Circulars related to Income Tax

MEF/10/19/11/1042

Dated: 12 June 2011

Circular No (2) year 2011 Regarding tax retention and WHT requirements

Your Excellencies/the Ministers

Messrs/Heads of Government bodies and public authorities and corporations

Messrs/Taxpayers and external auditors

Greetings,

In reference to the provisions of the Income Tax Law issued by way of Law 21 of 2009, and particularly Articles 2, 3, 4, 11, 20 and 21 thereof, kindly follow the following instructions when making payments under contracts wholly or partly carried out in the State:

First: Where payments are made to taxpayers who are residents in the State

1. In the case of companies

A company shall be resident if it is incorporated in the State or has its place of effective management therein. This can be confirmed through the data in the extract of the Commercial Register (which must be valid). The company will, then, have the Qatari nationality and will take one of the forms provided for in the Commercial Company Law issued by way of Law 5 of 2002 (joint company, limited liability company, shareholding company, etc.).

Where the payments are made in execution of a contract concluded with a resident company as described above, the last payment shall be made upon the presentation of a valid tax card by the company. The issuance of a tax assessment or a non-objection letter by the Public Revenues and Taxes Department is not required.

2. In the case of natural persons

Where the payments are made to a natural person resident in the State and holding the Qatari nationality (or the nationality of another State of the Cooperation Council for the Arab States of the Gulf) and carries on an activity in his name (in a sole proprietorship), the last payment shall be made upon the presentation of a valid tax card.

Second: Where the payments are made to non-resident taxpayers

1. In the case of taxpayers registered in the Commercial Register

The extract of the Commercial Register (which must be valid) provides, in this case, that the taxpayer has a foreign nationality and takes the form of a branch.

Where the payments are made to a branch of a foreign taxpayer, the following must be observed:

a. If the branch is permanent in the State

This can be confirmed in the extract of the Commercial Register through the existence of a fixed address in the State and also through the absence of a link between the activity of the branch and a specific period, contract or project.

In this case, the last payment shall be made upon the presentation of a valid tax card by the branch. The issuance of a tax assessment or a non-objection letter by the Public Revenues and Taxes Department is not required.

b. If the branch is not permanent in the State and the period of its activity is at least one year

Where the extract of the Commercial Register provides that the activity of the branch is linked to a specific period, contract or project and the period of activity is at least one year, the last payment of the contract or 3% of its value after deduction of supply and works carried out abroad, whichever is higher, must be retained. It will be released only after the presentation by the taxpayer of a non-objection letter issued by the Department.

The retention shall apply only to the last payment (or 3% of the contract value mentioned above if higher). Other payments (prior to the last payment or to the equivalent of 3% of contract value) shall be made upon the presentation of a valid tax card by the taxpayer. The issuance of a tax assessment or a non-objection letter by the Public Revenues and Taxes Department is not required.

(Cont'd)

2. In the case of taxpayers not registered in the Commercial Register or registered for an activity or a project which lasts less than one year

Where the payments are made to a non-resident taxpayer who is not registered in the Commercial Register or who is registered therein for a contract, an activity or a project the period of which is less than one year, then the payments shall be subject to withholding tax in accordance with the provisions of Article 11/2 of the above mentioned law, and a certificate to this effect shall be delivered to the taxpayer in accordance with Article 20 of the same law.

Taxpayers who have a permanent establishment in the State may submit to the Department a request for refund of the tax withheld unduly.

Third: Where the payments are made to taxpayers registered in the Qatar Financial Center

In this case, the amounts due (including the last payment) shall be paid upon the presentation by the taxpayer of a valid certificate issued by the competent authorities of the Qatar Financial Center stating that the taxpayer is registered in the Center.

Finally, the Ministry reminds all parties that make payments to taxpayers as envisaged above, including Ministries, Government bodies and public authorities and corporations, that they are required to provide the Public Revenues and Taxes Department in the Ministry of the details of the contracts they conclude in accordance with the conditions of Article 38 of the Executive Regulations of the above mentioned law (copy of which is enclosed).

This Circular repeals any contrary provision in previous circulars.

Yours faithfully.

Also kindly provide the details of the contracts concluded with them, in accordance with the conditions provided for in Article 38 of the Executive Regulations of the Income Tax Law mentioned above.

