2022/2023 Budget Speech Highlights

The 2022/2023 Budget Proposals were presented to the National Assembly on the 7th of February 2022 by the Honourable Minister of Finance and Economic Development, Peggy O Serame - the first female Minister of Finance and Economic Development after five decades of independence.

Budget focus

In her maiden budget speech, the Minister said that the outlook for the domestic economy is positive, with a growth rate of 9.7 percent projected for 2021 and 4.3 percent in 2022. Unfortunately, the economic recovery has been accompanied by rising inflation which reached a decade long high of 8.7 % in December 2021. Domestic inflation is expected to fall throughout 2022 and return to the 3 – 6 percent objective range in the medium term.

The balance of payments and fiscal deficits have necessitated the drawdown of the foreign exchange reserves and Government savings. To address the situation, Government intends to intensify transformation efforts with a view to rebuilding foreign exchange reserves and to take the following measures aimed at restoring fiscal sustainability:

- i) Revenue Mobilisation
 - Increased tax audits and inspections.
 - Review of taxation laws to enhance efficiency and collections.
 - Use of ICT to improve collection efficiency.
 - Enhanced public education for taxpayers
 - Revision of user fees and services charges across Government.
- ii) Managing Government Expenditure
 - Reduce and effectively manage Government wage bill.
 - Reduce subventions to commercial SOEs.
 - Reduce revenue support grants to Local Authorities.
 - Introduce additional cost-containment measures.
 - Improve preparation & prioritisation of development projects
- iii) Rebuilding Fiscal Buffers
 - Restore the Government Investment Account to its pre-COVID-19-crisis levels.
 - Contain expenditures in order to manage the fiscal deficit.

Economic indicators

- The domestic economic growth rate for 2022 is projected at 4.3% (2021 - 9.7%).
- Headline inflation rose to 8.7% in December 2021, the highest rate in a decade. The inflation rate is expected to decline and fall within the 3%-6% objective range during 2022.
- The Bank Rate was maintained at 3.75% (with effect from October 2021).
- A deficit equivalent to 4.4% of GDP was recorded in the first half of 2021. Deficits of P20.1 billion (or 11.6% of GDP) and P12.0 billion (or 6.7% of GDP) were recorded in 2020 and 2019, respectively.
- Foreign exchange reserves amounted to P60.0 billion in October 2021 (P57,5 billion in October 2020), representing 11,3 months import cover for non-diamond goods and services.
- As at October 2021 the Government Investment Account portion of the foreign exchange reserves was P9.9 billion compared to P6.5 billion in October 2020.
- To avert the long-term downward trend in the level of foreign exchange reserves, intensification of transformation efforts aimed at achieving diversified export-led growth, is of critical importance.
- The actual budget out-turn for 2020/2021 was a deficit of P16.41 billion, equivalent to 9.4% of GDP.
- The revised budget forecast for 2021/2022 is a deficit of P10.16 billion, equivalent to 5.09% of GDP.
- A budget deficit of P6.98 billion is projected for the 2022/2023 fiscal year. This represents 3.2% of GDP.

2022/2023 Budget Speech Highlights

Fiscal highlights and proposals

No changes to the current tax rates and other fiscal provisions were announced.

Income Tax - Salient Features

Business Taxable Income

- Income from, or deemed to be from a source within Botswana is taxable in Botswana.
- Income accruing from different businesses is deemed to accrue from one business except capital gains and income from farming and mining.
- Farming, mining and prospecting income/losses and capital gains/losses are ascertained separately.
- Normal business expenses wholly, exclusively and necessarily incurred in the production of assessable income are allowed as deductions.
- Transactions with connected parties should be consistent with the arm's length principle and contemporaneous transfer pricing documentation should be filed with the corporate tax return.
- Deduction of interest expenditure incurred by companies (other than variable rate loan stock companies, micro, small or medium enterprises, banking companies and insurance companies) is restricted to 30% of tax EBIDTA. Any excess interest disallowed is carried forward for 10 years in the case of a mining company or for 3 years in all other cases.
- Deduction of expenditure relating to interest, royalties management or consultancy fees paid or payable to non-residents is allowed in the year in which the related withholding tax is paid over to BURS.
- Specific deductions include capital allowances, expenditure on lease improvements, bad debt provisions, contributions to an approved mine rehabilitation fund. Capital allowance claims for assets procured from third parties through a non-resident related party should be supported by the third party invoice.
- Assessed losses from business can be carried forward for no more than five years, except for mining and prospecting losses, which can be carried forward indefinitely.
- Capital losses can be carried forward for one year only.

