How we can support you

Impact assessment for the IOA revision

The revision of the Insurance Oversight Act (IOA) takes effect from 1 January 2024 and comprises several changes, particularly in relation to the following aspects:

- Qualified life insurance
- Recovery and resolution planning
- Rules of conduct for insurance intermediaries
- Customer segmentation

We recommend identifying and estimating what action needs to be taken with an impact assessment.

Post-implementation assessment for the FADP revision

The partially revised Federal Data Protection Act (FADP) has been in force since 1 September 2023. Handling personal data is a key issue for any insurer and is proving more challenging than ever.

This is why we recommend seeking independent advice on how much work needs to be done in terms of implementing FADP.