Third: Exemption from tax bearing the tax burden

Kindly refrain from including any conditions relating to exemption from income tax or the bearing of its burden by you instead of the taxpayer in bidding documents, contracts and agreements concluded by the bodies and authorities you represent, unless a written approval from the Ministry of Economy and Finance is obtained, in order to rationalize the granting of tax incentives and to assure the maximum benefit from agreements for the avoidance of double taxation concluded by the State. Any commitment to exempt from tax or to bear its burden made by the Ministries and other Government bodies in bids, agreements and contracts in contradiction to the above shall not be binding to the Ministry of Economy and Finance.

Should you wish to exempt taxpayers from tax before you conclude a contract with them, you may invite them to submit a request to the Tax Exemption Committee in the Ministry, in accordance with Article 51 to 56 of the above-mentioned law.

Accordingly, kindly instruct whom who may be concerned to accurately follow the content of this Circular in order to preserve the public interest and to comply with the provisions of the law.

Circular No (4) year 2020
Regarding the interpretation of Article 2 of the ERs of the ITL

To all the taxpayers and the Auditing offices

Doha – Qatar

After Greetings,

Whereas, the General Tax Authority has received a large number of inquiries about the application of the provisions of Article (2/11) of the Executive Regulations of the Income Tax Law referred to in the above subject, especially with regards to the requirement of direct ownership of Qatari natural persons in the legal persons subject to tax under the law in order to benefit from tax exemption.

We would like to clarify to you that the legislator intended to set the direct ownership requirement stipulated in Article (2) of the executive regulations of the Income Tax Law, for the purpose of proving the ownership of legal persons that are partially owned by Qataris in proportion to their shares in profit in said legal persons, and the reason behind this is to enable the Authority to reach the income subject to tax arising from sources in the country during the tax year in which the financial statements are submitted.

Therefore, companies subject to the Income Tax Law are required to prove ownership and benefit of Qatari persons of said companies, by submitting some information and supporting documents, according to the attached form. And if this is proven, these shares will be exempt from tax.

And Yours sincerely

Q1. What is the scope of the reporting obligation under Article 56 of the Executive Regulations of the Income Tax Law?

In accordance with the provisions of Article 56 of the Executive Regulations (ERs) of the Income Tax Law (ITL) and Articles 2 and 3 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 of July 16, 2020 relating to the transfer pricing (TP) declaration and the master and local files, entities resident in Qatar must submit a declaration relating to their TP when they meet the following conditions:

- the annual tax-free turnover of these entities or the gross assets appearing on their balance sheet is greater than or equal to QAR10,000,000; and
- these entities are associated to other entities established in Qatar or abroad.

Important:

1. For the purposes of applying the aforementioned provisions, an entity is deemed to be associated to another entity, resident in Qatar or abroad, in the following cases:
 - the reporting entity holds, at the end of the financial year (FY), directly or indirectly, more than half of the capital or voting rights of the other entity; or
 - more than half of the reporting entity's capital or of its voting rights is held, at the end of the FY, directly or indirectly, by the other entity.
2. Entities which do not carry out any transactions with related entities resident in Qatar or abroad may submit a "nil" declaration.
3. The reporting obligation described above also applies to foreign entities having a permanent establishment (PE) in Qatar, being specified in this case that the conditions mentioned above will be considered as satisfied if they are fulfilled at the level of the PE in Qatar.

II. Deadline and method of filing the transfer pricing declaration

Q2. What is the deadline for filing the transfer pricing declaration?

The transfer pricing (TP) declaration must be filed with the income tax (IT) return, in accordance with Article 56 of the Executive Regulations (ERs) of the Income Tax Law (ITL) and Article 4 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 of July 16, 2020 on the TP declaration and the master and local files.

Example:

Entities whose fiscal year (FY) coincides with the calendar year must file their IT return no later than April 30 of the following calendar year, in accordance with Paragraph 1 of Article 29 of the ITLs ERs.

The TP reporting obligation must therefore be satisfied when filing the IT return.

The TP declaration must therefore be filed with the IT return.

For this purpose, the reporting entities must use the declaration available online on the Dhareeba site.

III. Content of the transfer pricing declaration

Q3. What does the transfer pricing declaration contain?

The TP declaration referred to in Article 56 of the Executive

Regulations (ERs) of the Income Tax Law (ITL) is a light version of the master file and the local file that some entities must file with the General Tax Authority (GTA), in accordance with Article 57 of the ITLs ERs.

