Internship Opportunities

Audit, Intern

Jumpstart your future with an internship at KPMG Singapore, where you will have the flexibility and power to create your own career journeys through our various internship programmes stretching from 10 weeks to 40 weeks long.

At KPMG, we will provide you with the opportunity to gain exposure to top companies within one of the key industry clusters we serve. You will be part of a dynamic and purpose driven firm where we inspire confidence and empower change. We are committed to helping you achieve your greatest potential by giving you the necessary support, training and practical experience. We are also focused on innovation, and we leverage on cutting-edge audit tools and technologies to automate audit processes and enhance the accuracy and productivity, so that you can concentrate on delivering high-value service to our clients. As a KPMG Intern, you will work collaboratively with a team of experienced audit professionals to solve real client problems. Interns will also be exposed to ample opportunities to network and make meaningful memories. The Audit Function is structured along 4 lines of businesses, each addressing the unique demands of a key industry cluster in the marketplace:

Diversified Industrials & Infrastructure

Government | Transport & Logistics | Building & Construction | Shipping | Diversified Industries | Communications

Technology, Life Sciences & Aviation

Airlines | Telecommunication | Technology | E-commerce | Software & Business Services | Chemicals & Pharmaceuticals | Energy & Natural Resources | Engineering | Life Sciences

Financial Services

Retail Banking | Investment Banking | Insurance | Investment Management and Funds | Real Estate Investment Trust

Real Estate, Consumer & Tourism

Retail | Food & Beverage | Consumer Products | Industrial & Automotive | Tourism & Hospitality | Education | Real Estate | Media & Entertainment | Healthcare

US Audit

US-based firms in technology, e-commerce, digital payments, electronics, and energy sectors etc

The ideal candidate should possess the following attributes:

- Pursuing a bachelor's degree in accounting or finance related field
- A team player who can build accountability for delivering high quality and accurate work
- Business curiosity that encompasses the use of data
- Forward thinking and ready to embrace change and technological advancements in how you think, problem solve and approach tasks
- A keen learner who continuously strives for improvement
- Communicates and articulates confidently and concisely, both verbally and written

Internship Opportunities

Technology Assurance, Intern

At KPMG in Singapore, we understand that trust is paramount in today's rapidly evolving digital landscape. Trust in the reliability and integrity of data, and confidence that technology functions as intended is critical for organisations across all industry sectors. Our Technology Assurance team provides this assurance to stakeholders, which will range from your colleagues in financial audit teams to the C level executives in government agencies, banks, and private companies as they embark on their digital journey.

We have:

- Collaborative opportunities with Financial Audit colleagues to evaluate IT systems in the context of their impact on business processes and enhance audit quality.
- Engagements to provide assurance to third parties who require an independent party to review, assess and evaluate IT controls and/or compliance with IT-related regulations.
- Opportunities for you to identify and communicate technology-related findings and recommendations to stakeholders; assess the impact of these risks on the audit/assurance engagement and advise stakeholders accordingly.
- Exposure to diverse global and local businesses and technology used by these organisations, supported by innovative data and analytics technology and automated solutions like KPMG Clara.
- A dynamic culture where technical expertise is not mandatory; we value curiosity, agility, and a willingness to learn.
- Global and regional mobility opportunities to broaden your exposure.
- Internal and external training opportunities to equip you with the skills to succeed as a KPMG professional.

The ideal candidate should possess:

- Studying a Bachelor's degree or higher in Management Information Systems, Accounting, Finance, or related fields is preferred.
- Strong analytical skills, technical aptitude, and critical thinking skills; demonstrated quality service mindset, proficiency in MS Office, and a desire to provide exceptional client experiences.
- Excellent communication, time management and leadership skills; flexible and adaptable team player; resourceful in delivering high quality work; ability to demonstrate project management skills is a plus.
- Exposure to ERP systems such as SAP, Oracle or Workday is preferred but not required.

