payments for the interest portion as operating activities consistent with the presentation of interest payments chosen by the Group (see footnote (e) below); and • short-term lease payments and payments for leases of low-value assets as operating activities. The Group has not restated comparative information. There is no specific guidance in the IFRS Accounting Standards on the classification of cash flows from reverse factoring arrangements. However, in our view IFRS 7.31, 33-34, it is the nature of the activity, rather than the classification of the related item in the statement of financial position, that determines the classification of the cash outflow. Furthermore, in our view, in determining the appropriate classification an entity should apply judgement and assess whether a single cash outflow IAS 7.10-11, 43, Insights or multiple cash flows occur for the entity. The Group presents a single cash outflow for the payments made to the factor (the bank) because it considers the payment to a supplier by the bank not to be a cash transaction of the entity. The Group classifies its cash outflows for payments made to the bank within 2.3.190.30-60, operating activities because it views the principal nature of these payments as related to the purchase of goods and services. The Group has provided disclosure of non-cash transactions (see Note 29) and disclosure of liquidity risk arising from liabilities related to reverse factoring arrangements (see Note 32(C)(iii)). There IU 12-20 may be other acceptable approaches depending on the legal form and structure of reverse factoring arrangements. The Group has used 'profit or loss' as the starting point for presenting operating cash flows using the indirect method. This is the starting point referred to in IAS IAS 7.18, 20, A, 7 Statement of Cash Flows, although the example provided in the appendix to the standard starts with a different figure – 'profit before taxation'. Because the appendix is illustrative only and therefore does not have the same status as the standard, it would be more appropriate to follow the standard. Insights 2.3.30.20 The Group has classified cash flows related to emissions certificates (current intangible assets) within operating activities because they relate to the Group's principle revenue-generating activities and the assets are not considered long-term in nature. The emissions certificates are expected to be realised within d. IAS 7.6, 11, Insights 2.3.20.11 12 months of the reporting date by surrendering them to the government to settle the annual emissions obligation (see Note 22(E)). In determining the classification of cash flows, an entity considers the nature of the activity to which they relate. The Accounting Standards require cash flows from interest and dividends received and paid to be disclosed separately. In our view, such disclosure is required in the IAS 7.31, Insights statement of cash flows, rather than in the notes. In the absence of specific guidance in the IFRS Accounting Standards, an entity chooses an accounting policy, to be applied consistently, for classifying interest and dividends paid as either operating or financing activities, and interest and dividends received as either 2.3.50.10-20 operating or investing activities. The Group has elected to classify cash flows from interest paid as operating activities, cash flows from interest received and dividends received as investing activities, and cash flows from dividends paid as financing activities. Interest paid includes the interest portion of the lease liabilities. See footnotes (a) above and (f) below Insights 2.3.50.38 f. In our view, an entity should choose an accounting policy, to be applied consistently, to classify cash flows related to capitalised interest as follows: • as cash flows from investing activities if the other cash payments to acquire the qualifying asset are reflected as investing activities; or consistently with interest cash flows that are not capitalised. The Group has presented capitalised interest consistently with interest cash flows that are not capitalised.

- **b.** Although it is not required, this categorisation of fees to auditors is encouraged by ASIC to aid in the consistent and transparent reporting of audit and non-audit fee information.
- c. Disclosures are required regardless of whether the entity or a related entity make the payments. Where fees are paid on behalf of the entity by a related party outside the consolidated entity, disclosure as a related party transaction is required.
- d. Half-year audit and review fees for entities in the group are included in 'audit and review services'.

AASB 1054.10,11

S300(2A).

S300(11B)(a)

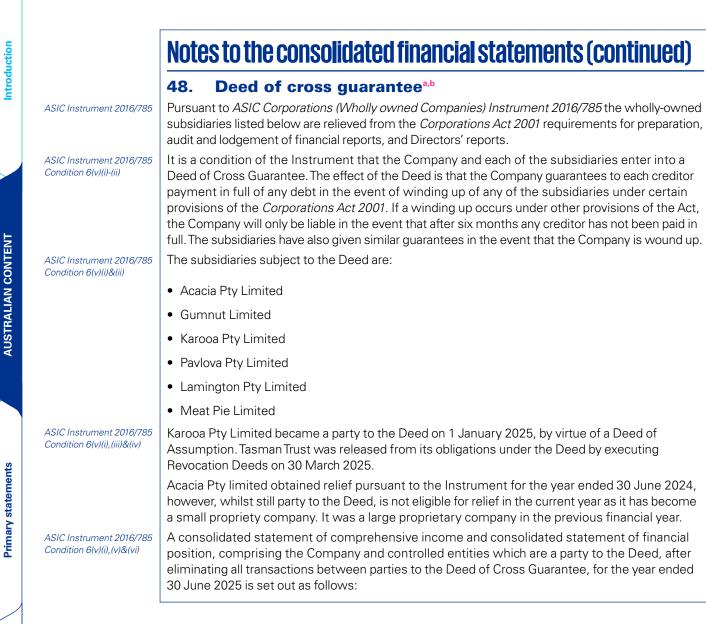

S300(11C)(b)

- e. ASIC encourages fees paid to the Group auditor to be split out separately for those relating to auditing the statutory financial report of the parent covering the consolidated group; and those relating to auditing the statutory financial reports of any controlled entities. This disclosure is provided for illustrative purposes only.
- f. Although it is not required, ASIC encourages entities to split fees for assurance services from fees for non-assurance services. They also encourage assurance services to be further split between "regulatory assurance services" and "other assurance services." This disclosure is provided for illustrative purposes only.

An entity is required to describe the nature of all services provided that do not relate to the audit or review of the financial statements. There is no requirement to provide an amount for each non-audit service.

However, an entity that has not included detailed amounts for all non-audit services in the directors' report but has specified that this information may be found in the financial statements, discloses the amount for each non-audit service in this note in order to comply with the *Corporations Act 2001* requirements.

- 9. Regulatory assurance services are those that are required under legislation and are performed by the auditor, for example, Form FS 71 for an AFS licensee, workers compensation, APRA reports, US Sarbanes-Oxley Act of 2002 Section 404, franchising code of conduct and retirement villages.
- h. Other assurance services are fees for other assurance services other than those included under regulatory assurance, such as those required under contractual arrangements. Examples include, assurance on revenue information relevant to a royalty agreement, sustainability assurance reporting and capital raisings.
- i. Other services are services that do not fall within regulatory or other assurance services e.g. tax advice, tax compliance, consulting.

Summarised consolidated income statement and balance sheet disclosures for each of the following groups of entities ASIC Instrument 2016/785 as at the reporting date must be included in the consolidated financial statements of the Holding Entity: the Closed Group • the group comprising the Holding Entity and all of its controlled entities that are parties to the Deed of Cross Guarantee (i.e. including controlled entities not wholly owned) parties to the Deed of Cross Guarantee which are not controlled entities (either individually or in aggregate). In some circumstances, the disclosures required for each of the above will not differ as all the parties to the Deed of Cross Guarantee will be members of the Closed Group. This is the case in Example Public Company Limited group. These are only the financial report conditions for obtaining relief under the legislative instrument. The legislative instrument must be referred to for full details and conditions. b. Comparative information is only required where the holding entity was a holding entity in a deed of cross guarantee ASIC Instrument 2016/785 at any time during the immediately preceding financial year. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. The parent entity is defending an action brought by an environmental agency in Europe. (a) While liability is not admitted, if defence against the action is unsuccessful, fines and legal costs could amount to \$950 thousand (2024: nil) of which \$250 thousand (2024: nil) would be reimbursable under an insurance policy. Based on legal advice, the directors do not expect the outcome of the action to have a material effect on the parent entity's financial position. In the directors' opinion, disclosure of any further information would be prejudicial to the interests of the Group.

a. Parent entities that are APRA regulated or hold an Australian Financial Services Licence are recommended to continue to present the parent entity financial statements and notes in the group annual report.

S295(3A)(a)

a. These disclosures are applicable for all Australian public companies (listed and unlisted) reporting under *Chapter 2M* of the *Corporations Act 2001* effective for financial years beginning on or after 1 July 2023 i.e. the annual financial reports for 30 June 2024 and onwards. Public companies with a financial year ending 30 June 2024 will have needed to comply with this requirement for their financial year ended 30 June 2024. This requirement is therefore only new for public companies that have not yet reported on or after 30 June 2024, such as a public company with a financial year ending 31 December 2024. For details of Amendments to the CEDS requirements that apply to financial years ending on or after 30 June 2025, see footnote (f). For more information refer to our Reporting update, 25RU-02 | Consolidated Entity Disclosure Statement.

b. The prescribed information must be disclosed for each entity that was, at the end of the financial year, part of the consolidated entity. Prescribed information for an entity disposed of during the year that is no longer part of the consolidated entity at the end of the financial year is not required.

S295(3A)(b) c. Where a public company is not required to prepare consolidated financial statements, a 'Consolidated entity disclosure statement' must still be included. Below is an illustrative disclosure for such a statement: 'Example Public Company Limited is not required by Australian Accounting Standards to prepare consolidated financial statements, and as a result subsection 295(3A)(a) of the Corporations Act 2001 to prepare a Consolidated

Entity Disclosure Statement does not apply to the Company.'d. Comparative information is not required for the prescribed information disclosed in a Consolidated entity disclosure statement.

e. The Consolidated Entity Disclosure Statement information required by the *Corporations Act 2001* must incorporate each entity forming part of the Consolidated Group, not just those considered to be material. This includes newly acquired 'shelf' companies, dormant entities or those that would otherwise be excluded from the company's process to prepare consolidated financial statements on the basis of materiality.

Key assumptions and judgements

Determination of Tax Residency

Section 295 (3A) of the *Corporation Acts 2001* requires that the tax residency of each entity which is included in the Consolidated Entity Disclosure Statement (CEDS) be disclosed. For the purposes of this section, an entity is an Australian resident at the end of a financial year if the entity is:

- a) an Australian resident (within the meaning of the Income Tax Assessment Act 1997) at that time; or
- b) a partnership, with at least one partner being an Australian resident (within the meaning of the *Income Tax Assessment Act 1997*) at that time; or
- c) a resident trust estate (within the meaning of Division 6 of Part III of the *IncomeTax Assessment Act 1936*) in relation to the year of income (within the meaning of that Act) that corresponds to the financial year.

The determination of tax residency involves judgment as the determination of tax residency is highly fact dependent and there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency.

In determining tax residency, the consolidated entity has applied the following interpretations:

Australian tax residency

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Commissioner of Taxation's public guidance in *Tax Ruling TR 2018/5*.

• Foreign tax residency

The consolidated entity has applied current legislation and where available judicial precedent in the determination of foreign tax residency. Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in its determination of tax residency to ensure applicable foreign tax legislation has been complied with.

	f.	In December 2024, the Government enacted amendments to clarify CEDS disclosures for financial year commencing on or after 1 July 2024, i.e. annual financial reports for 30 June 2025 and onwards.
		Amendments and clarifications include:
		• CEDS must identify whether each entity is an Australian tax resident and any foreign jurisdictions where they are tax residents;
		• When partnerships and trusts that are part of the consolidated entity are Australian residents for the purposes of the disclosures.
		The amendments have been reflected in the above illustrative disclosures. These amendments are not required to be reflected in the CEDS for entities with financial years commencing on or before 30 June 2024, i.e. annual financial reports for periods ending on or before 29 June 2025. Such an entity may, however, choose to voluntarily apply these amendments. Any voluntary disclosures are subject to the Directors' declaration for the Consolidated Entity Disclosure Statement of 'true and correct'.
)(a)(iv)	g.	A body corporate is only required to disclose the place at which the entity was incorporated or formed. An entity may wish to voluntarily disclose this information for partnerships and/or trusts. It should be noted that any voluntary disclosures are also subject to the Directors' declaration for the Consolidated Entity Disclosure Statement of 'true and correct'.
	h.	The determination of tax residency is not a straight forward process and may require judgements, entities may consider the guidance from Australian Tax Office, e.g. Working out your residency guidance, <u>Residency requirements</u> guidance, <u>Practical Compliance Guideline – PCG 2018/9</u> when performing an assessment.
	i.	In our view a basis of preparation should be provided to describe the key assumptions and judgements made in determining an entity's tax residency. This may include: what sources were used, what interpretations or judgements were required to be applied due to these sources, what criteria was used to conclude given the judgement applied.

Introduction

AUSTRALIAN CONTENT

Primary statements

Notes

	Directors' declaration
S295(4)	1. In the opinion of the directors of Example Public Company Limited (the 'Company'):
	 a) the consolidated^a financial statements and notes that are set out on pages xx to xxx and the Remuneration report^b in sections xx to xxx in the Directors' report, are in accordance with the <i>Corporations Act 2001</i>, including:
S295(4)(d)(ii)	(i) giving a true and fair view of the Group's ^a financial position as at 30 June 2025 and of its performance for the financial year ended on that date; and
S295(4)(d)(i)	(ii) complying with Australian Accounting Standards and the <i>Corporations Regulations</i> 2001;
S295(4)(da)	b) the Consolidated entity disclosure statement as at 30 June 2025 set out on pages yy is true and correct; and
S295(4)(c), ASIC RG22	c) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
	2. There are reasonable grounds to believe that the Company and the group entities identified in Note 48 will be able to meet any obligations or liabilities to which they are or may become subject to by virtue of the Deed of Cross Guarantee between the Company and those group entities pursuant to ASIC Corporations (Wholly owned Companies) Instrument 2016/785. ^b
S295(4)(e)	 The directors have been given the declarations required by Section 295A of the <i>Corporations</i> Act 2001 from the chief executive officer and chief financial officer for the financial year ended 30 June 2025.
S295(4)(ca)	4. The directors draw attention to Note 2 to the consolidated financial statements, which includes a statement of compliance with International Financial Reporting Standards.
S295(5)(a)	Signed in accordance with a resolution of the directors:
S295(5)(b)	Dated at 2025
S295(5)(c)	[Director_name]
	Director ^c

Appendices

		Entities that are including parent entity financial statements (not only consolidated financial statements) will need to tailor this to reflect the parent entity's financial statements, financial position and performance.
S295(5)	b	The Corporations Act does not require the Directors' declaration to refer to the Remuneration report.

c. The declaration may be signed by more than one director.

Voluntary tax disclosures: Part A

The disclosures on the following pages illustrate one way in which an entity might incorporate Part A of the Tax Transparency Code (The Code) requirements, released by the Board of Taxation in May 2016, within its annual financial statements. The Code disclosures are divided into:

- Part A (Financial statements or other report for businesses with a turnover of AU\$100 million or over)
- Part B ('Taxes Paid' report for businesses with a turnover of A\$500 million or over).

The Code is a voluntary code. An entity may therefore wish to disclose that it is voluntarily adopting the Code, and to what extent it is doing it – whether it is doing Part A and Part B disclosures; and where other taxes might be reported elsewhere.

The Code proposes that where a business is only required to adopt Part A, that the information can be displayed either as improved tax disclosure in its general purpose financial report or in another document. An entity will need to consider whether a separate report would achieve the objectives of the Code, or whether it could include the information in its financial statements in a manner that provides the desired level of transparency and 'plain English' explanation.

Comparative information is not required for the first year of disclosure.

In May 2017, the Australian Accounting Standards Board (AASB), at the request of the Board of Taxation, included an Appendix to the Code, providing draft guidance on implementing the Code. The guidance sets out the necessary disclosures to ensure interested parties can better understand the differences, if any, between the effective tax rate (ETR) under the Code and the accounting ETR prepared in accordance with accounting standards. The calculation of the ETR is consistent with the example included in these financial statements.

On 29 February 2019, the Board of Taxation released a consultation paper which proposed changes to the Code following feedback from earlier consultation sessions. The submission date for feedback was 26 March 2019. At the date of this publication there have been no decisions on changes to the Code.

- a. The reconciliation to the effective income tax expense illustrated in Example Public commences with 'Profit before tax from continuing operations'. To calculate the effective tax rate for continuing and discontinued operations, this reconciling item is required. Where an entity commences from a basis of continuing and discontinued operations, this reconciling item will not be required.
- b. There may be items recognised in or recycled out of other comprehensive income (OCI), or recognised in equity that result in movements in temporary differences. Whilst Example Public Company Limited did not have such items for the years ended 30 June 2025 and 2024, these should be separately disclosed where the client has these and they are material.
- c. This illustrative disclosure cross-references to the note to the financial statements where the net movement in deferred tax balances is further disaggregated. Such detail could be included here rather than providing a cross-reference.
- d. The reconciliation to income taxes payable can also be extended to income taxes paid. Alternatively, the Code states that a reconciliation from income tax expense to income taxes paid could be provided. If presented in the annual financial statements, this would necessitate reconciling the prior year tax expense as taxes are usually paid in the subsequent financial year.

Voluntary tax disclosures: Part A (continued)

Effective tax rates (ETR)

Bases of calculation of each ETR^{a,b,c}

Global operations – Total consolidated tax expense ETR: IFRS calculated total consolidated company income tax expense divided by total consolidated accounting profit on continuing and discontinued operations.

Australian operations – Australian company income tax expense ETR: IFRS calculated company income tax expense for all Australian companies and Australian operations of overseas companies included in these consolidated financial statements, divided by accounting profit derived by all Australian companies and Australian operations of overseas companies included in these consolidated financial statements.

The Company income tax expense ETR: IFRS calculated company income tax expense for the parent Company divided by accounting profit on continuing and discontinued operations for the parent Company.^d

	2025	2024
Percentage		Restated*
ETR ^e		
Global operations – Total consolidated tax expense	31.56%	25.32%
Australian operations – Australian company income tax expense	25.68%	28.81%
The Company income tax expense	35.54%	37.59%

* See Notes 7, 21(H) and 43.

- a. The ETRs should be calculated as company income tax expense divided by accounting profit. Calculation of the ETR based on company tax expense only will enable the users of the disclosure to make comparisons both to the company tax rate and to other companies. The Board of Taxation has specified that the global ETR should be calculated 'for the worldwide accounting consolidated group' of which the Australian operations form a part.
- b. As required in the Code, this example includes company income taxes only. No adjustments have been made for other taxes as Example Public Company Limited does not have taxes other than company income tax that meets the AASB 112 definition of income taxes and therefore is in the scope of AASB 112. Other taxes (for example, government royalties, PRRT) could be included in an additional ETR disclosure. The basis of calculation of the ETR should clearly identify what has been included and any underlying assumptions.
- c. The Code does not specify which entity needs to provide the disclosures, for example the ETR could be calculated on a tax consolidated group basis or on a legal entity basis or another basis. The key to providing transparency is to clearly identify any basis of calculation.
- d. Disclosure of the Company (that is, the parent) ETR is not required by the Code. This is additional to what is required.
- e. While not provided in this illustrative disclosure, an explanation of variances to the domestic company tax rate and movements year on year should be provided.

	Total assets		112,860	90,013	86,344
l					

IAS 1.10	a.	An entity may also use other titles – e.g. 'balance sheet' – as long as the meaning is clear and the title not misleading.
Insights 2.8.50.110	b.	When comparatives are restated, in our view, although it is not specifically required by the Accounting Standards, labelling the comparatives as restated is necessary to highlight that the comparatives are not the same as the financial statements published previously.
IAS 1.10(f), 40A	C.	The Group has presented a third statement of financial position as at the beginning of the preceding period, because the correction of errors (see Note 43) has a material effect on the information in the statement.
IFRS 16.47(a), 48	d.	The Group has presented right-of-use assets that do not meet the definition of investment property within 'property, plant and equipment' – i.e. the same line item in which it presents underlying assets of the same nature that it owns. Alternatively, an entity may choose to present right-of-use assets separately in the statement of financial position. Right-of-use assets that meet the definition of investment property are presented within 'investment property'.
Insights 7.10.40.50	e.	In our view, derivative assets and liabilities should be presented in separate line items in the statement of financial position if they are significant.
IAS 1.60–61	f.	The Group has made a current/non-current distinction in the statement of financial position. An entity may present its assets and liabilities broadly in order of liquidity if such a presentation provides information that is reliable and more relevant. Our publication <u>Guide to annual financial statements – Illustrative disclosures for banks</u> (December 2023) provides an example presentation of assets and liabilities in order of liquidity.
IAS 1.66, Insights 3.1.30	g.	The Group has classified certain intangible assets (emissions allowances) as current (see Note 22(E)) because they are expected to be realised within 12 months of the reporting date. An entity needs to apply the requirements in IAS 1 in determining whether to classify intangible assets as current or non-current.
IFRS 15.B21, BC367	h.	IFRS 15 <i>Revenue from Contracts with Customers</i> and other accounting standards do not specify where assets for rights to recover products from customers with regards to sales with a right of return should be presented. The Group has included these assets within 'inventories' and disclosed them separately in the notes (see Note 17).
IAS 1.54–55, IFRS 15.105, 109, A, BC320–BC321,	i.	Although it is not specifically required, the Group has presented in the statement of financial position line items related to contract assets and contract liabilities. For further guidance on applying the requirements in IAS 1 for classification of contract assets and contract liabilities as current or non-current, see 4.2.510 in <u>Insights into IFRS</u> .
Insights 4.2.510		Although this guide uses the terms 'contract assets' and 'contract liabilities', an entity may also use other terms.
IAS 1.66, Insights 3.1.30	j.	The Group has classified prepayments as current because they relate to the purchase of inventories and are expected to be realised within 12 months of the reporting date. An entity needs to apply the requirements in IAS 1 in determining whether to classify prepayments as current or non-current.

Consolidated statement of financial position (continued)

The notes on pages 27 to 191 are an integral part of these consolidated financial statements.

IFRS 16.47(b)	k.	The Group has presented lease liabilities within 'loans and borrowings'. Alternatively, an entity (a lessee) may choose to present lease liabilities separately from other liabilities in the statement of financial position.
IFRS 15.55	L	The Group has presented its refund liabilities under IFRS 15 as 'trade and other payables'. The Group's returns policy offers only an exchange for another good – i.e. the Group does not offer a cash refund. Therefore, refund liabilities do not meet the definition of a financial liability in IAS 32 <i>Financial Instruments: Presentation</i> . If a refund liability or a liability related to a repurchase agreement meets the definition of a financial liability in IAS 32, then it is subject to the disclosure requirements in IFRS 7 <i>Financial Instruments: Disclosures</i> .
Insights 3.1.10.30, 7.10.35.70–100, IU 12-20	m.	The Group has presented amounts owed for the purchase of goods or services but related to a supplier finance arrangement within 'trade and other payables' because it considers that the nature and function of these payables is not different from other trade payables and therefore, does not warrant a separate presentation on the face of the statement of financial position. In our view, regardless of whether the original trade payable is derecognised, an entity should consider the appropriate presentation of amounts related to supplier finance arrangements in the statement of financial position. The Group has disclosed those amounts separately in the notes. See Note 29.
Insights 7.10.310.10, 30–40, IAS 1.29, IFRS 7.8(e)(ii)	n.	There is no specific guidance in the Accounting Standards on the presentation of embedded derivatives and the related host contracts. The Group has presented its separable embedded derivative liability related to certain convertible notes together with the host contract on the basis that the host and the embedded derivative are subject to the same contract. However, as the separable embedded derivative is mandatorily measured at FVTPL, it is disclosed separately in the notes (see Note 32(A)).

Australian content

PRIMARY STATEMENTS

		statement of profit or loss – we believe that an entity should not include amounts that do not fall in the scope of IFRS 15 (see Note 8).				
IAS 1.82(a), Insights 7.10.70.20	d.	The Group has presented interest income on financial assets that are subsequently measured at amortised cost or FVOCI as part of 'finance income' because it does not consider it as part of its revenue-generating activities. If the interest income, calculated under the effective interest method, constituted revenue, then the entity would be required to separately present that income as interest revenue in the statement of profit or loss and OCI. In our view an entity may present interest income from other financial assets in another revenue line item if it arises in the cour of the entity's ordinary activities.				
IAS 1.99–100	e.	The Group has elected to analyse expenses recognised in profit or loss based on functions within the Group. Alternatively, an entity may present the analysis based on nature if this presentation provides information that is reliable and more relevant. The analysis may also be presented in the notes.				
IAS 1.82(ba), 85, 31, 97, 99, Insights 4.1.20.40	f.	An entity that presents the analysis of expenses by function or by nature in the statement of profit or loss and OCI may face challenges in determining how this presentation interacts with the specific requirements to present the effect of some events or circumstances as a single amount in the statement of profit or loss and OCI – e.g. impairment losses determined under Section 5.5 of IFRS 9 <i>Financial Instruments</i> .				
		The Group has applied judgement in determining an appropriate presentation and disaggregated the impairment loss amount into:				
		 impairment related to trade and other receivables and contract assets, which is presented separately in the statement of profit or loss and OCI; and 				
		• impairment related to investments in debt securities, which is not presented separately but included under 'finance costs' due to materiality considerations.				
		The Group believes that this presentation is relevant to an understanding of its financial performance.				
IAS 1.85, BC55–BC56	g.	The Group has presented a subtotal of 'operating profit'. When an entity presents results from operating activities, it ensures that the amount disclosed is representative of activities that would normally be regarded as 'operating', and it would be inappropriate to exclude items clearly related to operations.				
IAS 1.82(b), IFRS 16.49, 7.IG13	h.	The Group has presented interest expense on the lease liability separately from the depreciation charge for the right- of-use asset. Interest expense on the lease liability is a component of finance costs, which are presented separately in the statement of profit or loss and OCI.				
IFRS 5.33(a)–(b), IAS 1.82(ea)	i.	The Group has elected to disclose a single amount of post-tax profit or loss of discontinued operations in the statement of profit or loss and OCI, and has analysed that single amount into revenue, expenses and the pre-tax profit or loss in Note 7. Alternatively, an entity may present the analysis in the statement.				
IAS 1.90–91	j.	The Group has elected to present individual components of OCI before related tax with an aggregate amount presented for tax in the statement of profit or loss and OCI and has provided disclosures related to tax on each component of OCI in Note 14(B). Alternatively, an entity may present individual components of OCI net of related tax in the statement.				
IFRS 9.6.5.11, 6.5.15, IAS 1.82A(a), Insights 7.10.90.35	k.	IFRS 9 specifies whether and when amounts previously recognised in OCI are reclassified to profit or loss. However, in some circumstances it may be unclear at the time when a gain or loss is recognised in OCI whether it will subsequently be reclassified to profit or loss. For example, if an entity hedges a future purchase of a non-financial item, then the related hedging gains and losses will subsequently be included in the initial cost of the non-financial item and affect profit or loss when the non-financial item is disposed of or written down. Conversely, if the future hedged cash flows are no longer expected to occur or if a loss is no longer expected to be recoverable, then the hedging gains or losses will be reclassified to profit or loss. Accordingly, in our view gains or losses on cash flow hedges and costs of hedging relating to the future recognition of a non-financial asset or liability should be presented in OCI as items that may be subsequently reclassified to profit or loss when specific conditions are met.				
IAS 1.94	I.	The Group has elected to present reclassification adjustments in the statement of profit or loss and OCI. Alternatively, an entity may present these adjustments in the notes.				
IAS 1.85–85B, BC38G,	m.	The Group has disclosed adjusted EBITDA because management believes that this measure is relevant to an understanding of the entity's financial performance. This disclosure is provided for illustrative purposes only.				

The Group has elected to present comprehensive income under a 'one-statement' approach. For an illustration of the

IAS 1 requires the separate presentation of specific line items in the statement of profit or loss. The Group has not

presented certain line items because during the reporting period it did not have events or transactions to be reflected in those line items. See footnotes (c) and (d) below for specific considerations related to separate presentation of line

In our view, an entity is not required to present revenue from contracts with customers as a separate line item in the

statement of profit or loss and may aggregate it with other types of revenue considering the requirements in IAS 1.

However, in providing a separate disclosure of revenue from contracts with customers - either in the notes or in the

IAS 32.33, Insights 7.3.750.10–20 a. The Accounting Standards do not mandate a specific method of presenting treasury shares within equity. However, local laws may prescribe the allocation method. Therefore, an entity needs to take into account its legal environment when choosing how to present its own shares within equity. An entity needs to choose a presentation format, to be applied consistently to all treasury shares. The Group has elected to present the total cost of treasury shares as a separate category of equity.

IG18A, IAS 7.10–11,

а.

b.

The Group has elected to present cash flows from operating activities under the indirect method. Alternatively, an entity may present operating cash flows under the direct method (see Appendix III).

There is no specific guidance in the Accounting Standards on the classification of cash flows from supplier finance arrangements. However, in our view it is the nature of the activity, rather than the classification of the related item in the statement of financial position, that primarily determines the classification of the cash outflow. Furthermore, in our view, in determining the appropriate classification an entity should apply judgement and assess whether a single cash outflow or multiple cash flows occur for the entity. The Group presents a single cash outflow for the payments made to the bank because it considers the payment to a supplier by the bank not to be a cash transaction of the Group. The Group classifies its cash outflows for payments made to the bank within operating activities because it views the principal nature of these payments as related to the purchase of goods and services. There may be other acceptable approaches depending on the legal form and structure of supplier finance arrangements. The Group has provided disclosure to enable understanding of the effects of its supplier finance arrangement on its financial position, financial performance and cash flows (see Note 29 and Note 32(C)(iii)).