Two categories of information must be declared:

- general information on the group of related entities; and
- specific information on the reporting entity.

(Cont'd)

IV. General information about the group of related entities

Q4. What does the general description of the group's activity contain?

In accordance with Sub-paragraph (a) of Paragraph 1 of Article 5 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, this description is intended to identify the main activities of the group, including the changes that have occurred during the fiscal year (FY), as well as the nature and location of the intangible assets exploited.

The main character of an activity is assessed with regard to the importance of the revenues generated or the importance of the means implemented.

Q5. What are the intangible assets that should be mentioned in the intangible assets table?

In accordance with Sub-paragraph (b) of Paragraph 1 of Article 5 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, the intangible assets to be mentioned in this part of the TP declaration must meet two cumulative conditions:

1. have a principal character for the group: the principal character of an intangible asset is assessed with regard to the importance of its contribution to the group's activity;
2. be connected to the reporting entity: consequently, must be mentioned:
 - the main intangible assets owned by the reporting entity, whether or not they are used;
 - the main intangible assets which the reporting entity does not own, but which it uses in the course of its activity.

The state or territory of the establishment of the entity that owns or co-owns the intangible asset must be mentioned.

Example:

A company headquartered in Germany owns a patent made available to a Qatari related entity in exchange for the payment of a royalty.

The nature of the asset must be mentioned in the table provided for this purpose in the TP declaration.

The state in which the entity owning the patent is located (Germany) should also be indicated.

Assets used by or available to the reporting entity that are held by an unrelated entity do not need to be reported.

Q6. What is the group's transfer pricing policy that the reporting entity should indicate?

In accordance with Sub-paragraph (c) of Paragraph 1 of Article 5 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, the reporting entity must indicate, from the drop-down list provided for this purpose, the TP methodology(ies) used by the group and which are related to the reporting entity, that is to say the method or methods which exert an influence on the determination of the amount of intra-group transactions in which the reporting entity is involved.

Q6. What is the group's transfer pricing policy that the reporting entity should indicate?

In accordance with Sub-paragraph (c) of Paragraph 1 of Article 5 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, the reporting entity must indicate, from the drop-down list provided for this purpose, the TP methodology(ies) used by the group and which are related to the reporting entity, that is to say the method or methods which exert an influence on the determination of the amount of intra-group transactions in which the reporting entity is involved.

(Cont'd)

V. Specific information on the reporting entity

Q7. What does the summary of transactions carried out with other related entities contain?

In accordance with Sub-paragraph (b) of Paragraph 2 of Article 5 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, the amounts to be entered in this part of the transfer pricing (TP) declaration are those derived from the accounting of the reporting entity.

The reporting entity must disclose the aggregate amount of sales and purchases of goods and services, as well as acquisitions and disposals of assets, which it recorded for the reporting fiscal year, by nature and by amount, when the aggregate amount of transactions exceeds QAR200,000.

To determine the threshold of QAR200,000, no compensation between revenues and expenses can be made, as these transactions are of a different nature.

It is not necessary to indicate, for each type of flow, the full detail of all the transactions which make it possible to reach the amount of QAR200,000.

Only one amount must be mentioned for each type of transaction per related entity's jurisdiction on residence.

Example 1:

If 10 services are rendered to a related entity for an amount of QAR22,000 each, only the amount of QAR220,000 will be indicated, and not the details of each transaction at QAR22,000

Example 2:

A company is manufacturing a product in Qatar.

This product is sold to a related entity established in Spain.

The total amount of sales to the Spanish entity is QAR500,000,000.

The reporting entity is not required to detail the revenues derived from that related entity.

The reporting entity only needs to report the total amount of sales, which is QAR500,000,000.

All transactions must be broken down by type, in accordance with the dropdown list provided for that purpose.

The states or territories where related entities are located with which the transactions are carried out must be mentioned in the summary statement for each type of flow reported.

Q8. How should mixed transactions be reported?

In the case of mixed transactions, such as the sale of goods together with the provision of services (for example, maintenance services), the transfer pricing (TP) declaration should reflect the accounting method used by the reporting entity for these transactions.

The reporting entity may therefore be required to report these items in two different categories (goods and services) or in one of the two categories.

