

KPMG Digital Gateway

**The innovative portal solution
for your tax department**

As a tax professional you have many roles: compliance manager, controller, data analyst, strategist. You are required to constantly adjust your strategic role and identify business opportunities and risks. And the efficient management of increasingly complex tasks is becoming more and more a key success factor – as are the technology solutions used for this purpose. Our innovative tax portal provides you with optimal support.

KPMG Digital Gateway

The cloud-based portal solution offers you a central point of access to your digital tax function. It acts as a bracket around your tax processes, applications and data, efficiently linking them all together. From just one platform you can manage and control your global compliance processes and access your tax applications. These can be integrated into the platform, no matter which providers you use, in a similar way to apps on a mobile phone.

KPMG Digital Gateway also acts as a „data lake“. Relevant data from various systems are collected, processed and made available for all applications. This eliminates interfaces or media disruptions between different tools, reduces susceptibility to errors and improves data quality. As a result, a more meaningful analysis of data is enabled, including with respect to business opportunities and risks. With interactive dashboards and automatically generated reports, you can share the results with the decision-makers in your company.

Some or all of the services described herein may not be permissible for KPMG audit clients and their affiliates or related entities.

The innovative portal solution

With these user-friendly modules, you are firmly in control.

Digital Control Tower:

Data-based insights into the three key focuses of a tax function – opportunities, risks and compliance