The role involves:

- Documenting understanding of client processes and IT systems, identifying risk points and controls.
- Executing and documenting testing of IT controls, identifying deficiencies, and supporting Data and Analytics (D&A) in audits including data extraction and analysis; utilise a range of technologies and data analysis tools to execute substantive IT Audit procedures, including SQL, Python, IDEA, Excel, Alteryx, QlikView and Power BI and assist in the preparation of the related documentation.
- Supporting system implementation and digital transformation reviews.
- Assisting with project management activities, communicating findings, and building client relationships.
- Learning new technologies and collaborating with cross-functional teams globally.
- Contributing innovative ideas to drive business transformation.

Internship Opportunities

Consulting - Cyber, Intern

Evolving global cyber threats. Smarter cyber attackers. High profile data breaches. It's no wonder that cyber security is top of mind for all modern-day businesses, regardless of industries and sectors.

As an intern in our KPMG Cyber team, you will have the unique opportunity to work across multiple business units within our Cyber Security practice. This role is designed to be fungible, allowing you to collaborate with experienced cyber security and forensic professionals, corporate partners, and clients under the 5 pillars of our Cyber Security business. This is an excellent opportunity to develop your skills in a fast-growing, cutting-edge field while contributing to impactful projects that shape the future of digital security.

During the internship, you will gain hands-on experience in various service lines, expanding your expertise and building a strong foundation across multiple disciplines. This structure offers a holistic view of the cybersecurity landscape and prepares you for a dynamic career in the field.

Cyber Strategy and Governance

KPMG Cyber Strategy and Governance professionals provide advice to CEOs, CISOs and CIOs on how to better manage their cyber security by designing their Cyber Organisational Structure, and defining the Cyber Security Strategy to combine people, processes and technology tools.

Cyber Defence

KPMG Cyber Defence covers vulnerability assessment, application and network penetration testing, wireless security, mobile security, and system security testing so to identify blind spots in the defences and provide an in-depth assessment of previously overlooked weaknesses.

Cyber Transformation

KPMG Cyber Transformation Service professionals work with our clients to automate their Cyber business processes by deploying Technology solutions. We tailor tech solutions to client's specific needs to achieve business outcome efficiently and solve their business problems using technology.

Cyber Response

KPMG Cyber Response professionals work at the forefront of major cyber-attacks, supporting our clients as the "First Responders" to any major cyber emergency. Cyber Response helps clients who have experienced a cyber security incident such as ransomware, business e-mail compromise or other kinds of network intrusion.

Cyber Operational Technology (OT)

KPMG Cyber OT security professionals service the Critical Information Infrastructure (CII) sectors, covering technology transformation, security assessments/testing and cyber incident response.

Embark on an internship journey that not only immerses you in a dynamic and evolving field but also empowers you to explore and contribute meaningfully across the spectrum of our Cyber Security practice.

Internship Opportunities

Consulting – Governance and Risk, Intern

KPMG in Singapore's Governance and Risk (G&R) Business is a market leading practice that consults on solutions in managing and enhancing Governance, Risk and Compliance transformational activities. Working with top tier clients in both the private and public sector, we are trusted advisors in the field.

The incumbent will work closely with Consultants from our G&R business and gain deep seated exposure within engagement across project teams, working on specializations like Corporate Governance, Enterprise Risk Management, Internal Audit as well as niche and exciting fields like Sustainability Consulting. This opportunity opens a wealth of learning and networking opportunities as you build relationships with both internal stakeholders and clients alongside practical, first-hand experience into a career within Consulting, right from the get-go.