IAS 7.18, 20, A, Insights 2.3.30.20	C.	The Group has used 'profit or loss' as the starting point for presenting operating cash flows under the indirect method. This is the starting point referred to in IAS 7 <i>Statement of Cash Flows</i> , although the example provided in the appendix to the accounting standard starts with a different figure – 'profit before taxation'. Because the appendix is illustrative only and therefore does not have the same status as the accounting standard, it would be more appropriate to follow the accounting standard.
IAS 7.6, 11, Insights 2.3.20.11	d.	The Group has classified cash flows related to emissions allowances (current intangible assets) within operating activities because they relate to the Group's principal revenue-generating activities and the assets are not considered long-term in nature. The emissions allowances are expected to be realised within 12 months of the reporting date by surrendering them to the Government to settle the annual emissions obligation (see Note 22(E)). In determining the classification of cash flows, an entity considers the nature of the activity to which they relate.
IFRS 16.50,	е.	The Group has classified:
IAS 7.17(e)		<ul> <li>cash payments for the principal portion of lease payments as financing activities;</li> <li>cash payments for the interest portion of lease payments as operating activities (see footnote (f) below); and</li> <li>short-term lease payments and payments for leases of low-value assets as operating activities.</li> </ul>
IAS 7.31, Insights 2.3.50.10–20	f	The Accounting Standards require cash flows from interest and dividends received and paid to be disclosed separately. In our view, such disclosure is required in the statement of cash flows, rather than in the notes. In the absence of specific guidance in the Accounting Standards, an entity chooses an accounting policy, to be applied consistently, to classify interest and dividends paid as either operating or financing activities, and interest and dividends received as either operating or investing activities. The Group has elected to classify cash flows from interest paid as operating activities, cash flows from interest received and dividends received as investing activities, and cash flows from dividends paid as financing activities.
		Interest paid includes the interest portion of the lease liabilities. See footnotes (e) above and (g) below.
Insights 2.3.50.38	g.	In our view, an entity should choose an accounting policy, to be applied consistently, to classify cash flows related to capitalised interest as follows:
		<ul> <li>as investing activities if the other cash payments to acquire the qualifying asset are reflected as investing activities; or</li> <li>consistently with interest cash flows that are not capitalised.</li> <li>The Group has presented capitalised interest consistently with interest cash flows that are not capitalised.</li> </ul>

Introduction

IAS 1 113-114

а.

Notes are presented, to the extent practicable, in a systematic manner and are cross-referred to/from items in the primary statements. In determining a systematic manner of presentation, an entity considers the effect on the understandability and comparability of the financial statements. The Group has applied judgement in presenting related information together in a manner that it considers to be most relevant to an understanding of its financial performance and financial position. The order presented is only illustrative and entities need to tailor the organisation of the notes to fit their specific circumstances.

IAS 1.10(e)

IAS 1.122

# Notes to the consolidated financial statements (continued)

### 4. Use of judgements and estimates

In preparing these consolidated financial statements, management has made judgements and estimates about the future, including climate-related risks and opportunities, that affect the application of the Group's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis and are consistent with the Group's risk management and climate-related commitments where appropriate. Revisions to estimates are recognised prospectively.

#### A. Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

- Note 8(D): revenue recognition whether revenue from made-to-order paper products is recognised over time or at a point in time;
- Note 24(B): equity-accounted investees whether the Group has significant influence over an investee;
- Note 29: reverse factoring presentation of amounts related to supplier finance arrangements in the statement of financial position and in the statement of cash flows;
- Note 33(A): consolidation whether the Group has de facto control over an investee; and
- Note 37(A): lease term whether the Group is reasonably certain to exercise extension options.

Introduction

vppendices

## 4. Use of judgements and estimates (continued)

### B. Assumptions and estimation uncertainties

IAS 1.125, 129-130

IFRS 13.93(g)

Information about assumptions and estimation uncertainties at the reporting date that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year is included in the following notes:

- Notes 8(D) and 29: revenue recognition estimate of expected returns;
- Note 13(D)(i): measurement of defined benefit obligations key actuarial assumptions;
- Note 14(H): recognition of deferred tax assets availability of future taxable profit against which deductible temporary differences and tax losses carried forward can be utilised;
- Note 14(I): uncertain tax treatments;
- Note 16(B): determining the fair value of biological assets on the basis of significant unobservable inputs;
- Note 20(D): determining the fair value less costs to sell of the disposal group on the basis of significant unobservable inputs;
- Note 22(C): impairment test of intangible assets and goodwill key assumptions underlying recoverable amounts, including the recoverability of development costs;
- Notes 31 and 39: recognition and measurement of provisions and contingencies key assumptions about the likelihood and magnitude of an outflow of resources;
- Note 32(C)(ii): measurement of ECL allowance for trade receivables and contract assets key assumptions in determining the weighted-average loss rate; and
- Notes 34(A) and 34(C): acquisition of subsidiary fair value of the consideration transferred (including contingent consideration) and fair value of the assets acquired and liabilities assumed, measured on a provisional basis.

### i. Measurement of fair values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets, and financial and non-financial liabilities.

The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the chief financial officer.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of the Accounting Standards, including the level in the fair value hierarchy in which the valuations should be classified.

Significant valuation issues are reported to the Group's audit committee.

### 4. Use of judgements and estimates (continued)

### B. Assumptions and estimation uncertainties (continued)

### i. Measurement of fair values (continued)

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note 12(B): share-based payment arrangements;^a
- Note 16(B): biological assets;
- Note 20(D): disposal group held for sale;
- Note 23(C): investment property;
- Note 32(B): financial instruments; and
- Note 34(C)(i): acquisition of subsidiary.^b

**Appendices** 

*IFRS 13.6(a)* a. The Group has included in the list above a reference to the disclosures about the measurement of fair values for share-based payment arrangements. However, the measurement and disclosure requirements of IFRS 13 *Fair Value Measurement* do not apply to these arrangements.

IFRS 13.BC184
 b. The Group has disclosed information about the fair value measurement of assets acquired in a business combination, although the disclosure requirements of IFRS 13 do not apply to the fair value of these assets if they are subsequently measured at other than fair value. This disclosure is provided for illustrative purposes only.

IFRS 13.95

Introduction

Australian content

# Notes to the consolidated financial statements (continued)

## 5. Change in accounting policy^{a, b, c}

### A. Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants

The Group has adopted *Classification of Liabilities as Current or Non-current (Amendments to IAS 1)* and *Non-current Liabilities with Covenants (Amendments to IAS 1)* from 1 January 2024. The amendments apply retrospectively. They clarify certain requirements for determining whether a liability should be classified as current or non-current and require new disclosures for non-current loan liabilities that are subject to covenants within 12 months after the reporting period. This resulted in a change in the accounting policy for the classification of liabilities that can be settled in a Group entity's own shares (e.g. convertible notes issued by a Group entity). Previously, the Group ignored all counterparty conversion options when classifying the related liabilities as current or non-current. Under the new policy, when a liability includes a counterparty conversion option whereby the liability may be settled by a transfer of a Group entity's own shares, the Group takes into account the conversion option in classifying the host liability as current or non-current unless the option is classified as equity under IAS 32. The Group's other liabilities were not impacted by the amendments.

Despite the change in policy, there is no retrospective impact on the comparative statement of financial position, as the Group had no outstanding convertible notes as at 31 December 2023. However, the Group issued new convertible notes during the year ended 31 December 2024, some of which (series B) have conversion options that are classified as liabilities. As such, these convertible notes are impacted by the revised policy. The related liabilities are classified as current at 31 December 2024 because the conversion option can be exercised by the note holders within 12 months after the reporting period (in this case at any time) – i.e. the Group does not have the right to defer settlement for at least 12 months after the reporting date. See Note 28(D).

IAS 8.28	a.	The description of the nature and effects of the changes in accounting policies presented is only an example that reflects the circumstances of the Group, and may not be representative of the nature and effects of the changes for other entities. It is given for illustrative purposes largely without regard to materiality.
		Amendments to accounting standards and interpretations that are effective for annual reporting periods beginning on 1 January 2024 are described in Appendix I.
	b.	The Group chose to present a separate note describing its change in accounting policy since the last annual financial reporting period. Alternatively, this information could be provided in the basis of accounting note – see Note 2.
IAS 1.38	c.	Comparative information is generally required in respect of the preceding period for all amounts reported in the current period's financial statements and, if it is relevant to understanding the current period's financial statements, also for narrative and descriptive information. However, when entities adopt new accounting standards without restating comparative information, the disclosure requirements of the new accounting standards do not normally apply to the comparative period because the comparative information reflects the requirements of the superseded accounting standards.

IAS 1.69–76B, Insights 3.1.50-80

Primary statements

## 6. Operating segments^a

### A. Basis for segmentation

The Group has the following six strategic divisions, which are its reportable segments. These divisions offer different products and services, and are managed separately because they require different technology and marketing strategies.

The following summary describes the operations of each reportable segment.

Reportable segments ^b	Operations
Non-recycled Papers	Buying, manufacturing and distributing pulp and paper
Recycled Papers	Buying, recycling and distributing pulp and paper
Packaging (sold in February 2024; see Note 7)	Designing and manufacturing packaging materials
Forestry	Cultivating and managing forest resources and related services
Timber Products	Manufacturing and distributing softwood lumber, plywood, veneer, composite panels, engineered lumber, raw materials and building materials
Research and Development (R&D)	Conducting research and development activities
The Group's chief executive officer rev	views the internal management reports of each division at

The Group's chief executive officer reviews the internal management reports of each division at least quarterly.

Other operations include the cultivation and sale of farm animals (sheep and cattle), the construction of storage units and warehouses, the rental of investment property and the manufacture of furniture and related parts (see Notes 8 and 16). None of these segments met the quantitative thresholds for reportable segments in 2024 or 2023.

There are varying levels of integration between the Forestry and Timber Products segments, and the Non-recycled Papers and Recycled Papers segments. This integration includes transfers of raw materials and shared distribution services, respectively. Inter-segment pricing is determined on an arm's length basis.

IFRS 8.27–28	a.	Operating segment disclosures are consistent with the information reviewed by the chief operating decision maker (CODM) and will vary from one entity to another and may not be in accordance with the Accounting Standards.
		To help users of the financial statements understand the segment information presented, an entity discloses information about the measurement basis adopted – e.g. the nature and effects of any differences between the measurements used in reporting segment information and those used in the entity's financial statements, the nature and effect of any asymmetrical allocations to reportable segments and reconciliations of segment information to the corresponding amounts reported in the financial statements.
		The Group's internal measures used in reporting segment information are consistent with the Accounting Standards. Therefore, the reconciling items are limited to items that are not allocated to reportable segments, as opposed to a difference in the basis of preparation of the information.
IFRS 8.12, 22(aa)	b.	When two or more operating segments are aggregated into a single operating segment, the judgements made by management in applying the aggregation criteria are disclosed. This includes a brief description of the operating segments that have been aggregated in this way and the economic indicators that have been assessed in determining that the aggregated operating segments share similar economic characteristics.

IFRS 8.23, IAS 1.7, 30-31, 97-98, IU 06-24, Insights 5.2.200.10–27 a.

The Group has disclosed these amounts for each reportable segment because they are either included in the segment measure of profit or loss reviewed by the CODM or otherwise regularly provided to the CODM. The Group applied judgement and considered a number of factors, including the core principle of IFRS 8 *Operating Segments*, to determine the material items of income and expense to disclose for each reportable segment.

b. IFRS 8 does not specify the disclosure requirements for a discontinued operation; nevertheless, if the CODM regularly reviews the financial results of the discontinued operation (e.g. until the discontinuance is completed), and the definition of an operating segment is otherwise met, then an entity may need to disclose such information to meet the core principle of IFRS 8. This will depend on the entity's specific facts and circumstances.

### D. Geographic information^{a, b}

IFRS 8.33(a)-(b)

The Non-recycled Papers, Recycled Papers and Forestry segments are managed on a worldwide basis, but operate manufacturing facilities and sales offices primarily in [*Country X*], the Netherlands, Germany, the UK and the US.

The geographic information analyses the Group's revenue and non-current assets by the Company's country of domicile and other countries. In presenting the geographic information, segment revenue has been based on the geographic location of customers and segment assets were based on the geographic location of the assets.

Insights 5.2.220.20	a.	In our view, entity-wide disclosures by region (e.g. Europe or Asia) do not meet the requirement to disclose information by individual foreign country (e.g. France, the Netherlands or Singapore) when it is material.
IFRS 8.32, IG5	b.	As part of the required 'entity-wide disclosures', an entity discloses revenue from external customers for each product and service, or each group of similar products and services, regardless of whether the information is used by the CODM in assessing segment performance. This disclosure is based on the financial information used to produce the entity's financial statements. The Group has not provided additional disclosures in this regard, because the Group has already met that disclosure requirement by providing the external revenue information in Note 6(B), which has been prepared in accordance with the Accounting Standards, and the disaggregated revenue information in Note 8.

Non-current assets exclude financial investments (other than equity-accounted investees), deferred tax assets and employee benefit assets.^a

#### E. Major customer

Revenues from one customer of the Group's Non-recycled Papers and Recycled Papers segments represented approximately EUR 20,000 thousand (2023: EUR 17,500 thousand) of the Group's total revenues.

Introduction

Australian content

Primary statements

IFRS 8.24(a), 33(b) a.

a. The Group has disclosed the equity-accounted investees as the geographic information of non-current assets because they are regularly provided to the CODM. IFRS 8 does not specify which financial instruments are excluded from non-current assets reported in the geographic information.

#### **Discontinued operation** 7.

See accounting policy in Note 44(C).

In February 2024, the Group sold its entire Packaging segment (see Note 6). Management committed to a plan to sell this segment early in 2024, following a strategic decision to place greater focus on the Group's key competencies - i.e. the manufacture of paper used in the printing industry, forestry and the manufacture of timber products.

The Packaging segment was not previously classified as held-for-sale or as a discontinued operation. The comparative consolidated statement of profit or loss and OCI has been re-presented to show the discontinued operation separately from continuing operations.

Subsequent to the disposal, the Group has continued to purchase packaging from the discontinued operation. Although intra-group transactions have been fully eliminated in the consolidated financial results, management has elected to attribute the elimination of transactions between the continuing operations and the discontinued operation before the disposal in a way that reflects the continuance of these transactions subsequent to the disposal, because management believes this is useful to the users of the financial statements.

To achieve this presentation, management has eliminated from the results of the discontinued operation the inter-segment sales (and costs thereof, less unrealised profits) made before its disposal. Because purchases from the discontinued operation will continue after the disposal, inter-segment purchases made by the continuing operations before the disposal are retained in continuing operations.

IAS 1.98(e)	A. Results of discontinued operation ^a			
	In thousands of EUR	Note	2024	2023
IFRS 5.33(b)(i)	Revenue		8,483	26,028
	Elimination of inter-segment revenue		(940)	(2,835)
	External revenue		7,543	23,193
IFRS 5.33(b)(i)	Expenses		(8,641)	(26,486)
	Elimination of expenses related to inter-segment sales		936	2,827
	External expenses		(7,705)	(23,659)
IFRS 5.33(b)(i)	Results from operating activities		(162)	(466)

IFRS 5.33(b)(ii), IAS 12.81(h)(i)	Income tax on gain on sale of discontinued operation	14(A)	(330)	-
IFRS 5.33(a)	Profit (loss) from discontinued operations, net of tax		379	(422)
IAS 33.68	Basic earnings (loss) per share (EUR) ^b	11	0.12	(0.14)
IAS 33.68	Diluted earnings (loss) per share (EUR) ^b	11	0.12	(0.14)
IFRS 5.33(d)	The profit from the discontinued operation of EUR 379 thousand	d (2023: loss o	of EUR 422 t	thousand)

is attributable entirely to the owners of the Company. Of the profit from continuing operations of EUR 7,173 thousand (2023: EUR 6,396 thousand), an amount of EUR 6,676 thousand is attributable to the owners of the Company (2023: EUR 6,045 thousand).

IFRS 5.30, 41(a)-(b),

41(d)

In our view, considering that IFRS 5 does not specify how the elimination should be attributed to continuing and discontinued operations (see Note 6(B)–(C)), an entity may present transactions between the continuing and discontinued operations in a way that reflects the continuance of those transactions, when that is useful to the users of the financial statements. It may be appropriate to present additional disclosure either on the face of the statement of profit or loss and OCI or in the notes. In our experience, if the additional disclosure is provided in the statement of profit or loss and OCI, then judgement may be required over whether the disaggregated information should be presented as part of the statement itself or as an additional disclosure alongside the totals in that statement. Clear disclosure of the approach taken to the elimination of intra-group transactions will be relevant, including an explanation of any additional analysis of discontinued operations in the notes to the statement of profit or loss and OCI.

b. The Group has elected to present basic and diluted EPS for the discontinued operation in the notes. Alternatively, basic and diluted EPS for the discontinued operation may be presented in the statement of profit or loss and OCI. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. Insights 5.4.220.50

In our view, there are numerous ways in which the requirements of IFRS 5 and IAS 7 on cash flow presentation may be met. The Group has elected to present:

• a statement of cash flows that includes an analysis of all cash flows in total: i.e. including both continuing and discontinued operations; and

• amounts related to discontinued operations by operating, investing and financing activities in the notes.

Alternatively, cash flows attributable to operating, investing and financing activities of discontinued operations can be presented separately in the statement of cash flows.

### 8. Revenue^a

#### A. Revenue streams

The Group generates revenue primarily from the sale of paper and timber products and provision of forestry services to its customers (see Note 6(A)). Other sources of revenue include rental income from owned and leased investment properties and immaterial amounts related to hedge accounting and hedging gains.

		Contin operat	-	Discont opera (see No	tion	То	tal

Total revenue		102,860	96,719	7,543	23,193	110,403	119,912

IFRS 15.119(b), IFRS 15 requires an entity to provide disclosure about costs to obtain or fulfil a contract with a customer. The Group a. 127-128 does not incur such costs, and therefore the related disclosures are not illustrated in this guide. Similarly, the Group has determined that its contracts with customers do not contain a significant financing component, and therefore the related disclosures are not illustrated. IERS 15 113 b. In providing a separate disclosure of revenue from contracts with customers - either in the notes or in the statement IAS 1.29-30, 85, of profit or loss - we believe that an entity should not include amounts that do not fall in the scope of IFRS 15. Insights 4.2.560.25 IFRS 9.B6.5.29(a), When an entity hedges a sale, whether in a forecast transaction or a firm commitment, the costs of hedging related c. Insights 7.10.167.20 to that sale are reclassified to profit or loss as part of the cost related to that sale in the same period as the revenue from the hedged sale is recognised. In our view, when these costs of hedging are reclassified to profit or loss, an entity may choose an accounting policy, to be applied consistently, to present them: • as revenue: because they relate to a hedge of revenue. However, they should not be presented or disclosed as revenue from contracts with customers in the scope of IFRS 15, because they are not; or • in another appropriate line item of income or expense: because the term 'cost related to that sale' could be interpreted as precluding presentation as revenue. The Group has chosen to present the costs of hedging related to sales transactions as revenue.

### 8. Revenue (continued)

#### B. Disaggregation of revenue from contracts with customers

In the following table, revenue from contracts with customers (including revenue related to a discontinued operation) is disaggregated by primary geographical market, major products and service lines and timing of revenue recognition. The table also includes a reconciliation of the disaggregated revenue with the Group's reportable segments (see Note 6).^{a, b, c}

#### IFRS 15.114, B87– B89. IE210–IE211

IFRS 15.115

The extent to which an entity's revenue is disaggregated for the purpose of this disclosure depends on the facts and circumstances of the entity's contracts with customers.

In determining the appropriate categories, an entity considers how revenue is disaggregated in:

- disclosures presented outside the financial statements: e.g. earnings releases, annual reports or investor presentations;
- information reviewed by the CODM for evaluating the financial performance of operating segments; and
- other similar information that is used by the entity or users of the entity's financial statements to evaluate
  performance or make resource allocation decisions.

For example, if in the front part of an annual report an entity provides information about its revenue by type of good or service and by geographic region, then the disclosure in the financial statements needs to provide a consistent disaggregation – i.e. by type of good or service and by geographic region.

Examples of categories that might be appropriate in disclosing disaggregated revenue include, but are not limited to, the following.

TYPE OF CATEGORY	Example
Type of good or service	Major product lines
Geographic region	Country or region
Market or type of customer	Government and non-government customers
Type of contract	Fixed-price and time-and-materials contracts
Contract duration	Short-term and long-term contracts
Timing of transfer of goods or services	<ul><li>Goods or services transferred to customers:</li><li>at a point in time</li><li>over time</li></ul>

## 8. Revenue (continued)

### C. Contract balances

The following table provides information about receivables, contract assets and contract liabilities from contracts with customers.

In thousands of EUR	Note	31 December 2024	31 December 2023
Receivables, which are included in 'trade and other receivables'	18	32,092	22,010
Receivables, which are included in 'assets held for sale'	20	3,496	-
Contract assets		1,271	782
Contract liabilities		(160)	(166)

The contract assets primarily relate to the Group's rights to consideration for work completed but not billed at the reporting date on made-to-order paper products. The contract assets were impacted by an impairment charge of EUR 4 thousand (2023: EUR 2 thousand). There was no impact on contract assets as a result of an acquisition of the subsidiary (see Note 34). The contract assets are transferred to receivables when the rights become unconditional. This usually occurs when the Group issues an invoice to the customer.

The contract liabilities primarily relate to the advance consideration received from customers for construction of storage units and warehouses, for which revenue is recognised over time, and to the unredeemed customer loyalty points. The amount of unredeemed customer loyalty points is EUR 50 thousand (2023: EUR 2 thousand). This will be recognised as revenue when the points are redeemed by customers, which is expected to occur over the next two years.

The amount of EUR 166 thousand included in contract liabilities at 31 December 2023 has been recognised as revenue in 2024 (2023: EUR 140 thousand).

The amount of revenue recognised in 2024 from performance obligations satisfied (or partially satisfied) in previous periods is EUR 8 thousand (2023: EUR 4 thousand). This is mainly due to changes in the estimate of the stage of completion of construction of storage units and warehouses.

No information is provided about remaining performance obligations at 31 December 2024 or at 31 December 2023 that are part of contracts that have an original expected duration of one year or less, as allowed by IFRS 15.

IFRS 15.119, 123–126, IAS 1.122 D.

### Performance obligations and revenue recognition policies^a

Revenue is measured based on the consideration specified in a contract with a customer. The Group recognises revenue when it transfers control over a good or service to a customer.

The following table provides information about the nature and timing of the satisfaction of performance obligations in contracts with customers, including significant payment terms, and the related revenue recognition policies. For the accounting policy for onerous contracts, see Note 44(T).

Type of product/service	Nature and timing of satisfaction of performance obligations, including significant payment terms	Revenue recognition policies
Standard paper products	Customers obtain control of standard paper products when the goods are delivered to and have been accepted at	Revenue is recognised when the goods are delivered and have been accepted by customers at their premises.
	their premises. Invoices are generated at that point in time. Invoices are usually payable within 30 days. No discounts are provided for standard paper products, but customers may earn loyalty points instead (see Loyalty programme).	For contracts that permit the customer to return an item, revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur.
	Some contracts permit the customer to return an item. Returned goods are exchanged only for new goods – i.e. no cash refunds are offered.	Therefore, the amount of revenue recognised is adjusted for expected returns, which are estimated based on the historical data for specific types of paper, size, finish etc. In these circumstances, a refund liability and a right to recover returned goods asset are recognised.
		The right to recover returned goods asset is measured at the former carrying amount of the inventory less any expected costs to recover goods. The refund liability is included in other payables (see Note 29) and the right to recover returned goods is included in inventory (see Note 17). The Group reviews its estimate of expected returns at each reporting date and updates the amounts of the asset and liability accordingly.
Made-to-order paper products	The Group has determined that for made- to-order paper products, the customer controls all of the work in progress as the products are being manufactured. This is because under those contracts paper products are made to a customer's specification and if a contract is terminated by the customer, then the Group is entitled to reimbursement of the costs incurred to date, including a reasonable margin.	Revenue and associated costs are recognised over time – i.e. before the goods are delivered to the customers' premises. Progress is determined based on the cost-to-cost method because the customer obtains control of the work in progress as the made-to-order paper products are being manufactured, and the cost measure faithfully depicts the transformation of the work in progress.
	Invoices are issued according to contractual terms and are usually payable within 30 days. Uninvoiced amounts are presented as contract assets. Customers may earn loyalty points (see Loyalty programme).	

IAS 1.117–117E

a. The Group presents material accounting policies related to revenue from contracts with customers in the revenue note, rather than in a separate note with other material accounting policies (see Note 44). Other approaches to presenting accounting policies may be acceptable.

## 8. Revenue (continued)

#### IFRS 15.119, 123–126, D IAS 1.122

D.	Performance obligations and	revenue recognition	policies (continued)

Type of product/service	Nature and timing of satisfaction of performance obligations, including significant payment terms	Revenue recognition policies
Timber products	Customers obtain control of timber products when the goods are dispatched from the Group's warehouse. Invoices are generated and revenue is recognised at that point in time. Invoices are usually payable within 30 days. No discounts, loyalty points or returns are offered for timber products.	Revenue is recognised when the goods are dispatched from the Group's warehouse.
Loyalty programme	Customers who purchase paper products may enter the Group's customer loyalty programme and earn points that are redeemable against any future purchases of the Group's products. The points accumulate and do not expire.	The Group allocates a portion of the consideration received to loyalty points. This allocation is based on the relative stand-alone selling prices. The amount allocated to the loyalty programme is deferred, and is recognised as revenue when loyalty points are redeemed or the likelihood of the customer redeeming the loyalty points becomes remote. The deferred revenue is included in contract liabilities.
Managing forest resources services and related services	Invoices for forestry services are issued on a monthly basis and are usually payable within 30 days.	Revenue is recognised over time as the services are provided. The stage of completion for determining the amount of revenue to recognise is assessed based on surveys of work performed.
		If the services under a single arrangement are rendered in different reporting periods, then the consideration is allocated based on their relative stand- alone selling prices. The stand-alone selling price is determined based on the list prices at which the Group sells the services in separate transactions.
Construction contracts	The Group builds storage units and warehouses for customers in the Timber Products segment based on their designs and on their land. Each	Revenue is recognised over time based on the cost-to-cost method. The related costs are recognised in profit or loss when they are incurred.
	project commences on receipt of a full prepayment from a customer and its length depends on the complexity of the design. However, projects usually do not extend beyond six months.	Advances received are included in contract liabilities.

## 12. Share-based payment arrangements^a

See accounting policy in Note 44(E)(ii).

IFRS 2.44-45(a), 50

#### **Description of share-based payment arrangements** Α.

At 31 December 2024, the Group had the following share-based payment arrangements.

#### Share option programmes (equity-settled) i.

On 1 January 2020 and 1 January 2023, the Group established share option programmes that entitle key management personnel to purchase shares in the Company. On 1 January 2024, a further grant on similar terms was offered to key management personnel and senior employees. Under these programmes, holders of vested options are entitled to purchase shares at the market price of the shares at grant date. Currently, these programmes are limited to key management personnel and other senior employees.

The key terms and conditions related to the grants under these programmes are as follows; all options are to be settled by the physical delivery of shares.

Grant date/employees entitled	Number of instruments in thousands	Vesting conditions	Contractual life of options
Options granted to key management personnel			
On 1 January 2020	400	3 years' service from grant date and 5% increase in operating income in each of the 3 years	7 years
On 1 January 2023	200	Same as above	10 years
On 1 January 2024	225	Same as above	10 years
Options granted to senior employees			
On 1 January 2024	100	3 years' service from grant date	10 years
Total share options	925		

#### ii. **Replacement awards (equity-settled)**

In connection with the acquisition of Papyrus, the Group exchanged equity-settled share-based payment awards held by employees of Papyrus for 150,000 equity-settled share-based payment awards of the Company with a contractual life of nine years from the vesting date (see Note 34(A)(ii)).

#### Share purchase plan (equity-settled) iii.

On 1 January 2024, the Group offered 26 of its employees the opportunity to participate in an employee share purchase plan. To participate in the plan, the employees are required to save an amount of 5 percent of their gross monthly salary, up to a maximum of EUR 300 per month, for a period of 36 months. Under the terms of the plan, at the end of the 36-month period the employees are entitled to purchase shares using funds saved at a price of 20 percent below the market price at grant date. Only employees who remain in service and save the required amount of their gross monthly salary for 36 consecutive months will become entitled to purchase the shares. Employees who cease their employment, do not save the required amount of their gross monthly salary in any month before the 36-month period expires, or elect not to exercise their options to purchase shares will be refunded their saved amounts.

#### iv. Share appreciation rights (cash-settled)

Liability limited by a scheme approved under Professional Standards Legislation.

On 1 January 2019 and 1 January 2024, the Group granted 100,000 and 300,000 share appreciation rights (SARs), respectively, to employees that entitle them to a cash payment after three years of service. The SARs expire at the end of a five-year period after grant date. The amount of the cash payment is determined based on the increase in the share price of the Company between grant date and the time of exercise.

