The future of New Zealand after COVID-19

Our resounding view is that now is the time for New Zealand to reset.

To re-think our position in the world and to reconsider our narrative locally, nationally and globally.

The business environment for the next two to three years will be very turbulent for most organisations. As a result of COVID-19, organisations need to reconsider their future and what these changes mean for them and their customers.

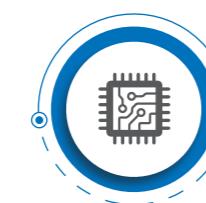

We must focus relentlessly on how we optimise our businesses in this environment, ensuring we have the agility to pivot to new priorities at pace and embedding long term business resilience.

This is a real opportunity to reset our business strategy, but it will only be achieved if we are financially strong, have an agile operating model, effective automation and an elastic workforce.

We're experiencing the kind of fundamental shift that requires us as businesses, iwi and government organisations, to collaborate, to rethink and to reset. Let's make the most of this opportunity.

How KPMG can help

Reduce cost and improve productivity

RAPID ASSESSMENT MOBILISATION PROGRAMME

Our RAMP framework rapidly assesses your organisation's opportunities and threats in times of disruption. We can help you rapidly implement productivity improvements by identifying your opportunity for cost out, operational improvement and revenue uplift.

Leverage digital change

DIGITAL SPRINGBOARD

Adapt how your organisation operates to embrace digital ways of working. KPMG's digital enablement tools set the scene, help you understand your digital landscape, and provide you with a clear view of the pathway ahead. This is the first step towards your organisation's digital future.

Optimise your operating model

RAPID RESPONSIVE OPERATING MODEL

Reconfigure your operating model to respond to our new reality. We can help you design a responsive operating model to enable you to respond, scale and exploit opportunities as they become available. KPMG's Rapid Responsive Operating model will help you focus on growth, security, viability and sustainability.

Future-proof your workforce

WORKFORCE OF THE FUTURE

Re-shape your workforce to operate effectively and efficiently into the future. Organisations need to consider fresh challenges such as workforce requirements, employee wellbeing, future operating models, compliance requirements and emerging technologies. KPMG's Workforce of the Future model can help you work through these challenges.

Deliver infrastructure projects at pace

INFRASTRUCTURE RECOVERY

As part of New Zealand's economic recovery, infrastructure investment and delivery is a key stimulus. The rapid mobilisation of projects is now required whilst recognising that these projects are being delivered in a very different risk environment.

KPMG has the capacity and experience to help you tackle these challenges and deliver infrastructure support at pace. We understand your need for timely delivery of projects in the current environment, we are experienced in delivering major infrastructure projects and our team of experts bring local and global insights to allow you to deliver your projects and achieve your outcomes.
