

Unleashing the power of SAP S/4HANA®

Helping to revolutionize industries and transform enterprises

An SAP S/4HANA-enabled business transformation with KPMG provides the opportunity for organizations to transform their business with confidence.

A move to SAP S/4HANA with SAP Business AI should be a move to a modern enterprise. It's an opportunity to improve and streamline business processes across an organization, to leverage the value of common data structures, and to adopt the agility needed to excel in a future defined by constant innovation.

The SAP S/4HANA cloud-enabled enterprise resource planning (ERP) platform enables organizations to benefit from greater efficiencies, automated and streamlined business processes, meaningful insights to inform strategic decisions, and strengthened risk and compliance programs. SAP Business AI can help take organizations to the next level by powering insight and ingenuity, and scaling up enterprise innovation.

But without the necessary expertise and guidance, a transformation of this size has the potential to be overly complex, expensive, and risky — which can lead to poorer-than-expected metrics and outcomes.

KPMG firms are helping businesses to unleash the power of SAP S/4HANA with SAP Business AI through a business-led, technology-enabled, cloud-first, industry-focused, and platform-enabled approach.

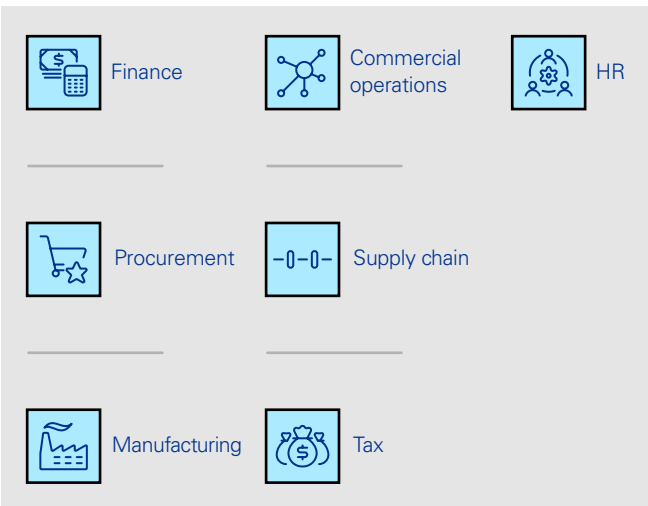

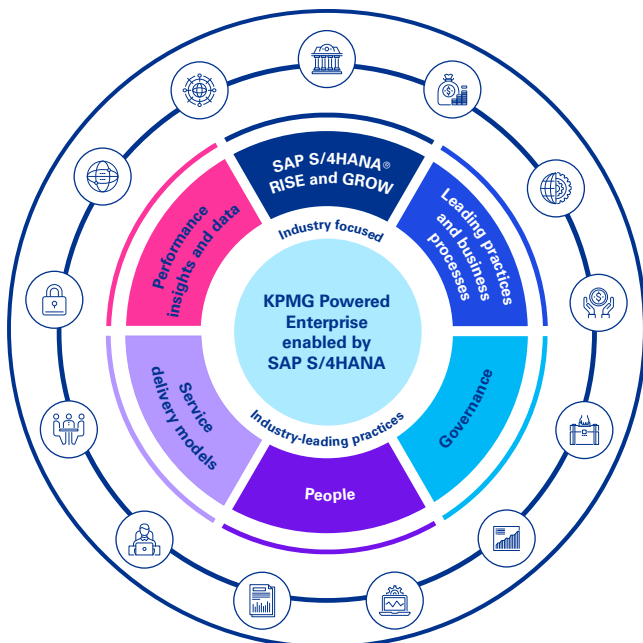

Unleashing the power of SAP S/4HANA with KPMG Powered Enterprise

KPMG Powered Enterprise is an **outcome-driven digital transformation solution that combines deep industry-focused business process knowledge, established delivery capabilities, and leading technologies** to help drive sustainable change,

enhance performance, and create lasting value. Fueled by a winning combination of deep industry and functional knowledge and leading SAP business processes, KPMG firms deliver dynamic, agile operating models that help position businesses for growth and innovation.

An efficient, scalable, risk-mitigated, industry-focused, six-tier, globally standard target operating model harnesses the value of SAP S/4HANA.

Business-led, cloud-first, industry-focused and platform-enabled

KPMG professionals understand the complexities associated with a SAP S/4HANA-enabled business transformation. We apply a business-first approach to an organization's move to SAP S/4HANA, starting with a deep understanding of the strategic imperatives driving your need for change.

KPMG firms are valued for their ability to deliver enterprise-scale business transformation and bring a wealth of knowledge, skills, and experience to deliver a digital transformation solution — from the operational core of your business and across business processes toward consistent value generation.

Along with KPMG firms' well-established methodologies, SAP accelerators and the KPMG Powered Enterprise and KPMG Trusted AI frameworks enable KPMG professionals to help businesses unleash the power of SAP S/4HANA with SAP Business AI, and complete their transformation more efficiently.

Client success story

KPMG in the US helped the largest global IT infrastructure services provider to simplify and streamline its business globally with SAP S/4HANA, enabling it to focus on providing excellent service to its clients.

KPMG in the US played a pivotal role in helping the organization separate from costly legacy applications while simplifying, streamlining and standardizing critical business processes and driving clarity through unified data. In order to meet a 24-month transitional services agreement (TSA) exit deadline from its parent company, KPMG professionals helped the client through a fit-for-purpose transformation of its

front, middle and back-office functions, such as quote-to-cash, project management, labor claiming, finance and accounting, tax, and procurement. More than 375 legacy systems and applications were replaced with a single global SAP S/4HANA private cloud instance on Microsoft Azure in more than 65 countries, territories and regions leveraging KPMG Powered Enterprise and SAP S/4HANA. KPMG professionals helped the organization successfully exit its TSA (within the 24-month TSA timeframe) while limiting operational disruptions, thus playing a pivotal role in helping it separate from costly and complex legacy applications and processes, as well as streamlining critical processes and unifying data.

Why KPMG?

By focusing on value and performance, KPMG firms help organizations solve some of their most pressing business challenges and successfully execute on their move to SAP S/4HANA. Our trusted experience in people and industry-focused technology-enabled business transformations, combined with the advanced capability of SAP's digital and cloud-based ecosystem, can help guide you to transform your business with confidence.