ASIC Instrument 2016/191

Where ASIC Instrument 2016/191 is applied in the financial statements, certain share-based payment disclosures are subject to the exception of the rounding provisions. This exception is not reflected in this international-based illustrative disclosure. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English

Introduction

### 12. Share-based payment arrangements (continued)

### A. Description of share-based payment arrangements (continued)

### iv. Share appreciation rights (cash-settled) (continued)

Details of the liabilities arising from the SARs were as follows.

In thousands of EUR	Note	2024	2023
Total carrying amount of liabilities for SARs	13	440	380
Total intrinsic value of liabilities for vested benefits		-	380

The liabilities at 31 December 2023 were settled during 2024.

#### **B.** Measurement of fair values

### i. Equity-settled share-based payment arrangements

The fair value of the employee share purchase plan (see (A)(iii)) has been measured using a Monte Carlo simulation. The fair value of the employee share options (see (A)(i) and (A)(ii)) has been measured using the Black-Scholes formula. Service and non-market performance conditions attached to the arrangements were not taken into account in measuring fair value.

The requirement that the employee has to save in order to purchase shares under the share purchase plan has been incorporated into the fair value at grant date by applying a discount to the valuation obtained. The discount has been determined by estimating the probability that the employee will stop saving based on historical behaviour.

The inputs used in the measurement of the fair values at grant date of the equity-settled share-based payment plans were as follows.

	Share option programmes				
	Key management personnel (see (A)(i))		Senior employees (see (A)(i))	Replacement awards (see (A)(ii))	Share purchase plan (see (A)(iii))
	2024	2023	2024	2024	2024
	EUR	EUR	EUR	EUR	EUR
Fair value at grant date	3.54	3.72	3.14	3.81	4.02
Share price at grant date	EUR	EUR	EUR	EUR	EUR
	10.10	10.50	10.10	10.30	10.10
Exercise price	EUR	EUR	EUR	EUR	EUR
	10.10	10.50	10.10	10.30	8.08
Expected volatility					
(weighted average)	46.6%	48.7%	45.7%	<b>52.0%</b>	<b>46.1%</b>
Expected life (weighted average)	8.6 years	8.8 years	5.4 years	5.9 years	3.0 years
Expected dividends	3.2%	3.2%	3.2%	3.2%	N/A
Risk-free interest rate (based on					
government bonds)	1.0%	0.2%	0.9%	1.5%	0.8%

Expected volatility has been based on an evaluation of the historical volatility of the Company's share price, particularly over the historical period commensurate with the expected term. The expected term of the instruments has been based on historical experience and general option holder behaviour.

At 31 December 2024, a total amount of EUR 78 thousand was invested by the participants in the share purchase plan (see Note 40(B)(i)) and has been included in 'other trade payables' (see Note 29).

## 12. Share-based payment arrangements (continued)

### B. Measurement of fair values (continued)

#### ii. Cash-settled share-based payment arrangement^a

The fair value of the SARs (see Note 12(A)(iv)) has been measured using the Black-Scholes formula. Service and non-market performance conditions attached to the arrangement were not taken into account in measuring fair value.

The inputs used in the measurement of the fair values at grant date and measurement date of the SARs were as follows.

	Grant date 1 January 2024	Measurement date 31 December 2024
Fair value	EUR 2.82	EUR 4.40
Share price	EUR 10.10	EUR 12.70
Exercise price	EUR 10.10	EUR 10.10
Expected volatility (weighted average)	46.4%	<b>48.5%</b>
Expected life (weighted average)	3.2 years	2.8 years
Expected dividends	3.2%	3.3%
Risk-free interest rate (based on government bonds)	0.8%	1.6%

Expected volatility has been based on an evaluation of the historical volatility of the Company's share price, particularly over the historical period commensurate with the expected term. The expected term of the instruments has been based on historical experience and general option holder behaviour.

#### C. Reconciliation of outstanding share options

IFRS 2.45(b)

IFRS 2.33A

IFRS 2.52

IFRS 2.45(b)(i) IFRS 2.45(b)(iii) IFRS 2.45(b)(iv) IFRS 2.45(b)(vi) IFRS 2.45(b)(vii) IFRS 2.45(b)(vii)

IFRS 2.45(c)

The number and weighted-average exercise prices of share options under the share option programmes (see Note 12(A)(i)) and replacement awards (see Note 12(A)(ii)) were as follows.

	20	24	203	23
In thousands of options	Number of options	Weighted- average exercise price	Number of options	Weighted- average exercise price
Outstanding at 1 January	550	EUR 10.18	400	EUR 10.00
Forfeited during the year	(50)	EUR 10.00	(50)	EUR 10.00
Exercised during the year	(5)	EUR 10.00	-	-
Granted during the year	505	EUR 10.04	200	EUR 10.50
Outstanding at 31 December	1,000	EUR 10.12	550	EUR 10.18
Exercisable at 31 December	295	EUR 10.00	350	EUR 10.00

The options outstanding at 31 December 2024 had an exercise price in the range of EUR 8.08 to EUR 10.50 (2023: EUR 10.00 to EUR 10.50) and a weighted-average remaining contractual life of 6.4 years (2023: 5.2 years).

The weighted-average share price at the date of exercise for share options exercised in 2024 was EUR 10.70 (2023 no options exercised).

### D. Expense recognised in profit or loss

For details of the related employee benefit expenses, see Note 13(E).

NOTES

Insights 4.5.1000.10  Although it is not specifically required by IFRS 2, the Group has disclosed information about the fair value measurement of its SARs. In our view, these disclosures should be provided for cash-settled share-based payments.
 For awards granted during the period, disclosures about fair value measurement at grant date and at the reporting date should be given; for awards granted in previous periods but unexercised at the reporting date, disclosures about fair value measurement at the reporting date should be given.

## **13. Employee benefits**

See accounting policies in Note 44(E).

In thousands of EUR	Note	2024	2023
Net defined benefit asset		(671)	(731)
Total employee benefit asset		(671)	(731)
Net defined benefit liability		285	280
Liability for social security contributions		8	5
Liability for long-service leave		199	176
Cash-settled share-based payment liability	12	440	380
Total employee benefit liabilities		932	841
Non-current		912	453
Current ^a		20	388
		932	841

For details on the related employee benefit expenses, see Note 13(E).

The Group contributes to the following post-employment defined benefit plans in [*Countries X and Y*].

- Plan A entitles a retired employee to receive an annual pension payment. Directors and executive officers (see Note 40(B)(i)) retire at age 60 and are entitled to receive annual payments equal to 70 percent of their final salary until the age of 65, at which time their entitlement falls to 50 percent of their final salary. Other retired employees are entitled to receive annual payments equal to 1/60 of final salary for each year of service that the employee provided.
- Plan B reimburses certain medical costs for retired employees.

The defined benefit plans are administered by a single pension fund that is legally separated from the Group. The board of the pension fund comprises three employee and two employer representatives and an independent chair. The board of the pension fund is required by law to act in the best interests of the plan participants and is responsible for setting certain policies (e.g. investment, contribution and indexation policies) of the fund.

These defined benefit plans expose the Group to actuarial risks, such as longevity risk, currency risk, interest rate risk and market (investment) risk.

### A. Funding

Plan A is fully funded by the Group's subsidiaries, except for the obligation for directors and executive officers, which is funded by the Company. The funding requirements are based on the pension fund's actuarial measurement framework set out in the funding policies of the plan. The funding of Plan A is based on a separate actuarial valuation for funding purposes for which the assumptions may differ from the assumptions set out in (D). Employees are not required to contribute to the plans. Plan B is unfunded.

The Group has determined that, in accordance with the terms and conditions of the defined benefit plans, and in accordance with statutory requirements (including minimum funding requirements for Plan A) for the plans of the respective jurisdictions, the present value of refunds or reductions in future contributions is not lower than the balance of the total fair value of the plan assets less the total present value of obligations. This determination has been made on a planby-plan basis. As such, no decrease in the defined benefit asset was necessary at 31 December 2024 or 31 December 2023.

IAS 19.147(b)

The Group expects to pay EUR 350 thousand in contributions to its defined benefit plans in 2025.

IAS 1.69, 19.133

a. Although it is not required to distinguish the current and non-current portions of assets and liabilities arising from post-employment benefits, the Group distinguishes between the current and non-current portions of obligations arising from long-term employee benefits if it does not have the right to defer settlement of the liability at least 12 months from the reporting date.

plan amendment, the Group's defined benefit obligation decreased by EUR 100 thousand (2023: nil). A corresponding past service credit was recognised in profit or loss during 2024.

IAS 19.138	a.	The Group has more than one defined benefit plan and has generally provided aggregated disclosures in respect of these plans, on the basis that they are not exposed to materially different risks. Further disaggregation of some or all of the disclosures – e.g. by geographic locations or by different characteristics – would be required if this were not the case.
	b.	Although it is not specifically required by IAS 19 <i>Employee Benefits</i> , the Group has disclosed the subtotals of items recognised in profit or loss and OCI. This disclosure is provided for illustrative purposes only.
IAS 21.39, Insights 4.4.1010	C.	A net obligation under a defined benefit plan may be denominated in a foreign currency from the point of view of the sponsor's financial statements. In our view, in that case the net defined benefit liability (asset) should first be calculated in the currency in which it is denominated, and the resulting net amount should then be translated into the sponsor's functional currency. As a result, the foreign exchange gain or loss arising on translation will be recognised together with other foreign exchange gains and losses, rather than as part of the IAS 19 remeasurement. This is different from the situation illustrated above. In this case, the sponsor of the plan is a foreign subsidiary, and therefore the translation difference is recognised in OCI in the usual way.

At each reporting date, an Asset-Liability Matching study is performed by the pension fund's asset manager, in which the consequences of the strategic investment policies are analysed. The strategic investment policy of the pension fund can be summarised as follows:

- a strategic asset mix comprising 40–50 percent equity securities, 40–50 percent government bonds and 0–15 percent other investments;
- interest rate risk is managed with the objective of reducing the cash flow interest rate risk by 40 percent through the use of debt instruments (government bonds) and interest rate swaps;
- currency risk is managed with the objective of reducing the risk by 30 percent through the use of forward foreign currency contracts; and
- longevity risk is managed with the objective of reducing the risk by 25 percent through the use of longevity swaps.

IAS 12.81(h)(i)-(ii)

88

IAS 12.81(d)

Tax Transparency Code - Part A

3 13 580 20-80

Insiahts

'Tax expense on continuing operations' excludes the Group's share of the tax expense of equityaccounted investees^e of EUR 492 thousand (2023: EUR 261 thousand), which has been included in 'share of profit of equity-accounted investees, net of tax'. The amount also excludes the tax income from the discontinued operation of EUR 25 thousand (2023: EUR 44 thousand) and the tax expense on the gain on sale of the discontinued operation of EUR 330 thousand (2023: nil); both of these have been included in 'profit (loss) from discontinued operation, net of tax' (see Note 7). In December 2024, a new corporate tax law was enacted in France. Consequently, as of 1 July

IAS 10.22(h), 12.81(d), 2025, the corporate tax rate in France will be reduced from 30 to 29 percent. This change resulted in a gain of EUR 15 thousand related to the remeasurement of deferred tax assets and liabilities of the Group's French subsidiary, Baguette S.A., being recognised during the year ended 31 December 2024. In addition, on 23 March 2025, an increase in the corporate tax rate in the Netherlands from 25 to 30 percent was substantively enacted, effective from 1 January 2026. This increase does not affect the amounts of current or deferred income taxes recognised at 31 December 2024. However, this change will increase the Group's future current tax charge accordingly. If the new tax rate were applied to calculate taxable temporary differences and tax losses recognised as at 31 December 2024, then the net deferred tax assets would increase by EUR 27 thousand.

In December 2023, numerous changes to the tax law were enacted in Denmark, including a decrease in the corporate tax rate from 35 to 21 percent. This change resulted in a gain of EUR 5 thousand related to the remeasurement of deferred tax assets and liabilities of the Group's consolidated Danish entity, Mermaid A/S, being recognised during the year ended 31 December 2023.

The changes in tax laws and the tax rates disclosed or applied throughout this guide to calculate the tax impact a. amounts are for illustrative purposes only and do not reflect actual changes in tax laws or corporate tax rates in the respective jurisdictions. In practice, the applicable changes in tax laws need to be considered and tax rates of the respective entities need to be used. All tax impacts in this guide are calculated using the Company's domestic tax rate of 33 percent, except for global minimum top-up tax.

b. Refer to Australian content: Note 14 Income taxes for additional Australia specific disclosures.

The Tax Transparency Code (the Code) released by the Board of Taxation requires businesses with a turnover of AU\$100 million or over to voluntarily disclose additional tax information in their financial statements or other report. Such additional disclosures are included in Part A of the Code. Refer to Voluntary tax disclosures - Part A for an example that illustrates one way in which an entity might incorporate additional disclosure requirements in Part A of the Code within its annual financial statements. The Group has allocated the entire amount of current income tax related to cash contributions to funded post-employment benefit plans to profit or loss because the cash contributions relate primarily to service costs. In our view, the allocation of the current income tax effect to profit or loss and OCI should reflect the nature of the cash contribution, unless it is impracticable to identify whether the cost to which the funding relates affects profit or loss or OCI. We believe that if the nature of the cash contribution is unclear, then an entity may choose an accounting policy, to be applied consistently, based on one of three

specific approaches. For further information about the three approaches, see Insights into IFRS 3.13.580.30. Although it is not specifically required, the Group has disclosed the share of tax of equity-accounted investees. This disclosure is provided for illustrative purposes only.

IAS 12.85 a. The Group's reconciliation of the effective tax rate is based on its domestic tax rate, with a reconciling item in respect of tax rates applied by Group companies in other jurisdictions. The reconciliation of the effective tax rate is based on an applicable tax rate that provides the most meaningful information to users. In some cases, it might be more meaningful to aggregate separate reconciliations prepared using the domestic tax rate in each individual jurisdiction. IAS 12.81(c) b. Rather than presenting either a numerical reconciliation between total tax expense and the product of accounting profit multiplied by the applicable tax rates, or a numerical reconciliation between the average effective tax rate and the applicable tax rate, the Group has elected to present both. C. IAS 12 does not provide specific guidance on how to reflect the impact of global minimum top-up tax in the reconciliation of the effective tax rate. The Group has disclosed a separate line item for the total amount of top-up tax levied on the Group in 2024 to aid users' understanding of the impact. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English

IAS 12.81(g), Insights 3.13.640.60	a.	IAS 12 requires disclosure of the amount of recognised deferred tax assets and liabilities in respect of each type of temporary difference. The Accounting Standards are unclear on what constitutes a 'type', and the Group has provided the disclosures based on the classes of assets and liabilities related to the temporary differences. Another possible interpretation is to present disclosures based on the reason for the temporary difference – e.g. depreciation.
Insights 3.13.640.70	b.	In our view, it is not appropriate to disclose the tax effects of both recognised and unrecognised deferred tax assets as a single amount – e.g. similar to the 'gross' approach under US GAAP – because under the Accounting Standards it is <i>recognised</i> deferred tax assets that are required to be disclosed.
Insights 3.13.300	C.	The Group does not plan to dispose of its investments in associates in the foreseeable future, and therefore has measured deferred tax relating to these investments using the tax rates applicable to dividends, which are nil because such dividends are tax-exempt. As a result, no deferred tax has been recognised.

IAS 12.15, 22A, 24, Insights 3.13.230 d.

The tax deductions in the Group's jurisdictions related to leases are allocated to the lease liabilities rather than the right-of-use assets. Therefore, the Group has recognised a separate deferred tax asset in relation to its lease liabilities and a deferred tax liability in relation to its right-of-use assets.

IAS 12.68C

e. When the amount of the tax deduction (or estimated future tax deduction) exceeds the amount of the related cumulative share-based payment expense, the excess of the associated income tax is recognised directly in equity. Any subsequent reduction in the excess is also recorded in equity.

E.

# Notes to the consolidated financial statements (continued)

### 14. Income taxes (continued)

#### Unrecognised deferred tax liabilities^a

At 31 December 2024, there was a deferred tax liability of EUR 1,523 thousand (2023: EUR 1,146 thousand) for temporary differences of EUR 4,615 thousand (2023: EUR 3,473 thousand) related to investments in subsidiaries and the joint venture. However, this liability was not recognised because the Group controls the dividend policy of its subsidiaries and is able to veto the payment of dividends of its joint venture – i.e. the Group controls the timing of reversal of the related taxable temporary differences and management is satisfied that they will not reverse in the foreseeable future.^b

In some of the countries in which the Group operates, local tax laws provide that gains on the disposal of certain assets are tax-exempt, provided that the gains are not distributed. At 31 December 2024, total tax-exempt reserves amounted to EUR 613 thousand (2023: EUR 540 thousand), which would result in a tax liability of EUR 202 thousand (2023: EUR 178 thousand) if the subsidiaries paid dividends from these reserves.

#### G. Unrecognised deferred tax assets

Deferred tax assets have not been recognised in respect of the following items, because it is not probable that future taxable profit will be available against which the Group can use the benefits therefrom.^c

	2024	2023		3
la thousan de sé EUD	Gross	T	Gross	<b>T</b>
In thousands of EUR	amount	Tax effect	amount	Tax effect
Deductible temporary differences	161	53	200	66
Tax losses	644	213	672	222
	805	266	872	288

#### H. Tax losses carried forward

Tax losses for which no deferred tax asset was recognised expire as follows.

In thousands of EUR	2024	Expiry date	2023	Expiry date
Expire	644	2025–2029	520	2025–2026
Never expire	-	-	152	-

In 2024, one of the Group's UK subsidiaries, Paper Pabus Co, successfully launched a new type of paper and entered into a number of long-term supply contracts. As a result, management revised its estimates of future taxable profits and the Group recognised the tax effect of EUR 152 thousand of previously unrecognised tax losses (tax impact: EUR 50 thousand) because management considered it probable that future taxable profits would be available against which such losses can be used.

In 2023, the Group's Danish subsidiary, Mermaid A/S, launched a new production line that would allow it to reduce costs significantly going forward and improve profitability. As a result, management revised its estimates of future taxable profits and the Group recognised the tax effect of EUR 727 thousand of previously unrecognised tax losses (tax impact: EUR 240 thousand) because management considered it probable that future taxable profits would be available against which such losses can be used. In 2024, Mermaid A/S achieved its planned profitability; therefore, management continues to consider it probable that future taxable profits would be available against which the tax losses can be recovered and, therefore, the related deferred tax asset can be realised.

IAS 12.81(f), 87	a.	Although it is not required, in addition to the aggregate amount of temporary differences associated with investments in subsidiaries, branches and associates and interests in joint arrangements for which deferred tax
		liabilities have not been recognised, the Group has also provided the encouraged disclosure of the amounts of
		unrecognised deferred tax liabilities. This disclosure is provided for illustrative purposes only.

 In our view, the ability of a joint venturer to veto the payment of dividends is sufficient to demonstrate control for the purpose of recognising deferred tax.

81(e) C. Although IAS 12 only requires the disclosure of the amount of deductible temporary differences and unused tax losses for which no deferred tax asset has been recognised, the Group has also disclosed their respective tax effects. This disclosure is for illustrative purposes only.

IAS 12.82A

IAS 12.81(e)

IAS 12.81(e)

IAS 1.125, 129, 12.82

## 14. Income taxes (continued)

### H. Tax losses carried forward (continued)

In 2024, the Group's Romanian subsidiary, Lei Sure Limited, incurred a tax loss of EUR 124 thousand, increasing cumulative tax losses to EUR 644 thousand (2023: EUR 520 thousand). Management has determined that the recoverability of cumulative tax losses, which expire in 2027–2031, is uncertain due to surplus capacity/supply depressing paper prices in Romania. Based on the five-year business plan and taking into account the reversal of existing taxable temporary differences, Lei Sure Limited is not expected to generate taxable profits until 2030. However, if paper prices improve more quickly than forecast or new taxable temporary differences arise in the next financial year, then additional deferred tax assets and a related income tax benefit of up to EUR 213 thousand could be recognised.

### I. Uncertainty over income tax treatments^{a, b}

From 2020 until 2023, the Group's Canadian subsidiary Maple-leaf Inc benefited from a tax ruling of the Canadian tax authorities allowing it to qualify for a reduced corporate tax rate. In 2024, there was a change in the Canadian Government. The new Government is currently debating certain tax rulings granted in the past, which include the tax ruling applied by the Group. If the tax ruling applied in the past is retroactively revoked, then additional tax expenses for the period 2020–2023 of up to EUR 53 thousand may be incurred. This amount has not been recognised in these consolidated financial statements because the Group believes that the tax ruling granted in the past was in compliance with the applicable law and, if revoked, the Group believes that it is probable that it would successfully defend the Group's tax treatment in court.

Of the Group's current tax provision, EUR 63 thousand (2023: nil) relates to management's estimation of the amount of tax payable by the Group's German subsidiary Papier GmbH for the ongoing tax review, which its tax authority opened in March 2024. The uncertain tax treatment relates to the interpretation of how the tax legislation applies to the Group's transfer pricing arrangements. Due to the uncertainty involved, there is a possibility that the outcome of the tax review is significantly different from the amount currently recognised. Although management has used a single best estimate of the tax amount expected to be paid, it is anticipated that the reasonably possible outcome of current tax liabilities sits within a range between EUR 51 thousand and EUR 72 thousand.

The Group believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretations of tax law and prior experience.

- a. Management of the Group analysed the specific facts and circumstances of the open tax review and determined that it is necessary to provide information about assumptions and estimates related to the uncertain tax treatment required by paragraph 125 of IAS 1.
- b. The Group provided quantitative disclosure of the sensitivity of the amount of the uncertain tax treatment to the method, assumptions and estimates underlying the calculation. Other approaches to the disclosure may be acceptable to meet the requirements of paragraph 129 of IAS 1.

IAS 1.122, 125, 129, 12.88

## 14. Income taxes (continued)

#### J. Global minimum top-up tax^{a, b, c, d}

IAS 12.88A-88D, EI.88C-88D(a)(b)(i) The Group is subject to the global minimum top-up tax under Pillar Two tax legislation. The top-up tax relates to the Group's operations in [*Country F*], where the statutory tax rate is 10 percent, and in [*Country G*], where Subsidiary X receives government support through additional tax deductions that reduce its effective tax rate to below 15 percent. The Group recognised a current tax expense of EUR 132 thousand related to the top-up tax (2023: nil) which is levied on the Company.^e

The Group has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

In March 2024, [*Country G*] enacted new tax legislation to implement a domestic minimum top-up tax, which is effective from 1 January 2025. As a result, from 2025 Subsidiary X will be liable for the top-up tax in relation to its operations instead of the Company.

a. The Organisation for Economic Co-operation and Development's (OECD) draft legislative framework for the global minimum top-up tax (GloBE model rules) applies to multinational enterprise groups with a total consolidated group revenue of EUR 750 million or more in at least two of the four preceding years, although jurisdictions may introduce a lower threshold. Although the Group may not be subject to this global minimum top-up tax, the disclosures are included for illustration purposes.

Insights 3.13.43.10 b.

b. 'Pillar Two taxes' are those arising from tax laws enacted or substantively enacted to implement the Pillar Two framework published by the OECD. This tax reform aims to ensure that large multinational groups pay taxes at least at a minimum rate of 15 percent on income arising in each jurisdiction in which they operate by applying a system of top-up taxes. There are three active mechanisms under Pillar Two model rules that countries can adopt: the Income Inclusion Rule (IIR), the Undertaxed Payment Rule (UTPR) and a Qualified Domestic Minimum Top-up Tax (QDMTT). They are often referred to as 'global minimum top-up tax' or 'top-up tax'. Different jurisdictions may enact or substantively enact local tax laws at different points in time, and the taxes may also become effective at different

- c. It is noted that for the purpose of the top-up tax, if a single jurisdiction in which a group operates enacts or substantively enacts changes to its tax laws, then that entire group may be impacted regardless of whether a similar tax law has been enacted or substantively enacted in the jurisdiction of the ultimate parent. An entity needs to monitor the progress of the legislative process in each jurisdiction in which it operates to determine whether and when it may become subject to the top-up tax.
- d. For further information about the financial reporting impacts of global minimum top-up taxes, see our <u>article</u> and read our <u>FAOs</u>.
- e. The ultimate parent company of the Group is Cameron Paper Co (see Note 40(A)). However, it is located in a jurisdiction that has not adopted Pillar Two legislation. Therefore, the Company, as an intermediate parent, is liable for IIR Pillar Two taxes.

Introduction

IAS 41.43

This is an example of encouraged disclosures providing a quantified description of each group of biological assets, distinguishing between mature and immature biological assets (for standing timber), and the basis for making such distinctions.

b. Because the Group classifies the entire category of standing timber as Level 3 in the fair value hierarchy, this table illustrates only those disclosures that are incremental to the information in the reconciliation in Note 16(A).

## 16. Biological assets (continued)

### B. Measurement of fair values (continued)

### iii. Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Туре	Valuation technique	Significant unobservable inputs	Inter-relationship between key unobservable inputs fair value measureme
Standing timber Standing timber older than 25 years (the age at which it becomes marketable)	Discounted cash flows: The valuation model considers the present value of the net cash flows expected to be generated by the plantation. The cash flow projections include specific estimates for [X] years. The expected net cash flows are discounted using a risk- adjusted discount rate.	<ul> <li>Estimated future timber market prices per tonne (2024: EUR 12.8–17.9, weighted average EUR 16.25; 2023: EUR 11.6–16.3, weighted average EUR 15.15).</li> <li>Estimated yields per hectare (2024: 6–10, weighted average 8; 2023: 5–10, weighted average 8; 2023: 5–10, weighted average 7.5).</li> <li>Estimated harvest and transportation costs (2024: 6.4–8.3%, weighted average 7.5%; 2023: 6.3–7.8%, weighted average 6.7%).</li> <li>Risk-adjusted discount rate (2024: 7.9–9.0%, weighted average 8.6%; 2023: 7.1–8.3%, weighted average 7.8%).</li> </ul>	<ul> <li>The estimated fair value would increass (decrease) if:</li> <li>the estimated timber prices per tonne were high (lower);</li> <li>the estimated yields per hectar were higher (low</li> <li>the estimated harvest and transportation co were lower (high or</li> <li>the risk-adjusted discount rates w lower (higher).</li> </ul>
Younger standing timber	Cost approach and discounted cash flows: The Group considers both approaches, and reconciles and weighs the estimates under each approach based on its assessment of the judgement that market participants would apply. The cost approach considers the costs of creating a comparable plantation, taking into account the costs of infrastructure, cultivation and preparation, buying and planting young trees with an estimate of the profit that would apply to this activity. Discounted cash flows consider the present value of the net cash flows expected to be generated by the plantation at maturity, the expected additional biological transformation and the risks associated with the asset; the expected net cash flows are discount rates.	<ul> <li>Estimated costs of infrastructure per hectare (2024: EUR 0.8–1.1, weighted average EUR 0.95; 2023: EUR 0.8–1.2, weighted average EUR 0.97).</li> <li>Estimated costs of cultivation and preparation per hectare (2024: EUR 0.2–0.4, weighted average EUR 0.3; 2023: EUR 0.3–0.4, weighted average EUR 0.35).</li> <li>Estimated costs of buying and planting young trees (2024: EUR 1.0–1.3, weighted average EUR 1.25; 2023: EUR 1.1–1.3, weighted average EUR 1.25; 2023: EUR 1.1–1.3, weighted average EUR 1.28, 2023: EUR 1.1–1.3, weighted average EUR 1.29.</li> <li>Estimated future timber market prices per tonne (2024: EUR 1.3.8–19.8, weighted average EUR 1.20, weighted average EUR 16.6).</li> <li>Estimated yields per hectare (2024: 6–11, weighted average 8.6; 2023: 7–11, weighted average 8.6; 2023: 7–11, weighted average 9.4%; 2023: 9.3–9.9%, weighted average 9.4%; 2023: 9.3–9.9%, weighted average 9.6%).</li> </ul>	<ul> <li>The estimated fair value would increase (decrease) if:</li> <li>the estimated co of infrastructure, cultivation and preparation and buying and plantit trees were highe (lower);</li> <li>the estimated timber prices per tonne were higher (lower);</li> <li>the estimated yields per hectarwere higher (lower); or</li> <li>the risk-adjusted discount rates we lower (higher).</li> </ul>
Livestock Livestock comprises cattle and sheep, characterised as commercial or breeders	Market comparison technique: The fair values are based on the market price of livestock of similar age, weight and market values.	Not applicable.	Not applicable.

IFRS 13.93(d), (h), 99

Introduction

Australian content

Primary statements

# 16. Biological assets (continued)

B. Measurement of fair values (continued)

### iii. Valuation techniques and significant unobservable inputs (continued)

The estimated yields per hectare of pine tree plantations are determined mainly based on the age of the plantation, historical yields, the potential impact of extreme weather events and harvest loss due to disease and pests. Historical yields of younger standing timber have been adjusted downwards by 0.8 percent (2024: 0.78 percent) to reflect potential losses due to severe storms and high winds and by 0.3 percent (2024: 0.26 percent) for all other factors. The risk of potential losses due to fire is reflected in the cash flows by including the estimated cost of fire insurance.

