

REAL ESTATE Corporate Advisory

kpmg.ch/realestate

Being cost-intensive and becoming increasingly more complex, real estate is of major importance for every company.

KPMG Real Estate Corporate Advisory accompanies you in the knowledge, control, optimization and valorization of your real estate portfolio.

Real Estate Strategy

Corporate Real Estate Portfolio Management accompanies you in the definition and the implementation of a suitable real estate strategy that meets your operational goals and allocates your financial resources efficiently.

After an in-depth analysis of your real estate situation, we work with you to define a real estate strategy tailored to your needs and constraints, before supporting you in its implementation in order to turn your real estate into a fully-fledged strategic tool.

Wealth

Besides its operational role, real estate property enables the company to constitute financial reserves even if the maintenance may turn out to be costly. At certain stages in a company's life, the wealth dimension of real estate can be crucial to its owners.

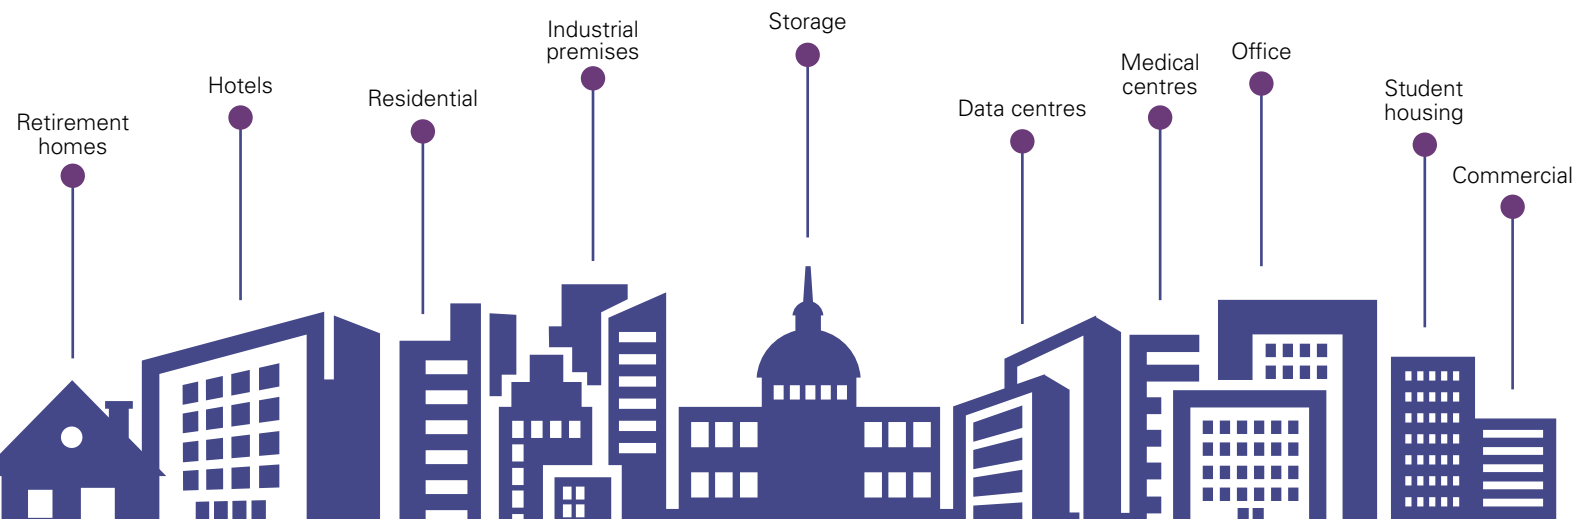

Corporate Property Services accompanies you in the creation of an independent real estate structure and offers you complete legal and fiscal advice.

Organization

Corporate Real Estate Administration assists you in creating an efficient structure, in optimizing your processes and in implementing tools facilitating the management of your real estate portfolio.

After an analysis of the operation of the company, its organization and the processes in place, we define, in partnership with management and identified employees, an organizational chart adapted to the company's specific characteristics and needs and we assist you during its implementation. This organizational structuration is accompanied by an optimization of the internal processes and by the implementation of tools that facilitate the real estate portfolio management.
