If you can't measure it, you can't understand it. If you can't understand it, you can't control it; and if you can't control it, you can't improve it.

KPMG has developed a unique solution to help organisations meet stakeholder expectations as well as obligations under the Financial Sector (Climate-related Disclosures and Other Matters) Amendment Act 2021 and the new Climate Standards. Our Climate Risk & Resilience Navigator (Climate Navigator) also helps you:

- Put the right policies, processes, and plans in place to reduce risks and capture emerging opportunities in the global transition to a low-emissions economy;
- Accelerate alignment with global reporting frameworks; and,
- Assure non-financial disclosure statements.

The Climate Navigator entails a robust review of your structures, systems and settings to identify opportunities for improvement, develop a practical [roadmap](#) to good practice, and track progress over time.

KPMG's framework for assessing climate change maturity includes 115 indicators organised across 4 domains and 11 themes.