IAS 1.31, 112

IAS 1.125, 129

The Group assessed the impact of climate-related risks and opportunities on the estimated yields per hectare for younger standing timber. By considering the impact of higher temperatures (an increase of 2°C by 2050) on the growth rate of pine trees and on the intensity and frequency of storms, the Group concluded that, overall, the positive effects (accelerated growth) and negative effects (increase in the frequency of storms) would have an immaterial impact on yields. Due to the high degree of estimation uncertainty around the impact of climate change on the intensity and frequency of storms, this conclusion may change in the future.

The fair value of younger timber reflects on average five days per year of intense high winds. Fair value would decrease by EUR 323 thousand assuming 10 days per year of intense high winds^a.

As described in Note 30(D), a flood occurred in 2024 in an area near one of the Group's standing timber plantations, temporarily affecting the access roads to it but not the plantation itself. Although employees were temporarily unable to access the plantation, there was no damage to the plantation itself and no significant impact on the fair value of the standing timber.

IAS 41.49(c)

### C. Risk management strategy related to agricultural activities

The Group is exposed to the following risks relating to its pine tree plantations. These risks and management's strategies to mitigate them are described below.

## *i.* Regulatory and environmental risks

The Group is subject to environmental and other laws and regulations in various countries in which it operates. The Group has established environmental policies and procedures aimed at compliance with these laws.

## *ii.* Supply and demand risk

The Group is exposed to risks arising from fluctuations in the price and sales volume of timber. When possible, the Group manages this risk by aligning its harvest volume to market supply and demand. Management performs regular industry trend analyses for projected harvest volumes and pricing.

### 16. Biological assets (continued)

#### Risk management strategy related to agricultural activities (continued) С.

#### iii. **Climate-related risks**

The Group's pine plantations are exposed to the risk of damage from extreme weather events such as storms, high winds and drought. Changes in global climate-related conditions could intensify one or more of these events. Periods of drought and associated high temperatures may increase the risk of forest fires and insect outbreaks. In addition to their effects on forest yields, extreme weather events may also increase the cost of operations. The Group has extensive processes in place aimed at monitoring and mitigating these risks through proactive management and early detection. The Group has incorporated considerations for climate change into its reforestation practices, such as the establishment and maintenance of fire breaks and increased monitoring during fire danger periods.

Physical risks arising from fires and drought are to a great extent subject to risk transfer and thereby within the cover of the Group's property and business interruption insurance programmes. However, should the frequency and severity of these events increase as a result of climate change, the cost of such coverage may increase.

For information on the impact of extreme weather events and climate change on the valuation of standing timber, see Note 16(B)(iii).

### **17. Inventories**

See accounting policies in Notes 44(K) and 8(D).

In thousands of EUR	2024	2023
Raw materials and consumables	7,415	6,914
Finished goods	4,200	4,705
Right to recover returned goods ^a	533	500
Inventories	12,148	12,119
Carrying amount of inventories pledged as security for liabilities	1,650	2,090

In 2024, inventories of EUR 54,019 thousand (2023: EUR 53,258 thousand) were recognised as an expense during the year and included in 'cost of sales'.

During 2023, due to regulatory restrictions imposed on the manufacture of a new product in the Non-recycled Papers segment, the Group tested the related product line for impairment (see Note 22(C)(ii)) and wrote down the related inventories to their net realisable value, which resulted in a loss of EUR 42 thousand. In 2024, following a change in estimates, EUR 10 thousand of the write-down was reversed.

In addition, inventories have been reduced by EUR 345 thousand (2023: EUR 125 thousand) as a result of the write-down to net realisable value. This write-down was recognised as an expense during 2024.

The write-downs and reversals are included in 'cost of sales'.^b

IFRS 15.B21. BC367

Insights 3840070 IFRS 15 and other accounting standards do not specify where assets for rights to recover products from customers with regards to sales with a right of return should be presented. The Group has included the assets in 'inventories' and disclosed them separately in the note.

b. In our view, for an entity that presents an analysis of expenses by function in the statement of profit or loss and OCI, the write-down of inventories to net realisable value and any reversals should be included in 'cost of sales'.

© 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. IAS 2.36(h) IAS 1.98(a), 2.36(d)

IAS 1.78(c), 2.36(b) IAS 1.78(c), 2.36(b)

IAS 2.36(e)-(g)

## 18. Trade and other receivables

See accounting policies in Notes 44(P)(i)–(ii) and (S)(i).

In thousands of EUR	Note	2024	2023
Trade receivables due from related parties	40(C)	1,236	642
Other trade receivables		31,282	21,683
		32,518	22,325

### A. Transfer of trade receivables^a

IFRS 7.14, 42D(a)-(c)

IFRS 7.42D(e)

IAS 1.78(b) IAS 1.78(b)

The Group sold with recourse trade receivables to a bank for cash proceeds. These trade receivables have not been derecognised from the statement of financial position, because the Group retains substantially all of the risks and rewards – primarily credit risk. The amount received on transfer has been recognised as a secured bank loan (see Note 28(A)). The arrangement with the bank is such that the customers remit cash directly to the Group and the Group transfers the collected amounts to the bank.

The receivables are held within a held-to-collect business model consistent with the Group's continuing recognition of the receivables.

The following information shows the carrying amount of trade receivables at the reporting date that have been transferred but have not been derecognised and the associated liabilities.

In thousands of EUR	2024	2023
Carrying amount of trade receivables transferred to a bank	600	1,000
Carrying amount of associated liabilities	598	985

### B. Credit and market risks, and impairment losses

Information about the Group's exposure to credit and market risks, and impairment losses for trade receivables is included in Note 32(C).

Insights 2.3.150.20, 170.30 There is no specific guidance in the Accounting Standards on the classification of cash flows from factoring arrangements – e.g. whether the entity should classify the cash inflows from the factor as operating or financing in the statement of cash flows. The primary consideration for the classification of cash flows is the nature of the activity to which they relate and judgement may be needed to apply this to factoring arrangements.

Considering that the customers remit cash directly to the Group, the Group has presented a financing cash inflow for the proceeds received from the bank, followed by an operating cash inflow for the proceeds received from the customer and a financing cash outflow for the settlement of amounts due to the bank.

## 19. Cash and cash equivalents

See accounting policies in Notes 44(P)(i)-(ii) and (S)(i).

In thousands of EUR	2024	2023
Bank balances	50	988
Demand deposits	1,352	861
Cash	1,402	1,849
3-month deposit (cash equivalent)	102	-
Cash and cash equivalents in the statement of financial position	1,504	1,849
Bank overdrafts repayable on demand and used for cash management		
purposes	(334)	(282)
Cash and cash equivalents in the statement of cash flows	1,170	1,567

An amount of EUR 300 thousand (2023: nil) included in demand deposits is subject to restrictions imposed by certain customers. Although the amount can be withdrawn at any time from the bank without penalty, the agreements with the customers require the Group to keep an aggregate amount of EUR 300 thousand in a demand deposit account and to use it only to meet warranty claims arising in the next 12 months (see Note 31(A)).^a

## 20. Disposal group held for sale^b

See accounting policy in Note 44(O).

In June 2024, management committed to a plan to sell part of a manufacturing facility within the Non-recycled Papers segment. Accordingly, part of that facility is presented as a disposal group held for sale. Efforts to sell the disposal group have started and a sale is expected by April 2025.

### A. Impairment losses relating to the disposal group

Impairment losses of EUR 35 thousand for write-downs of the disposal group to the lower of its carrying amount and its fair value less costs to sell have been included in 'other expenses' (see Note 9(B)). The impairment losses have been applied to reduce the carrying amount of property, plant and equipment within the disposal group.

IFRS 5.41(a)–(b), 41(d)

IFRS 5.41(c)

# ES

Insights 2.3.10.20, 40, 70, IU 03-22

a. The Group has classified the amount of EUR 300 thousand as cash because it assessed that the contractual restrictions on use of the amount held in the demand deposit do not change the nature of the demand deposit because the amount can still be accessed on demand from the bank without penalty. The Group has included the demand deposit as a component of cash and cash equivalents in its statement of cash flows and presents the demand deposit as cash and cash equivalents in its statement of financial position. The Group has also provided disclosure about the restriction on use in Note 19 and disclosure about liquidity risk arising from this demand deposit and how it manages that risk (see Note 32(C)(iii)).

b. The part of the Group's manufacturing facility that has been presented as a disposal group held for sale does not meet the definition of a discontinued operation in IFRS 5. If it did, then additional disclosures applicable to the discontinued operation would be required.

Introduction

IAS 7.45

IAS 1.31

# 20. Disposal group held for sale (continued)

#### Assets and liabilities of disposal group held for sale^a Β.

At 31 December 2024, the disposal group was stated at fair value less costs to sell and comprised the following assets and liabilities.

In thousands of EUR	Note	
Property, plant and equipment	21(A)	8,129
Inventories		2,775
Trade and other receivables		3,496
Assets held for sale		14,400
In thousands of EUR	Note	
Trade and other payables		4,270
Deferred tax liabilities	14(E)	140
Liabilities held for sale		4,410

#### IERS 5.38

IFRS 13.93(a)-(b)

IFRS 5.38

#### С. **Cumulative income or expenses included in OCI**

There are no cumulative income or expenses included in OCI relating to the disposal group.

#### D. **Measurement of fair values**

#### i. Fair value hierarchy

The non-recurring fair value measurement for the disposal group of EUR 10,050 thousand (before costs to sell of EUR 60 thousand) has been categorised as a Level 3 fair value based on the inputs to the valuation technique used (see Note 4(B)).^b

#### ii. Valuation technique and significant unobservable inputs

The following table shows the valuation technique used in measuring the fair value of the disposal group, as well as the significant unobservable inputs used.

Valuation technique	Significant unobservable inputs
<i>Cost approach and discounted cash flows:</i> The Group considers both approaches, and reconciles and weighs the estimates under each technique based on its assessment of the judgement that market participants would apply. The cost approach considers the current replacement costs of replicating the manufacturing facility, including the costs of transportation, installation and start-up. Discounted cash flows consider the present value of the net cash flows expected to be generated from the facility, taking into account the budgeted EBITDA growth rate and budgeted capital expenditure growth rate; the expected net cash flows are discounted using	<ul> <li>Budgeted EBITDA growth rate (4.2–5.1%, weighted average 4.7%).</li> <li>Budgeted capital expenditure growth rate (3–4%, weighted average 3.5%).</li> <li>Risk-adjusted discount rate (7.7%).</li> </ul>
a risk-adjusted discount rate.	

#### IFRS 5.38

The Group has elected to disclose major classes of assets and liabilities classified as held-for-sale in the notes. Alternatively, this information may be provided in the statement of financial position.

IFRS 13.93(a), Insights 2.4.530 a.

A non-recurring fair value measurement - e.g. related to an asset classified as held-for-sale - may occur during the b. reporting period. The disclosures required for a non-recurring fair value measurement are applicable in the financial statements for the period in which the fair value measurement occurred.

# 21. Property, plant and equipment

See accounting policies in Notes 44(L), (S)(ii) and (U)(ii).

#### **Reconciliation of carrying amount^a** Α.

IAS 16.73(e)(ii) IAS 16.73(e)(viii)

IAS 16.73(d) IAS 1.78(a), 16.73(d)

Property, plant and equipment includes right-of-use assets of EUR 3,593 thousand (2023: EUR 4,153 thousand) related to leased properties that do not meet the definition of investment property (see Note 37(A)(i)).

### B. Impairment loss and subsequent reversal

During 2023, due to regulatory restrictions imposed on the manufacture of a new product in the Non-recycled Papers segment, the Group tested the related product line for impairment and recognised an impairment loss of EUR 1,123 thousand with respect to plant and equipment. In 2024, EUR 393 thousand of the loss was reversed. Further information about the impairment loss and subsequent reversal is included in Note 22(C)(ii).

### C. Leased property, plant and equipment

During 2024, the Group recognised additions to right-of-use assets related to leased properties that do not meet the definition of investment property of EUR 150 thousand (2023: EUR 180 thousand in relation to leases of production equipment). Some leases provide the Group with the option to buy the equipment at a beneficial price.

### D. Security

At 31 December 2024, properties with a carrying amount of EUR 5,000 thousand (2023: EUR 4,700 thousand) were subject to a registered debenture that forms security for bank loans (see Note 28(A)).

### E. Property, plant and equipment under construction

During 2024, the Group acquired a piece of land for EUR 3,100 thousand, with the intention of constructing a new factory on the site.

The Group has started construction and costs incurred up to 31 December 2024 totalled EUR 1,000 thousand. Included in this amount are capitalised borrowing costs related to the acquisition of the land and the construction of the factory of EUR 194 thousand, calculated using a capitalisation rate of 5.2 percent.

### F. Transfer to investment property

During 2024, a building was transferred to investment property (see Note 23(A)), because it was no longer used by the Group and it was decided that the building would be leased to a third party.

Immediately before the transfer, the Group remeasured the property to fair value and recognised a gain of EUR 200 thousand in OCI. The valuation techniques and significant unobservable inputs used in measuring the fair value of the building at the date of transfer were the same as those applied to investment property at the reporting date (see Note 23(C)(ii)).

## G. Change in estimates^a

During 2024, the Group conducted an operational efficiency review at one of its plants, which resulted in changes in the expected usage of certain dyeing equipment. The dyeing equipment, which management had previously intended to sell after five years of use, is now expected to remain in production for 12 years from the date of purchase. As a result, the expected useful life of the equipment increased and its estimated residual value decreased.

As part of its commitment to reduce the carbon footprint of its Timber Products segment (see Note 38), the Group decided to replace its fleet of diesel trucks. This resulted in a reduction in the expected useful life of the trucks, which were originally intended to be sold after eight years of use but are now expected to remain in use for only two more years. Consequently, the estimated residual value of the trucks has increased.

The effect of these changes on actual and expected depreciation expense, included in 'cost of sales', was as follows.

In thousands of EUR	2024	2025	2026	2027	2028	Later
(Decrease) increase in depreciation expense	(256)	(113)	150	150	130	170

### H. Change in classification

During 2024, the Group modified the classification of depreciation expense on certain office space to reflect more appropriately the way in which economic benefits are derived from its use. Comparative amounts in the statement of profit or loss and OCI were reclassified for consistency. As a result, EUR 120 thousand was reclassified from 'administrative expenses' to 'selling and distribution expenses'.

## I. Temporarily idle property, plant and equipment

At 31 December 2024, plant and equipment with a carrying amount of EUR 503 thousand were temporarily idle, but the Group plans to operate the assets in 2025.

a. Transitioning to a lower-carbon economy can pose climate-related risks and opportunities that may affect an entity's business and strategic plans. It can also affect the useful lives and residual values of assets and the methods of depreciation or amortisation. See our article for more information on how climate-related matters influence useful lives and residual values of property, plant and equipment and intangible assets.

а.

Insights 5.14.100.10 Although IAS 38 *Intangible Assets* requires only the reconciliation of the carrying amount at the beginning and at the end of the reporting period, the Group has also provided separate reconciliations of the gross carrying amount and accumulated amortisation. These additional reconciliations are not required and a different format may be used.

b. The Accounting Standards do not contain specific guidance on accounting for emissions allowances. In our view, a polluting entity participating in a cap and trade scheme should choose an accounting policy, to be applied consistently, to account for emissions allowances based on one of the following approaches.

• As intangible assets: Under this approach, it is argued that emissions allowances are identifiable non-monetary assets that do not have physical substance and that therefore they meet the definition of an intangible asset.

• As inventories: Under this approach, it is argued that emissions allowances are effectively an input to be consumed in the production process, similar to inventories.

The Group has elected to account for emissions allowances as intangible assets.

Introduction

**Australian content** 

Primary statements

IAS 36.132, 134
 The Group has disclosed the key assumptions used (discount rate and terminal growth rate) to determine the recoverable amount of assets and CGUs, although disclosures beyond the discount rate are required only for CGUs containing goodwill or indefinite-lived intangible assets.

IAS 36.134
b. Separate disclosures are required for each CGU (or group of CGUs) for which the carrying amount of goodwill or intangible assets with an indefinite useful life allocated to the CGU is significant in comparison with its carrying amount.

## 22. Intangible assets and goodwill (continued)

#### Impairment test (continued) С.

#### iii. Impairment testing for CGUs containing goodwill (continued)

#### European Paper manufacturing and distribution (continued)

The estimated recoverable amount of the CGU exceeded its carrying amount by approximately EUR 300 thousand (2023: EUR 250 thousand). Management has identified that a reasonably possible change in two key assumptions could cause the carrying amount to exceed the recoverable amount. The following table shows the amount by which these two assumptions would need to change individually for the estimated recoverable amount to be equal to the carrying amount.

	Change required for carrying amount to equal recoverable amount				
In percent	2024	2023			
Discount rate	1.6	1.3			
Budgeted EBITDA growth rate	(4.4)	(3.6)			

#### **Timber Products**

The recoverable amount of this CGU was based on its value in use, determined by discounting the future cash flows to be generated from the continuing use of the CGU. The carrying amount of the CGU was determined to be higher than its recoverable amount of EUR 960 thousand and an impairment loss of EUR 116 thousand during 2024 (2023: nil) was recognised. The impairment loss was fully allocated to goodwill and included in 'other expenses'.

The Group committed in 2024 to reduce the carbon footprint of its Timber Products segment (see Note 38). The impact of this project – which has substantively commenced in 2023 incurring costs of EUR 1,000 thousand and under which additional capital expenditure of EUR 20,000 thousand is expected in the next four years - was included in calculating the recoverable amount.^a Furthermore, the budgeted EBITDA growth rate is expected to decrease by 1 percent on average in the next five years due to higher energy costs. The budgeted EBITDA does not reflect environmental costs arising from potential regulatory developments, as the Group expects that the project will decrease the carbon footprint to sufficiently low levels.

#### IAS 36.134(d)(i)

The key assumptions used in the estimation of value in use were as follows.^b In percent 2024 2023 Discount rate 9.6 10.0 IAS 36.134(d)(v) Terminal value growth rate 1.8 2.0 IAS 36.134(d)(iv) Budgeted EBITDA growth rate (average of next five years) 8.0 9.0 IAS 36.134(d)(i), (f)(ii)

Introduction

Australian content

Primary statements

IAS 36,134(f)(i)

IAS 36, 134(f)(iii) IAS 36.134(f)(iii)

IAS 1 125

36.134(c)-(d)

vppendices

IAS 36 requires that, when determining value in use, the benefits from capital expenditure to improve or enhance Insights 3.10.250.20 an asset's performance are taken into account in the future net cash flow estimation only once the expenditure is incurred. In our view, capital expenditure should be considered incurred once the project has substantively commenced, rather than it being necessary for the project to have been completed.

IAS 36.134(d)(ii), (iv)-(v), (e)(ii), (iv)-(v), (f), 1E89

IAS 36.48,

IAS 36 specifically requires quantitative disclosures (i.e. values) in respect of the discount rates and growth rates used to extrapolate cash flow projections. Narrative disclosures are sufficient for other key assumptions, having regard to the requirement for an entity to disclose a description of management's approach to determining the value(s) assigned to each key assumption, whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information. An entity also discloses additional quantitative information if a reasonably possible change in key assumptions would result in an impairment.

# 22. Intangible assets and goodwill (continued)

### C. Impairment test (continued)

### iii. Impairment testing for CGUs containing goodwill (continued)

#### Timber Products (continued)

IAS 36.134(d)(ii)

The discount rate was a pre-tax measure^a based on the rate of 10-year government bonds issued by the Government in the relevant market and in the same currency as the cash flows, adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific CGU.

IAS 36.134(d)(ii)–(iii)

IAS 36.134(f)

IAS 23.26(a)-(b)

Five years of cash flows were included in the discounted cash flow model. A long-term growth rate into perpetuity has been determined as the lower of the nominal gross domestic product (GDP) rates for the countries in which the CGU operates and the long-term compound annual EBITDA growth rate estimated by management.

Budgeted EBITDA was based on expectations of future outcomes taking into account past experience, adjusted for anticipated revenue growth. Revenue growth was projected taking into account the average growth levels experienced over the past five years and the estimated sales volume and price growth for the next five years. It was assumed that sales prices would grow at a constant margin above forecast inflation over the next five years, in line with information obtained from external brokers who publish a statistical analysis of long-term market trends.

Following the impairment loss recognised in the Group's Timber Products CGU, the recoverable amount was equal to the carrying amount. Therefore, any adverse movement in a key assumption would lead to further impairment.

#### **D.** Development costs

Included in development costs is an amount of EUR 37 thousand (2023: EUR 12 thousand) that represents borrowing costs capitalised during the year using a capitalisation rate of 5.1 percent (2023: 5.4 percent).

### E. Emissions allowances

The Group participates in a 'cap and trade' scheme in various countries. Under the scheme, at the beginning of each year the Government in each country sets specific annual limits for emitting pollutants and grants the Group the respective number of emissions allowances. The Group can settle its annual obligation created by the emissions of pollutants only by surrendering emissions allowances by a specified date, which is usually within 12 months after the reporting date. If the Group's annual emissions are below the limit, then it can sell the remaining allowances to other parties on a trading platform. Conversely, if the annual emissions exceed the limit, then the Group purchases additional allowances to settle its obligation. Historically, the Group has emitted more pollutants than its annual allocation of emissions allowances from the Government and has had to purchase additional allowances.

The Group recognises emissions allowances as intangible assets. Emissions allowances received from the Government are initially measured at fair value, which is determined based on the market price of allowances traded on the platform at that date. Emissions allowances purchased on the trading platform are initially measured at cost.

In 2024, the Group received emissions allowances amounting to EUR 115 thousand (2023: EUR 120 thousand) (see Note 31(D)). In addition, the Group purchased emissions allowances amounting to EUR 20 thousand during 2024 (2023: EUR 10 thousand) on a trading platform. The additional allowances are purchased and surrendered within a period of less than 12 months to settle the obligation to the Government.

IAS 36.50(b), 55, A20, Insights 3.10.840.10–20 a.

IAS 36 prima facie requires value in use to be determined using pre-tax cash flows and a pre-tax discount rate. However, in our experience it is more common to use post-tax cash flows and a post-tax discount rate such as the weighted-average cost of capital. Challenges arise in following a post-tax approach appropriately so that the resulting value in use is consistent with the pre-tax principle.

Whichever rate is used (pre- or post-tax), the pre-tax discount rate needs to be disclosed. When value in use is determined using post-tax cash flows and a post-tax discount rate, the pre-tax discount rate needs to be calculated to comply with the disclosure requirements.

Investment property comprises a number of commercial properties that are leased to third parties. Each of the leases contains an initial non-cancellable period of 10 years. Subsequent renewals are negotiated with the lessee and historically the average renewal period is four years. Further information about these leases is included in Note 37(B).

Changes in fair values are recognised as gains in profit or loss and included in 'other income'. All gains are unrealised.

#### Amounts recognised in profit or loss Β.

Rental income recognised by the Group during 2024 was EUR 460 thousand (2023: EUR 302 thousand) and was included in 'other revenue' (see Note 8(A)). Maintenance expense, included in 'cost of sales' (see Note 9(C)), was as follows.

#### C. **Measurement of fair values**

#### i. Fair value hierarchy

The fair value of investment property was determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair value of the Group's investment property portfolio every six months.

The fair value measurements for all of the investment properties have been categorised as a Level 3 fair value based on the inputs to the valuation technique used (see Note 4(B)).

Insights 3.4.260.40 а.

Because IAS 40 Investment Property makes no reference to making disclosures on a class-by-class basis, it could be assumed that the minimum requirement is to make the disclosures on an aggregate basis for the whole investment property portfolio. If investment property represents a significant portion of the assets, then it may be appropriate to disclose additional analysis - e.g. portfolio by types of investment property.

### C. Measurement of fair values (continued)

### *ii.* Valuation technique and significant unobservable inputs

The following table shows the valuation technique used in measuring the fair value of investment property, as well as the significant unobservable inputs used.

Valuation technique	Significant unobservable inputs	unobservable inputs and fair value measurement
Discounted cash flows: The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected market rental growth rate, void periods, occupancy rate, lease incentive costs such as rent-free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk- adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms.	<ul> <li>Expected market rental growth (2024: 2–3%, weighted average 2.6%; 2023: 2–3%, weighted average 2.5%).</li> <li>Void periods (2024 and 2023: average 6 months after the end of each lease).</li> <li>Occupancy rate (2024: 90–95%, weighted average 92.5%; 2023: 91–95%, weighted average 92.8%).</li> <li>Rent-free periods (2024 and 2023: 1-year period on new leases).</li> <li>Risk-adjusted discount rates (2024: 5–6.3%, weighted average 5.8%; 2023: 5.7–6.8%, weighted average 6.1%).</li> </ul>	<ul> <li>The estimated fair value would increase (decrease) if:</li> <li>expected market rental growth were higher (lower);</li> <li>void periods were shorter (longer);</li> <li>the occupancy rate were higher (lower);</li> <li>rent-free periods were shorter (longer); or</li> <li>the risk-adjusted discount rates were lower (higher).</li> </ul>

#### A. Joint venture^c

Paletel AG (Paletel) is a joint venture in which the Group has joint control and a 40 percent ownership interest. It is one of the Group's strategic suppliers and is principally engaged in the production of paper pulp in Himmerland, Denmark. Paletel is not publicly listed.

Paletel is structured as a separate vehicle and the Group has a residual interest in the net assets of Paletel. Accordingly, the Group has classified its interest in Paletel as a joint venture. In accordance with the agreement under which Paletel is established, the Group and the other investor in the joint venture have agreed to make additional contributions in proportion to their interests to make up any losses, if required, up to a maximum amount of EUR 6,000 thousand. This commitment has not been recognised in these consolidated financial statements.

For additional disclosure examples and explanatory notes on IFRS 12 Disclosure of Interests in Other Entities, see	
our Guide to annual financial statements – IFRS 12 supplement.	

*IFRS 12.21* b. The extent of disclosures required by IFRS 12 for individually material interests in joint arrangements and associates differs from that for individually immaterial interests. For example, required financial information may be disclosed in aggregate for all individually immaterial associates.

*IFRS 12.21–23, B12–B13* C. The extent of disclosures required by IFRS 12 for individually material joint ventures and joint operations is different. *B12–B13* For example, the disclosure of summarised financial information, fair value (if there is a quoted market price) and commitments is not required for joint operations.

# 24. Equity-accounted investees (continued)

### B. Associates

On 31 March 2024, the Group's equity interest in its material associate, Papyrus, increased from 25 to 90 percent and Papyrus became a subsidiary from that date (see Note 34). Papyrus is one of the Group's strategic suppliers and is principally engaged in the production of paper pulp in Kentucky, US. Papyrus is not publicly listed.

The following table summarises the financial information of Papyrus as included in its own financial statements, adjusted for fair value adjustments at acquisition and differences in accounting policies. The table also reconciles the summarised financial information to the carrying amount of the Group's interest in Papyrus. The information for 2023 presented in the table includes the results of Papyrus for the period from 1 January to 31 December 2023. The information for 2024 includes the results of Papyrus only for the period from 1 January to 31 March 2024, because Papyrus became a subsidiary on 31 March 2024.

In thousands of EUR	2024	2023
Percentage ownership interest	25%	25%
Non-current assets	-	1,280
Current assets		1,975
Non-current liabilities	-	(1,087)
Current liabilities		(324)
Net assets (100%)	-	1,844
Group's share of net assets (25%)	-	461
Elimination of unrealised profit on downstream sales		(8)
Carrying amount of interest in associate	-	453
Revenue	7,863	19,814
Profit from continuing operations	271	857
Other comprehensive income	(408)	(552)
Total comprehensive income (100%)	(137)	305
Total comprehensive income (25%)	(34)	76
Elimination of unrealised profit on downstream sales	1	(1)
Group's share of total comprehensive income	(33)	75

The Group also has interests in a number of individually immaterial associates. For one of these associates, the Group owns 20 percent of the equity interests but has less than 20 percent of the voting rights; however, the Group has determined that it has significant influence because it has meaningful representation on the board of the investee.

The following table analyses, in aggregate, the carrying amount and share of profit and OCI of these associates.

In thousands of EUR	2024	2023
Carrying amount of interests in associates	272	447
Share of:		
<ul> <li>Profit from continuing operations</li> </ul>	(133)	102
- OCI	(57)	(31)
	(190)	71

IFRS 12.22(c)

The Group has not recognised losses totalling EUR 15 thousand (2023: nil) in relation to its interests in associates, because the Group has no obligation in respect of these losses.

During 2024, the Group repaid a loan of EUR 1,000 thousand received from one of its associates (see Notes 28 and 40(C)).

## **25. Other investments, including derivatives**

See accounting policies in Notes 44(P) and (S)(i).

In thousands of EUR	2024	2023
Non-current investments		
Corporate debt securities – at amortised cost	2,421	2,243
Corporate debt securities – at FVOCI	118	373
Equity securities – at FVOCI	710	511
Equity securities – mandatorily at FVTPL	251	254
Interest rate swaps used for hedging	116	131
	3,616	3,512
Current investments		
Sovereign debt securities – mandatorily at FVTPL	243	591
Forward exchange contracts used for hedging	297	352
Other forward exchange contracts	122	89
	662	1,032

Corporate debt securities classified as at amortised cost have interest rates of 6.3 to 7.8 percent (2023: 7.5 to 8.3 percent) and mature in two to five years. Corporate debt securities at FVOCI have stated interest rates of 5.2 to 7.0 percent (2023: 6.5 to 8.0 percent) and mature in two to three years.

