KPMG

Cyber response retainer program

Cyber Security for all

Evolving challenges in the cyber security space

256 days with the enemy

The average time that an organization takes to identify advanced persistent threats is 256* days, and most of the time, the damages are already done.

Ineffective methodologies

The current methods of perimeter security leaves a wide gap in the ability to monitor and protect from the threats.

Growing online exposure

At least 50 per cent of businesses offer online payments, provide access to social media sites and transact with business through online channels.

USD 6.5 million per breach

The one big thing consistently growing is the unfathomable number of data breaches. The cost of every breach (only in the U.S.) is on the rise.

Distributed solutions

The threat management capability needs to get all of its components in place, to take action proactively ahead of the threat.

Response discipline

An integrated response mechanism is necessary to takedown and build corrective measures towards emerging attacks

The Cyber Response Services

KPMG's On-Demand Cyber Incident Response Services model is an affordable, customized service targeted towards small and medium enterprises to address many cybersecurity threats collectively.

Under this model, we offer a host of KPMG's cybersecurity solutions categorized and bundled together as per your business need. This offering helps reduce risks, can proactively inform clients of threats, and focuses on the long-term development of cyber-response capabilities

**KPMG's three-pronged approach under the Cyber Response Services**

A **Readiness:** The phase consist of information gathering on the current system, access and analyze findings and create a response strategy

B **Response:** A customized incident response and management plan for SocGen.

C **Post-Incident Review:** In case of an Cyber incident we provide an incident analysis report, followed by the corrective actions and monitoring of the systems
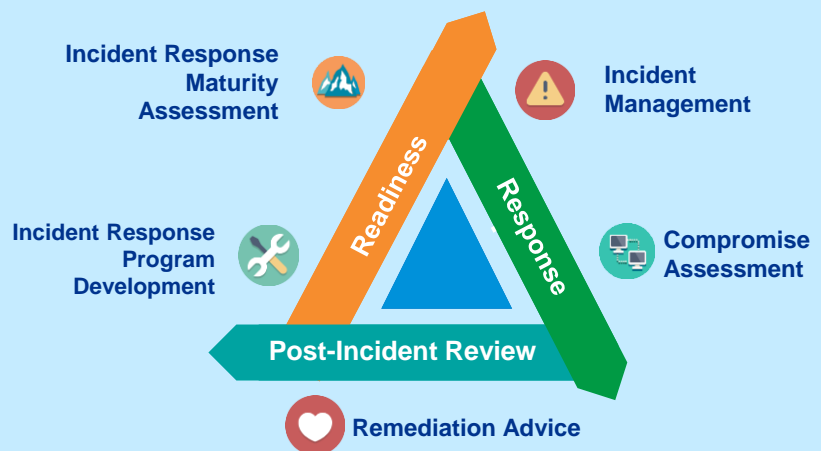

Workflow process

Phase 1: Onboarding

A

On-demand agreement: We meet you to discuss Incident Response requirements and agree the best option, based on your requirements.

B

Readiness: A workshop is held to gain an understanding of their infrastructure systems and current risks. A hotline and automated e-mail notification system is established.

Phase 2: KPMG on standby

KPMG's team of expert will be on standby as an emergency response unit. In case of an security breach…

A

Contact KPMG: Reach out to KPMG through the hotline or automated E-mail notification

B

Incident response: Incident triage and first response call. We attend site if needed

C

Post-incidence monitoring: Quarterly check-ins to review the general threat landscape and your overall cyber needs