Q9. What are the amounts to be reported under the headings "acquisitions of assets" and "disposals of assets"?

The amounts that must be declared correspond to the gross amount of the purchase prices and the selling prices of the assets concerned, and not to the capital gains or losses.

(Cont'd)

Q10. Do the name and address of the related entities have to be reported?

It is not necessary to indicate the name and address of the related entities.

Only the states or territories of the related entities involved in the transactions should be mentioned.

Q11. How are the transfer pricing methods of reported transactions identified?

With regard to the transfer pricing (TP) methods used, the reporting entity should specify the main TP method that is applied to each reported transaction.

The concept of “main TP method applied” is assessed with regard to the amount of transactions carried out by the reporting entity, by type of transaction and by jurisdiction of residence of the related entity with which the transaction was concluded.

Example:

80% of the amount of intra-group goods purchases of the reporting entity in Egypt are made on the basis of the comparable uncontrolled price (CUP) method and 20% on the basis of the resale price method.

Only the first method should be mentioned on the line “Goods – Buyer – Egypt” by the reporting entity.

2. FAQ'S MASTER FILE AND LOCAL FILE

Q1. What is the scope of the reporting obligation under Article 57 of the Executive Regulations of the Income Tax Law?

In accordance with the provisions of Article 57 of the Executive Regulations (ERs) of the Income Tax Law (ITL) and Articles 6 and 7 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 of July 16, 2020 relating to the transfer pricing (TP) declaration and the master file and local file, entities resident in Qatar must submit a master file and a local file when they meet the following conditions:

- the annual tax-free turnover of these entities or the gross assets appearing on their balance sheet is greater than or equal to QAR50,000,000; and
- these entities are associated to other entities established abroad.

Important:

1. For the purposes of applying the aforementioned provisions, an entity is deemed to be associated to another entity, resident abroad, in the following cases:
 - the reporting entity holds, at the end of the financial year (FY), directly or indirectly, more than half of the capital or voting rights of the other entity; or
 - more than half of the reporting entity's capital or of its voting rights is held, at the end of the FY, directly or indirectly, by the other entity.
2. Entities which do not carry out any transactions with related entities resident abroad may submit a "nil" declaration.
3. The reporting obligation described above also applies to foreign entities having a permanent establishment (PE) in Qatar, being specified in this case that the conditions mentioned above will be considered as satisfied if they are fulfilled at the level of the PE in Qatar.

Enterprises other than those described above are not required to produce the master file and local file.

However, those enterprises are obliged to provide information and documents about their material cross-border transactions upon a specific request of the GTA in the course of a tax examination or for transfer pricing risk assessment purposes.

Q2. What is the master file?

Article 57 of the Executive Regulations (ERs) of the Income Tax Law (ITL) and Articles 6, 7, 8, 9, 10 and 11 of the Decision of the President of the General Tax Authority (GTA) No. 4 of the year 2020 on the Transfer Pricing (TP) Declaration, the Master File and the Local File, require multinational enterprises (MNEs) to provide the General Tax Authority (GTA) with high-level information regarding their global business operations and transfer pricing (TP) policies in a "master file".

Q3. What is the local file?

Article 57 of the ITL's ERs and Articles 6, 7, 8, 9, 10 and 11 of the Decision of the GTA's President of No. 4 of the year 2020 require that detailed transactional TP documentation be provided in a "local file", identifying material related party transactions, the amounts involved in those transactions, and the company's analysis of the TP determinations they have made with regard to those transactions.

Q4. Why are those documents useful for the General Tax Authority?

Taken together, these two documents (master file and local file) will require taxpayers to articulate consistent TP positions and will provide the GTA with useful information to assess TP risks, make determinations about where audit resources can most effectively be deployed, and, in the event audits are called for, provide information to commence and target audit enquiries.

(Cont'd)

Q5. What are the objectives of master file and local file requirements?

The objectives of master file and local file requirements are:

1. to ensure that taxpayers give appropriate consideration to transfer pricing (TP) requirements in establishing prices and other conditions for transactions between associated enterprises and in reporting the income derived from such transactions in their tax returns (cf. Article 52 of the Executive Regulations (ERs) of the Income Tax Law (ITL));
2. to provide the General Tax Authority (GTA) with the information necessary to conduct an informed TP risk assessment (cf. Article 58 of the ITLs ERs); and
3. to provide the GTA with useful information to employ in conducting an appropriately thorough audit of the TP practices (cf. Article 58 of the ITLs ERs), although it may be necessary to supplement the documentation with additional information as the audit progresses (cf. Articles 56, 59 and 60 of the ITLs ERs).