Sovereign debt securities at FVTPL have stated interest rates of 3.5 to 4.0 percent (2023: 3.2 to 3.8 percent) and are held for trading.

Information about the Group's exposure to credit and market risks, and fair value measurement, is included in Note 32(C).

#### Equity securities designated as at FVOCI^a

The Group designated the investments shown below as equity securities at FVOCI because these equity securities represent investments that the Group intends to hold for the long term for strategic purposes.

In thousands of EUR	Fair value at 31 December 2024	Fair value at 31 December 2023	Dividend income recognised during 2024	Dividend income recognised during 2023

IFRS 7.11A(e)

IFRS 7.8(f) IFRS 7.8(h) IFRS 7.8(h) IFRS 7.8(a) IFRS 7.228(a)

IFRS 7.8(a) IFRS 7.22B(a)

IFRS 77

IFRS 7.11A

No strategic investments were disposed of during 2024, and there were no transfers of any cumulative gain or loss within equity relating to these investments.

#### Insights 7.10.230.25 a.

When disclosing which investments in equity instruments have been designated as at FVOCI, in our view an entity should apply judgement in determining what disclosures would provide the most useful information for financial statement users. We believe that in most cases, disclosing the names of individual investees would be appropriate – e.g. if an entity has a small number of individually significant investments, particularly if this disclosure enables users to access additional information about those investees from other sources. However, in some cases disclosure at a higher level of aggregation and disclosures other than the names of investees may provide more useful information. For example, if an entity has a large number of individually insignificant investments in a few industries, then disclosure by industry may be appropriate. Similarly, if an entity holds investments for which no public information is available, then disclosure about the nature and purpose of those investments may be relevant.

Introduction

# 26. Capital and reserves^a

See accounting policies in Notes 44(B)(i)–(ii), (E)(iv), (L)(iv), (P)(ii), (P)(iv)–(v), (Q) and (R).

### A. Share capital and share premium

	Ordinary shares		Non-redee preference	
In thousands of shares	2024	2023	2024	2023
In issue at 1 January	3,100	3,100	1,750	1,750
Issued for cash	130	-	-	-
Exercise of share options	5	-	-	-
Issued in business combination	8	-	-	-
In issue at 31 December – fully paid	3,243	3,100	1,750	1,750
Authorised – par value EUR 3	10,000	10,000	2,000	2,000

All ordinary shares rank equally with regard to the Company's residual assets. Preference shareholders participate only to the extent of the face value of the shares.

### i. Ordinary shares

Holders of these shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company. All rights attached to the Company's shares held by the Group are suspended until those shares are reissued.

#### Issue of ordinary shares

In October 2024, the general meeting of shareholders approved the issue of 130,000 ordinary shares at a price of EUR 11.92 per share (2023: nil).

Additionally, 5,000 ordinary shares were issued as a result of the exercise of vested options arising from the 2020 share option programme granted to key management personnel (2023: nil) (see Note 12). Options were exercised at an average price of EUR 10 per share.

During 2024, 8,000 ordinary shares were also issued as a result of the acquisition of Papyrus (see Note 34(A)) (2023: nil).

### ii. Non-redeemable preference shares

Holders of these shares receive a non-cumulative dividend of 25.03 cents per share at the Company's discretion or whenever dividends to ordinary shareholders are declared. They do not have the right to participate in any additional dividends declared for ordinary shareholders. These shares do not have voting rights.

### B. Nature and purpose of reserves

### i. Translation reserve

The translation reserve comprises all foreign currency differences arising from the translation of the financial statements of foreign operations, as well as the effective portion of any foreign currency differences arising from hedges of a net investment in a foreign operation (see Note 44(P)(v)).

Introduction

IAS 1.135(a)

Management is considering extending the Group's share option programme beyond key management and other senior employees. Currently, other employees are awarded SARs and participate in an employee share purchase programme (see Note 12(A)). The Group is in discussions with employee representatives, but no decisions have been made. The Group monitors capital using a ratio of 'net debt' to 'adjusted equity'. Net debt is calculated as total liabilities (as shown in the statement of financial position) less cash and cash equivalents.

Adjusted equity comprises all components of equity other than amounts accumulated in the hedging and cost of hedging reserves.^a

The Group's policy is to keep the ratio below 1.95. The Group's net debt to adjusted equity ratio at 31 December 2024 was as follows.

In thousands of EUR	2024	2023 restated*
Total liabilities	67,638	54,647
Less: cash and cash equivalents	(1,504)	(1,849)
Net debt	66,134	52,798
Total equity	45,222	35,366
Less: hedging reserve	(433)	(491)
Less: cost of hedging reserve	(4)	27
Adjusted equity	44,785	34,902
Net debt to adjusted equity ratio	1.48	1.51

* See Note 43.

See Notes 28(B) and 32(C)(iii) for information about loans subject to covenants.

From time to time, the Group purchases its own shares on the market; the timing of these purchases depends on market prices. The shares are primarily intended to be used for issuing shares under the Group's share option programme. Buy and sell decisions are made on a specific transaction basis by the risk management committee; the Group does not have a defined share buy-back plan.

Appendices

a. The Group has provided the definitions of 'net debt' and 'adjusted equity' because they are relevant to understanding how it manages capital and are not defined in IFRS Accounting Standards. It has also provided the reconciliations between these measures and items presented in the consolidated financial statements.

IFRS 7.7

#### 28. Loans and borrowings (continued)

#### B. Secured bank loans

IAS 1.69(a)-(d), 72A, 72B, 75–75A, 76ZA, IFRS 7.18–19 The Group's secured bank loans are subject to various covenants. Two of these loans include covenants that need to be complied with within 12 months of the reporting date.

#### i. Secured bank loan (EUR)

The Group has a secured bank loan with a carrying amount of EUR 3,460 thousand at 31 December 2024 (2023: EUR 3,460 thousand). This loan is repayable in tranches within five years from the issue date, with the next tranche due in January 2026. However, the loan contains a covenant stating that at the end of each quarter the Group's debt (defined in the covenant as the Group's loans and borrowings and trade and other payables) cannot exceed 2.5 times the Group's quarterly revenue from continuing operations, otherwise the loan will be repayable on demand.

The Group exceeded its maximum leverage threshold in the third quarter of 2024; however, management obtained a waiver from the bank in October 2024 and the breach was remedied. At 31 December 2024, the threshold was no longer exceeded and the Group complied with the covenant. Accordingly, the loan is classified as non-current at 31 December 2024.

The Group expects to comply with the quarterly covenants within 12 months after the reporting date.

#### ii. Secured bank loan (GBP)

The Group has another secured bank loan with a carrying amount of GBP 1,864 thousand at 31 December 2024 (2023: GBP 4,855 thousand). This loan is repayable in tranches within 3 years from the issue date, with the next and final tranche due in June 2026. The loan contains a covenant that requires the Group to reach a cumulative revenue threshold (from both continuing and discontinued operations) of at least EUR 105,060 thousand per year, over the period from 1 July to 30 June of each year. The covenant is tested annually on 30 June. The loan becomes repayable on demand if the cumulative threshold is not met at any testing date.

The Group complied with the cumulative revenue threshold when it was tested on 30 June 2024. The Group earned revenue of EUR 50,330 thousand from 1 July 2024 through 31 December 2024. As at 31 December, management is uncertain whether the Group will meet the cumulative revenue threshold at 30 June 2025. However, the loan is classified as non-current at 31 December 2024 because the Group has an existing right to defer settlement of the loan for at least 12 months after the reporting period.^b

Introduction

IAS 1.69(d). Any breach of a covenant at or before the reporting date, that triggers a repayment of the related liability within а. 72A-72B. Insights 12 months after the reporting date, results in the entity classifying that liability as current unless the breach is 3.1.50.100, 190, remediated at or before the reporting date. In this case, the Group breached the covenant but obtained a remedy 3.1.70.20 or 'waiver' from the lender before the reporting date. In addition, the Group complied with the covenant at 31 December 2024 resulting in the Group having the right to defer settlement of the loan for at least 12 months after the reporting date. The covenants with which the Group needs to comply after the reporting date (i.e. future covenants) do not affect the Group's right to defer settlement of the loan at the reporting date. IAS 1.76ZA, Insights b. When an entity classifies a liability arising from a loan arrangement as non-current, and that liability is subject to 3.1.80.10 covenants with which an entity is required to comply within 12 months after the reporting date, the entity discloses information in the notes that enables users of the financial statements to understand the risk that the liabilities could become repayable within 12 months after the reporting date.

#### 28. Loans and borrowings (continued)

#### C. Convertible notes (series A)

In thousands of EUR	Note	
Proceeds from issue of convertible notes (1,000,000 notes at EUR 4 par value) Transaction costs		4,000 (200)
Net proceeds Amount classified as equity (net of transaction costs of EUR 9 thousand)	14(C)	3,800 (163)
Accrued interest		91
Carrying amount of liability at 31 December 2024		3,728

The Company issued 1,000,000 convertible notes on 6 August 2024 (2023: nil). The notes have a three-year term. Interest is payable at maturity. The conversion option may be exercised by the holders of the notes at any time until maturity. When the conversion option is exercised, the outstanding principal of the notes are converted into 250,000 ordinary shares of the Company; any accrued but unpaid interest as at the exercise date is required to be paid in cash. Otherwise, the total principal and accrued interest outstanding is repayable in cash at maturity. The liability is classified as non-current at 31 December 2024.^a

#### D. Convertible notes (series B)

In thousands of EUR Note	
Proceeds from issue of convertible notes (250,000 notes at EUR 4 (USD 4.4) par value)	1,000
Transaction costs ^b	(50)
Net proceeds	950
Fair value of embedded derivative liability (equity conversion option) 32(A)-(B)	(45)
Accrued interest	-
Carrying amount of host liability at 31 December 2024	905

The Company issued 250,000 foreign currency (USD) convertible notes on 31 December 2024 (2023: nil). The notes have a three-year term. Interest is payable annually in arrears. The conversion option may be exercised by the holders of the notes at any time until maturity. When the conversion option is exercised, the outstanding principal of the notes are converted into 100,000 ordinary shares of the Company; any accrued but unpaid interest as at the exercise date is required to be paid in cash. Otherwise, the total principal and accrued interest outstanding is repayable in cash at maturity. The host liability is classified as current at 31 December 2024.^c

IAS 1.69(a)–(d), 76A–76B, IAS 32.11, 16, Insights 3.1.100	a.	The newly effective amendments to IAS 1 clarified how entities classify liabilities that can be settled in their own shares – e.g. convertible notes (see Note 5). The Group classified the liability as non-current at 31 December 2024 as the maturity date is not within 12 months of the reporting date and the equity-classified conversion option does not impact the classification of the liability as current or non-current. The Group therefore has the right to defer settlement of the liability for at least 12 months after the reporting date. The conversion option is classified as an equity component under IAS 32 because the conversion will result in a fixed amount (i.e. the outstanding principal amount of the notes), exchanged for a fixed number of ordinary shares (i.e. the 'fixed for fixed' requirement is met).
Insights 7.7.50.80	b.	In our view, an entity should choose an accounting policy, to be applied consistently, to allocate transaction costs relating to a hybrid (combined) instrument that includes a non-derivative host contract which is not accounted for at FVTPL and an embedded derivative that is accounted for at FVTPL. The Group's accounting policy is to allocate all of the transaction costs to, and deduct from, the carrying amount of the non-derivative host contract on initial recognition and measure the embedded derivative at fair value on initial recognition.
IAS 1.69(a)–(d), 76A–76B, IAS 32.11, Insights 3.1.100	c.	The newly effective amendments to IAS 1 clarified how entities classify liabilities that can be settled in their own shares – e.g. convertible notes (see Note 5). Even though the maturity date is not within 12 months from the reporting date, the Group classified the host liability as current at 31 December 2024 because the Group takes the liability-classified conversion option into account when classifying the host liability. The note holders may exercise the conversion option at any time, which would result in the notes being settled by the Group. As such, the Group does not have the right to defer settlement of the host liability for at least 12 months after the reporting date. The conversion option contains an obligation for the Company to issue a fixed number of shares in exchange for a variable amount of cash. As the note payable is denominated in USD rather than EUR, the Company's functional currency, the cash is fixed in USD terms but is variable in the Company's functional currency terms. In addition, the conversion option has economic characteristics of equity and is not closely related to those of the host debt instrument. Therefore, the conversion option is a separable embedded derivative liability.

Appendices

Introduction

### 28. Loans and borrowings (continued)

#### E. Redeemable preference shares

In thousands of EUR

Proceeds from issue of redeemable preference shares	2,000
Transaction costs	(61)
Accrued dividend	51
Carrying amount at 31 December 2024	1,990

During 2024, 1,000,000 redeemable preference shares were issued as fully paid with a par value of EUR 2 per share (2023: nil). The redeemable preference shares do not carry the right to vote. The holders of the redeemable preference shares participate in the Company's residual assets only to the extent of the face value of the shares.

The redeemable preference shares are mandatorily redeemable at par on 31 May 2030 and classified as a non-current liability at 31 December 2024. The Group is obliged to pay holders of these shares annual dividends of 4.4 percent of the par amount on 31 May each year until and including on maturity.

a.

This example illustrates one possible format to meet the disclosure requirement in paragraphs 44A–E of IAS 7 by providing a reconciliation between the opening and closing balances for liabilities arising from financing activities. Other presentation formats are possible. Although IAS 7 only requires disclosure of a reconciliation of changes in liabilities arising from financing activities, the Group has elected to expand the disclosure to cover changes in bank overdrafts used for cash management purposes and changes in equity balances arising from financing activities as well. If an entity provides the disclosures required by paragraph 44A of IAS 7 in combination with disclosures of changes in other assets and liabilities, then it discloses the changes in liabilities arising from financing activities separately from changes in those other assets and liabilities.

#### * See Note 43.

Information about the Group's exposure to currency and liquidity risks is included in Note 32(C).

#### **Supplier finance arrangements**

The Group participates in a supplier finance arrangement under which its suppliers may elect to receive early payment of their invoices from a bank. Under the arrangement, the bank agrees to pay amounts due to participating suppliers in respect of invoices owed by the Group and the Group repays the bank at a later date. The principal purpose of this arrangement is to facilitate efficient payment processing and provide the willing suppliers early payment terms, compared with the related invoice payment due date.

The Group has not derecognised the original trade payables relating to the arrangement because neither a legal release was obtained nor was the original liability substantially modified on entering into the arrangement.

From the Group's perspective, the arrangement does not significantly extend payment terms beyond the normal terms agreed with other suppliers that are not participating; however, the arrangement does provide willing suppliers with the benefit of early payment. Additionally, the Group does not incur any additional interest towards the bank on the amounts due to the suppliers. The Group therefore includes the amounts subject to the arrangement within trade payables because the nature and function of these payables remains the same as those of other trade payables.

All payables under the arrangement are classified as current as at 31 December 2024 and 2023.

IFRS 7.8(a)

IAS 7.44G, 44H(a),

## Notes to the consolidated financial statements (continued)

#### **30. Government grants**

See accounting policies in Notes 8(D) and 44(F)-(G).

In thousands of EUR	Note	2024	2023
Deferred income – Asset acquisition ^a	30(A)	1,424	1,462
		1,424	1,462
Non-current		1,424	1,462
Current			-
		1,424	1,462

#### A. Asset acquisitions

In 2023, the Group was awarded a grant, amounting to EUR 1,462 thousand, conditional on the acquisition of factory premises in a specified region. The factory has been in operation since early 2024 and the grant, recognised as deferred income, is being amortised over the useful life of the building. In accordance with the terms of the grant, the Group is prohibited from selling the factory premises for a period of 15 years from the date of the grant.

#### B. Emissions schemes^b

The Group participates in a 'cap and trade' scheme in various countries. Under the scheme, at the beginning of each year the Government in each country sets specific annual limits for emitting pollutants and grants the Group the respective number of emissions allowances. The Group recognises emissions allowances and the related deferred income at the fair value of allowances granted, which is determined based on the quoted market price of allowances traded in an active market. When the Group emits pollutants and recognises a liability (see Note 31(D)), it reduces the related expense in profit or loss by releasing the deferred income. In 2024, the Group received emissions allowances amounting to EUR 115 thousand (2023: EUR 120 thousand) (see Note 22). The Group emitted pollutants above the limit in 2024 and 2023, and therefore the deferred income related to this grant as at 31 December 2024 is nil (2023: nil).

#### C. New pine tree plantations

In 2024, the Group was awarded an unconditional grant, amounting to EUR 130 thousand, for plantations of pine trees in a specified region. This grant was recognised in profit or loss in full and presented in 'other income' when it became receivable (see Note 9(A)). There is no outstanding balance of deferred income related to this grant as at 31 December 2024.

#### D. Payroll expenses for employees in flood-affected areas

In 2024, the Group received support from the Government in [*Country X*], amounting to EUR 70 thousand, towards payroll for employees who were temporarily out of work in flood-affected areas. The full amount of the grant was received in 2024 and recognised in profit or loss as 'other income' (see Note 9(A)).

a. The Group has elected to present government grants related to assets as deferred income. Alternatively, an entity may present these grants as a deduction in arriving at the carrying amount of the asset.

The deferred income is generally classified as a non-current liability when an entity presents a classified statement of financial position.

b. In our view, if emissions allowances are received from a government for less than their fair value, then the entity should choose an accounting policy, to be applied consistently, either to recognise the resulting government grant at fair value (as the difference between the fair value of the allowances and the consideration (if any) paid) or to recognise them at the nominal amount paid for the certificates. IAS 20 Accounting for Government Grants and Disclosure of Government Assistance notes that fair value is the usual approach for non-monetary grants.

The Group has elected to account for the government grant related to emissions allowances at their fair value.

#### A. Warranties

IAS 37.85(a)–(c)

IAS 1.98(b) 125

37.85(a)-(b)

IAS 37.84(a)

IAS 37.84(b)

IAS 37.84(c)

IAS 37.84(e) IAS 37.84(a)

The provision for warranties relates mainly to paper sold during 2023 and 2024. The provision has been estimated based on historical warranty data associated with similar products and services. The Group expects to settle the majority of the liability over the next year. An expected reimbursement of warranty expense incurred of EUR 25 thousand has been included in 'other trade receivables' (see Note 18) following a supplier accepting responsibility for the defective products.

#### B. Restructuring

During 2024, a provision of EUR 280 thousand was made to cover the costs associated with restructuring part of a manufacturing facility within the Non-recycled Papers segment that will be retained when the remainder of the facility is sold (see Note 20). Estimated restructuring costs mainly include employee termination benefits (see Note 13(E)) and are based on a detailed plan agreed between management and employee representatives. The restructuring and the sale are expected to be completed by June 2025.

During 2023, the Group committed to a plan to restructure a product line in the American Paper manufacturing and distribution division due to a decrease in demand as a result of a deterioration in economic conditions. Following the announcement of the plan, the Group recognised a provision of EUR 460 thousand for expected restructuring costs, including contract termination costs, consulting fees and employee termination benefits (see Note 13(E)). Estimated costs were based on the terms of the relevant contracts. The restructuring was completed in 2024, and EUR 360 thousand of the provision was used during the year. The unused provision of EUR 100 thousand was reversed and has been included in 'cost of sales'.

Insights 3.12.850.10 a.

io.10 a. In our view, in the statement of profit or loss and OCI, the reversal of a provision should be presented in the same line item as the original estimate.

#### **31. Provisions (continued)**

#### C. Site restoration

#### i. France

A provision of EUR 740 thousand was made during 2023 and an unwind of the discount of EUR 60 thousand was recognised in 2024 in respect of the Group's obligation to rectify environmental damage in France. The required work was completed during 2024 at a cost of EUR 800 thousand.

#### ii. Romania

Under Romanian law, the Group's subsidiary in Romania is required to restore contaminated land to its original condition before the end of 2027. During 2024, the Group provided EUR 660 thousand for this purpose.

Because of the long-term nature of the liability, the greatest uncertainty in estimating the provision is the costs that will be incurred. In particular, the Group has assumed that the site will be restored using technology and materials that are currently available. The Group has been provided with a range of reasonably possible outcomes for the total cost, which range from EUR 500 thousand to EUR 700 thousand, reflecting different assumptions about pricing of the individual components of the cost. The provision has been calculated using a discount rate of 5.9 percent, which is the risk-free rate in Romania. The rehabilitation is expected to occur in the next two to three years.

The provision has increased compared with the amount of EUR 500 thousand reported in the Company's interim financial statements as at 30 June 2024 due to a change in estimated costs. At the time of preparing the interim financial statements, the extent of restoration work required was uncertain, because the inspection report by the Romanian authorities had not yet been finalised. The estimates were subsequently revised based on the final report.

#### iii. Acquisition of Papyrus

As part of the acquisition of Papyrus, the Group recognised environmental provisions of EUR 150 thousand, measured on a provisional basis (see Note 34(C)).

IAS 34.26

**vppendices** 

### **31. Provisions (continued)**

#### D. Emissions schemes

The Group participates in a 'cap and trade' scheme in various countries (see Note 30(B)). The Group recognises a liability to surrender emissions allowances as it emits pollutants. The liability is measured based on the carrying amount of the allowances on hand to the extent of emissions within the annual limit (see Note 22), and at the current market value of allowances to the extent that the Group would be required to purchase additional allowances to settle the obligation.

During 2024, the Group recognised a provision for pollutants emitted of EUR 120 thousand. The provision will be settled by surrendering the emissions allowances to the Government in 2025. A provision of EUR 140 thousand at 31 December 2023 was settled in 2024 in a similar manner.

As a result of the acquisition of Papyrus, the Group assumed a contingent liability of

#### E. Legal

IAS 37.86(a)–(b)

IAS 37.85(a)

IAS 37.85(a)

### EUR 20 thousand, measured on a provisional basis (see Note 34(C)).

Levies

E.

The Group operates in a number of countries in which it is subject to government levies. It assesses the timing of when to accrue environmental taxes imposed by legislation at the end of the tax year (31 March) on entities that manufacture pulp products. The Group recognised a liability to pay environmental taxes on 31 March, when the obligating event as stated in the legislation occurred. It paid that liability in full at a later date.

Therefore, at 31 December 2024 no liability for environmental taxes has been recognised. An expense of EUR 102 thousand has been recognised in profit or loss for the year ended 31 December 2024.

#### 32. Financial instruments – Fair values and risk management

#### A. Accounting classifications and fair values^{a, b}

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

Trade and other receivables and trade and other payables classified as held-for-sale are not included in the table below (see Note 20). Their carrying amount is a reasonable approximation of fair value.

IFRS 78, 29
 a. In this table, the Group has disclosed the fair value of each class of financial assets and financial liabilities in a way that permits the information to be compared with the carrying amounts. In addition, it has reconciled the assets and liabilities to the different categories of financial instruments as defined in IFRS 9. This presentation method is optional and different presentation methods may be appropriate, depending on circumstances. The Group has not disclosed the fair values of financial instruments such as short-term trade receivables and payables, because their carrying amounts are a reasonable approximation of fair value.
 IFRS 76, B1-B3
 b. An entity groups financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments. Although IFRS 7 does not define 'classes', as a minimum instruments measured at amortised cost should be distinguished from instruments measured at fair value.

Introduction

IFRS 13.93(c), 95

IFRS 13.93(e)(iv), 95

Notes to the consolidated financial statements (continued)

#### 32. Financial instruments - Fair values and risk management (continued)

#### Β. **Measurement of fair values (continued)**

#### ii. **Transfers between Levels 1 and 2**

At 31 December 2024, FVOCI corporate debt securities with a carrying amount of EUR 40 thousand were transferred from Level 1 to Level 2 because guoted prices in the market for such debt securities were no longer regularly available. To determine the fair value of such debt securities, management used a valuation technique in which all significant inputs were based on observable market data (see Note 32(B)(i)). There were no transfers from Level 2 to Level 1 in 2024 and no transfers in either direction in 2023.

#### Level 3 recurring fair values iii.

#### Reconciliation of Level 3 fair values

The following table shows a reconciliation from the opening balances to the closing balances for Level 3 fair values.

	Balance at 31 December 2024		-	(270)	(45)

Transfer out of Level 3

The Group holds an investment in equity shares of MSE Limited with a fair value of EUR 243 thousand at 31 December 2024 (2023: EUR 225 thousand). The fair value of this investment was categorised as Level 3 at 31 December 2023 (for information on the valuation technique, see Note 32B(i)). This was because the shares were not listed on an exchange and there were no recent observable arm's length transactions in the shares.

During 2024, MSE Limited listed its equity shares on an exchange and they are currently actively traded in that market. Because the equity shares now have a published price quotation in an active market, the fair value measurement was transferred from Level 3 to Level 1 of the fair value hierarchy at 31 December 2024.

#### Notes to the consolidated financial statements (continued) 32. Financial instruments – Fair values and risk management (continued) **Measurement of fair values (continued)** Β. iii. The Group has exposure to the following risks arising from financial instruments: credit risk (see Note 32(C)(ii)); • liquidity risk (see Note 32(C)(iii)); and market risk (see Note 32(C)(iv)). **Risk management framework** i. IFRS 7.31, 33(b) The Company's board of directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the board of directors on its activities. The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations. The Group audit committee oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee. The financial risk disclosures presented are only illustrative and reflect the facts and circumstances of the Group. In particular, IFRS 7 requires the disclosure of summary quantitative data about an entity's risk exposures based on information provided internally to an entity's key management personnel, although certain minimum disclosures are

#### Trade receivables and contract assets (continued)

Expected credit loss assessment for corporate customers

The Group allocates each exposure to a credit risk grade based on data that is determined to be predictive of the risk of loss (including but not limited to external ratings, audited financial statements, management accounts and cash flow projections and available press information about customers) and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of the risk of default and are aligned to external credit rating definitions from agencies [*Rating Agencies X and Y*].

Exposures within each credit risk grade are segmented by geographic region and industry classification and an ECL rate is calculated for each segment based on delinquency status and actual credit loss experience over the past seven years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

Scalar factors are based on GDP forecast and industry outlook and include the following: 1.3 (2023: 1.2) for [*Country X*], 0.9 (2023: 0.8) for [*Country Y*], 1.1 (2023: 1.2) for [*Country Z*] and 1.8 (2023: 1.9) for [*Industry A*].

The following table provides information about the exposure to credit risk and ECLs for trade receivables and contract assets for corporate customers as at 31 December 2024.

<b>31 December 2024</b> In thousands of EUR	Equivalent to external credit rating [ <i>Agency Y</i> ]	Weighted- average loss rate	Gross carrying amount	Impairment Ioss allowance	Credit- impaired
Grades 1–6: Low risk	BBB- to AAA	0.30%	9,163	(27)	No
Grades 7–9: <i>Fair risk</i>	BB- to BB+	0.60%	16,094	(97)	No
Grade 10: Substandard	B- to CCC-	2.60%	1,633	(42)	No
Grade 11: Doubtful	C to CC	23.20%	118	(27)	Yes
Grade 12: Loss	D	44.90%	67	(30)	Yes
			27,075	(223)	

Expected credit loss assessment for individual customers

The Group uses an allowance matrix to measure the ECLs of trade receivables from individual customers, which comprise a very large number of small balances.

Loss rates are calculated under a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Roll rates are calculated separately for exposures in different segments based on the following common credit risk characteristics – geographic region, age of customer relationship and type of product purchased.

- ii. Credit risk (continued)

#### Debt securities

IFRS 7.33(a)–(b), 35B(a), 35F(a), 35G(a)–(b) The Group limits its exposure to credit risk by investing only in liquid debt securities and only with counterparties that have a credit rating of at least A2 from [*Rating Agency X*] and A from [*Rating Agency Y*].

The Group monitors changes in credit risk by tracking published external credit ratings. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in published ratings, the Group supplements this by reviewing changes in bond yields and, where available, credit default swap (CDS) prices together with available press and regulatory information about debtors.

12-month and lifetime probabilities of default are based on historical data supplied by [*Rating Agency X*] for each credit rating and are recalibrated based on current bond yields and CDS prices. Loss given default parameters generally reflect an assumed recovery rate of 40 percent except when a security is credit-impaired, in which case the estimate of loss is based on the instrument's current market price and original effective interest rate.

IFRS 7.34(a), (c)

The exposure to credit risk for debt securities at amortised cost, FVOCI and FVTPL at the reporting date by geographic region was as follows.

	Net carrying	amount

NOTES

### Notes to the consolidated financial statements (continued)

# **32. Financial instruments – Fair values and risk management** (continued)

#### C. Financial risk management (continued)

#### iii. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's objective when managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group uses activity-based costing to cost its products and services, which assists it in monitoring cash flow requirements and optimising its cash return on investments.

The Group aims to maintain the level of its cash and cash equivalents and other highly marketable debt investments at an amount in excess of expected cash outflows on financial liabilities (other than trade payables) over the next 60 days. As described in Note 19, cash of EUR 300 thousand (2023: nil) is subject to restrictions imposed by certain customers. As such, this cash amount was excluded when calculating the ratio for the current period. The ratio of investments to outflows was 1.17 at 31 December 2024 (2023: 1.21).

