

# Protect what matters

Secure your most valuable assets  
with **Managed Data Loss Prevention**

# An ever-evolving threat landscape

Cyber threats are on the rise and can originate anywhere, from beyond an organisation's walls to within it. One of the biggest security risks in the cyber landscape is the potential leak or theft of confidential or sensitive information.

## Three key challenges that organisations face in data loss prevention:

▶ Staying up to date with the latest cyber threats, information technology security and cyber security measures

▶ Maintaining a DLP operations team that have clearly communicated and aligned roles, responsibilities and strategies

▶ New data-related regulations and increased complexity make risk mitigation and monitoring a continuous challenge

# Protect your data, wherever it is

In a perilous digital age where cyber threats are on the rise, data loss prevention (DLP) is critical.

At KPMG in Singapore, we work with you to defend and secure sensitive information under your organisation's control. Our DLP services focus on three key areas across regulatory compliance, monitoring and risk management:

## ▶ Assess and analyse

We assess your data-handling protocols and procedures, improving practices tailored to your business needs.

## ▶ Triage and respond

We identify and proactively escalate to remediate data breaches.

## ▶ Enhance

We continuously monitor and provide feedback for refinement of your DLP policies.

# Secure your data with confidence

Our Cyber specialists offer managed security services, tailored to your organisation's goals. We provide two operating models for enterprises – designed to protect your most valuable assets and increase your security posture -- so you can focus on your core business.

## ▶ Model #1 – A dedicated team

Our team has wide-ranging experience and knowledge of cyber security and broader risks. Combined with leading technology, we help clients to manage their core platforms and respond to their business needs as quickly as possible.

## ▶ Model #2 – A unified approach

We provide a shared resource model that integrates information and solutions so you know your data, protect your data and prevent data loss across your enterprise

Clients have the flexibility to choose one of two pricing models:

### 1 Fixed-price engagement

### 2 Time and material engagement

Clients can engage our DLP managed services team to manage one of their channels (e.g., email, endpoint, network). The exact scope and size of the engagement can be worked out based on the regions, business units and users involved.

# Inspiring stakeholder trust with KPMG managed services

- ▶ Business transformation can pave the way for sustained advantage. But transformation is more than a destination — it is a continuous journey. How can you evolve your business while keeping up with everchanging goals?
- ▶ KPMG Managed Services can help you realise your dreams. We combine advanced tech with functional sector expertise to handle knowledge-intensive processes across your enterprise — both on a subscription and a as-a-service basis. In addition to maximising your costs, we can help deliver other outcomes like resilience, customer retention, stakeholder trust and an added competitive edge. Let us help you operationalise your growth ambitions as you can accelerate your transformation journey amid disruptions and risks.

## Connect with us

- ▶ Shape a future-ready cyber security strategy to scale new frontiers of tomorrow. Connect with us today to transform your organisation.