Taxpayers are required to carefully evaluate, at or before the time of filing a tax return, their own compliance with the applicable TP rules (cf. Article 53 of the ITLs ERs).

Q6. Are taxpayers required to assess their compliance with the arm's length principle?

By requiring taxpayers to articulate convincing, consistent and cogent transfer pricing (TP) positions, TP documentation will help to ensure that a culture of compliance is created.

Well-prepared documentation will give the General Tax Authority (GTA) some assurance that the taxpayer has analyzed the positions it reports on tax returns, has considered the available comparable data, and has reached consistent TP positions.

Moreover, contemporaneous documentation requirements will help to ensure the integrity of the taxpayers' positions and restrain taxpayers from developing justifications for their positions after the fact.

The Executive Regulations of the Income Tax Law require that TP documentation requirements be satisfied on a contemporaneous basis.

This means that the documentation would be prepared at the time of the transaction, or in any event, no later than the time of completing and filing the tax return for the fiscal year in which the transaction takes place (cf. Article 53 of the ITLs ERs).

Q7. How does transfer pricing documentation ensure high quality transfer pricing risk assessment?

Effective risk identification and assessment constitute an essential early stage in the process of selecting appropriate cases for transfer pricing (TP) audits or enquiries and in focusing such audits on the most important issues (cf. Article 58 of the Executive Regulations (ERs) of the Income Tax Law (ITL)).

Because the General Tax Authority (GTA) operate with limited resources, it is important for it to accurately evaluate, at the very outset of a possible audit, whether a taxpayer's TP arrangements warrant in-depth review and a commitment of significant tax enforcement resources.

Particularly with regard to TP issues (which generally are complex and fact-intensive), effective risk assessment becomes an essential prerequisite for a focused and resource-efficient audit.

Proper assessment of TP risk by the GTA requires access to sufficient, relevant and reliable information at an early stage.

While there are many sources of relevant information, TP documentation (TP declaration, master file and local) is one critical source of such information (Cf. Articles 56 and 57 of the ITLs ERs).

The GTA will use a variety of tools and sources of information for identifying and evaluating TP risks of taxpayers and transactions, including TP declaration (to be filed with the annual tax return), TP questionnaires focusing on particular areas of risk (cf. Article 56 of the ITLs ERs), general TP documentation requirements identifying the supporting evidence necessary to demonstrate the taxpayer's compliance with the arm's length principle (cf. Articles 59 and 60 of the ITLs ERs), and cooperative discussions between the GTA and taxpayers.

(Cont'd)

Each of the tools and sources of information appears to respond to the same fundamental observation: there is a need for the GTA to have ready access to relevant information at an early stage to enable an accurate and informed TP risk assessment.

Q8. What information must be provided in the master file?

The master file should provide an overview of the multinational enterprise group (MNE) business, including the nature of its global business operations, its overall transfer pricing (TP) policies, and its global allocation of income and economic activity in order to assist the General Tax Authority (GTA) in evaluating the presence of significant TP risk.

In general, the master file is intended to provide a high-level overview in order to place the MNE group's TP practices in their global economic, legal, financial and tax context.

It is not intended to require exhaustive listings of minutiae (e.g., a listing of every patent owned by members of the MNE group) as this would be both unnecessarily burdensome and inconsistent with the objectives of the master file.

In producing the master file, including lists of important agreements, intangibles and transactions, taxpayers should use prudent business judgment in determining the appropriate level of detail for the information supplied, keeping in mind the objective of the master file to provide the GTA a high-level overview of the MNE's global operations and policies.

When the requirements of the master file can be fully satisfied by specific cross-references to other existing documents, such cross-references, together with copies of the relevant documents, should be deemed to satisfy the relevant requirement.

For purposes of producing the master file, information is considered important if its omission would affect the reliability of the TP outcomes.

The information required in the master file provides a "blueprint" of the MNE group and contains relevant information that can be grouped in 5 categories:

1. the MNE group's organizational structure;
2. a description of the MNE's business or businesses;
3. the MNE's intangibles;
4. the MNE's intercompany financial activities; and
5. the MNE's financial and tax positions.