The Group also monitors the level of expected cash inflows on trade and other receivables together with expected cash outflows on trade and other payables. At 31 December 2024, the expected cash inflows from trade and other receivables maturing within two months were EUR 30,892 thousand (2023: EUR 21,209 thousand) and the expected cash outflows from trade and other payables due within two months were EUR 23,024 thousand (2023: EUR 20,444 thousand). This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

As described in Note 29, the Group also participates in a supplier finance arrangement with the principal purpose of facilitating efficient payment processing of supplier invoices and providing the willing suppliers early payment terms compared with the related invoice payment due date. The arrangement allows the Group to centralise payments of trade payables to the bank rather than paying each supplier individually.

From the Group's perspective, the arrangement does not significantly extend payment terms beyond the normal terms agreed with other suppliers that are not participating; on average, the payment terms for invoices relating to participating suppliers are extended by 5 days compared with the normal terms agreed with other suppliers that are not participating (see Note 29).

In addition, the Group maintains the following lines of credit.

- EUR 10,000 thousand overdraft facility that is unsecured. Interest would be payable at the rate of Euribor plus 250 basis points (2023: Euribor plus 160 basis points).
- EUR 15,000 thousand facility that is unsecured and can be drawn down to meet short-term financing needs. The facility has a 30-day maturity that renews automatically at the option of the Group. Interest would be payable at a rate of Euribor plus 200 basis points (2023: Euribor plus 110 basis points).

IFRS 7.39(b). B11A-B11D

vppendices

IFRS 7.39, B11,

The Group has disclosed a contractual maturity analysis for its financial liabilities, which is the minimum disclosure under IFRS 7 in respect of liquidity risk. Because IFRS 7 does not mandate the number of time bands to be used in Insights 7.10.650.80 the analysis, the Group has applied judgement to determine an appropriate number of time bands.

Insights 7.10.650.70 b. The Group has included both the interest and principal cash flows in the analysis. In our view, this best represents the liquidity risk being faced by the Group.

In our view, the maturity analysis should include all derivative financial liabilities, but contractual maturities only are Insights 7.10.650.30 ^{C.} required for those essential for an understanding of the timing of the cash flows.

d. In disclosing information about the maturity analysis of financial liabilities, an entity does not separate an embedded Insights 7.10.650.60; derivative from a hybrid financial instrument. For such an instrument, the entity applies the disclosure requirements IFRS 7.B11A for non-derivative financial liabilities. The Group has therefore also included the contractual cash flows associated with the embedded derivative related to the series B convertible notes.

IFRS 7.39(b)–(c), B11D	The inflows/(outflows) disclosed in the above table represent the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes and which are not usually closed out before contractual maturity. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross cash settlement.							
IFRS 7.B10A	As disclosed in Note 28(B), the future breach of any of these co than indicated in the above table	venants m						

The interest payments on variable interest rate loans and bond issues in the table above reflect market forward interest rates at the reporting date and these amounts may change as market interest rates change. The future cash flows on contingent consideration (see Note 34(A)) and derivative instruments may be different from the amount in the above table as interest rates and exchange rates or the relevant conditions underlying the contingency change. Except for these financial liabilities, it is not expected that the cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts.^a

_____

Insights 7.10.650.110 When the amount payable is not fixed, the amount to be disclosed is determined with reference to conditions existing at the reporting date. For example, for a floating-rate bond with interest payments indexed to three-month Euribor, in our view the amount to be disclosed should be based on forward rates rather than spot rates prevailing at the reporting date because the spot interest rates do not represent the level of the index based on which the cash flows will be payable. The forward interest rates better describe the level of the index in accordance with the conditions existing at the reporting date.

# **32.** Financial instruments – Fair values and risk management (continued)

#### C. Financial risk management (continued)

#### iv. Market risk

Market risk is the risk that changes in market prices – e.g. foreign exchange rates, interest rates and equity prices – will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group uses derivatives to manage market risks. All such transactions are carried out within the guidelines set by the risk management committee. Generally, the Group seeks to apply hedge accounting to manage volatility in profit or loss.

#### Currency risk^a

The Group is exposed to transactional foreign currency risk to the extent that there is a mismatch between the currencies in which sales, purchases, receivables and borrowings are denominated and the respective functional currencies of Group companies. The functional currencies of Group companies are primarily Euro (EUR) and Swiss francs (CHF). The currencies in which these transactions are primarily denominated are EUR, USD, GBP and CHF.

The Group's risk management policy is to hedge 75 to 85 percent of its estimated foreign currency exposure in respect of forecast sales and purchases over the following 12 months at any point in time. The Group uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date. These contracts are generally designated as cash flow hedges.^b

IFRS 7.21C, 22A(a)

NOTES

Primary statements

IFRS 7.24C(b)(vi)	a.	The Group did not designate any net positions in a hedging relationship. For an entity that did, the required disclosures would include the hedging gains or losses recognised in a separate line item in the statement of profit or loss and OCI.
IFRS 7.24B(a), 24C(a)	b.	The Group has not designated any fair value hedging relationships. For an entity that has a fair value hedge, the required disclosures would include:
		<ul> <li>the carrying amount of the hedged item recognised in the statement of financial position (presenting assets separately from liabilities);</li> </ul>
		• the accumulated amount of fair value hedge adjustments on the hedged item included in the carrying amount of the hedged item recognised in the statement of financial position (presenting assets separately from liabilities);
		<ul> <li>the line item in the statement of financial position that includes the hedged item;</li> </ul>
		• the change in value of the hedged item used as the basis for recognising hedge ineffectiveness for the period;
		• the accumulated amount of fair value hedge adjustments remaining in the statement of financial position for any hedged items that have ceased to be adjusted for hedging gains and losses;
		<ul> <li>hedge ineffectiveness: i.e. the difference between the hedging gains or losses of the hedging instrument and the hedged item recognised in profit or loss; and</li> </ul>

• the line item in the statement of profit or loss and OCI that includes the recognised hedge ineffectiveness.

Introduction

	Notes to the consolidated financial statements (continued)
	32. Financial instruments – Fair values and risk management (continued)
	C. Financial risk management (continued)
	iv. Market risk (continued)
	Currency risk (continued)
IFRS 7.22B	The Group designates the spot element of forward foreign exchange contracts to hedge its currency risk and applies a hedge ratio of 1:1. The forward elements of forward exchange contracts are excluded from the designation of the hedging instrument and are separately accounted for as a cost of hedging, which is recognised in equity in a cost of hedging reserve. The Group's policy is for the critical terms of the forward exchange contracts to align with the hedged item.
IFRS 7.22B(b)	The Group determines the existence of an economic relationship between the hedging instrument and hedged item based on the currency, amount and timing of their respective cash flows. The Group assesses whether the derivative designated in each hedging relationship is expected to be and has been effective in offsetting changes in cash flows of the hedged item under the hypothetical derivative method.
IFRS 7.23D	In these hedge relationships, the main sources of ineffectiveness are: ^a
	• the effect of the counterparties' and the Group's own credit risk on the fair value of the forward foreign exchange contracts, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in exchange rates; and
	<ul> <li>changes in the timing of the hedged transactions.</li> </ul>

a. The Group did not have any new sources of hedge ineffectiveness emerging in designated hedging relationships. If it had, then it would be required to disclose those sources by risk category and explain the resulting hedge ineffectiveness.

IERS 7.34(a)

Introduction

Disclosure of estimated forecast sales and purchases does not form part of the minimum disclosure requirements in IFRS 7, because estimated forecast sales and purchases are not financial instruments. However, the Group has disclosed this information because it is relevant to an understanding of its exposure to currency risk. In addition, IFRS 7 requires quantitative data about risk exposures to be based on information provided internally to key management personnel and the Group provides forecast sales and purchase information to management as part of its management of currency risk.

IFRS 7.23D

Notes to the consolidated financial statements (continued)

### 32. Financial instruments - Fair values and risk management (continued)

- **Financial risk management (continued)** С.
- Market risk (continued) iv.

#### Interest rate risk

The Group adopts a policy of ensuring that between 80 and 90 percent of its interest rate risk exposure is at a fixed rate. This is achieved partly by entering into fixed-rate instruments and partly by borrowing at a floating rate and using interest rate swaps as hedges of the variability in cash flows attributable to movements in interest rates. The Group applies a hedge ratio of 1:1.

The Group determines the existence of an economic relationship between the hedging instrument and hedged item based on the reference interest rates, tenors, repricing dates and maturities and the notional or par amounts.

The Group assesses whether the derivative designated in each hedging relationship is expected to be effective in offsetting changes in cash flows of the hedged item under the hypothetical derivative method.

In these hedge relationships, the main sources of ineffectiveness are:^a

- the effect of the counterparty's and the Group's own credit risk on the fair value of the swaps, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in interest rates; and
- differences in repricing dates between the swaps and the borrowings.

#### Exposure to interest rate risk

The interest rate profile of the Group's interest-bearing financial instruments as reported to the management of the Group is as follows.

	Nominal amount			
In thousands of EUR	2024	2023		
Fixed-rate instruments				
Financial assets	2,554	2,629		
Financial liabilities	(18,041)	(12,869)		
	(15,487)	(10,240)		
Effect of interest rate swaps	(8,000)	(7,500)		
	(23,487)	(17,740)		
Variable-rate instruments				
Financial liabilities	(11,064)	(14,055)		
Effect of interest rate swaps	8,000	7,500		
	(3,064)	(6,555)		

#### Fair value sensitivity analysis for fixed-rate instruments

The Group does not account for any fixed-rate financial assets or financial liabilities, at FVTPL, and the Group does not designate derivatives (interest rate swaps) as hedging instruments under a fair value hedge accounting model. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

A change of 100 basis points in interest rates would have increased or decreased equity by EUR 65 thousand after tax (2023: EUR 66 thousand). This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

IFRS 7.23E

The Group did not have any new sources of hedge ineffectiveness emerging in designated hedging relationships. If it had, then it would be required to disclose those sources by risk category and explain the resulting hedge ineffectiveness.

# **32. Financial instruments – Fair values and risk management** (continued)

- C. Financial risk management (continued)
- iv. Market risk (continued)

Interest rate risk (continued)

#### Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

	Profit or	loss	Equity, net of tax		
Effect in thousands of EUR	100 bp increase	100 bp decrease	100 bp increase	100 bp decrease	
31 December 2024					
Variable-rate instruments	(66)	66	-	-	
Interest rate swaps	61	(61)	310	(302)	
Cash flow sensitivity (net)	(5)	5	310	(302)	
31 December 2023					
Variable-rate instruments	(142)	142	-	-	
Interest rate swaps	61	(61)	280	(275)	
Cash flow sensitivity (net)	(81)	81	280	(275)	

#### Other market price risk

The primary goal of the Group's investment in equity securities is to hold the investments for the long term for strategic purposes. Management is assisted by external advisers in this regard. However, the Group also holds certain equity securities for the purpose of trading. See Note 25 for further details.

#### Sensitivity analysis – Equity price risk

All of the Group's listed equity investments are listed on either the London Stock Exchange or the New York Stock Exchange. For such investments classified at FVOCI, a 2 percent increase in the FTSE 100 plus a 3 percent increase in the Dow Jones Industrial Average at the reporting date would have increased equity by EUR 28 thousand after tax (2023: an increase of EUR 18 thousand after tax); an equal change in the opposite direction would have decreased equity by EUR 28 thousand after tax). For such investments classified as at FVTPL, the impact of a 2 percent increase in the FTSE 100 plus a 3 percent increase in the Dow Jones Industrial Average at the reporting classified as at FVTPL, the impact of a 2 percent increase in the FTSE 100 plus a 3 percent increase in the Dow Jones Industrial Average at the reporting date on profit or loss would have been an increase of EUR 16 thousand after tax (2023: EUR 18 thousand after tax). An equal change in the opposite direction would have decreased profit or loss by EUR 16 thousand after tax.

Cash flow hedges^{a, b}

At 31 December 2024, the Group held the following instruments to hedge exposures to changes in foreign currency and interest rates.

	Maturity				
	1–6 months	6–12 months	More than one year		
Foreign currency risk					
Forward exchange contracts					
Net exposure (in thousands of EUR)	253	63	-		
Average EUR:USD forward contract rate	0.91	0.87	0.83		
Average EUR:GBP forward contract rate	1.27	1.23	1.20		
Average EUR:CHF forward contract rate	0.92	0.91	0.90		
Interest rate risk					
Interest rate swaps					
Net exposure (in thousands of EUR)	-	41	78		
Average fixed interest rate	2.2%	2.4%	2.8%		

At 31 December 2023, the Group held the following instruments to hedge exposures to changes in foreign currency rates.

	Maturity			
	1–6 months	6–12 months	More than one year	
Foreign currency risk				
Forward exchange contracts				
Net exposure (in thousands of EUR)	293	73	-	
Average EUR:USD forward contract rate	0.93	0.89	0.85	
Average EUR:GBP forward contract rate	1.35	1.32	1.28	
Average EUR:CHF forward contract rate	0.95	0.93	0.91	
Interest rate risk				
Interest rate swaps				
Net exposure (in thousands of EUR)	-	63	67	
Average fixed interest rate	2.1%	2.2%	2.9%	

IFRS 7.23C, 24D

a.

Liability limited by a scheme approved under Professional Standards Legislation.

The Group does not frequently reset hedging relationships because both the hedging instrument and the hedged item frequently change (i.e. the entity does not use a dynamic process in which neither the exposure nor the hedging instruments used to manage that exposure remain the same for a long period). If it did, then it would be exempt from providing the disclosures required by paragraphs 23A and 23B of IFRS 7, but would instead provide information about the ultimate risk management strategy, how it reflects its risk management strategy in its hedge accounting and designations, and how frequently hedging relationships are discontinued and restarted. If the volume of these hedges is unrepresentative of normal volumes during the year (i.e. the volume at the reporting date does not reflect the volumes during the year), then the entity would disclose that fact and the reason it believes the volumes are unrepresentative.

IFRS 7.23F

The Group did not have any forecast transaction for which cash flow hedge accounting had been used in the previous period, but which is no longer expected to occur. If it did, then it would be required to disclose a description of the forecast transaction as well as the amount reclassified from the cash flow hedge reserve to profit or loss. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. ### **32.** Financial instruments – Fair values and risk management (continued)

#### D. Master netting or similar agreements^{a, b}

The Group enters into derivative transactions under International Swaps and Derivatives Association (ISDA) master netting agreements. In general, under these agreements the amounts owed by each counterparty on a single day in respect of all transactions outstanding in the same currency are aggregated into a single net amount that is payable by one party to the other. In certain circumstances – e.g. when a credit event such as a default occurs – all outstanding transactions under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions.

The ISDA agreements do not meet the criteria for offsetting in the statement of financial position. This is because the Group does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default on the bank loans or other credit events.

The following table sets out the carrying amounts of recognised financial instruments that are subject to the above agreements.

### **33. List of subsidiaries**^a

See accounting policy in Note 44(A)(ii).

IFRS 12.10(a), 12(a)–(b), IAS 24.13–14 Set out below is a list of material subsidiaries of the Group.

A. Maple-leaf Inc and Silver Fir S.A.

Although the Group owns less than half of Maple-leaf Inc and Silver Fir S.A. and has less than half of their voting power, management has determined that the Group controls these two entities. The Group controls Maple-leaf Inc by virtue of an agreement with its other shareholders; the Group has control over Silver Fir S.A., on a de facto power basis, because the remaining voting rights in the investee are widely dispersed and there is no indication that all other shareholders exercise their votes collectively.

#### B. Sloan Bio-Research Co and MayCo

The Group does not hold any ownership interests in two structured entities, Sloan Bio-Research Co and MayCo. However, based on the terms of agreements under which these entities were established, the Group receives substantially all of the returns related to their operations and net assets (these entities perform research activities exclusively for the Group) and has the current ability to direct these entities' activities that most significantly affect these returns. Because the owners' interests in these entities are presented as liabilities of the Group, there are no NCI for these entities.

The Company has issued guarantees to certain banks in respect of the credit facilities of EUR 700 thousand granted to these entities, which is the maximum amount the Company is exposed to.

IFRS 12.7(a), 9(b), 10(b)(ii)

IFRS 12.14

Appendices

NOTES

 For additional disclosure examples and explanatory notes on IFRS 12, see our <u>Guide to annual financial statements –</u> IFRS 12 supplement.

### 34. Acquisition of subsidiary

See accounting policies in Note 44(A)(i)-(iii).

On 31 March 2024, the Group acquired 65 percent of the shares and voting interests in Papyrus. As a result, the Group's equity interest in Papyrus increased from 25 to 90 percent, granting it control of Papyrus (see Note 24(B)).

Included in the identifiable assets and liabilities acquired at the date of acquisition of Papyrus are inputs (a head office, several factories, patented technology, inventories and customer relationships), production processes and an organised workforce. The Group has determined that together the acquired inputs and processes significantly contribute to the ability to create revenue. The Group has concluded that the acquired set is a business.

Taking control of Papyrus will enable the Group to modernise its production process through access to Papyrus's patented technology. The acquisition is also expected to provide the Group with an increased share of the standard paper market through access to Papyrus's customer base. The Group also expects to reduce costs through economies of scale.

For the nine months ended 31 December 2024, Papyrus contributed revenue of EUR 20,409 thousand and profit of EUR 425 thousand to the Group's results. If the acquisition had occurred on 1 January 2024, management estimates that consolidated revenue would have been EUR 107,091 thousand, and consolidated profit for the year would have been EUR 8,128 thousand. In determining these amounts, management has assumed that the fair value adjustments, determined provisionally, that arose on the date of acquisition would have been the same if the acquisition had occurred on 1 January 2024.

#### A. Consideration transferred

The following table summarises the acquisition date fair value of each major class of consideration transferred.

In thousands of EUR Note	2024
Cash	2,500
Equity instruments (8,000 ordinary shares) 26(A)(i)	87
Replacement share-based payment awards	120
Contingent consideration 32(B)(iii)	250
Settlement of pre-existing relationship 9(B)	(326)
Total consideration transferred	2,631

#### Equity instruments issued

The fair value of the ordinary shares issued was based on the listed share price of the Company at 31 March 2024 of EUR 10.88 per share.

#### ii. Replacement share-based payment awards

In accordance with the terms of the acquisition agreement, the Group exchanged equity-settled share-based payment awards held by employees of Papyrus (the acquiree's awards) for equity-settled share-based payment awards of the Company (the replacement awards). The details of the acquiree's awards and replacement awards were as follows.

	Acquiree's awards	Replacement awards
Terms and conditions	Grant date: 1 April 2023 Vesting date: 31 March 2027 Service condition	Vesting date: 31 March 2027 Service condition
Fair value at date of acquisition	EUR 527 thousand	EUR 571 thousand

IFRS 3.B64(f)(iv)

i.

### 34. Acquisition of subsidiary (continued)

#### A. Consideration transferred (continued)

#### ii. Replacement share-based payment awards (continued)

The value of the replacement awards is EUR 520 thousand, after taking into account an estimated forfeiture rate of 9 percent. The consideration for the business combination includes EUR 120 thousand transferred to employees of Papyrus when the acquiree's awards were substituted by the replacement awards, which relates to past service. The balance of EUR 400 thousand will be recognised as post-acquisition compensation cost. For further details on the replacement awards, see Note 12(A)(ii).

#### iii. Contingent consideration

#### IFRS 3.B64(g), B67(b)

IFRS 3.B64(I)

IFRS 3.B64(I)-(m)

IFRS 3.B64(i), IAS 7.40(a)–(d)

IFRS 3.B64(h)(i) IAS 740(c) The Group has agreed to pay the selling shareholders in three years' time additional consideration of EUR 600 thousand if the acquiree's cumulative EBITDA over the next three years exceeds EUR 10,000 thousand. The Group has included EUR 250 thousand as contingent consideration related to the additional consideration, which represents its fair value at the date of acquisition. At 31 December 2024, the contingent consideration had increased to EUR 270 thousand (see Note 29).

#### iv. Settlement of pre-existing relationship

The Group and Papyrus were parties to a long-term supply contract under which Papyrus supplied the Group with timber products at a fixed price. Under the contract, the Group could terminate the agreement early by paying Papyrus EUR 326 thousand. This pre-existing relationship was effectively terminated when the Group acquired Papyrus.

The Group has attributed EUR 326 thousand of the consideration transferred to the extinguishment of the supply contract and has included the amount in 'other expenses' (see Note 9(B)). This amount is the lower of the termination amount and the value of the off-market element of the contract. The fair value of the contract at the date of acquisition was EUR 600 thousand, of which EUR 400 thousand related to the unfavourable aspect of the contract to the Group relative to market prices.

#### B. Acquisition-related costs

The Group incurred acquisition-related costs of EUR 50 thousand on legal fees and due diligence costs. These costs have been included in 'administrative expenses'.

#### C. Identifiable assets acquired and liabilities assumed

The following table summarises the recognised amounts of assets acquired and liabilities assumed at the date of acquisition.

In thousands of EUR	Note	2024
Property, plant and equipment	21(A)	1,955
Intangible assets	22(A)	250
Inventories		825
Trade receivables		848
Cash and cash equivalents		375
Loans and borrowings		(500)
Deferred tax liabilities	14(E)	(79)
Contingent liabilities	31	(20)
Site restoration provision	31	(150)
Trade and other payables		(460)
Total identifiable net assets acquired		3,044

# Introduction

### 34. Acquisition of subsidiary (continued)

#### C. Identifiable assets acquired and liabilities assumed (continued)

#### Measurement of fair values^a *i*.

The valuation techniques used for measuring the fair value of material assets acquired were as follows.

	Assets acquired	Valuation technique
	Property, plant and equipment	Market comparison technique and cost technique: The valuation model considers market prices for similar items when they are available, and depreciated replacement cost when appropriate. Depreciated replacement cost reflects adjustments for physical deterioration as well as functional and economic obsolescence.
	Intangible assets	<i>Relief-from-royalty method and multi-period excess earnings method:</i> The relief-from-royalty method considers the discounted estimated royalty payments that are expected to be avoided as a result of the patents being owned. The multi-period excess earnings method considers the present value of net cash flows expected to be generated by the customer relationships, by excluding any cash flows related to contributory assets.
	Inventories	<i>Market comparison technique:</i> The fair value is determined based on the estimated selling price in the ordinary course of business less the estimated costs of completion and sale, and a reasonable profit margin based on the effort required to complete and sell the inventories.
IFRS 3.B64(h)(ii)–(iii)		eivables comprise gross contractual amounts due of EUR 900 thousand, of which and was expected to be uncollectable at the date of acquisition.
	Fair values m	neasured on a provisional basis
IFRS 3.B67(a),	The following	amounts have been measured on a provisional basis.
IAS 1.125		ie of Papyrus's intangible assets (patented technology and customer relationships) easured provisionally, pending completion of an independent valuation.
IFRS 3.B64(j), B67(c), IAS 37.86	supplied de underlying s claim has lit Manageme	he defendant in legal proceedings brought by a customer that alleges that Papyrus fective goods. Management's assessment, based on its interpretation of the sales contract and independent legal advice, is that the basis for the customer's tle merit and it is not probable that an outflow will be required to settle the claim. nt's assessment of the fair value of this contingent liability, taking into account the ssible outcomes of the judicial process, is EUR 20 thousand (see Note 39).
	conducted a regulations	perations are subject to specific environmental regulations. The Group has a preliminary assessment of site restoration provisions arising from these and has recognised a provisional amount. The Group will continue to review these ing the measurement period.
	circumstances	ation obtained within one year of the date of acquisition about facts and s that existed at the date of acquisition identifies adjustments to the above amounts, nal provisions that existed at the date of acquisition, then the accounting for the II be revised.

IFRS 3.61

IFRS 13.BC184

The Group has disclosed information about the fair value measurement of assets acquired in a business a. combination, although the disclosure requirements of IFRS 13 do not apply to the fair value of these assets if they are subsequently measured at other than fair value. This disclosure is provided for illustrative purposes only.

### 34. Acquisition of subsidiary (continued)

#### D. Goodwill

Goodwill arising from the acquisition has been recognised as follows.

In thousands of EUR	Note	2024
Consideration transferred	34(A)	2,631
NCI, based on their proportionate interest in the recognised amounts of the assets and liabilities of Papyrus		305
Fair value of pre-existing interest in Papyrus		649
Fair value of identifiable net assets	34(C)	(3,044)
Goodwill	22(A)	541

The remeasurement to fair value of the Group's existing 25 percent interest in Papyrus resulted in a gain of EUR 250 thousand (EUR 649 thousand less the EUR 419 thousand carrying amount of the equity-accounted investee at the date of acquisition plus EUR 20 thousand of translation reserve reclassified to profit or loss). This amount has been included in 'finance income' (see Note 10).

IFRS 3.B64(e), B64(k)

IFRS 3.B64(o)(i)

IFRS 3.B64(p)(i)

IFRS 3.B64(p)(ii)

The goodwill is attributable mainly to the skills and technical talent of Papyrus's work force and the synergies expected to be achieved from integrating Papyrus into the Group's existing Standard Papers business. None of the goodwill recognised is expected to be deductible for tax purposes.

IFRS 12.10(a)(ii), 12,

B10-B11

### Notes to the consolidated financial statements (continued)

#### 35. Non-controlling interests^a

Introduction

#### **37. Leases**

IFRS 16.60

IFRS 16.53-54

IFRS 16.47(a)(ii)

IFRS 16.53(i) IFRS 16.53(a) IFRS 16.53(h)

IFRS 16.53(j)

See accounting policy in Note 44(U).

#### Α. Leases as lessee

IFRS 16.51, 59	The Group leases warehouse and factory facilities. The leases typically run for a period of 10 years, with an option to renew the lease after that date. Lease payments are renegotiated every five years to reflect market rentals. Some leases provide for additional rent payments that are based on changes in local price indices. For certain leases, the Group is restricted from entering into any sub-lease arrangements. The Group also leases production equipment.
IAS 1.122	The warehouse and factory leases were entered into many years ago as combined leases of land and buildings.
	During 2024, one of the leased properties has been sub-let by the Group. The lease and sub-lease

expire in 2026.

The Group leases IT equipment with contract terms of one to three years. These leases are shortterm and/or leases of low-value items. The Group has elected not to recognise right-of-use assets and lease liabilities for these leases.

Information about leases for which the Group is a lessee is presented below.

#### **Right-of-use assets**^a

i.

Right-of-use assets related to leased properties that do not meet the definition of investment property are presented as property, plant and equipment (see Note 21(A)).

In thousands of EUR	Land and buildings	Production equipment	Tota
2024			
Balance at 1 January	2,181	1,972	4,153
Depreciation charge for the year	(25)	(283)	(308
Additions to right-of-use assets	150	-	150
Derecognition of right-of-use assets*	(402)	-	(402
Balance at 31 December	1,904	1,689	3,593

Derecognition of the right-of-use assets is as a result of entering into a finance sub-lease.

#### **37. Leases (continued)**

#### A. Leases as lessee (continued)

#### i. Right-of-use assets (continued)

In thousands of EUR	Land and buildings	Production equipment	Total
2023			
Balance at 1 January	2,526	2,057	4,583
Depreciation charge for the year	(30)	(265)	(295)
Additions to right-of-use assets	-	180	180
Derecognition of right-of-use assets*	(315)	-	(315)
Balance at 31 December	2,181	1,972	4,153

Derecognition of the right-of-use assets is as a result of entering into a finance sub-lease.

#### ii. Amounts recognised in profit or loss

In thousands of EUR	2024	2023
Interest on lease liabilities	320	238
Income from sub-leasing right-of-use assets presented in 'other revenue'	(150)	(90)
Expenses relating to short-term leases	80	90
Expenses relating to leases of low-value assets, excluding short-term		
leases of low-value assets	65	119
iii. Amounts recognised in statement of cash flows		
In thousands of EUR	2024	2023
Total cash outflow for leases	1,019	1,037

#### iv. Extension options

Some property leases contain extension options exercisable by the Group up to one year before the end of the non-cancellable contract period. Where practicable, the Group seeks to include extension options in new leases to provide operational flexibility. The extension options held are exercisable only by the Group and not by the lessors. The Group assesses at the lease commencement date whether it is reasonably certain to exercise the extension options. The Group reassesses whether it is reasonably certain to exercise the options if there is a significant event or significant changes in circumstances within its control.

The Group has estimated that the potential future lease payments, should it exercise the extension option, would result in an increase in lease liability of EUR 120 thousand.

#### B. Leases as lessor

The Group leases out its investment property consisting of its owned commercial properties as well as leased property (see Note 23). All leases are classified as operating leases from a lessor perspective with the exception of a sub-lease, which the Group has classified as a finance sub-lease.

#### **38. Commitments**

During 2024, the Group entered into a contract to purchase property, plant and equipment and patents and trademarks in 2024 for EUR 1,465 thousand (2023: nil) and EUR 455 thousand (2023: nil) respectively.

