

cutting through complexity

TMMi and its potential benefits

Improving testing for everyone

Management Consulting, Business Excellence

2015

Testing process improvement

TMMi is a **test maturity model** developed by the TMMi Foundation

TMMi is being applied in **various domains** and **industries world-wide**

Perceived as a **de-facto standard** for test improvement and assessment

Using TMMi, Organisations can improve their test process and even have their test process or test organization accredited when it complies with the requirements. Important differences between TMMi and other test improvement models are independence, compliance with international testing standards, the business-driven (objective-driven) orientation and the complementary relationship with the CMMI framework.

Why TMMi

- Provides tools for effective and measurable test improvements
- Build structure to improve test process
- Provides accreditation
- Enables worldwide assessment

**Potential business
benefits**

Open	838.63
High	856.45
Low	836.23
Close	845.12
on Close (50)	NA
on Close (100)	NA
on Close (200)	NA

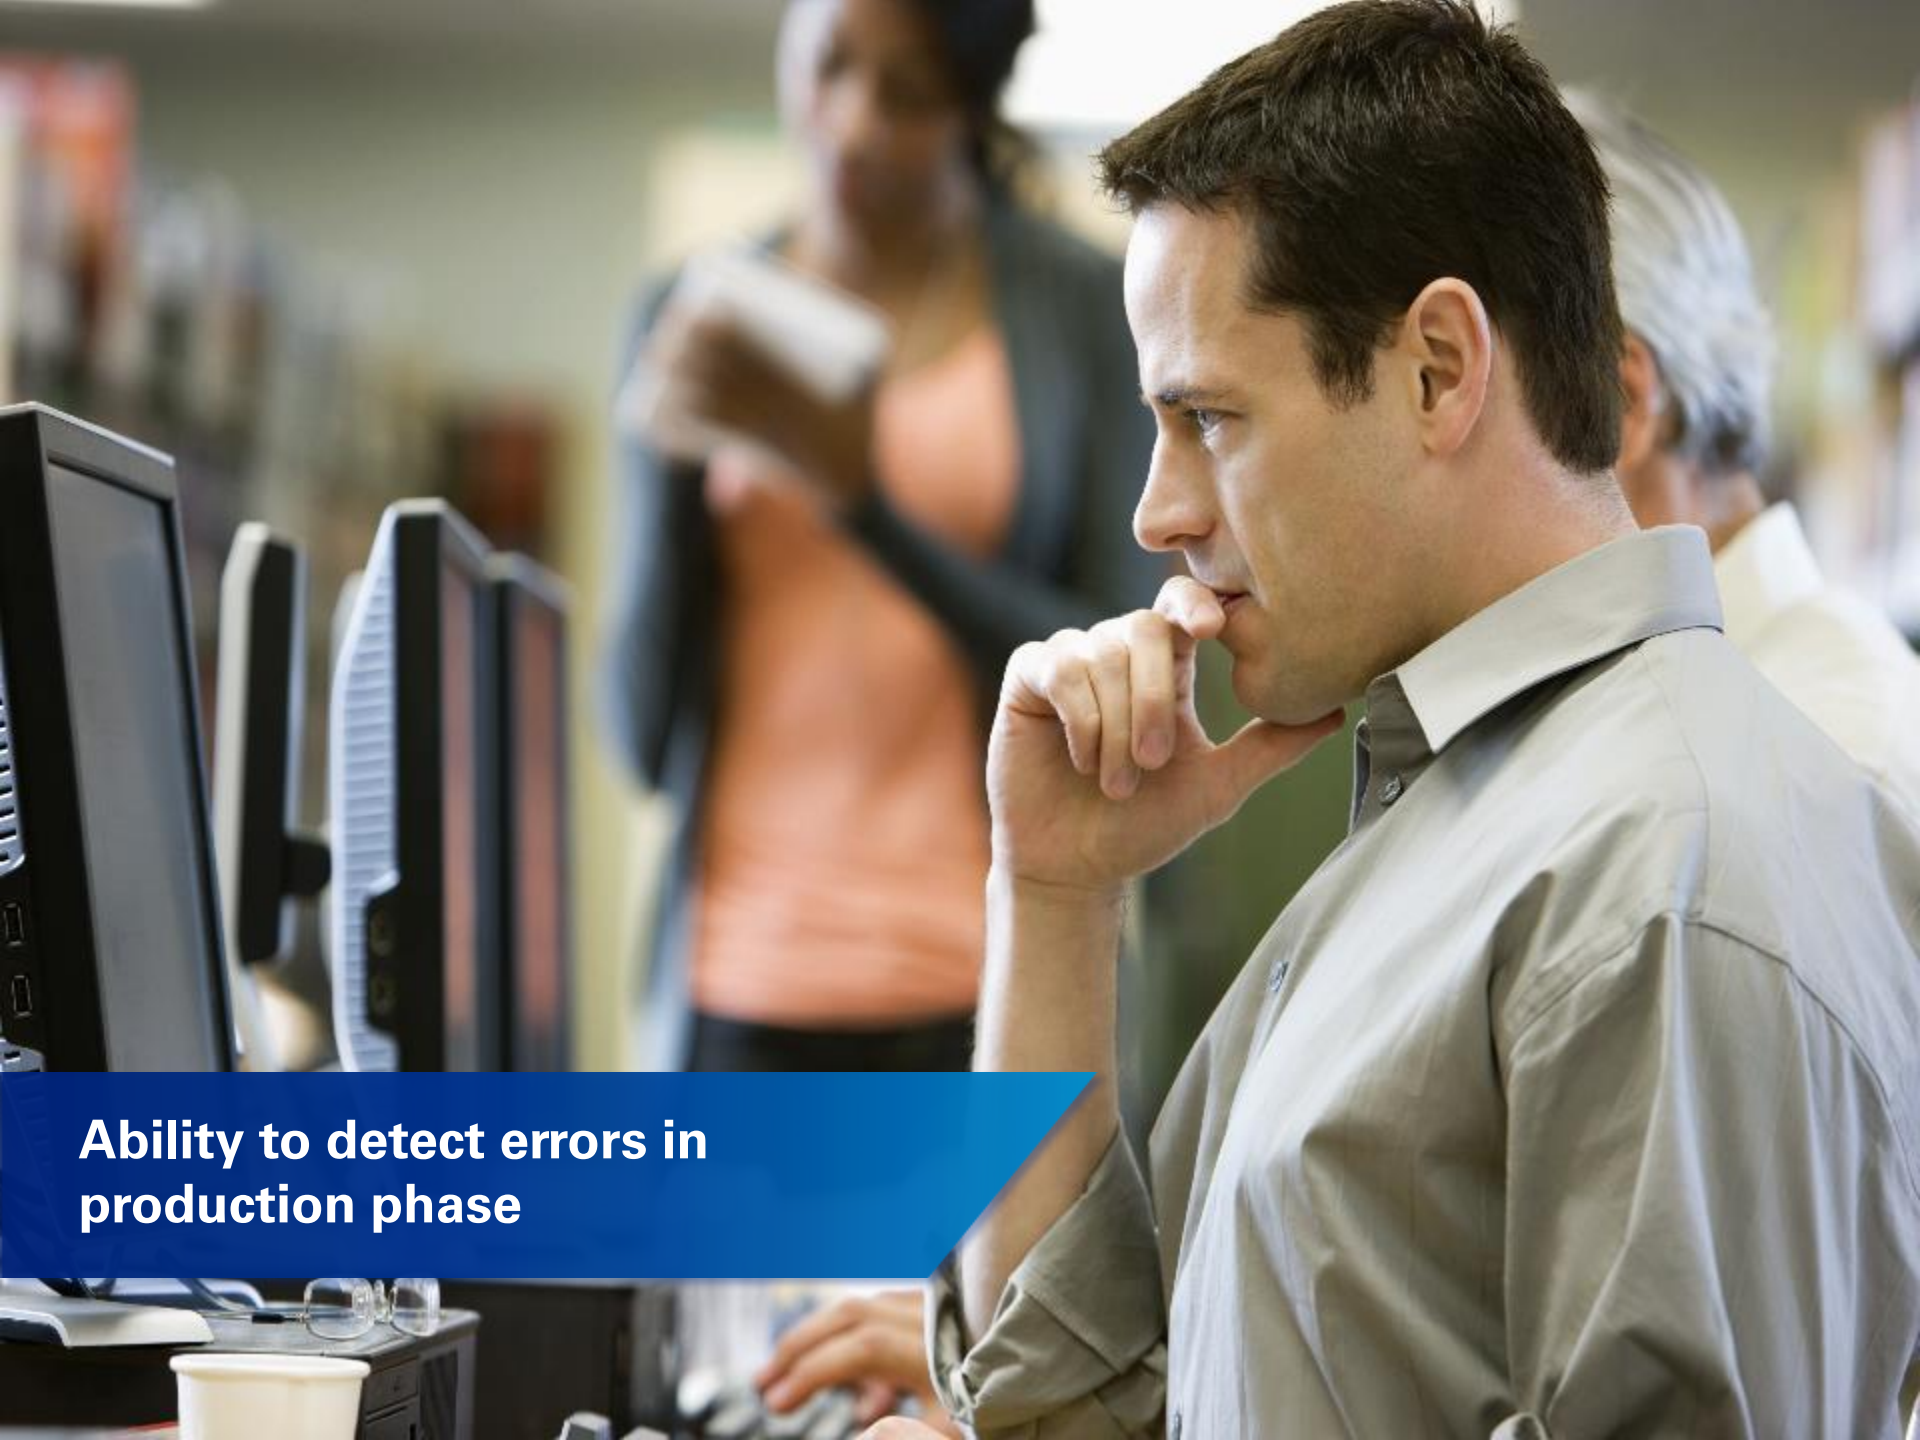

Improved software quality

Enhanced performance

**Ability to detect and prioritise
cost effective improvements**

