Corporate Tax Rates 2

Substantively Enacted¹ Income Tax Rates for Income Earned by a General Corporation² for 2015 and Beyond—As at June 30, 2016

Notes

- (1) For Accounting Standards for Private Enterprise (ASPE) and IFRS purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be "substantively enacted" at the balance sheet date. In general, where there is a majority government, federal and provincial tax changes are considered to be "substantively enacted" for ASPE and IFRS purposes when a tax bill containing the detailed legislation is tabled for first reading in the House of Commons or the provincial legislature. In the case of a minority government, however, the "substantively enacted" test is more stringent and requires the enabling legislation to have passed third reading in the House of Commons or the provincial legislature.

For U.S. GAAP purposes, a corporation's recorded income tax liabilities and assets in their financial statements should be measured using tax rates that are considered to be enacted at the balance sheet date. In general, tax rate changes are considered enacted once the relevant bill has received Royal Assent.

When tax rate changes are considered enacted or "substantively enacted," the effect of the change in tax rate is reflected in the period in which the changes are enacted or "substantively enacted." The effect of the change is recorded in income as a component of deferred tax expense in the period that includes the date of enactment or substantive enactment. For example, if a bill becomes "substantively enacted" for ASPE or IFRS purposes (enacted for U.S. GAAP purposes) on December 31, the tax rate changes should be reflected in the corporation's financial statements for the quarter that includes December 31.

- (2) The federal and provincial tax rates shown in the tables apply to income earned by corporations other than Canadian-controlled private corporations (CCPCs). A general corporation typically includes public companies, and their subsidiaries, that are resident in Canada, and Canadian resident private companies that are controlled by non-residents.

The tax rates included in this table reflect federal and provincial income tax rate changes that were substantively enacted as at June 30, 2016.

Substantively Enacted¹ Income Tax Rates for Income Earned by a General Corporation² for 2015 and Beyond—As at June 30, 2016

- (3) The federal and provincial rates shown in the tables apply to investment income earned by general corporations other than capital gains and dividends received from Canadian corporations. The rates that apply to capital gains are one-half of the rates shown in the table. Dividends received from Canadian corporations are deductible in computing regular Part I tax, but may be subject to Part IV tax, calculated at a rate of 33 $\frac{1}{3}$ % for amounts received before 2016 and 38 $\frac{1}{3}$ % for amounts received after 2015.
- (4) A general tax rate reduction is available on qualifying income. Income that is eligible for other reductions or credits, such as small business income, M&P income and investment income subject to the refundable provisions, is not eligible for this rate reduction. The general rate reduction does not apply to the portion of taxable income of a corporation earned from a “personal services business”.
- (5) Corporations that derive at least 10% of their gross revenue for the year from manufacturing or processing goods in Canada for sale or lease can claim the manufacturing and processing (M&P) deduction against their M&P income. General corporations that earn income from M&P activities are subject to the same rates as those that apply to CCPCs.
- (6) Alberta Bill 2 (introduced June 18, 2015) increased the general corporate income tax rate for active business, investment and manufacturing and processing income to 12% (from 10%), effective July 1, 2015.
- (7) New Brunswick’s 2016 budget increased the general corporate income tax rate to 14% (from 12%) effective April 1, 2016.
- (8) Newfoundland and Labrador’s 2016 budget increased the general corporate income tax rate to 15% (from 14%), retroactive to January 1, 2016. The budget also eliminated the manufacturing and processing profits tax credit, effective January 1, 2016.