Taxpayers should present the information in the master file for the MNE as a whole.

However, organization of the information presented by line of business is permitted where well justified by the facts, e.g., where the structure of the MNE group is such that some significant business lines operate largely independently or are recently acquired.

Where line of business presentation is used, care should be taken to assure that centralized group functions and transactions between business lines are properly described in the master file.

Even where line of business presentation is selected, the entire master file consisting of all business lines be made available to the GTA in order to assure that an appropriate overview of the MNE group's global business is provided.

The Decision of the President of the General Tax Authority No. 4 of the year 2020 on the Transfer Pricing Declaration, the Master File and the Local File sets out the items of information to be included in the master file.

(Cont'd)

Q9. What information must be provided in the local file?

In contrast to the master file, which provides a high-level overview as described in Q8, the local file provides more detailed information relating to specific intercompany transactions.

The information required in the local file supplements the master file and helps to meet the objective of assuring that the taxpayer has complied with the arm's length principle in its material transfer pricing (TP) positions affecting a specific jurisdiction.

The local file focuses on information relevant to the TP analysis related to transactions taking place between a Qatari affiliate and associated enterprises in different countries and which are material in the context of the Qatari's tax system.

Such information would include relevant financial information regarding those specific transactions, a comparability analysis, and the selection and application of the most appropriate TP method.

Where a requirement of the local file can be fully satisfied by a specific cross-reference to information contained in the master file, such a cross-reference should suffice.

The Decision of the President of the General Tax Authority No. 4 of the year 2020 on the Transfer Pricing Declaration, the Master File and the Local file sets out the items of information to be included in the local file..

Q10. What does "contemporaneous documentation" mean?

Each taxpayer should endeavor to determine transfer prices (TP) for tax purposes in accordance with the arm's length principle, based upon information reasonably available at the time of the transaction.

Thus, a taxpayer ordinarily should give consideration to whether its TP is appropriate for tax purposes before the pricing is established and should confirm the arm's length nature of its financial results at the time of filing its income tax return (ITR).

Where a taxpayer reasonably demonstrates that either no comparable data exists or that the cost of locating the comparable data would be disproportionately high relative to the amounts at issue, the taxpayer should not be required to incur costs in searching for such data.

Q11. What is the timing for preparing the transfer pricing documentation and for filing the master file and local file?

The Executive Regulations (ERs) of the Income Tax Law (ITL) require information to be finalized by the time the tax return is filed (Cf. Article 53 of the ITL's ERs).

A 30-day period is given to taxpayers to respond to specific General Tax Authority (GTA)'s requests for documentation and other audit related information requests (cf. Article 56 of the ITL's ERs).

Taxpayers must submit their master files and local files no later than June 30 of the year following the fiscal year in question (cf.

Article 57 of the ITL's ERs and Article 8 of the Decision of the President of the General Tax Authority No. 4 of the Year 2020 on the Transfer Pricing Declaration, Master File and Local File).

Q12. What does "Materiality" mean?

Not all transactions that occur between associated enterprises are sufficiently material to require full documentation in the local file.

The General Tax Authority (GTA) has an interest in seeing the most important information while at the same time it also has an interest in seeing that multinational enterprises (MNEs) are not so overwhelmed with compliance demands that they fail to consider and document the most important items.

(Cont'd)

The section "Controlled transactions" in the local file form includes a description of significant transactions with associated enterprises, amounts of intra-group payments and receipts, identification of associated enterprises involved in controlled transactions, significant inter-enterprise agreements, a comparability analysis and a functional analysis, an indication of the transfer pricing (TP) method used.

The transactions concerned are those between the enterprise that establishes the documentation and one or more associated enterprises and the amount of which, aggregated by category, exceeds QAR200,000 for the year.

Transactions carried out between a head office and its branch must, subject to meeting the aforementioned threshold of QAR200,000, also be described.

Important (1):

In all cases, the amounts are those taken from the enterprise's accounts without compensation between income and expenses, or between acquisitions and disposals of assets.

The categories of transactions to be considered are:

Revenues: sales of goods, provision of services, commissions, royalties, performance guarantees, financial guarantees, financial products, other products.

Charges: purchases of goods or services, commissions, fees, performance guarantees, financial guarantees, financial charges, other charges.

