

Advanced reporting metrics

Approx. 54% of AP and finance executives say that “deeper, more agile analytics and reporting” are essential for future success

Opportunity

Monitor KPIs across different functions within the enterprise. By comparing performance metrics against industry benchmarks & historical trends, identify areas of strength, as well as areas where performance falls short.

One of the greatest values that data-driven automation can provide is visibility, the right solution can help a business measure both day-to-day and long-term performance, while enlarging the scope of its company and achieving added value beyond cost optimization.

Key Benefits

- Transparent reporting
- Clear metrics
- Better understating of performance

Solution Description

The following metrics are easily trackable by AI tools:

- Number of invoices processed per month or per employee
- Spend by category/supplier/volume
- Order processing times
- Invoice delivery & payment status
- Credit risk exposure