The role involves:

- Support our consultants in projects pertaining (but not limited to) developing frameworks to address new regulatory requirements, facilitating risk workshops and governance conversations with C-suite clients, highlighting improvement insights on business processes, advising on climate and sustainability related topics across the varied sectors such as Financial Services, Transport, Healthcare, Education, Real Estate, Government, etc.
- Build understanding of solutions and producing analysis, reports or presentations that outline findings and recommendations
- Deliver assignments to a high level of professionalism and client satisfaction
- Work with our consultants in assessing and developing sound and effective compliance, assurance and control framework
- Work on a range of engagements across the teams, including advisory, assurance and strategy development
- Facilitate and support meetings and workshops, including preparing workshop material, taking notes and meeting minutes
- Conduct core analyses as well as market research on Reporting

The ideal candidate should possess the following:

- Strong interest in Corporate Governance, Risk Management and Control
- Detail orientated with a penchant for curiosity
- Able to write clearly and articulate well
- Business & Accountancy students are encouraged to apply but otherwise open to graduating students from any discipline
- Relevant Data analytics skills will be advantageous (not a must-have)

Internship Opportunities

Consulting – Forensic Anti-Money Laundering, Intern

KPMG's Forensic practice consists of experienced professionals with a wealth of experience in investigations, forensic technology and disputes. KPMG has provided investigations services for some of the world's biggest companies and some of the most important matters of public interest in Singapore..

As an intern with the Forensic AML/CFT team, you will:

- **Tackle financial crimes with hands-on experience:** Collaborate and work closely with the AML/CFT team in supporting Financial Institutions and companies in their fight against financial crimes. You will be exposed to trainings with use of consistent methodologies to deliver value on engagements.
- **Be at the forefront of stakeholders management:** Liaise with internal stakeholders to ensure timely completion of tasks and handling of enquiries from both internal and external stakeholders. You will gain an understanding of stakeholder management and key elements of project delivery.
- **Stay ahead with research:** Assist in researching the latest technologies and emerging trends in Money laundering and Terrorism Financing. You will play a key role in ensuring we are updated in our go-to-market materials and presentations.
- **Obtain exposure to other opportunities within Forensic:** Assist in investigative work through reviews of documents and devices as part of our investigation and dispute advisory procedures

Internship Opportunities

Consulting – Technology Risk, Intern

As a Technology Risk intern, you will be an essential part of our Technology Risk team. You will collaborate with a dynamic team of experienced consultants and engage directly with our clients from different sectors, addressing their technology risk challenges and implementing robust risk management strategies. This role offers extensive learning opportunities, exposure to diverse projects across different geographical locations, and emerging technologies, and the chance to contribute to shaping the risk landscape for our clients and helping organizations navigate the digital landscape with confidence.

What you will do:

As a Technology Risk intern, your role will encompass a diverse range of responsibilities aimed at mitigating technology-related risks. Here's an overview of what you'll be doing in this exciting and dynamic position:

- You will be involved in end-to-end technology risk engagements, working alongside experienced team members to overlay point-of-views and industry insights via research and analysis, and formulate solutions and recommendations to address client's needs, challenges, and risks.
- Support the assessment of technology risks and evaluate the design and operation of controls related to complex IT environments and systems against KPMG's frameworks, regulatory and third-party frameworks; and assist in the development of risk-based IT internal audit programmes.
- Use advanced tools and technology to analyse and review data
- Attend meetings with clients to define problem statements, analyse key priorities/issues, and work with team members to conduct workshops, develop responses to client enquiries, produce documentation and reports.
- Assist the management team with business development activities including formulating KPMG's offerings and propositions, proposals, presentations and publications.
- Collaborate across global and advisory teams in technology consulting, cyber security, internal audit, and deals advisory to deliver holistic solutions and POVs to clients.

You should have:

- Tertiary qualifications in Computer Science, Information Technology, Information Systems, Business, Engineering, Mathematics, Accounting / Finance or related disciplines.
- Specific interest or past internship experience in IT audit/assurance, IT governance, IT internal controls, technology risk management, technology advisory, information security, data analytics and governance.
- A passion for technology, understanding of key technology trends, eagerness to learn emerging technologies and new skills quickly.
- Self-motivated individual with inquisitive, innovative and resourceful mindset, able to work under pressure with changing priorities.
- Strong analytical and problem-solving skills, demonstrated interpersonal, organisational, presentation and report writing skills with attention to details.

