TRADE AND TRADE FINANCE: PRINCIPLES AND PRACTICE

The global economy has required every company to be engaged in some form of international trade, either as a buyer or supplier or both. Many companies enter into trading relationships without fully understanding risks and best practices, and the trade finance products available to mitigate risks and finance the trade transactions.

This foundation level trade and trade finance course covers the basic principles of international trade and trade finance banking products, and the practical application of these products to provide value to the company.

LEARNING OBJECTIVES

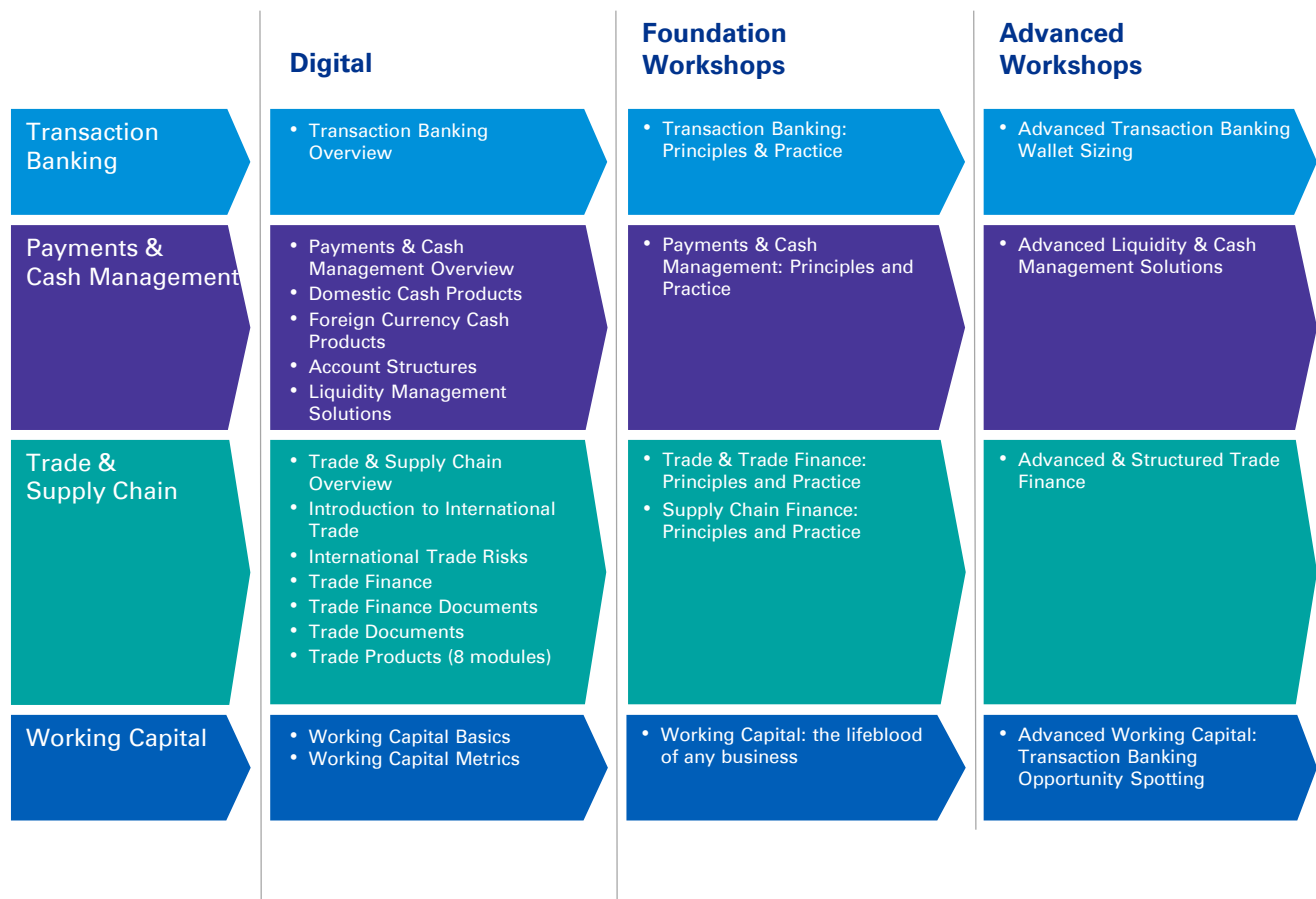

- Understand the principles and risks of international trade
- Understand the characteristics and benefits of trade finance products from banks
- To be able to select the most appropriate trade finance product based on the needs of the company.

COURSE OUTLINE

Topic	Content overview
International Trade	<ul style="list-style-type: none"> • Evolution and current trends in international trade • Risks in international trade
