

The program gives the option to save print-screens with data from the Register of Inactive Taxpayers and the VAT Split Register.

In this application these codes will no longer be introduced manually. They can be imported not only from an Excel file, but also from any ERP program.

The application can be installed on several laptops at no extra cost

The costs are established based on the total individual VAT registration numbers to be verified during one month, and NOT on the number of interrogations made. More precisely, if the same code is verified several times during one given month it still counts as one.

KPMG Romanian VAT Tool

The app that checks the VAT number of all your partners in one click

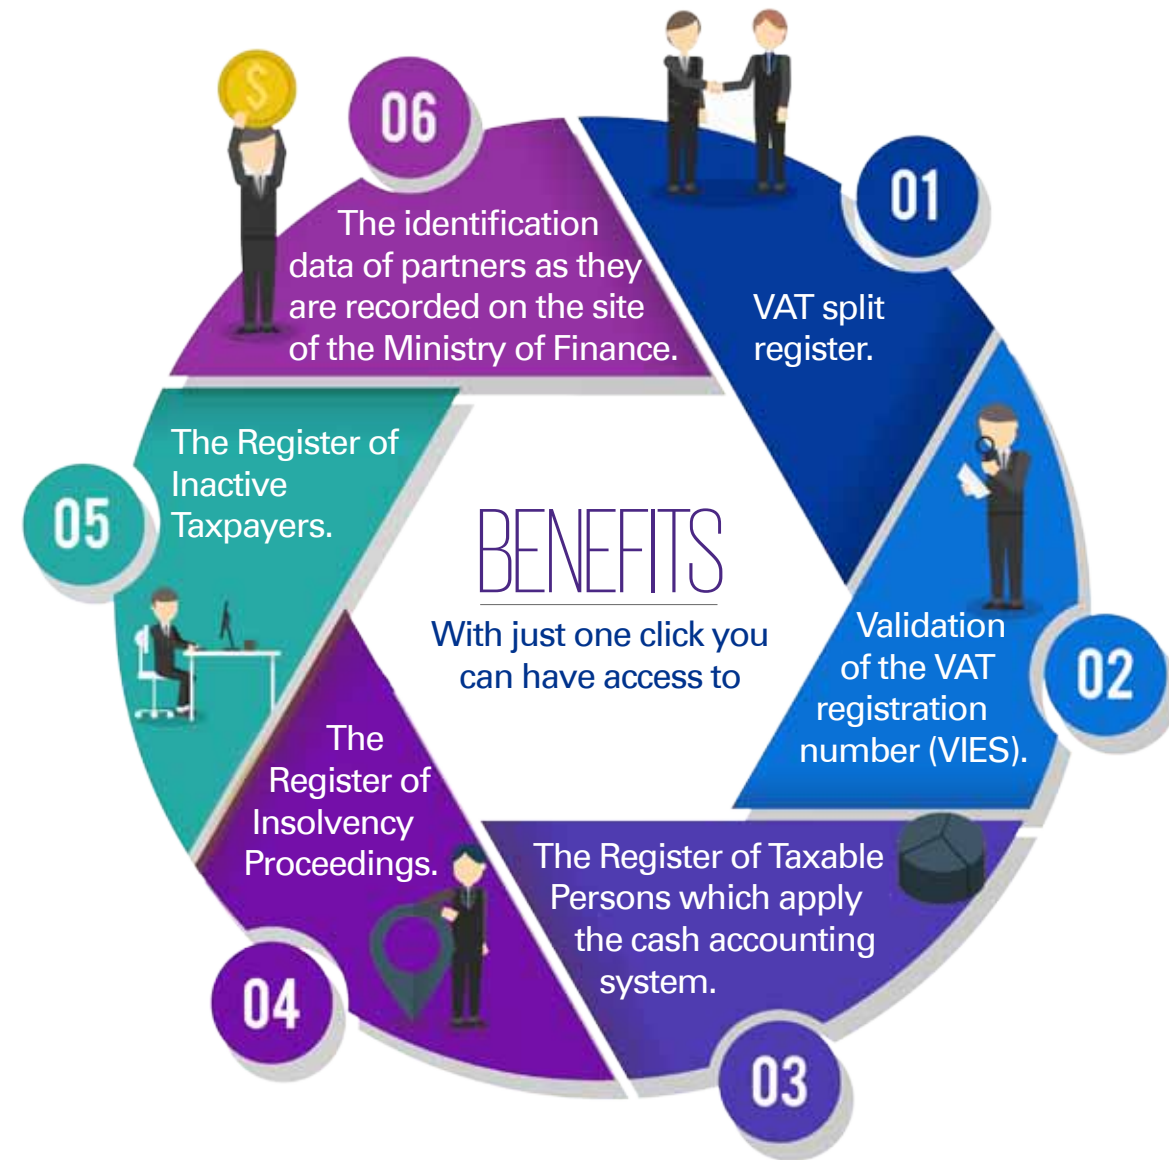

www.kpmg.ro

It is very likely that at some stage, your economic activity has been hampered because of the technical restrictions of the Romanian tax authorities' IT system.

To support your employees in the financial department who want to speed up the process of verifying the VAT registration numbers of all business partners on the tax authorities' websites, or those who want to prevent situations in which tax inspectors reject the deductibility of significant amounts of expenses and, more specifically, VAT related to these, due to administrative errors,

KPMG offers an application which is very useful and easy to use.

KPMG Romanian VAT Tool

1 Generates the history of the VAT registration number or tax identification number you are interested in.

2 All with a single click, in a few seconds.

3 For a low cost and easy installation process.
