

Defend and develop your digital assets with Identity and Access Management

Go further with our dynamic IAM solutions

Identity and Access Management (IAM) is one of the key controls for securing organisational assets. IAM is also a key layer to secure workforce identities, subcontractor/partner identities, customer identities, non-human identities and organisation resources. With the increasing threat landscape, there is an urgent need to engage professionals with specialised IAM knowledge. KPMG managed services offering brings together team with knowledge of IAM domain, technology and operations to not only navigate these cyber threats also provide seamless user experience.

Value Proposition & Client Benefits

Build cyber resilience from the inside out

KPMG's Identity and Access Management (IAM) managed services adopt an organisation-focused, comprehensive approach that safeguards and streamlines identity management by building resilience and mitigating risk by strengthening your IAM controls.

Our industry-leading managed services professionals can help guide your organisation to review and redesign your IAM Target Operating Model, streamline your IAM platform, optimise your business operations and work towards continuous improvements and innovations.

Protect your business as it transforms with KPMG'S IAM Managed Services
