Personal Tax Rates 2

Federal and Provincial/Territorial Income Tax Rates and Brackets for 2024

Notes

- (1) The federal tax brackets are indexed each year by a calculated inflation factor, which is based on the change in the average federal inflation rate over the 12-month period ending September 30 of the previous year compared to the change in the rate for the same period of the year prior to that. The federal inflation factor is 4.7% for 2024.
- (2) British Columbia indexes its tax brackets using the same formula as that used federally, but uses the provincial inflation rate rather than the federal rate in the calculation. The inflation factor for this province is 5.0% for 2024.
- (3) Alberta indexes its tax brackets using the same formula as that used federally, but uses the provincial inflation rate rather than the federal rate in the calculation. The inflation factor for this province is 4.2% for 2024.
- (4) Saskatchewan, New Brunswick, Yukon, Northwest Territories and Nunavut index their tax brackets using the same formula as that used federally. The inflation factor for these provinces and territories is 4.7% for 2024.
- (5) Manitoba indexes its tax brackets using the same formula as that used federally, but uses the provincial inflation rate rather than the federal rate in the calculation. The inflation factor for this province is 5.2% for 2024.

Manitoba increased its tax brackets to \$47,000 and \$100,000 (from \$36,842 and \$79,625), effective for the 2024 tax year, with a return to annual indexing in 2025.
- (6) Ontario indexes its tax brackets and surtax thresholds using the same formula as that used federally, but uses the provincial inflation rate rather than the federal rate in the calculation. The inflation factor for this province is 4.5% for 2024.

Ontario surtax of 20% applies to the provincial income tax (before surtax) in excess of \$5,554. Ontario surtax of 36% applies in addition to the 20% surtax (i.e., a total surtax of 56%) to the provincial income tax (before surtax) in excess of \$7,108. The surtax effectively increases the top marginal tax rate for Ontario residents to 20.53% (13.16% x 156%).

Ontario resident individuals with taxable income over \$20,000 are also required to pay a Health Premium each year (see the table "Provincial Health Premiums").
- (7) Quebec indexes its tax brackets using the same formula as that used federally, but uses the provincial inflation rate, excluding changes in liquor and tobacco taxes, rather than the federal rate in the calculation. The inflation factor for this province is 5.08% for 2024.

Quebec residents are required to make payments to the province's Health Services Fund (see the table "Provincial Health Premiums").
- (8) Nova Scotia does not index its tax brackets.
- (9) Prince Edward Island does not index its tax brackets.

Prince Edward Island introduced a new five-bracket personal tax system that replaced the three-bracket system and eliminated the 10% surtax beginning in 2024. As a result, the province's top marginal personal tax rate will increase to 18.75% (from 16.7%), effective January 1, 2024.
- (10) Newfoundland and Labrador indexes its tax brackets using the same formula as that used federally, but uses the provincial inflation rate rather than the federal rate in the calculation. The inflation factor for this province is 4.2% for 2024.
