Corporate Tax Rates 2

Substantively Enacted¹ Income Tax Rates for Income Earned by a CCPC² for 2025 and Beyond—As at December 31, 2025

Notes

- (1) For IFRS Accounting Standards and Accounting Standards for Private Enterprises (ASPE) purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be "substantively enacted" at the balance sheet date. In general, where there is a majority government, federal and provincial tax changes are considered to be "substantively enacted" for IFRS Accounting Standards and ASPE purposes when a tax bill containing the detailed legislation is tabled for first reading in the House of Commons or the provincial legislature. In the case of a minority government, however, the "substantively enacted" test is more stringent and requires the enabling legislation to have passed third reading in the House of Commons or the provincial legislature.

For U.S. Generally Accepted Accounting Principles (U.S. GAAP) purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be enacted at the balance sheet date. In general, tax rate changes are considered enacted once the relevant bill has received Royal Assent.

When tax rate changes are considered enacted or "substantively enacted", the effect of the change in tax rate is reflected in the period in which the changes are enacted or "substantively enacted". For example, if a bill becomes "substantively enacted" for IFRS Accounting Standards or ASPE purposes (enacted for U.S. GAAP purposes) on December 31, the tax rate changes should be reflected in the corporation's financial statements for the quarter that includes December 31.

- (2) The federal and provincial/territorial tax rates shown in the tables apply to income earned by a Canadian-controlled private corporation (CCPC). In general, a corporation is a CCPC if the corporation is a private corporation and a Canadian corporation, provided it is not controlled by one or more non-resident persons, by a public corporation, by a corporation with a class of shares listed on a designated stock exchange, or by any combination of these, and provided it does not have a class of shares listed on a designated stock exchange.

Investment income earned by a "substantive CCPC" is taxed in the same manner as a CCPC. A substantive CCPC is a private corporation resident in Canada (other than a CCPC) that is ultimately controlled, in law or in fact, by Canadian-resident individuals.

For tax rates applicable to general corporations, see the tables "Substantively Enacted Income Tax Rates for Income Earned by a General Corporation".

- (3) The general corporate tax rate applies to active business income earned in excess of the small business income threshold. See the table "Small Business Income Thresholds" for the federal and provincial/territorial small business income thresholds.

Substantively Enacted¹ Income Tax Rates for Income Earned by a CCPC² for 2025 and Beyond—As at December 31, 2025

Notes, continued

(4) The small business tax rate is temporarily reduced to 4.5% (from 9%) and the general corporate tax rate is temporarily reduced to 7.5% (from 15%) for eligible zero-emission technology manufacturing profits. The reduced tax rates are gradually phased out starting in taxation years that begin in 2032, and are fully phased out for taxation years that begin after 2034.

(5) The federal and provincial/territorial tax rates shown in this table apply to investment income earned by a CCPC, other than capital gains and dividends received from Canadian corporations.

The rates that apply to capital gains are one-half of the rates shown in the tables.

Dividends received from Canadian corporations are generally deductible in computing regular Part I tax, but may be subject to Part IV tax, calculated at a rate of 38 1/3%.

(6) Corporations that are CCPCs throughout the year may claim the small business deduction (SBD). In general, the SBD is calculated based on the least of three amounts — active business income earned in Canada, taxable income and the small business income threshold.

(7) A general tax rate reduction is available on qualifying income. Income that is eligible for other reductions or credits, such as small business income, M&P income and investment income subject to the refundable provisions, is not eligible for this rate reduction.

Income of a corporation earned from a personal services business is not eligible for the general rate reduction and is subject to an additional 5% tax, which increases the federal tax rate on personal services business income to 33%.

(8) Corporations that derive at least 10% of their gross revenue for the year from manufacturing or processing goods in Canada for sale or lease can claim the manufacturing and processing (M&P) deduction against their M&P income.

(9) The refundable tax of 10 2/3% of a CCPC's investment income and taxable capital gains, as well as 20% of such income that is subject to regular Part I tax, is included in the corporation's non-eligible refundable dividend tax on hand (NERDTH) account. When non-eligible dividends are paid out to shareholders, a dividend refund equal to the lesser of 38 1/3% of the dividends paid or the combined balance in NERDTH and eligible refundable dividend tax on hand (ERDTH) accounts is refunded to the corporation. The dividend refund on non-eligible dividends must come out of the corporation's NERDTH account before it comes out of the corporation's ERDTH account.

Current as of December 31, 2025

Substantively Enacted¹ Income Tax Rates for Income Earned by a CCPC² for 2025 and Beyond—As at December 31, 2025

Notes, continued

- (10) Saskatchewan cancelled the previously scheduled increase of the province's small business income tax rate to 2% on July 1, 2025. As a result, the province's small business income tax rate will remain at 1%.
- The small business income threshold is \$600,000 in Saskatchewan. Therefore, Saskatchewan's combined income tax rate on active business income between \$500,000 and \$600,000 is 16% (i.e., 15% federally and 1% provincially).
- Saskatchewan provides a manufacturing and processing profits tax reduction that effectively reduces the corporate tax rate on the corporation's Canadian manufacturing and processing profits earned in the province to 10%.
- (11) Ontario provides a manufacturing and processing tax credit that effectively reduces the corporate tax rate on the corporation's Canadian manufacturing and processing profits earned in the province to 10%.
- (12) Quebec's small business deduction is generally available to corporations only if their employees were paid for at least 5,500 hours in the taxation year (proportionally reduced for short taxation years) or if their employees and those of their associated corporations were paid for at least 5,500 hours in the previous taxation year, to a maximum of 40 hours a week per employee (excluding the hours paid to a subcontractor). The small business deduction is reduced linearly between 5,500 and 5,000 hours, and falls to nil at 5,000 hours.
- (13) Nova Scotia decreased the province's small business income tax rate to 1.5% (from 2.5%) and increased the province's small business income threshold to \$700,000 (from \$500,000) effective April 1, 2025. Therefore, Nova Scotia's combined income tax rate on active business income between \$500,000 and \$700,000 is 16.5% (i.e., 15% federally and 1.5% provincially) effective April 1, 2025.
- (14) Prince Edward Island decreased the province's general corporate income tax rate for active business income, M&P income and investment income to 15% (from 16%) and increased the province's small business income threshold to \$600,000 (from \$500,000) effective July 1, 2025. As a result of the increased small business income threshold, Prince Edward Island's combined income tax rate on active business income between \$500,000 and \$600,000 is 16% (i.e., 15% federally and 1% provincially) effective July 1, 2025.
- (15) Yukon provides a manufacturing and processing profits tax credit that effectively reduces the corporate tax rate on the corporation's Canadian manufacturing and processing profits earned in the territory to 2.5%.
