Yukon	9.0	27.0	50.7
Northwest Territories	11.0	26.5	50.2
Nunavut	12.0	27.0	50.7

Notes

- (1) The federal and provincial/territorial tax rates shown in the tables apply to income earned by a Canadian-controlled private corporation (CCPC). In general, a corporation is a CCPC if the corporation is a private corporation and a Canadian corporation, provided it is not controlled by one or more non-resident persons, by a public corporation, by a corporation with a class of shares listed on a designated stock exchange, or by any combination of these, and provided it does not have a class of shares listed on a designated stock exchange.

The 2022 federal budget introduced new rules to eliminate the tax deferral opportunity using a non-CCPC to earn investment income. Specifically, the budget introduced “substantive CCPCs” which are private corporations resident in Canada (other than CCPCs) that are ultimately controlled, in law or in fact, by Canadian-resident individuals. These proposed new rules to tax investment income earned and distributed by substantive CCPCs in the same manner as CCPCs generally apply to taxation years that end on or after April 7, 2022. Finance released draft legislation on August 9, 2022 and accepted stakeholder comments until September 30, 2022.

For tax rates applicable to general corporations, see the tables “Federal and Provincial/Territorial Tax Rates for Income Earned by a General Corporation”.

Corporate Tax Rates 2

Combined Federal and Provincial/Territorial Tax Rates for Income Earned by a CCPC—2023 and 2024

Notes, continued

- (2) The small business income threshold is \$600,000 in Saskatchewan. Therefore, Saskatchewan's combined income tax rate on active business income between \$500,000 and \$600,000 is 15% (i.e., 15% federally and 0% provincially) until June 30, 2023, 16% (i.e., 15% federally and 1% provincially) effective July 1, 2023 to June 30, 2024 and 17% (i.e., 15% federally and 2% provincially) effective July 1, 2024. See the table "Small Business Income Thresholds for 2023 and Beyond" for the federal and provincial/territorial small business income thresholds.
- (3) The general corporate tax rate applies to active business income earned in excess of the small business income threshold. See the table "Small Business Income Thresholds for 2023 and Beyond" for the federal and provincial/territorial small business income thresholds.

CCPCs that earn income from manufacturing and processing (M&P) activities are subject to the same rates as those that apply to general corporations (see the tables "Federal and Provincial/Territorial Tax Rates for Income Earned by a General Corporation").

- (4) The federal government temporarily reduced the small business tax rate to 4.5% (from 9%) and the general corporate tax rate to 7.5% (from 15%) on eligible zero-emission technology manufacturing profits.

The 2023 federal budget proposed to expand the eligible activities that qualify for the reduced tax rates for zero-emission technology manufacturers to include certain nuclear manufacturing and processing activities. This expansion of eligible activities for the rate reduction applies for taxation years beginning after 2023. The budget also proposed to extend the availability of these reduced rates by three years. As a result, the planned phase-out will start in taxation years that begin in 2032 (instead of 2029), and the rate reduction will fully phase out for taxation years that begin after 2034 (instead of 2031). Finance released draft legislation on August 4, 2023 and accepted stakeholder comments until September 8, 2023.

- (5) The federal and provincial/territorial tax rates shown in the tables apply to investment income earned by a CCPC, other than capital gains and dividends received from Canadian corporations. The rates that apply to capital gains are one-half of the rates shown in the tables. Dividends received from Canadian corporations are generally deductible in computing regular Part I tax, but may be subject to Part IV tax, calculated at a rate of 38 1/3%.
- (6) Corporations that are CCPCs throughout the year may claim the small business deduction (SBD). In general, the SBD is calculated based on the least of three amounts — active business income earned in Canada, taxable income and the small business income threshold.

The federal government introduced a new range of \$10 million to \$50 million (previously \$10 million to \$15 million) over which the federal small business income threshold is reduced based on the combined taxable capital employed in Canada of a CCPC and its associated corporations. The new range applies to taxation years that begin on or after April 7, 2022.

Combined Federal and Provincial/Territorial Tax Rates for Income Earned by a CCPC—2023 and 2024

Notes, continued

- (7) A general tax rate reduction is available on qualifying income. Income that is eligible for other reductions or credits, such as small business income, M&P income and investment income subject to the refundable provisions, is not eligible for this rate reduction.
- Income of a corporation earned from a personal services business is not eligible for the general rate reduction and is subject to an additional 5% tax, which increases the federal tax rate on personal services business income to 33%.
- (8) The refundable tax of 10 2/3% of a CCPC's investment income and taxable capital gains, as well as 20% of such income that is subject to regular Part I tax, is included in the corporation's non-eligible refundable dividend tax on hand (NERDTH) account. When non-eligible dividends are paid out to shareholders, a dividend refund equal to the lesser of 38 1/3% of the dividends paid or the combined balance in NERDTH and eligible refundable dividend tax on hand (ERDTH) accounts is refunded to the corporation. The dividend refund on non-eligible dividends must come out of the corporation's NERDTH account before it comes out of the corporation's ERDTH account.
- (9) Saskatchewan has temporarily reduced the province's small business income tax rate to 0% (from 2%) effective October 1, 2020 to June 30, 2023. The small business income tax rate will increase to 1% (from 0%) beginning July 1, 2023 and will be further increased to 2% (from 1%) beginning July 1, 2024.
- (10) Quebec's small business deduction is generally available to corporations only if their employees were paid for at least 5,500 hours in the taxation year (proportionally reduced for short taxation years) or if their employees and those of their associated corporations were paid for at least 5,500 hours in the previous taxation year, to a maximum of 40 hours a week per employee (excluding the hours paid to a subcontractor). The small business deduction is reduced linearly between 5,500 and 5,000 hours, and falls to nil at 5,000 hours.