Employment Income

- Includes salaries, wages, terminal payments, directors and other fees, bonuses, commissions, allowances and the value of taxable benefits.
- Employment income from, or deemed to be from, a source within Botswana is taxable in Botswana.
- Employment income, including the value of benefits in kind, is subject to monthly withholding tax (PAYE).

Exemptions and Tax Free Benefits for Individuals

Exempt income/earnings include:

- The value of contractual travel benefits for employees and their families.
- Medical fund contributions and medical attention paid for by the employer.
- One third of contractual terminal gratuities payable to expatriate employees.
- Bank and building society interest of P7,800 per annum, for resident individuals.
- One third of severance pay and certain gratuities payable to citizen employees.
- Amount of severance pay or gratuity accrued to an employee transferred an approved pension or retirement annuity fund.

Transfer pricing

Botswana Transfer Pricing Legislation (TP) and Regulations came into effect on 1 July 2019. The Regulations, which are based on the OECD Guidelines, are cited in the Legislation as a relevant source of interpretation.

The law requires transactions between directly or indirectly connected persons to be consistent with the arm's length principle. TP applies to transactions with non-residents and transactions with Botswana resident IFSC accredited related companies.

The terms "connected person" and 'control' are defined in the Income Tax Act.

A transaction with a connected party is considered to be consistent with the arm's length principle if the conditions of the transaction do not differ from the conditions that would have applied between independent persons in a comparable transaction carried out in comparable circumstances.

Below is a list of some of TP documentation/information that taxpayers are required to submit within four months of the end of the financial year:

- An overview of the person's business operations, which includes, the history, recent evolution, general overview of the relevant markets of reference and an organizational chart;
- Description of the group's operational structure including general description of the role that each of the group members carries out with respect to the group's activities, which are relevant to the controlled transaction;
- A general business strategy pursued which includes business restructuring or intangible transfer in the present or immediate past year and an explanation of the effects of such transaction;
- Details of the taxpayer's key competitors;
- Description of controlled transactions, including analysis of the comparability factors etc;
- The amount of intra-group payments and receipts for each category of controlled transactions broken down by the tax jurisdiction of the foreign payer or recipient;
- Copies of all material inter-company agreements;

- A detailed comparability and functional analysis and the relevant connected persons with respect to each documented category of controlled transactions;
- A summary of the important assumptions made in applying the transfer pricing methodology;
- Comparability analysis which includes details of industry and economic analysis, budgets or projections relied on; and
- Any other information that may have material impact on the determination of the taxpayer's compliance with the arm's length principle.

The Commissioner General is empowered to:

- request the taxpayer to submit the equivalent of an OECD Master File within 7 days from the date of the request in cases where transactions with a connected person exceed BWP5 million; and
- restate taxable income in line with the arm's length principle.

Failure to comply with transfer pricing legislation attracts the following penalties:

- the greater of BWP10,000 or 200% of the additional tax arising from a TP adjustment or;
- an amount not exceeding BWP500,000 for failure to comply with TP documentation filing obligations which may be reduced to no less than BWP250,000 upon mitigation; and
- criminal penalties, upon conviction, of up to BWP10,000 or imprisonment for one year for failure to furnish documentation or returns as required under the Income Tax Act or failure to comply any written notice from the Commissioner General.

Please note that a restatement of related party transactions by the Commissioner General may give rise to additional VAT, Withholding Tax and other tax liabilities plus penalties and interest charges.

KPMG Botswana - Tax Services

Tax represents a significant risk to organisations both as a financial cost as well as increased financial exposures through non-compliance with laws and regulations. Tax authorities are increasingly conducting audits and investigations into high risk and this calls for a more efficient and effective management of the tax compliance process. Harsh penalties, arising from audit and investigation findings, negatively impact the entity's cash flow and consequently the shareholder funds.

Companies need to:

- Be aware of the tax risks/opportunities associated with business decisions in order to plan and manage the tax cost;
- Ensure that they are compliant with tax obligations in order to minimise or avoid the risk of penalties; and
- Keep abreast with changes in the tax laws in order to enhance effective tax cost management and compliance.

At KPMG, we believe that effective management of tax issues is integral to your core business.

Our team of professionals together with our network of KPMG professionals around the world can assist you cut through the complexities of tax through the provision of practical advice.

KPMG Botswana tax services