Internship Opportunities

Consulting – Insurance, Intern

We are seeking a motivated and detail-oriented university intern to join our dynamic insurance consulting team. This is an excellent opportunity for students interested in gaining real-world experience in the insurance and financial consulting industry. The intern will support ongoing client projects, contribute to internal research initiatives, and assist with the preparation of consulting deliverables.

As an intern, you will get the opportunity, but not limited to:

- **Research and Analysis:**
 - Assist in researching market trends, regulatory updates, and best practices in the insurance industry.
 - Support data analysis tasks to identify insights and trends for client reports.
- **Project Support:**
 - Collaborate with consultants to prepare presentations, reports, and proposals for clients.
 - Help gather and organize client data to support modeling and decision-making processes.
- **Administrative Assistance:**
 - Maintain project documentation and ensure timely updates to key stakeholders.
 - Coordinate meeting schedules, prepare agendas, and take minutes for internal and client meetings.
- **Knowledge Management:**
 - Assist in building and maintaining a repository of resources, templates, and research materials.
 - Document case studies and success stories from client engagements.
- **Collaboration:**
 - Work closely with team members across various functions, including actuarial, regulatory, and technology teams.
 - Participate in brainstorming sessions to contribute innovative ideas for solving client challenges.

The ideal candidate should possess the following attributes:

- Currently enrolled in a bachelor's or master's degree program in Business, Finance, Economics, Actuarial Science, Data Science, or a related field.
- Excellent communication and interpersonal skills.
- Proficiency in Microsoft Office Suite (Word, PowerPoint, Excel).
- Demonstrated ability to manage multiple tasks and meet deadlines in a fast-paced environment.
- Interest in the insurance or consulting industry is highly desirable.

Internship Opportunities

Consulting – Customer Transformation, Intern

At KPMG, our Customer team is at the forefront of innovation and excellence, driving impactful change for organisations worldwide. We collaborate with our colleagues within the Corporate Transformation division to deliver four key service pillars: CIO Advisory, Finance Transformation, Customer Transformation, and Org Transformation. These transformative pillars are supercharged by our Data & Analytics team, which turns raw data into actionable intelligence, and our Digital Village team, a hub of creativity where innovation and technology converge to deliver groundbreaking solutions.

We empower global clients across sectors, with a special emphasis on Financial Services, Public Sector and Healthcare & Life Sciences industries to make data-driven, customer-centric decisions that enhance customer satisfaction, loyalty, and business results. Our work revolves around designing and implementing strategies and technologies to deliver Total Experience (TX) – empowering organizations to create cohesive, outstanding experiences that resonate with their customers and drive value.

In addition to our core expertise, we are continuously exploring AI-driven solutions to help clients uncover deeper insights, deliver personalised experiences, and future-proof their customer strategies.

As an Intern in our Customer team, you will gain exposure in:

- **Customer Experience Strategy:** We design, assess, recommend and implement customer experiences that deliver business value best on our expertise and best-in-class principles. This involves analyzing Voice of Customer and Voice of Business through collecting large volumes of customer data, uncovering actionable insights, and advising on industry-specific strategies.
- **CRM Implementation:** We lead enterprise-wide transformations that bridge functional silos and drive large-scale digital initiatives. These projects focus on centralizing customer data and enhancing interactions to improve satisfaction, retention, and growth through personalized, data-driven engagement.
- **Marketing Strategy:** We empower clients to unlock the full potential of their marketing investments. We develop strategic roadmaps and actionable recommendations to optimize operations, ensuring efficiency, innovation, and measurable ROI.

Your responsibilities will include:

- Work in client engagements related to customer experience strategy, CRM implementation and digital marketing
- Contribute to data gathering, research and analysis to proposals and project deliverables
- Work closely with the project team to analyze business processes and requirements and identify opportunities for improvement and streamlining
- Support the consolidation, design, preparation, and analysis of reports and findings in a clear, logical and concise manner
- Build and maintain strong relationships with client stakeholders while actively identifying opportunities to enhance and expand collaboration.