**Ability to detect errors in
production phase**

**Better understanding of
overheads related to testing**

Improved customer satisfaction

Flexible delivery model

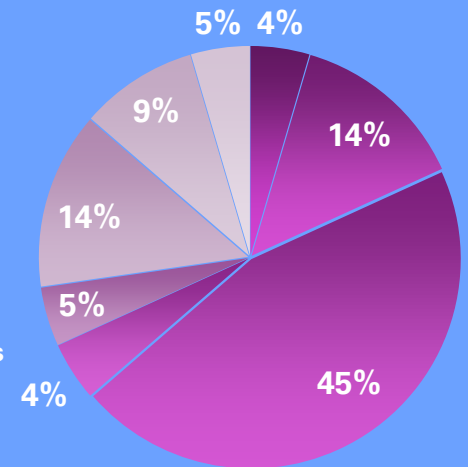

TMMi Trends

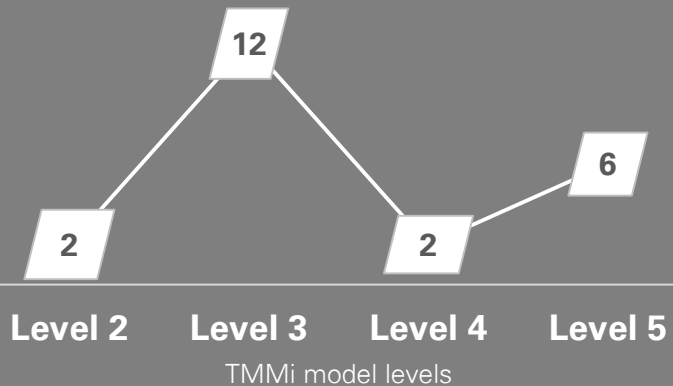

- Aerospace and Defence
- BFSI
- IT
- Software Quality Assurance
- Software testing body
- Telecommunications
- Travel
- Government Ministerial Department

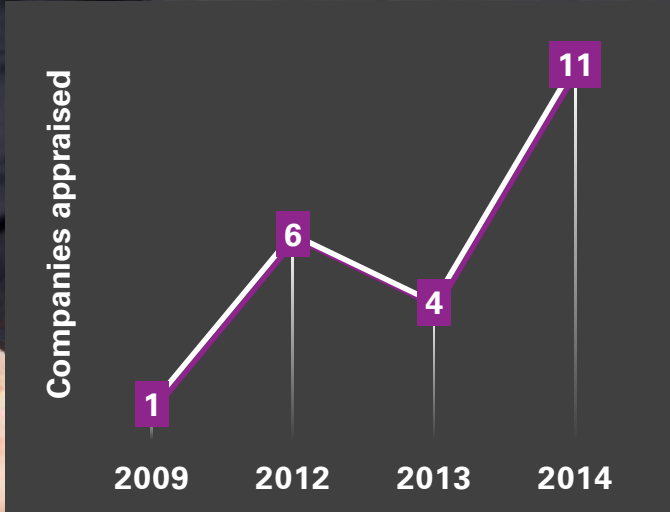

Share of TMMi adoption across varied industries

Number of companies
assessed at respective level

**Number of TMMi accredited organisations
and their level of accreditations worldwide**

TMMi adoption trend
