The latest news ticker gives real-time highlights and directly links to news articles regarding information security incidents, developments and threats from around the world.

Trends and threats as two separate views, where one focuses on new developments, and the other focuses on events hitting the industry.

Top 2 buzzing, growing and fading trends show the most prominent and emerging trends, and those that are declining in media attention.

Visually strong representation of cyber trends, giving you the opportunity to see the most buzzing trends for all industries and allowing you to view the latest news on the most relevant trends, incidents and threats in your industry.

A comprehensive trend timeline to see the historic development of the threats, incidents and trends, allowing you to see the news that has been trending over time.

Trends activity, allowing you to see what caused peaks in trends or threats.

Three different time horizons to distinguish day, week, and month views, allowing you to customize your news overview.

Expert point of views to the news where one of KPMG's cyber professionals gives his interpretation of the trends and developments.

Real-time actionable threats, incidents and trends information for your organization

Integration of this dashboard in your organization, with industry focus and worldwide newsfeeds, provides you with relevant intelligence in real time.

You want to see what is happening

One look at the Cyber Trends Index and you'll be up to date on the latest information security developments, incidents and emerging threats. Make it a daily routine to stay ahead of the press. Get it on screen in your SOC or cyber war rooms.

You want to take action

The Cyber Trends Index helps you know what's going on in your industry sector. If you want to obtain even more actionable information, the intuitive sunburst graph is what you need – it allows you to view the most recent news on a specific threat or trend in your selected industry.

We provide context

To put reasoning to the numbers, KPMG is there to assist you. We help you by facilitating knowledge around cyber security and can provide sources of useful information. We add value by providing expert point of views, contributing to the interpretation of events.

Threats, trends and beyond

Stay ahead of the press with the KPMG Cyber Trends Index. Feel free to contact us if you would like to know more about the cyber security services we can provide for you.

Cyber news on the go

The Cyber Trends Index is also available for Android or iPhone. With the '**KPMG Cyber News and Trends**' app, you can access the latest cyber security news through your smartphone.

It provides a comprehensive trend timeline which allows you to see historic development of trends, threats and incidents over time. You can find it in the App Store and the Play Store.

Why KPMG

The Cyber Trends Index is one component of KPMG's Global Cyber Security Services. Our vision is to make cyber security an integral part of your business through:

Experience

We understand the business and know about cyber security. We have identified key information and overviews that strategic stakeholders are looking for;

Integrated approach

We bring together specialists with a wide range of skills to tailor a solution relevant to your risk appetite and the cyber threats your organization faces;

Broad vision

We do not just display data on an index but also analyze the related processes and identify potential areas of improvement.

Actionable intelligence

We provide actionable advice for helping reduce risk, timely detection of events and improving digital resilience.
