

# Digital Finance Strategy & Vision

KPMG Digital Finance has a proven track record in helping Finance Functions manage unexpected digital changes at unprecedented speeds. While digital disruption may threaten current business practices, it also creates significant opportunities for organisations that are willing to proactively embrace this change.

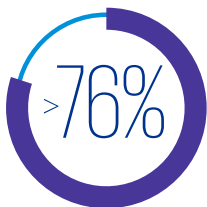

## What is Digital Finance?

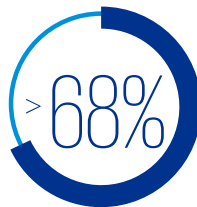

CEOs now need a more nimble, effective, technology and data-driven Finance Function to address this disruption in order to be able to convert these challenges into opportunities.

This is driving the Finance Function to support CEOs in taking on a considerably broader and deeper set of strategic responsibilities than ever before.

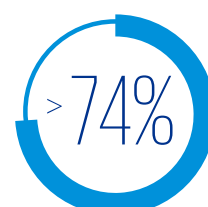

## View from the top

of CEOs agree their growth relies on their ability to challenge and disrupt business norms

of CEOs believe that moving too slow can lead to obsolescence

of CEOs are increasing digitisation of operations and creation of next-gen operating model

HFS Research in conjunction with KPMG International: State of intelligent automation, 2019. 2020 U.S. CEO Outlook report.

## The Solution

With understanding from above, we peel back the layers and dive deeper into what disruptors are impacting the Finance Function internally through People, Process, Technology, Governance & Control, Data & Reporting and Service Delivery. Our solution follows the following three stages:

### Finance Function Diagnostic

Taking a deep dive into how the finance function operates and supports the business and strategy

### Digital Finance Maturity Assessment

Leveraging from KPMG's Future of Finance leading practices to develop a roadmap delivery

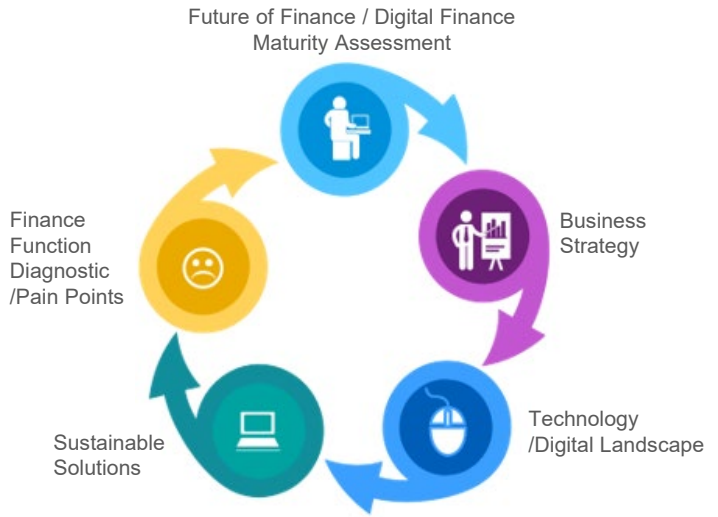

### Delivering Sustainable Solutions

Aligning your needs and value creation solutions

# How we develop Digital Finance Solutions

In developing Digital Finance solutions, we consider the wider gamut of **Business Operations and Strategies** into the future. This ensures the Finance Function matures in line with business requirements and technology infrastructure

**KPMG's Future of Finance**, depicted by the six pillars below, will provide KPMG's global point of view on the future of finance in each Finance area to draw out further considerations and develop **Sustainable Solutions**

### Strategy and value management

Preserve and create value through agile, effective allocation of capital and resources to enable strategic priorities

**Extreme automation**  
Integrate new technologies

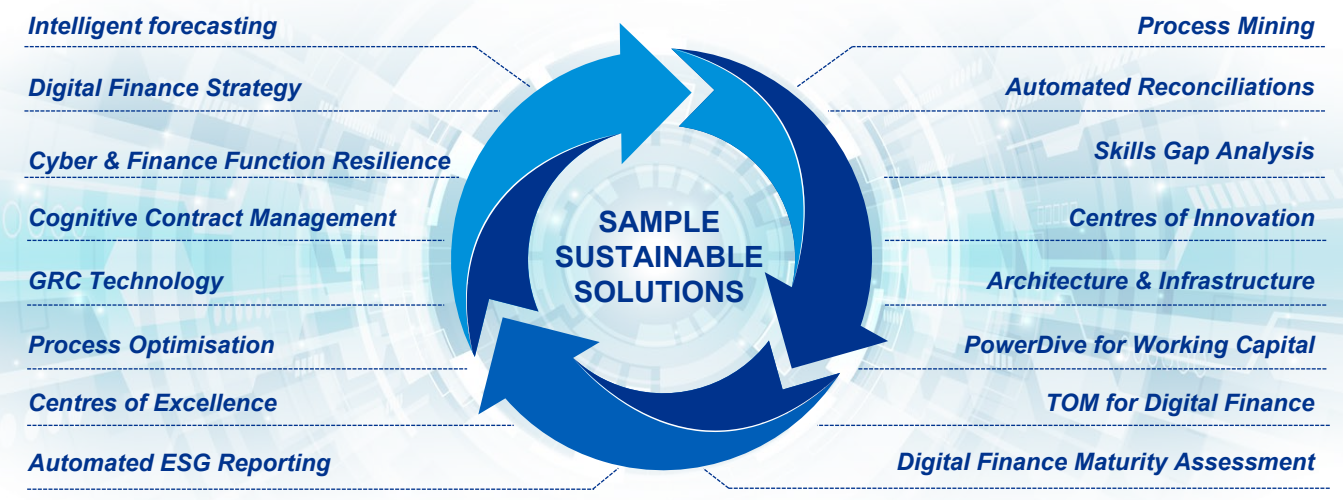

**Data, analytics and insights**  
Leverage data to unlock new value and viewpoints

**Organizational agility**  
Quickly adapt to market shifts

**Modern Workforce**  
Embrace new ways of working and talent management

### Risk and Compliance

Risk management must support, not hinder innovation