The Group has committed to reduce the carbon footprint of its Timber Products segment by 50 percent by increasing the use of green energy in the production and transportation of timber products. The Group's project to replace its fleet of diesel trucks with electric vehicles and to use solar energy in one of its factories has substantively commenced. The Group incurred costs of EUR 1,000 thousand in 2023 and is committed to incurring capital expenditure of EUR 20,000 thousand over the next four years. As part of the plan, the Group entered into a contract in 2024 to acquire property, plant and equipment in 2025 in the amount of EUR 640 thousand. See Notes 21(G) and 22(C) for the plan's impact on the useful life and impairment of property, plant and equipment.

The Group is committed to incurring other capital expenditure of EUR 150 thousand (2023: EUR 45 thousand). The Group's joint venture is committed to incurring capital expenditure of EUR 23 thousand (2023: EUR 11 thousand), of which the Group's share is EUR 9 thousand (2023: EUR 4 thousand). These commitments are expected to be settled in 2025.

The Group has entered into contracts for the management and maintenance of certain commercial properties that are leased to third parties. These contracts will give rise to annual expense of EUR 15 thousand for the next five years.

### **39. Contingencies**

A subsidiary is defending an action brought by an environmental agency in Europe. Although liability is not admitted, if the defence against the action is unsuccessful, then fines and legal costs could amount to EUR 950 thousand, of which EUR 250 thousand would be reimbursable under an insurance policy. Based on legal advice, management believes that the defence against the action will be successful.

As part of the acquisition of Papyrus, the Group recognised a contingent liability of EUR 20 thousand in respect of a claim for contractual penalties made by one of Papyrus's customers (see Note 34(C)).

ntroduction

IAS 16 74(c)

IAS 40 75(h)

IAS 1.125, 37.86

#### 40. Related parties^{a, b}

#### A. Parent and ultimate controlling party

IAS 1.138(c), 24.13

i.

IAS 24 18

IAS 24.17(a)

IAS 24.17(c) IAS 24.17(d) IAS 24.17(e)

IAS 24 17(d)

IAS 24,18(b)(i)

IAS 19.151(b), 24.17(b)

During 2024, a majority of the Company's shares were acquired by Cameron Paper Co from Brown Products Corporation. As a result, the new ultimate controlling party of the Group is AJ Pennypacker. The previous ultimate controlling party was Sigma Global Investment Holdings.^c

#### B. Transactions with key management personnel

#### Key management personnel compensation

Key management personnel compensation comprised the following.

In thousands of EUR	2024	2023
Short-term employee benefits	502	420
Post-employment benefits	82	103
Other long-term benefits	3	2
Termination benefits	25	-
Share-based payments	516	250
	1.128	775

Executive officers also participate in the Group's share option programme (see Note 12(A)(i)). Furthermore, employees of the Company are entitled to participate in a share purchase programme (see Note 12(A)(iii)) if they meet the criteria of investing a percentage of each month's salary for a period of 36 months. Consequently, the Group has deducted EUR 78 thousand from the salaries of the employees concerned (including an amount of EUR 37 thousand that relates to key management personnel), to satisfy the criteria. The amounts withheld are included in 'trade and other payables' (see Note 29).

As a result of the termination of the employment of one of the Group's executives in France, the executive received an enhanced retirement entitlement. Accordingly, the Group has recognised an expense of EUR 25 thousand during the year (2023: nil).

#### ii. Key management personnel transactions

Directors of the Company control 12 percent of the voting shares of the Company. A relative of a director of a subsidiary has a 10 percent share in the Group's joint venture (see Note 24(A)).

A number of key management personnel, or their related parties, hold positions in other companies that result in them having control or significant influence over these companies.

A number of these companies transacted with the Group during the year. The terms and conditions of these transactions were no more favourable than those available, or which might reasonably be expected to be available, in similar transactions with non-key management personnel-related companies on an arm's length basis.

ASIC Instrument 2016/191	a.	Where ASIC Instrument 2016/191 is applied in the financial statements, related party disclosures are subject to the exception of the rounding provisions. This exception is not reflected in this international-based illustrative disclosure.
	b.	For example disclosures for government-related entities that apply the exemption in paragraph 25 of IAS 24 <i>Related Party Disclosures</i> , see Appendix IV.
IAS 24.13	C.	If neither the Company's parent nor its ultimate controlling party produced consolidated financial statements available for public use, then the Company would disclose the name of the next most senior parent that does so. If neither the ultimate controlling party nor any intermediate controlling party produced consolidated financial statements that are available for public use, then this fact would be disclosed.
AASB 124.Aus13.1		When any of the parent entities and/or ultimate controlling parties named is incorporated or otherwise constituted outside Australia, an entity:
		(a) identifies which of those entities is incorporated overseas and where; and
		(b) discloses the name of the ultimate controlling entity incorporated within Australia.

Introduction

IAS 24.18

IAS 24.18(a)-(b), 19

#### 40. Related parties (continued)

#### C. Other related party transactions (continued)

All outstanding balances with these related parties are priced on an arm's length basis and are to be settled in cash within two months of the reporting date. None of the balances are secured. No expense has been recognised in the current year or prior year for bad or doubtful debts in respect of amounts owed by related parties. During 2024, there were no transactions or outstanding balances with Brown Products Corporation, the previous parent of the Group. No guarantees have been given or received.

To support the activities of the joint venture, the Group and the other investors in the joint venture have agreed to make additional contributions in proportion to their interests to make up any losses, if required (see Note 24).

Purchase obligations in relation to recycled paper products arise from supply and service contracts signed by the Group. During 2024, the Group entered into an EUR 89 thousand supply agreement with Cameron Paper Co. At 31 December 2024, the Group has used EUR 25 thousand of its commitment under the agreement.

IAS 1.114(c)(iv)(1), 24.21 Introduction

Australian content

#### **41. Subsequent events**

#### A. Restructuring

At the end of January 2025, the Group announced its intention to implement a cost-reduction programme and to take further measures to reduce costs. Additionally, to enable the Group to adapt its size to current market conditions, it intends to reduce the Group's workforce by 400 positions worldwide by the end of 2025, by means of non-replacement whenever possible. The Group expects the restructuring associated with the reduction in positions to cost between EUR 600 thousand and EUR 850 thousand in 2025 and 2026.

#### B. Others

Subsequent to 31 December 2024, one of the Group's major trade customers went into liquidation following a natural disaster in February 2025 that damaged its operating plant. Of the EUR 100 thousand owed by the customer, the Group expects to recover less than EUR 10 thousand. No additional allowance for impairment has been made in these consolidated financial statements.

On 10 January 2025, one of the premises of Oy Kossu AG, having a carrying amount of EUR 220 thousand, was seriously damaged by fire. Surveyors are in the process of assessing the extent of the loss, following which the Group will file a claim for reimbursement with the insurance company. The Group is unable to estimate the incremental costs relating to refurbishment and temporary shift of production to other locations (in excess of the reimbursement expected).

On 23 March 2025, an increase in the Netherlands corporate tax rate from 25 to 30 percent was substantively enacted, effective from 1 January 2025. This increase does not affect the amounts of current or deferred income taxes recognised at 31 December 2024. However, this change will increase the Group's future current tax charge accordingly. If the new tax rate were applied to calculate taxable temporary differences and tax losses recognised as at 31 December 2024 the effect would be that net deferred tax assets would increase by EUR 27 thousand (see Note 14).

On 22 July 2024, the Group announced its intention to acquire all of the shares of ABC Company for EUR 6,500 thousand. On 4 January 2025, the Group's shareholders approved the transaction and the Group is now awaiting approval from regulatory authorities before proceeding with the acquisition. Management anticipates that this approval will be received by April 2025.

Introduction

IAS 10.21-22

IAS 10.21-22

**vppendices** 

# 42. Basis of measurement

IAS 1.112(a), 117

The consolidated financial statements have been prepared on the historical cost basis except for the following items, which are measured on an alternative basis on each reporting date.

Items	Measurement bases
Derivative financial instruments	Fair value
Non-derivative financial instruments at FVTPL	Fair value
Debt and equity securities at FVOCI	Fair value
Contingent consideration assumed in a business combination	Fair value
Biological assets	Fair value less costs to sell
Investment property	Fair value
Liabilities for cash-settled shared-based payment arrangements	Fair value
Net defined benefit (asset) liability	Fair value of plan assets less the present value of the defined benefit obligation, limited as explained in Note 44(E)(iv)

# 43. Correction of errors^a

During 2024, the Group discovered that maintenance expenses had been erroneously duplicated in its financial statements since 2022. As a consequence, maintenance expenses and the related liabilities have been overstated. The errors have been corrected by restating each of the affected financial statement line items for prior periods. The following tables summarise the impacts on the Group's consolidated financial statements.

### *i.* Consolidated statement of financial position

	Impact of correction of error			
<b>1 January 2023</b> In thousands of EUR	As previously reported	Adjustments	As restated	
Total assets	86,344	-	86,344	
Trade and other payables (current)	(28,335)	85	(28,250)	
Deferred tax liabilities	(295)	(28)	(323)	
Others	(28,209)	-	(28,209)	
Total liabilities	(56,839)	57	(56,782)	
Retained earnings	(8,440)	(57)	(8,497)	
Others	(21,065)	-	(21,065)	
Total equity	(29,505)	(57)	(29,562)	
31 December 2023	As previously			
In thousands of EUR	reported	Adjustments	As restated	
Total assets	90,013	-	90,013	
Trade and other payables (current)	(21,424)	96	(21,328)	
Deferred tax liabilities	(374)	(32)	(406)	
Others	(32,913)	-	(32,913)	
Total liabilities	(54,711)	64	(54,647)	
Retained earnings	(13,722)	(64)	(13,786)	
Others	(21,580)	-	(21,580)	
Total equity	(35,302)	(64)	(35,366)	

## ii. Consolidated statement of profit or loss and OCI

	Impact of correction of error			
For the year ended 31 December 2023 In thousands of EUR	As previously reported	Adjustments	As restated	
Administrative expenses	(14,439)	11	(14,428)	
Income tax expense	(2,456)	(4)	(2,460)	
Others	22,862	-	22,862	
Profit	5,967	7	5,974	
Total comprehensive income	6,398	7	6,405	

There is no material impact on the Group's basic or diluted EPS and no impact on the total operating, investing or financing cash flows for the year ended 31 December 2023.

IAS 8.49

IAS 8.49

IAS 8.49

The Group has disclosed the nature of the prior-period error and the amount of the correction for each financial statement line item affected as required by IAS 8.

# 44. Material accounting policies^a

IAS 1.112(a), 116

IFRS 5.34, IAS 1.41, 8.28 The Group has consistently applied the following accounting policies to all periods presented in these consolidated financial statements, except if mentioned otherwise.

Certain comparative amounts in the statement of profit or loss and OCI have been restated, reclassified or re-presented, as a result of a correction of a prior-period error (see Note 43), a change in the classification of certain depreciation expenses during the current year (see Note 21(H)) or an operation discontinued during the current year (see Note 7).

Set out below is an index of the material accounting policies, the details of which are available on the pages that follow.

Α.	Basis of consolidation	170
Β.	Foreign currency	171
C.	Discontinued operation	172
D.	Revenue from contracts with customers	172

# 44. Material accounting policies (continued)

# A. Basis of consolidation

# i. Business combinations

The Group accounts for business combinations under the acquisition method when the acquired set of activities and assets meets the definition of a business and control is transferred to the Group (see Note 44(A)(ii)). In determining whether a particular set of activities and assets is a business, the Group assesses whether the set of assets and activities acquired includes, at a minimum, an input and substantive process and whether the acquired set has the ability to produce outputs.

The Group has an option to apply a 'concentration test' that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The optional concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment (see Note 44(S)(ii)). Any gain on a bargain purchase is recognised in profit or loss immediately. Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities (see Note 44(Q)).

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

If share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards), then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based measure of the replacement awards compared with the market-based measure of the acquiree's awards and the extent to which the replacement awards relate to pre-combination service.

## ii. Subsidiaries

Subsidiaries are entities controlled by the Group. The Group 'controls' an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

## iii. Non-controlling interests

NCI are measured initially at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.^a

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

# iv. Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

IFRS 3.19

An entity has a choice on a combination-by-combination basis to measure any NCI in the acquiree at either the proportionate share of the acquiree's identifiable net assets or fair value. The Group has elected the former approach.

Appendices

ntroduction

# 44. Material accounting policies (continued)

# A. Basis of consolidation (continued)

# v. Interests in equity-accounted investees^a

The Group's interests in equity-accounted investees comprise interests in associates and a joint venture.

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies. A joint venture is an arrangement in which the Group has joint control, whereby the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Interests in associates and the joint venture are accounted for under the equity method. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of the profit or loss and OCI of equity-accounted investees, until the date on which significant influence or joint control ceases.

# vi. Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee.^b Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

## **B.** Foreign currency

IIFRS 11.15-16.

[IAS 28.38-39]

[IERS 10 B86(c)

IAS 28.281

[IAS 21.21]

[IAS 21.23]

IIFRS 9.85.731

IAS 28.3]

## i. Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of Group
companies at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Foreign currency differences are generally recognised in profit or loss and presented within finance costs.⁶

However, foreign currency differences arising from the translation of the following items are recognised in OCI:

- an investment in equity securities designated as at FVOCI;
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective (see Note 44(P)(v)); and
- qualifying cash flow hedges to the extent that the hedges are effective.

Insights 5. 10. 140. 150	a.	Although it is not illustrated, an entity's equity-accounted investee may have accounting policies for items that do not apply to the investor. In our view, this information should be included in the accounting policy note for equity-accounted investees if it is necessary for an understanding of equity-accounted earnings or the carrying amount of equity-accounted investees.
Insights 3.5.430.30	b.	In the absence of specific guidance in the Accounting Standards, the Group has elected to eliminate unrealised gains and losses resulting from transactions with equity-accounted investees against the investment in the investees. Alternatively, the elimination may be presented as a reduction in the underlying asset – e.g. inventory.
Insights 2.7.160.20	C.	In our experience, the most common practice is for all such exchange differences related to monetary items to be included as part of finance costs. However, it is also acceptable to allocate the exchange differences to the various line items affected. If exchange differences are allocated in this way, then this should be done consistently from period to period having regard to the guidance in IAS 1 on offsetting, and in our view it would be necessary to disclose the entity's allocation policy, if it is significant, in the financial statements.

Introduction

# 44. Material accounting policies (continued)

#### **Foreign currency (continued)** Β.

#### ii. **Foreign operations**

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into EUR at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into EUR at the exchange rates at the dates of the transactions.

Foreign currency differences are recognised in OCI and accumulated in the translation reserve, except to the extent that the translation difference is allocated to NCI.

When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to NCI. When the Group disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

#### С. **Discontinued operation**

A discontinued operation is a component of the Group's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group and which:

- represents a separate major line of business or geographic area of operations;
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographic area of operations; or
- is a subsidiary acquired exclusively with a view to resale.

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held-for-sale.

When an operation is classified as a discontinued operation, the comparative statement of profit or loss and OCI is re-presented as if the operation had been discontinued from the start of the comparative year.

#### **Revenue from contracts with customers**^a D.

Information about the Group's accounting policies relating to contracts with customers is provided in Note 8(D).

#### Ε. **Employee benefits**

#### *i*. Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

IAS 1 117-117F

The Group presents material accounting policies related to revenue from contracts with customers in the 'revenue' note, rather than in a separate note with other material accounting policies. Other approaches to presenting accounting policies may be acceptable.

IAS 21411

**IIERS 5 321** 

IFRS 5.34

[IAS 19.11]

	Notes to the consolidated financial statements (continued)
	<b>44. Material accounting policies (continued)</b> E. Employee benefits (continued)
	ii. Share-based payment arrangements
[IFRS 2.14–15, 19–21, 21A]	The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognised as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognised is based on the number of awards that meet the related service and non-market performance conditions at the vesting date. For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.
[IFRS 2.30, 32]	The fair value of the amount payable to employees in respect of SARs, which are settled in cash, is recognised as an expense with a corresponding increase in liabilities, over the period during which the employees become unconditionally entitled to payment. The liability is remeasured at each reporting date and at settlement date based on the fair value of the SARs. Any changes in the liability are recognised in profit or loss.
	iii. Defined contribution plans
[IAS 19.28, 51]	Obligations for contributions to defined contribution plans are expensed as the related service is provided. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.
	iv. Defined benefit plans
[IAS 19.57, 83]	The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.
[IAS 19.63–64, IFRIC 14.23–24]	The calculation of defined benefit obligations is performed annually by a qualified actuary under the projected unit credit method. When the calculation results in a potential asset for the Group, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.
[IAS 19.122, 127–130]	Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in OCI. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then- net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.
[IAS 19.103, 109–110]	When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.
	v. Other long-term employee benefits
[IAS 19.155–156]	The Group's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit or loss in the period in which they arise.
	vi. Termination benefits
[IAS 19.165]	Termination benefits are expensed at the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises costs for a restructuring. If benefits are not

© 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organisation. Liability limited by a scheme approved under Professional Standards Legislation.

expected to be settled wholly within 12 months of the reporting date, then they are discounted.

# 44. Material accounting policies (continued)

# F. Government grants^a

The Group recognises an unconditional government grant related to a biological asset in profit or loss as other income when the grant becomes receivable. Other government grants related to assets are initially recognised as deferred income at fair value if there is reasonable assurance that they will be received and the Group will comply with the conditions associated with the grant. Grants related to the acquisition of assets are recognised in profit or loss as other income on a systematic basis over the useful life of the asset. Grants related to emissions allowances are recognised in profit or loss as a reduction of emissions expense in cost of sales as the group emits pollutants (see Note 44(G)).

Grants that compensate the Group for expenses incurred are recognised in profit or loss as other income on a systematic basis in the periods in which the expenses are recognised, unless the conditions for receiving the grant are met after the related expenses have been recognised. In this case, the grant is recognised when it becomes receivable.

# G. Emissions schemes^{b, c}

The Group participates in a 'cap and trade' scheme in various countries. Under the scheme, the Government in each country sets specific annual limits for emitting pollutants and grants the Group the respective number of emissions allowances. The Group can settle its annual obligation created by the emissions of pollutants only by surrendering emissions allowances. If the Group's annual emissions are below the limit, then it can sell the remaining allowances to other parties on a trading platform. Conversely, if the annual emissions exceed the limit, then the Group purchases additional allowances to settle its obligation.

The Group recognises emissions allowances as intangible assets (see Note 44(M)). Emissions allowances received from the Government are initially measured at fair value, which is determined based on the market price of allowances traded on the platform at that date. Emissions allowances purchased on the trading platform are initially measured at cost. Subsequent to initial recognition, the emissions allowances are measured at cost less any accumulated impairment losses. The cost of emissions allowances is based on the first-in, first-out allocation method.

Emissions allowances received from the Government are government grants (see Note 44(F)).

The Group recognises a liability to surrender emissions allowances as it emits pollutants. The Group measures the liability based on the carrying amount of the allowances on hand to the extent of emissions within the annual limit, and at the current market value of allowances to the extent that it would be required to purchase additional allowances to settle the obligation. The liability is presented as a provision and derecognised when the allowances are surrendered to the Government (see Note 44(T)).

Insights 4.3.140.10	a.	An entity chooses a presentation format, to be applied consistently, either to offset a grant related to income against the related expenditure (net presentation) or to present it separately or under a general heading such as 'other income' (gross presentation).
Insights 3.3.100.70, 5.14.130.10	b.	Emissions allowances are often interchangeable. The Accounting Standards are silent on how an entity should determine the carrying amount of such assets – e.g. whether to calculate a gain or loss on disposal. In some cases, it is feasible to identify and track the specific units sold or transferred – e.g. when the units have unique identification numbers. Conversely, if it is not feasible to identify and track the specific units, then in our view an entity should apply the guidance for determining cost formulas for inventories by analogy (see Insights into IFRS 3.8.280) under the hierarchy for selecting accounting policies. We believe that a reasonable cost allocation method may be used – i.e. average cost or first-in, first-out. An entity should apply the elected accounting policy consistently. The Group has elected the first-in, first-out allocation method for emissions allowances.
Insights 5.14.170.30	C.	In our view, when other means of settlement than surrendering emissions allowances are not possible, the provision could be measured based on the current carrying amount of the certificates on hand if sufficient allowances are owned to settle the current obligation, because that could be viewed as being the best estimate of the expenditure required to settle the obligation. Otherwise, the provision should be based on the current market value of the emissions allowances at the reporting date.

26, 41.34-35]

vppendices

# 44. Material accounting policies (continued)

# H. Finance income and finance costs^a

The Group's finance income and finance costs include:

- interest income;
- interest expense;
- dividend income;
- dividend expense on preference shares issued that are classified as financial liabilities;
- the net gain or loss on the disposal of investments in debt securities measured at FVOCI;
- the fair value gain or loss on financial assets measured at FVTPL;
- the foreign currency gain or loss on financial assets and financial liabilities; impairment losses (and reversals) on investments in debt securities measured at amortised cost or FVOCI;
- the gain or loss on the remeasurement to fair value of any pre-existing interest in an acquiree in a business combination;
- the unwind of the discount on provisions (see Note 44(T));
- the fair value gain or loss on contingent consideration classified as a financial liability;
- hedge ineffectiveness recognised in profit or loss; and
- the reclassification of net gains and losses previously recognised in OCI on cash flow hedges of interest rate risk and foreign currency risk for borrowings (see Note 32(C)(iv)).

Interest income or expense is recognised under the effective interest method. Dividend income is recognised in profit or loss on the date on which the Group's right to receive payment is established.

### [IFRS 9.5.4.1–5.4.2, A]

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the financial asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

Introduction

# 44. Material accounting policies (continued)

# I. Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI.

The Group has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore accounted for them under IAS 37 *Provisions, Contingent Liabilities and Contingent Assets.*^a

The Group has determined that the global minimum top-up tax – which it is required to pay under Pillar Two legislation – is an income tax in the scope of IAS 12. The Group has applied a temporary mandatory relief from deferred tax accounting for the impacts of the top-up tax and accounts for it as a current tax when it is incurred.^b

## i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

# ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that:
  - is not a business combination; and
  - at the time of the transaction (i) affects neither accounting nor taxable profit or loss and (ii) does not give rise to equal taxable and deductible temporary differences;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans for individual subsidiaries in the Group. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

 Insights 3.13.45.10	a.	Interest and penalties related to income taxes are not explicitly included in the scope of IAS 12. The IFRS Interpretations Committee discussed the accounting for interest and penalties related to income taxes and noted that an entity first considers whether interest or a penalty itself is an income tax. If so, then it applies IAS 12. If the entity does not apply IAS 12, then it applies IAS 37 to that amount. The Committee also noted that this is not an accounting policy choice – i.e. an entity needs to apply judgement based on the specific facts and circumstances.
Insights 3.13.43.20	b.	Pillar Two top-up taxes are determined based on taxable profit or loss in a specific jurisdiction. They are included in the consolidated financial statements of the ultimate parent entity, before eliminating intra-group items and after making other adjustments – i.e. top-up taxes are levied on a net amount. Therefore, in our view all Pillar Two top-up taxes levied by tax authorities are generally income taxes in the scope of IAS 12.

# 44. Material accounting policies (continued)

I. Income tax (continued)

# ii. Deferred tax (continued)

[IAS 12.51, 51C]	The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the Group has not rebutted this presumption.
[IAS 12.74]	Deferred tax assets and liabilities are offset only if certain criteria are met.
	J. Biological assets
[IAS 41.12–13]	Biological assets are measured at fair value less costs to sell, with any change therein recognised in profit or loss.
	K. Inventories
[IAS 2.9, 25], IAS 2.36(a)	Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the first-in, first-out allocation method. In the case of manufactured inventories, cost includes an appropriate share of production overheads based on normal operating capacity.
[IAS 2.20]	The cost of standing timber transferred from biological assets is its fair value less costs to sell at the date of harvest.
	L. Property, plant and equipment
	i. Recognition and measurement
[IFRS 1.D5, IAS 16.30], IAS 16.73(a)	Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and any accumulated impairment losses. The cost of certain items of property, plant and equipment at 1 January 2006, the Group's date of transition to the IFRS Accounting Standards, was determined with reference to its fair value at that date. ^a
[IAS 16.45]	If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.
[IAS 16.41, 71]	Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.
	ii. Subsequent expenditure
[IAS 16.13]	Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

Introduction

The Group was previously a first-time adopter of IFRS Accounting Standards. It has included the accounting policy for the determination of the cost of property, plant and equipment at the date of transition to IFRS Accounting Standards because it regards this information as relevant to an understanding of its financial statements.

# 44. Material accounting policies (continued)

# L. Property, plant and equipment (continued)

# iii. Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values under the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

٠	buildings:	40 years
•	plant and equipment:	3–12 years
•	fixtures and fittings:	5–10 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

## iv. Reclassification to investment property

When the use of a property changes from owner-occupied to investment property, the property is remeasured to fair value and reclassified accordingly. Any gain arising on this remeasurement is recognised in profit or loss to the extent that it reverses a previous impairment loss on the specific property, with any remaining gain recognised in OCI and presented in the revaluation reserve. Any loss is recognised in profit or loss. However, to the extent that an amount is included in the revaluation surplus for that property, the loss is recognised in OCI and reduces the revaluation surplus within equity.

#### Notes to the consolidated financial statements (continued) 44. Material accounting policies (continued) Intangible assets and goodwill Μ. i. **Recognition and measurement** [IAS 38.107-108] Goodwill Goodwill arising on the acquisition of subsidiaries is measured at cost less accumulated impairment losses. **Research and** Expenditure on research activities is recognised in profit or loss as incurred. [IAS 38.54-55] development [IAS 38.57, 66, 71, 74] Development expenditure is capitalised only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Group intends to and has sufficient resources to complete development and to use or sell the asset. Otherwise, it is recognised in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost less accumulated amortisation and any accumulated impairment losses. **Emissions** See Note 44(G). allowances [IAS 38.74] Other intangible Other intangible assets, including customer relationships, patents and trademarks, that are assets acquired by the Group and have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses. ii. Subsequent expenditure Subsequent expenditure is capitalised only when it increases the future economic benefits [IAS 38.18] embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred. iii. Amortisation IIAS 38.971. Amortisation is calculated to write off the cost of intangible assets less their estimated residual IAS 38.118(a)-(b) values under the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Goodwill and emissions allowances^a are not amortised. The estimated useful lives for current and comparative periods are as follows: 3-20 years • patents and trademarks: development costs: 2-5 years 4-5 years. • customer relationships: [IAS 38.104] Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. **Investment property** N. [IAS 40.7, 33, 35] Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in profit or loss. IIAS 16.41, 711 Any gain or loss on disposal of investment property (calculated as the difference between the net [IAS 40.62(b)(ii), 69] proceeds from disposal and the carrying amount of the item) is recognised in profit or loss. When investment property that was previously classified as property, plant and equipment is sold, any related amount included in the revaluation reserve (see Note 44(L)(iv)) is transferred to retained earnings.

Introduction

Insights 5.14.120.20 a. For most emissions allowances traded in an active market, no amortisation will be required because the condition of the asset does not change over time, and therefore the residual value will be the same as cost. As a result, the depreciable amount will be nil.

# 44. Material accounting policies (continued)

# N. Investment property (continued)

Rental income from investment property is recognised as other revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

# O. Assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held-forsale if it is highly probable that they will be recovered primarily through sale rather than through continuing use.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group's other accounting policies. Impairment losses on initial classification as held-for-sale or held-for-distribution and subsequent gains and losses on remeasurement are recognised in profit or loss.

Once classified as held-for-sale, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

# P. Financial instruments

# **Recognition and initial measurement**

Financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus or minus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price. However, if the Group has an unconditional right to an amount that differs from the transaction price (e.g. due to the Group's refund policy), the trade receivable will be initially measured at the amount of that unconditional right.

# ii. Classification and subsequent measurement

## Financial assets - classification

On initial recognition, a financial asset is classified as subsequently measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Introduction

Australian content

**Primary statements** 

	Notes to the consolidated financial statements (continued)
	44. Material accounting policies (continued)
IFRS 7.21	P. Financial instruments (continued)
	ii. Classification and subsequent measurement (continued)
	Financial assets – classification (continued)
[IFRS 9.4.1.2]	A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:
	<ul> <li>it is held within a business model whose objective is to hold assets to collect contractual cash flows; and</li> </ul>
	<ul> <li>its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.</li> </ul>
[IFRS 9.4.1.2A]	A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:
	<ul> <li>it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and</li> </ul>
	<ul> <li>its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.</li> </ul>
[IFRS 9.4.1.4, 5.7.5]	On initial recognition of certain equity investments that are not held for trading, the Group has made an irrevocable election to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis. See Note 25 for further details.
[IFRS 9.4.1.5, IFRS 9.B4.1.6]	All financial assets not measured at amortised cost or FVOCI as described above (e.g. financial assets held for trading and those that are managed and whose performance is evaluated on a fair value basis) are measured at FVTPL. This includes all derivative financial assets (see Note 32(A)).
	Financial assets – Business model assessment
[IFRS 9.B4.1.2]	The Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level ^a because this best reflects the way the business is managed and information is provided to management.
	Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Group's continuing recognition of the assets. ^b

managing its financial instruments.

depends on the circumstances.

# 44. Material accounting policies (continued)

## P. Financial instruments (continued)

# ii. Classification and subsequent measurement (continued)

Financial assets - Business model assessment (continued)

The business models of the Group are as follows.