Important (2):

In the case of mixed transactions, such as the sale of goods accompanied by the provision of maintenance services, the local file must reflect the accounting method adopted by the enterprise for these transactions.

The enterprise may therefore be required to indicate these elements in two different categories (sales and provision of services) or in only one.

Acquisitions and disposals of assets relate to tangible and intangible assets.

Important (3):

The amounts indicated must correspond to the gross amount of the purchase prices and the selling prices of the assets concerned, and not to the capital gains or losses.

The gross amount must be declared when it is greater than QAR200,000.

See Subparagraph (b) of Paragraph 2 of Article 9 of the Decision of the President of the General Tax Authority No. 4 of the Year 2020 on the Transfer Pricing Declaration, Master File and Local for the materiality standard applicable in completing the master file.

Tax Circulars

PART IV

Circulars related to MAP and Other Directives

Directive No (1) year 2020

Regarding the resolution and publication of matters related to the interpretation or application of double tax agreements

To Taxpayers and Chartered accountants

After greetings,

With reference to the double tax agreements concluded by the State of Qatar with other countries.

With regards to matters of a general nature relating to the interpretation or application of these agreements.

Considering that the provisions of these agreements, i.e. similar to the first sentence of Paragraph 3 of Article 25 of the OECD Model Tax Treaty on Income and Capital, the General Tax Authority is allowed to be the competent authority in the State of Qatar, authorized to deal with its counterparts (i.e. other countries as per the applicable treaty) regarding these issues and reach a mutual agreement on them.

Also, considering that the application/use of the provisions of double tax agreements may improve if the General Tax authority will follow up with its counterparts (i.e. other country as per the applicable treaty) and determine the opportunities to use the authority granted to it by provisions similar to those under paragraph 3 of Article 25 of the OECD Model Tax Treaty on Income and Capital.

The General Tax Authority will publish any mutual agreements reached under the provisions similar to paragraph 3 of Article 25, whether they apply to all taxpayers or to general categories of taxpayers, which would improve their guidance and instruction, and solve future disputes proactively.

These mutual agreements will be published on the official website of the General Tax Authority.

However, some mutual agreements will make the exception and will not be published such as mutual agreements related to tax compliance that include procedures related to criminal cases.

Directive No (2) year 2020

Regarding the correct interpretation of the time limits for requesting a mutual agreement procedure and informing them of the rights under tax treaties

To Taxpayers and Chartered accountants

After greetings,

With reference to the mutual agreement procedure stipulated in the tax agreements of the State of Qatar;

Kindly note that the General Tax authority will take into consideration the spirit and objectives of Double Tax Agreements, in order to achieve a balance between the time limits for making a mutual agreement and the need to provide assistance in making a mutual agreement for taxpayers who are entitled to the benefits of a tax agreement.

The General Tax Authority will seek to interpret the time limits with the tax agreements in an easy manner for taxpayers and enable them to benefit from any doubt related to these time restrictions, in a way that will not prevent them and may obtain assistance through the mutual agreement procedure without justification.

While the responsibility for submitting an application in a timely manner in order to preserve the use of the mutual agreement procedure rests with the taxpayers who must take all reasonable steps to ensure that the time limit granted to them does not expire, the General Tax Authority will inform the taxpayer of their rights under applicable tax agreements thereto, including any time restrictions in those agreements for the initiation of a mutual agreement.

The provision of the local law, including the time restrictions, will not be an impediment to the taxpayer to enter into a mutual agreement.

Violation of the requirements related to the substantial activities described in this Resolution.

Manipulating the amounts of expenditures and incomes, to inflate incomes or reduce losses related to the activity benefiting from the preferential tax system.

Directive No (3) year 2020

Regarding the method / approach that the General Tax Authority will take to resolve the issues related to the Mutual Agreement Procedure

To Taxpayers and Chartered accountants

After greetings,

With reference to the tax agreements concluded by the State of Qatar with other countries.

With regards to the approach that the General Tax Authority will take to resolve the issues related to the mutual agreement procedure.

Kindly note that the General Tax Authority, being the competent authority in the State of Qatar, and responsible to solve the issues related to the mutual agreement procedure, will enter into discussions with other competent authorities in a fair, equitable and objective manner, to decide on each issue on the basis of its own merits/specificities, and without reference to any results of other issues/cases related to the mutual agreement procedure.

