

# LEARNING PROGRAMME

The KPMG in Singapore and ACCA (the Association of Chartered Certified Accountants) pioneering learning programme is designed to address the future skills needed for the accountancy profession. Fulfilling a dual purpose, this programme provides access to non-accountancy graduates to enter the profession, and ensures that the profession has the right skillsets to navigate and address business challenges.

This initiative is a direct response to the recommendations of the Accountancy Workforce Review Committee (AWRC) report released in May 2024, which identified ESG (environmental, social, and governance) skillsets as one of the capabilities that accountants will need to have.

## Track One: Excellence in Sustainability

### Who Is It For?

New graduates and working adults from all backgrounds and mid-career professionals who want to:

- Gain a foundational understanding of sustainability in areas like climate risk, reporting, and measurements
- Lead on sustainability issues in their organisations

**Potential Roles:** Climate Reporting Accountant, Impact Reporting Accountant, Sustainability Finance Consultant, Environmental Risk Strategy Officer, ESG Data Analyst

### Course Programme

### What Is It?

#### In-person Masterclasses

**Expert-Led Insights**  
In-depth discussions and real-world applications

**Case Study Analysis**  
Explore real-world challenges and solutions

**Industry Immersion**  
Industry attachment opportunities with KPMG to apply ESG into business transformation and corporate practice

### Learning Outcomes

A joint certificate between KPMG and ACCA, recognising the participants' credibility in integrating sustainable and ethical strategies into their roles.

Participants have the option to pursue the **ACCA Certificate in Sustainability for Finance\*** separately.

*\*A series of 5 self-paced online interactive courses covering topics such as climate risk and reporting and sustainability analytics for finance professionals.*