Held to collect	There are two main portfolios of financial assets that have a held-to- collect business model.
	The Group holds financial assets which arise from its paper manufacturing business and investment property. The objective of the business model for these financial instruments is to collect the amounts due from the Group's receivables and to earn contractual interest income on the amounts collected.
	The Group also holds a portfolio of corporate debt securities for the purpose of earning fixed coupons throughout the life of the instrument, as well as maintaining a largely fixed interest rate profile to manage its interest rate risk exposure (see Notes 25 and 32 for further details).
Held to collect and sell	The Group holds a portfolio of corporate debt securities for liquidity management purposes (see Notes 25 and 32 for further details).
Held for trading	The Group holds a portfolio of listed equity securities and sovereign debt securities for the purpose of trading (see Note 25 for further details).

### Financial assets - Assessment whether contractual cash flows are SPPI

In assessing whether the contractual cash flows are SPPI, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- · contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the SPPI criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant on initial recognition. The Group had no financial assets held outside trading business models that failed the SPPI assessment.

IFRS 7.21

[IFRS 9.B4.1.11(b),

B4.1.121

	Notes to the consolidated financial statements (continued)		
IFRS 7.21		counting policies (continued)	
	ii. Classification	and subsequent measurement (continued)	
IFRS 7.B5(e)	Financial assets – Su	ubsequent measurement and gains and losses	
[IFRS 9.5.7.1]	Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss. However, see Note $44(P)(v)$ for derivatives designated as hedging instruments.	
[IFRS 9.5.72]	Financial assets at amortised cost	These assets are subsequently measured at amortised cost under the effective interest method. The gross carrying amount is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.	
[IFRS 9.5.7.10–5.7.11]	Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated under the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.	
[IFRS 9.5.75–5.76, B5.7.1]	Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.	
	Financial liabilities –	Classification, subsequent measurement and gains and losses	
[IFRS 9.5.71]	Financial liabilities are measured at amortised cost or FVTPL. A financial liability is measured at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost under the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

	iii. Derecognition	n	
[IFRS 9.3.2.6(b)]	financial position but r	transactions whereby it transfers assets recognised in its statement of etains either all or substantially all of the risks and rewards of the transferred s, the transferred assets are not derecognised. See Note 18(A) for further	

# 44. Material accounting policies (continued)

#### Ρ. **Financial instruments (continued)**

#### iv. Offsetting

Information about the Group's accounting policies relating to offsetting of financial assets and financial liabilities is provided in Note 32(D).

#### **Derivative financial instruments and hedge accounting** V.

### Derivative financial instruments and hedge accounting

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value and changes therein are generally recognised in profit or loss.

More information about the Group's accounting policies and risk management activities related to derivative financial instruments and hedge accounting is provided in Note 32(C)(iv).

### Cash flow hedges

[IFRS 9.6.5.11, 6.5.16]

[IFRS 9.5.1.1. 5.2.1(c)]

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognised in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The Group designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the forward element of forward exchange contracts (forward points) is separately accounted for as a cost of hedging, recognised in other comprehensive income and accumulated in a separate component of equity.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in the hedging reserve and the cost of hedging reserve is included directly in the initial cost of the non-financial item when it is recognised.

For all other hedged forecast transactions, the amount accumulated in the hedging reserve and the cost of hedging reserve is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in the hedging reserve remains in equity until, for a hedge of a transaction resulting in the recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or, for other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedged expected future cash flows affect profit or loss.

If the hedged future cash flows are no longer expected to occur, then the amounts that have been accumulated in the hedging reserve and the cost of hedging reserve are immediately reclassified to profit or loss.

### Net investment hedges

IIFRS 9.6.5.13-6.5.141

IIFRS 9.6.5.6-6.5.7

6.5.121

When a derivative instrument or a non-derivative financial liability is designated as the hedging instrument in a hedge of a net investment in a foreign operation, the effective portion of changes in the fair value of a derivative or foreign exchange gains and losses for a non-derivative is recognised in OCI and presented in the translation reserve within equity. Any ineffective portion of the changes in the fair value of the derivative or foreign exchange gains and losses on the nonderivative is recognised immediately in profit or loss. The amount recognised in OCI is fully or partially reclassified to profit or loss as a reclassification adjustment on disposal or partial disposal of the foreign operation, respectively.

IFRS 7.21

ppendice

	Notes to the consolidated financial statements (continued)		
	<b>44. Material accounting policies (continued)</b> Q. Share capital		
	i. Ordinary shares		
[IAS 32.35–35A]	Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity. Income tax relating to transaction costs of an equity transaction is accounted for in accordance with IAS 12 (see Note 44(I)).		
	ii. Preference shares		
[IAS 32.AG25–AG26]	The Group's redeemable preference shares are classified as financial liabilities because they bear non-discretionary dividends and are redeemable in cash by the holders. Non-discretionary dividends thereon are recognised as interest expense in profit or loss as accrued.		
	Non-redeemable preference shares are classified as equity because they bear discretionary dividends, do not contain any obligations to deliver cash or other financial assets and do not require settlement in a variable number of the Group's equity instruments. Discretionary dividends thereon are recognised as equity distributions on approval by the Company's shareholders.		
	iii. Repurchase and reissue of ordinary shares (treasury shares)		
[IAS 32.33]	When shares recognised as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs, is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are presented in the treasury share reserve. When treasury shares are sold or reissued subsequently, the amount received is recognised as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium. ^a		
	R. Compound financial instruments		
[IAS 32.28–32]	Compound financial instruments issued by the Group comprise convertible notes denominated in EUR, which can be converted by the holder at any time until maturity to a fixed number of ordinary shares. See Note 28(C) for further details.		
[IAS 32.38, AG31, IFRS 9.5.1.1]	The liability component of compound financial instruments is initially recognised at the fair value of a similar liability that does not have an equity conversion option. The equity component is initially recognised at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.		
[IFRS 9.5.3.1]	Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortised cost under the effective interest method. The equity component of a compound financial instrument is not remeasured.		
[IAS 32.AG32]	Interest related to the financial liability is recognised in profit or loss (see Note 44(H)). On conversion at maturity, the financial liability is reclassified to equity and no gain or loss is recognised.		

Insights 7.3.750.10

a. The Accounting Standards do not mandate a specific method of presenting treasury shares within equity. However, local laws may prescribe the allocation method. Therefore, an entity needs to take into account its legal environment when choosing how to present its own shares within equity. An entity needs to choose a presentation format, to be applied consistently to all treasury shares.

Notes to the consolidated financial statements (continued) ntroduction 44. Material accounting policies (continued) S. Impairment i. Non-derivative financial assets Financial instruments and contract assets [IFRS 9.2, 9.5.5.1, The Group recognises loss allowances for ECLs on: IFRS 16.77] financial assets measured at amortised cost (cash and cash equivalents, and trade and other receivables); debt securities measured at FVOCI (disclosed as part of 'other investments including derivatives'; see Note 25 for further details); and Australian content contract assets. The Group also recognises loss allowances for ECLs on lease receivables, which are disclosed as part of trade and other receivables. See Note 32(C)(ii) for further details. IIFRS 9.5.5.3. 5.5.5. The Group measures loss allowances at an amount equal to lifetime ECLs, except for the 5.5.11, 5.5.15-5.5.16] following, which are measured at 12-month ECLs: · debt securities that are determined to have low credit risk at the reporting date; and other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition. Loss allowances for trade receivables (including lease receivables) and contract assets are always measured at an amount equal to lifetime ECLs.^a Primary statements When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment, that includes forward-looking information. See Note 32(C)(ii) for further details. The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. IERS 735E(b) B8A The Group considers a financial asset to be in default when: • the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or • the financial asset is more than 90 days past due. IFRS 7.35F(a)(i), The Group considers a debt security to have low credit risk when its credit risk rating is equivalent [IFRS 9.5.5.10, to the globally understood definition of 'investment grade'. The Group considers this to be Baa3 or B5.5.22-B5.5.24, AI higher per [Rating Agency X] or BBB- or higher per [Rating Agency Y]. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over [IFRS 9.5.5.19, B5.5.38] which the Group is exposed to credit risk. [IFRS 9.5.5.17, A, Measurement of ECLs B5.5.28-B5.5.30, ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the B5.5.33] present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in Appendices accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective interest rate of the financial asset. IFRS 9.5.5.15 For lease receivables, contract assets and trade receivables with a significant financing component, an entity can choose as an accounting policy either to apply the general model for measuring the loss allowance or always to

measure the loss allowance at an amount equal to the lifetime ECLs. The Group has chosen the latter policy. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. # 44. Material accounting policies (continued)

S. Impairment (continued)

# Non-derivative financial assets (continued)

# Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the debtor;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

## Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

### Write-off

IFRS 7.35F(e), [IFRS 9.5.4.4]

IIFRS 9.5.5.1-5.5.21

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount when the financial asset is 180 days past due based on historical experience of recoveries of similar assets. For corporate customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due. Based on its experience, there have been no corporate customer recoveries after six months.

# ii. Non-financial assets

IIAS 36 9-10 591 At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than biological assets, investment property, inventories, contract assets and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment. [IAS 36.22, 80] For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination. [IAS 36.6, 30] The recoverable amount of an asset or CGU is the higher of its value in use and its fair value less costs of disposal. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. [IAS 36.59] An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount. IIAS 36, 1041 Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

i.

NOTES

**Primary statements** 

Introduction

Australian content

# 44. Material accounting policies (continued)

#### **Impairment (continued)** S.

#### ii. Non-financial assets (continued)

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### Т. **Provisions**

Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

[IAS 37.39]	Warranties	A provision for warranties is recognised when the underlying products or services are sold, based on historical warranty data and a weighting of possible outcomes against their associated probabilities.
[IAS 37.72]	Restructuring	A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating losses are not provided for.
[IAS 37.21]	Site restoration	In accordance with the Group's published environmental policy and applicable legal requirements, a provision for site restoration in respect of contaminated land, and the related expense, is recognised when the land is contaminated.
	Emissions schemes	See Note 44(G).
[IAS 37.66, 68, 68A, 69]	Onerous contracts	A provision for onerous contracts is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract, which is determined based on the incremental costs of fulfilling the obligation under the contract and an allocation of other costs directly related to fulfilling the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract (see Note 44(S)(ii)).

#### U. Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### *i*. As a lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

[IAS 36.117, 122, 124]

[IAS 37.14, 45, 47,

**IFRIC 1.8**]

IIFRS 16.91

[IFRS 16.15, 45]

IIFRS 16 22-241

	Notes to the consolidated financial statements (continued)
	44. Material accounting policies (continued)
	U. Leases (continued)
	i. As a lessee (continued)
[IFRS 16.29–33]	The right-of-use asset is subsequently depreciated under the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.
[IFRS 16.26]	The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.
IAS 1.112(c)	The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.
[IFRS 16.27]	Lease payments included in the measurement of the lease liability comprise the following:
	<ul> <li>fixed payments, including in-substance fixed payments;</li> </ul>
	• variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
	• amounts expected to be payable under a residual value guarantee; and
	• the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.
[IFRS 16.36, 40, 42]	The lease liability is measured at amortised cost under the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.
[IFRS 16.39]	When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to nil.
[IFRS 16.47–48]	The Group presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.
	Short-term leases and leases of low-value assets
IFRS 16.60, [IFRS 16.5–6, 8, B3–B8, BC100]	The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including IT equipment. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

# Notes to the consolidated financial statements (continued)

# 44. Material accounting policies (continued)

# U. Leases (continued)

# ii. As a lessor

At inception or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative standalone prices.

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, then the Group applies IFRS 15 to allocate the consideration in the contract.

The Group applies the derecognition and impairment requirements in IFRS 9 to the net investment in the lease (see Note 44(S)(i)). The Group further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

The Group recognises lease payments received under operating leases as income on a straightline basis over the lease term as part of 'other revenue'.

# V. Operating profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Group as well as other income and expenses related to operating activities. Operating profit excludes net finance costs, share of profit of equity-accounted investees and income taxes.

# W. Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets, and financial and non-financial liabilities (see Note 4(B)(i)).

When one is available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

*[IFRS 13.70–71]* If an asset or a liability measured at fair value has a bid price and an ask price, then the Group measures assets and long positions at a bid price and liabilities and short positions at an ask price.

ppendices

OTES

# 44. Material accounting policies (continued)

# W. Fair value measurement (continued)

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Group determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

# 45. Accounting standards issued but not yet effective^a

A number of new accounting standards are effective for annual reporting periods beginning after 1 January 2024 and earlier application is permitted. However, the Group has not early adopted the following new or amended accounting standards in preparing these consolidated financial statements.

# A. IFRS 18 Presentation and Disclosure in Financial Statements^b

IFRS 18 will replace IAS 1 *Presentation of Financial Statements* and applies for annual reporting periods beginning on or after 1 January 2027. The new standard introduces the following key new requirements.

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal. Entities' net profit will not change.
- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The Group is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the Group's statement of profit or loss, the statement of cash flows and the additional disclosures required for MPMs. The Group is also assessing the impact on how information is grouped in the financial statements, including for items currently labelled as 'other'.

# **B.** Other accounting standards^c

The following new and amended accounting standards are not expected to have a significant impact on the Group's consolidated financial statements.

- Lack of Exchangeability (Amendments to IAS 21)
- Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)^d

AASB 1054.17 a. When an IFRS Accounting Standard has been issued by the IASB Board but the equivalent Australian Accounting Standard has yet to be issued by the AASB, an entity intending to comply with IFRS Accounting Standards discloses the information specified in paragraphs 30 and 31 of AASB 108 Accounting Policies, Changes in Accounting Estimates and Errors in relation to that IFRS Accounting Standard.

- b. For further information on IFRS 18, see our <u>article</u> and read our <u>First Impressions</u> publication.
- c. Although new or amended accounting standards that will have no or no material effect on the financial statements need not be provided, the Group has included all new or amended accounting standards and their possible impact on the consolidated financial statements for illustrative purposes only.
- d. For some entities, these amendments may be expected to have a material effect on their financial statements. The potential impact may include, but are not limited to, a change in timing of recognition and derecognition of financial instruments in certain situations in which settlement of a financial instrument with another takes more than a day. For example, entities that derecognise trade receivables and recognise cash on the debtor's payment initiation date may need to change the timing of recognition and derecognise both trade payables and cash on the payment initiation date even if the creditor has not yet received that cash. However, an accounting policy choice is available for derecognising certain financial liabilities that are settled using an

electronic payment system subject to certain criteria being met. For further information, see our article. © 2025 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. # New accounting standards or amendments for 2024-25 and forthcoming requirements

Since the July 2024 edition of this guide, a number of accounting standards, amendments to or interpretations of accounting standards have been issued. This appendix lists these new requirements that have been issued by the IASB as at 31 August 2024, and it contains two tables, as follows.

- New currently effective requirements: This table lists the recent changes to the Accounting Standards that are required to be applied by an entity with an annual reporting period beginning on 1 January 2024 and annual periods beginning on 1 July 2024.
- Forthcoming requirements: This table lists the recent changes to the Accounting Standards that are required to be applied for annual reporting periods beginning after 1 January 2024, and for annual periods beginning on 1 July 2024. These changes are also available for early adoption in annual reporting periods beginning on 1 January 2024 and annual periods beginning on 1 July 2024.

The tables also include a cross-reference to further KPMG guidance, as appropriate. All of the effective dates in the tables refer to the beginning of an annual accounting period.

**Australian content** 

Introduction

a. The effective date for these amendments was deferred indefinitely by the IASB Board. Due to regulatory framework in Australia, the AASB set an effective date of 1 January 2025. AASB will consider further deferral of these amendments at its November 2024 Board meeting which is expected to be approved by the Board given the recent Exposure Draft (ED) issued by IASB relating to applying the equity method and AASB's ED 333 Equity *Method of Accounting* issued for comment. Early adoption continues to be permitted.

Appendix IV 241

# Appendix IV

# Other disclosures not illustrated in the consolidated financial statements

Other disclosures not illustrated in the consolidated financial statements

**Going concern matters** 

# Extracts of notes to the consolidated financial statements

# 2. Basis of accounting

# X. Going concern basis of accounting^{a, b}

The consolidated financial statements have been prepared on a going concern basis, which assumes that the Group will be able to discharge its liabilities including the mandatory repayment terms of the banking facilities as disclosed in Note [X].

The Group has recognised a net profit after tax of EUR 7,937 thousand for the year ended 31 December 2024 and, as at that date, current assets exceed current liabilities by EUR 22,046 thousand. However, as described in Note [X] significant one-off environmental costs are expected in 2025, reflecting various regulatory developments in a number of European countries.

In addition to the above, fully drawn banking facilities of EUR 7,012 thousand are subject to review by 30 June 2025. The lenders are expected to undertake a review, which will include (but is not limited to) an assessment of:

- the financial performance of the Group against budget; and
- the progress of compliance with new regulatory requirements.

Management believes that the repayment of the facilities will be met out of operating cash flows and the immediate and significant mitigating actions taken by management to reduce costs and optimise the Group's cash flow and liquidity. Among these are the following mitigating actions: reducing capital and investment expenditure through postponing or pausing projects and change activity; deferring or cancelling discretionary spend; freezing non-essential recruitment; and reducing marketing spend. Management anticipates that any additional cash flow needs will be met out of asset sales. Management is confident that the asset sales will be finalised before 30 June 2025 as disclosed in Note [X] and that the proceeds will be sufficient to meet any additional cash flow needs.

Based on these factors, management has a reasonable expectation that the Group has and will have adequate resources to continue in operational existence for the foreseeable future.

# 4. Use of judgements and estimates

# A. Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

• Note 2(X) – going concern: whether there are material uncertainties that may cast significant doubt on the entity's ability to continue as a going concern [...]

IAS 1.122, IU 07-14,
Insights 1.2.85.10

a

This appendix illustrates one possible example of disclosures in a close-call scenario.

b. In some cases, management may conclude that there are no material uncertainties that require disclosure in accordance with paragraph 25 of IAS 1. However, reaching that conclusion involved significant judgement (i.e. a 'close-call' scenario). In these cases, a question arises about whether any disclosures are required. The IFRS Interpretations Committee discussed this issue and noted that the disclosure requirements in paragraph 122 of IAS 1 apply to the judgements made in concluding that there are no material uncertainties related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. To meet these disclosure requirements, in our view similar information to that in respect of material uncertainties (see first three points in 1.2.83.10 in Insights into IFRS) may be relevant to the users' understanding of the entity's financial statements.

IAS 1.25-26, 122

IAS 1.122, IU 07-14, Insights 1.2.83.10

### Distributions of non-cash assets to owners

# Extracts of notes to the consolidated financial statements

# X. Distribution of wholly owned subsidiary to owners of the Company^{a, b, c}

On 15 May 2024, the board of directors of the Company announced that the Group would distribute all of its shares in Papier GmbH, a wholly owned subsidiary within the Recycled Papers segment, to the Company's shareholders. On authorisation of the distribution, the Group recognised a dividend payable of EUR 12,500 thousand, being the fair value of the assets to be distributed.

On 3 June 2024, the shares were distributed. The net assets comprised assets of EUR 17,408 thousand less liabilities of EUR 7,464 thousand as follows.

In thousands of EUR	2024
Property, plant and equipment	9,650
Investment property	100
Intangible assets	400
Deferred tax assets	225
Inventories	2,900
Trade and other receivables	4,133
Loans and borrowings	(3,064)
Provisions	(200)
Deferred tax liabilities	(450)
Trade and other payables	(3,750)
Carrying amount of net assets distributed	9,944
Dividend to shareholders	12,500
Carrying amount of net assets distributed	(9,944)
Gain on distribution to owners of the Company	2,556 [°]
There was no change in the fair value of the assets to be distributed b	petween the date on which

the distribution was approved and the date on which the dividend was settled.

This appendix illustrates the disclosures that may be necessary to provide information about distributions of nona. cash assets to owners and/or non-current assets (or disposal groups) that are held for distribution (or distributed) to owners

IFRS 5.5A, Insights 5.4.130.30

b. It is not clear whether a business that will be disposed of by distribution to owners could be classified as a discontinued operation before its disposal. Although IFRS 5 was amended to extend the requirements in respect of non-current assets or disposal groups held for sale to such items held for distribution to owners, the crossreferencing in the amendments does not extend to discontinued operations. In our view, although the definition of a discontinued operation has not been extended explicitly, classification of non-current assets or disposal groups held for distribution to owners as a discontinued operation is appropriate if the remaining criteria of IFRS 5 are met.

IFRIC 17.14

The difference between the dividend paid/payable and the carrying amount of the assets distributed is presented as a separate line item in profit or loss.

IFRIC 17.16(a)

Primary statements

IFRIC 17.16(b)

# **Government-related entities under IAS 24**

# Extracts of notes to the consolidated financial statements

# 40. Related parties^a

# Example 1 – Individually significant transaction because of size of transaction

In 2021, a subsidiary entity, Griffin Limited, entered into a procurement agreement with the Department of Commerce of the Government of [*Country X*], such that Griffin Limited would act as the sole supplier of recycled paper products to the Department's various agencies for a term of three years from 2023 to 2025, with an agreed bulk discount of 10 percent compared with the list prices that Griffin Limited would generally charge on individual orders.

The aggregate sales value under the agreement for the year ended 31 December 2024 amounted to EUR 3,500 thousand (2023: EUR 2,800 thousand). As at 31 December 2024, the aggregate amounts due from the Department amounted to EUR 10 thousand (2023: EUR 30 thousand) and were payable under normal 30 days' credit terms.

# Example 2 – Individually significant transaction carried out on 'non-market' terms

On 30 December 2023, the Department of Finance of the Government of [*Country X*] contracted Griffin Limited to be the sole designer and supplier of materials for office fit-outs for all of Government. The contract lasts for a term of five years from 2024 to 2028. Under the agreement, the Department of Finance will reimburse Griffin Limited for the cost of each fit-out. However, Griffin Limited will not be entitled to earn a margin above cost for this activity. The aggregate sales value under the agreement for the year ended 31 December 2024 amounted to EUR 3,500 thousand. As at 31 December 2024, the aggregate amounts due from the Department amounted to EUR 1,000 thousand and were payable under normal 30 days' credit terms.

# Example 3 – Individually significant transaction outside normal day-to-day business operations

Under an agreement dated 1 January 2024, Griffin Limited and the Department of Trade and Enterprise of the Government of [*Country X*] agreed to participate and co-operate with a third party consortium in the development, funding and operation of a research and development centre. Griffin Limited will also sub-lease a floor in its headquarters building as an administrative office for the joint operation. As at 31 December 2024, the capital invested in the venture amounted to EUR 700 thousand and total lease payments of EUR 100 thousand were received as rental income.

# Example 4 – Individually significant transaction subject to shareholder approval

Griffin Limited currently owns 40 percent of Galaxy Corp, with the remaining 60 percent owned by the Department of Commerce of the Government of [*Country X*] (25 percent) and Lex Corp (35 percent), a party indirectly controlled by the Department of Commerce.

On 1 December 2024, Griffin Limited entered into a sale-and-purchase agreement (the Agreement) with the Department of Commerce and Lex Corp, such that Griffin Limited will buy their shares in Galaxy Corp at EUR 1 per share, at a total consideration of EUR 6,000 thousand. The terms of the Agreement are subject to independent shareholders' approval at the extraordinary general meeting to be held on 1 February 2025. On completion of the proposed acquisition, Galaxy Corp will become a wholly owned subsidiary of Griffin Limited.

a. This appendix illustrates a variety of disclosures that an entity may make under paragraph 26 of IAS 24; other formats are possible. We assume that the Group is indirectly controlled by the Government of [*Country X*]. We also assume that, in addition to selling to various private sector entities, products are sold to government agencies and departments of [*Country X*].

# Extracts of notes to the consolidated financial statements (continued)

# 40. Related parties (continued)

### Example 5 – Collectively, but not individually, significant transactions

Griffin Limited operates in an economic regime dominated by entities directly or indirectly controlled by the Government of [*Country X*] through its government authorities, agencies, affiliations and other organisations, collectively referred to as government-related entities. Griffin Limited has transactions with other government-related entities, including but not limited to sales and purchases of goods and ancillary materials, rendering and receiving services, lease of assets, and use of public utilities.

These transactions are conducted in the ordinary course of Griffin Limited's business on terms comparable to those with other entities that are not government-related. Griffin Limited has established procurement policies, a pricing strategy and an approval process for purchases and sales of products and services, which are independent of whether the counterparties are government-related entities.

For the year ended 31 December 2024, management estimates that the aggregate amount of Griffin Limited's significant transactions with other government-related entities is at least 50 percent of its sales of recycled paper products and between 30 and 40 percent of its purchase of materials.

IAS 24.26

**VPPENDICES** 

# Entities with a service concession arrangement

# Extracts of notes to the consolidated financial statements (continued)

# X. Service concession arrangement^{a, b}

On 1 July 2024, the Group entered into a service concession agreement with a local township (the grantor) to construct a toll road near one of the Group's forestry operations. The construction of the toll road started in July 2024 and it was completed and available for use on 30 September 2024. Under the terms of the agreement, the Group will operate and make the toll road available to the public for a period of five years, starting from 1 October 2024. The Group will be responsible for any maintenance services required during the concession period. The Group does not expect major repairs to be necessary during the concession period.

SIC-29.6(c)(iv)

SIC-29.6(c)(v)

SIC-29,6(e), 6A

SIC-29.6

the toll road is in operation. Additionally, the Group has received the right to charge users a fee for using the toll road, which the Group will collect and retain; however, this fee is capped to a maximum amount as stated in the service concession agreement. The usage fees collected and earned by the Group are over and above the guaranteed minimum annual payment to be received from the grantor. At the end of the concession period, the toll road will become the property of the grantor and the Group will have no further involvement in its operation or maintenance requirements.

The grantor will provide the Group a guaranteed minimum annual payment for each year that

The service concession agreement does not contain a renewal option. The rights of the grantor to terminate the agreement include poor performance by the Group and in the event of a material breach in the terms of the agreement. The rights of the Group to terminate the agreement include failure of the grantor to make payment under the agreement, a material breach in the terms of the agreement and any changes in law that would render it impossible for the Group to fulfil its requirements under the agreement.

For the year ended 31 December 2024, the Group has recognised revenue of EUR 350 thousand, consisting of EUR 320 thousand on construction and EUR 30 thousand on operation of the toll road, which is the amount of tolls collected. The Group has recognised profit of EUR 20 thousand, consisting of a profit of EUR 25 thousand on construction and a loss of EUR 5 thousand on operation of the toll road. The revenue recognised in relation to construction in 2024 represents the fair value of the construction services provided in constructing the toll road. The Group has recognised a service concession receivable, initially measured at the fair value of the construction services, of EUR 260 thousand representing the present value of the guaranteed annual minimum payments to be received from the grantor, discounted at a rate of 5 percent, of which EUR 11 thousand represents accrued interest.

The Group has recognised an intangible asset received as consideration for providing construction or upgrade services in a service concession arrangement of EUR 95 thousand, of which EUR 5 thousand has been amortised in 2024. The intangible asset represents the right to charge users a fee for use of the toll road.^c

a.	This appendix illustrates one possible format for the disclosure of a service concession arrangement to help in the preparation of consolidated financial statements. Other presentation formats are possible.
b.	Disclosures about the nature and extent of service concession arrangements are provided individually for each service concession arrangement or in aggregate for each class of service concession arrangement.
C.	The disclosure requirements in IFRS 13 do not apply to assets and liabilities that are not measured at fair value after initial recognition.
	b.

Notes

Introduction

# Extracts of notes to the consolidated financial statements (continued)

# 44. Material accounting policies

### D. Revenue

### x. Service concession arrangements

Revenue related to construction or upgrade services under a service concession arrangement is recognised over time, consistent with the Group's accounting policy on recognising revenue on construction contracts. Operation or service revenue is recognised in the period in which the services are provided by the Group. If the service concession arrangement contains more than one performance obligation, then the consideration received is allocated with reference to the relative stand-alone selling prices of the services delivered.

### M. Intangible assets and goodwill

### x. Service concession arrangements

The Group recognises an intangible asset arising from a service concession arrangement when it has a right to charge for use of the concession infrastructure. An intangible asset received as consideration for providing construction or upgrade services in a service concession arrangement is measured at fair value on initial recognition with reference to the fair value of the services provided. Subsequent to initial recognition, the intangible asset is measured at cost, which includes capitalised borrowing costs, less accumulated amortisation and accumulated impairment losses.

The estimated useful life of an intangible asset in a service concession arrangement is the period from when the Group is able to charge the public for the use of the infrastructure to the end of the concession period.

### P. Financial instruments

### x. Non-derivative financial assets – Service concession arrangements

The Group recognises a financial asset arising from a service concession arrangement when it has an unconditional contractual right to receive cash from or at the direction of the grantor for the construction or upgrade services provided, and the right to receive cash depends only on the passage of time. Such financial assets are measured at fair value on initial recognition and classified as financial assets measured at amortised cost.

If the Group is paid for the construction services partly by a financial asset and partly by an intangible asset, then each component of the consideration is accounted for separately and is initially recognised at the fair value of the consideration (see also Note 44(M)(x)).
