

Web Accounting

Accounting & Payroll Services

KPMG Web Accounting is the web-based version of Switzerland's widely-used business software, ABACUS. It enables you to handle accounting, financial reporting and payroll data online while at the same time working alongside us even more efficiently. You decide which activities you handle yourself and when to make use of our expert knowledge. This flexible online solution allows you to access your data whenever, wherever.

Your challenges and our support

Our services are flexible and based on your needs. We can offer you tailor made solutions with the best practice applicable.

Web Accounting offers the following applications

- Financial accounting
- Accounts receivable accounting
- Accounts payable accounting
- Payroll & Human Resources
- Electronic banking
- Activity recording & project accounting
- Customer relationship management (CRM)
- Invoicing & order management
- Fixed assets accounting
- Production planning and -steering (PPS)

Depending on your requirements, the modules can be combined.

Your benefits

- Cost efficient IT solution
- No investment costs for you
- Location-independent access to data and programs without time constraints – all you need is Internet access
- No software installations and therefore no updates are required
- No physical exchange of data is necessary since all data is acquired online

- You and KPMG work on the same user interface and always have the same data available
- We take care of daily backups for you
- Transparent costs for use and application of the software
- Personalized and therefore protected access to your data through two-factor authentication app
- Encrypted communication between you and us

What technical requirements must be met to use AwaWeb?

- An Internet-enabled PC or Mac
- A valid two-factor authentication app
- Internet access

How safe will your data be?

Client applications run on two physically and geographically separate data centers with electronic space surveillance and a fully automated alarm system. Professional data protection, stringent access controls, and redundant systems guarantee a high quality standard, meeting the sensitivity of the data.