The approach that the General Tax authority will take will be based on the OECD Model Tax Treaty and its related guidelines / comments for Transfer Pricing, to the extent that such comments and these principles apply.

The General Tax Authority will seek, as part of the approach that will follow in resolving the issues related to the mutual agreement procedure to take consistent positions and not change its position on any matter from one issue to another, and it will not take into account the fact that may achieve greater income from that case.

in case they cannot reach a mutual agreement, the General Tax Authority along with the other competent Authority will look for other suitable opportunities in order to eliminate the double taxation.

Directive No (4) year 2020

Regarding the completion and accuracy of the information required to be submitted by the taxpayer to the General Tax authority to request the mutual agreement procedure and the appropriate timing for that

To Taxpayers and Chartered accountants

After greetings,

With reference to the tax agreements concluded by the State of Qatar with other countries.

With regards to the information to be submitted to the General Tax Authority by the taxpayer to request for the mutual agreement procedure;

Kindly note that the completion and the accuracy of that information have a direct impact on the time required for both the General Tax Authority as being the competent authority in the State of Qatar authorized to make the mutual agreement, and the other competent authority to implement the process of mutual agreement procedure.

In order to deal quickly with issues related to the mutual agreement procedure, the General Tax Authority needs enough details to understand the issue, analyze it, prepare a position on it and discuss it with both the taxpayer and the other competent authority.

Also, the fact that both competent authorities will get the same information, in the same time, will facilitate their common understanding of the facts and will undoubtedly encourage them to make early decisions.

Therefore, the General Tax Authority will ensure to inform the other competent authority about the information received and subsequent requests, to reduce the risk of misunderstanding between the two competent authorities. That is because, if two competent authorities receive inconsistent information, it is likely that, as a result, the mutual agreement procedure will be delayed, unless the parties are able to agree on the information or on the facts presented.

Directive No (5) year 2020

Regarding the results of the mutual agreements procedure, specifically the reasons for rejection of the Mutual Agreement Procedure

To Taxpayers and Chartered accountants

After greetings,

With reference to the mutual agreement procedure stipulated in the tax agreements concluded by the State of Qatar;

With regards to the mutual agreements' procedure, specifically regarding the reasons for rejection of the Mutual Agreement procedure;

Please be informed that the first step in making the mutual agreement is that the competent authority which receive the request for the mutual agreement procedure should decide if it is acceptable or not, as per the provision of article 25 from the OECD Model Treaty on Income and Capital which requires the following, as mentioned in paragraph 16 of the "Comments" on article 25:

- To submit a request of mutual agreement procedure to the competent authority (first sentence from paragraph 1 of article 25);
- To submit a request of mutual agreement procedure on time (second sentence from paragraph 1 article 25);

The last sentence, from paragraph 34 of Commentary on article 25 of OECD Model Treaty, states that any request by the taxpayer for the Mutual Agreement procedure cannot be rejected without a valid reason.

In this regard, there are four reasons pursuant to which a mutual agreement request may be rejected:

- To not submit the request for mutual agreement procedure to the competent authority; or
- To not submit a request of mutual agreement process on time (it means to not submit the request after the deadline stated in the article related to mutual agreement on the applicable tax agreement); or
- To not submit the request for mutual agreement procedure from the right taxpayer; or
- To submit a request for the mutual agreement procedure with regards to the financial years in which the tax treaty has not been applicable.

Directive No (6) year 2020
Regarding the implementation and programs related to the Bilateral Advanced Pricing Agreements

To Taxpayers and Chartered accountants

After greetings,

With reference to the mutual agreement procedure as stipulated in the tax agreements concluded by the State of Qatar;

Please be informed that the General Tax Authority will seek to establish and promote programs related to Bilateral Advanced Pricing Agreements, because such arrangements will reduce the number of international tax disputes and provide taxpayers and tax administration in the State of Qatar with more tax certainty.

Bilateral Advanced Pricing Agreements provide taxpayers with an effective alternative to the mutual agreement procedure.

Before making transactions between the related parties, Bilateral Advanced Pricing Agreements set an appropriate set of criteria (such as the pricing method, comparatives, appropriate adjustments to them, and significant assumptions related to future events) to determine the transfer pricing of these transactions over a specified period of time.
