

Climate Impact Accelerator

An exciting opportunity for public and private clients to accelerate the pace and scale of meeting their net zero targets

Does your organization have net zero ambitions? Are you looking for solutions to achieve them quickly, effectively, and at scale without relying entirely on scarce internal resources?

What is the Climate Impact Accelerator?

The Climate Impact Accelerator, offered through a collaboration between MaRS Discovery District and KPMG, helps corporations and governments identify innovative climate solutions, connect with cleantech ventures, and rapidly scale their implementation to meet climate goals.

Access the Canadian innovation ecosystem

Pilot and **scale** promising technologies

Deliver on climate initiatives and **drive** impact

Increase organizational readiness and agility

How can we help? Together:

KPMG brings the sector knowledge and experience needed to help companies and governments solve for strategic business needs, deliver service outcomes, and leverage technology to offer innovation at scale.

The MaRS Partner Solutions team works with corporate and government partners to accelerate the adoption of innovation, with a focus on helping to remove the barriers to scaling innovation through scoping, sourcing, accelerating and measuring the impact of our partners' innovation portfolios.

Together, KPMG and MaRS are collaborating to offer organizations access to experienced innovation professionals. The collaboration helps to build an innovation architecture with you that supports solution matching, procurement, prototyping and scaling of climate solutions across a variety of streams including:

Transportation

Real estate

Energy generation

And more

The collaboration works hand in hand with organizations to identify solutions and implement them at scale at an accelerated pace; simplifying the procurement process and building capacity within the organization to manage solution deployment:

Prioritize

Identify areas within their climate plans where access to innovative start-ups could move the needle

Revolutionize

Connect with the broadest and most relevant range of start-ups (from early stage to commercialized) to deliver on emission reduction targets

Commercialize

Build contracting, onboarding, and ongoing support programs to ensure venture partnerships drive through to commercialization with positive financial and environmental impacts
