

The value of Snowflake with KPMG

What is Snowflake?

Snowflake is a cloud-based data platform built around scalability and elasticity, empowering organizations to adapt to changing data needs. It supports a wide range of data types and provides advanced analytics functionalities and robust integration capabilities to derive meaningful insights from data and seamlessly integrate with other systems.

KPMG's Snowflake capabilities

AI & Data & Analytic Strategy/Implementation

Snowflake Standup

Snowflake Migration

Snowflake Automation & Reporting

Snowflake Engineering

Snowflake Integration

Snowflake Operations

Offerings & accelerators

Credential example 1:

Client: large food retailer in Germany

Objective: Migration of DWH from Teradata to Snowflake

Response

KPMG team used a proven approach for agile migration support

Deliverables

KPMG supported the migration by doing quality assurance and testing

- KPMG brings deep business understanding and Teradata experience
- KPMG brings Snowflake experiences
- KPMG worked together with the customer in a joint team approach

Credential example 2:

Client: production company in Germany

Objective: Need to consolidate their several analytical needs in a coherent analytics and reporting

Response

Creation of a data lakehouse architecture and implementation on Snowflake leveraging several source systems to build one version of the truth

Deliverables

- Snowflake-based Lakehouse architecture
- Include production data (like sensor data), financial data and non-financial data to a holistic view of the performance of the company
- Dashboards Power-BI based fulfilling business reporting requirements
- AI based use cases to get better view on business with machine learning algorithms for prediction
