

KPMG Organizes a Solution Showcase about its Powered Enterprise and Technology Transformation in Healthcare

Powered and Managed Services

By using the power of leading practice and pre-built digital assets, KPMG Powered Enterprise and Managed Services offers tailored solutions, for better outcomes, across every business function, key industries and major technology platforms.

Powered Enterprise includes KPMG's Target Operating Model, Powered Technology and Powered Evolution. Together they can make your business more responsive, resilient, and competitive.

Managed services leverages KPMG outsourcing capabilities with Managed Services framework and methodologies to achieve client's strategic objectives.

Speakers

Jonathan Di Michiel – Partner KPMG

KPMG's Global Healthcare Leader for Powered Enterprise

Anwer Khan – Partner KPMG

Global Healthcare Sector Technology Leader and U.S. partner

Description

KPMG has invested heavily to build a market leading solution that enables back-office transformation in healthcare. Whether it is Finance, HR, Supply Chain, Clinical Operations, CRM or Procurement, KPMG has pre-built assets across all the major technology platforms. Key to our solutions is that they are business led, and technology enabled. This showcase will talk to the established assets and the importance of a best-in-class target operating model as the foundation to success of any technology enabled transformation.

Showcases:

- **HR and Finance:** Explore our solutions to accelerate back-office transformation
- **Generative AI:** See our latest and greatest AI uses cases around generative AI in healthcare transformation
- **IT Cost Optimization:** Preview our library of levers and frameworks to help clients drive IT cost optimization
- **Managed Services:** Learn how we combine skilled resources, subject matter expertise, data, and technology solutions, to enable clients to reduce costs, improve productivity, and accelerate transformation & innovation, whilst meeting regulatory expectations
- **Discharge Planning:** Find out how to unlock value and improve patient care delivery by more effectively addressing discharge planning and realize margin improvements and better patient outcomes