With us you will get the opportunity to:

- Be involved in a wide range of advisory projects across industries

Explore #KPMGForReal

Internship Opportunities

- Collaborate closely with senior stakeholders, experts both within KPMG and on the client-side
- Engage with cross-functional teams within the Advisory department to support projects in other domains
- Receive direct coaching from experienced team members and guidance from managers, enabling you to accelerate your learning and smoothly transition into your new role
- Maintain up-to-date knowledge of trends and market information related to customer experience strategy and digital transformation
- Support the business development efforts to grow our Customer practice together with Senior Management. These can include proposals or thought leadership/ white papers, etc.
- Participate to practice development through in-house activities such as our Rec Club, Sports Teams or other initiatives to enhance our people's experience

The ideal candidate should possess the following attributes:

- Excellent academic background with at least a Bachelor's degree
- Strong analytical and problem-solving skills with the ability to analyze data and breakdown and solve problems through quantitative and qualitative thinking and analysis
- Excellent foundational skills including written and verbal communication skills (English), impactful client presence, compelling facilitation and presentation skills
- Strong team spirit with excellent interpersonal skills to build strong relationships with colleagues and clients alike
- Highly motivated individual with the ability to work independently in a fast-paced environment and adapt to changing priorities and projects
- Demonstrate a commitment to learning and growth, with an expectation to regularly pursue certifications in Salesforce, Microsoft, and other relevant platforms as part of our project requirements
- Show interest in latest technology developments such as AI or Data & Analytics
- Prior experience in Management Consulting, Technology Consulting, Customer Experience / Marketing Strategy or IT is preferred
- Native / Business fluency in English is a must, fluency in APAC language(s) will be valuable

Consulting – Digital Village (Design), Intern

KPMG Digital Village is at the forefront of emerging technology, helping companies to transform through business model innovation and experience design. We are a dynamic tribe of entrepreneurs, designers, strategists and technologists, sharing a passion for innovation. Through ideation and collaboration, we identify new opportunities and deliver end to end solutions from design to development, enabling our clients to meet evolving customer demands.

Your role in the village:

As a UI/UX Design Intern, you will work closely with our project and client teams to identify existing pain points or growth opportunities. Using these insights, you will put on your thinking cap to design new user-friendly products or services.

As an intern, you will get the opportunity to:

- Collaborate with project and product managers, UI/UX designers, and developers to define and implement innovative solutions for the product direction, visuals and experience
- Support in executing all visual design stages from concept to final hand-off to product development
- Support in defining the visual direction and design requirements
- Help unify the design language and enhance digital experiences
- Keep on track with cutting edge technologies and UI trends
- Bring the proposed solution to life through user personas and journey mapping
- Support the product development process by writing user stories, test scripts, and performing user testing across mobile apps and web platforms
- Help manage the co-innovation process between our clients, our in-house designers and development teams, and external partners (i.e. start-ups and/or solution providers). This includes overseeing the following UI/UX design related activities:
 - Conducting user-driven immersion and requirements gathering
 - Ideating and designing of the product concept
 - Testing and validation of the solution prototype
 - Refinement of the solution prototype
 - Documentation of all design related deliverables (eg. immersion findings, design/brand/style guidelines, functional specification documents etc.)

The ideal candidate should possess:

- Strong interest in driving change and digital innovation
- Highly driven, 'can-do' attitude
- Creative approach towards problem solving
- Willingness and ability to take initiative and learn independently
- Highly collaborative team player
- Outstanding interpersonal and communication skills
- Understanding of human-centered design methodologies
- Experience in user interface design and rapid prototyping
- Foundational understanding of design tools such as: Figma, Adobe Photoshop, InDesign, illustrator etc.

Internship Opportunities

Consulting – Risk & Regulatory Advisory, Intern

The financial services landscape is evolving at an unprecedented pace of change and KPMG is at the heart of this change. At KPMG, you will work across a broad range of financial institutions, including private banks, commercial banks, digital banks, capital markets intermediaries, payment services providers, and fintechs.

Our global network of experienced professionals offer tailored services to clients and provide deep industry knowledge, insightful opinions, and technology-enabled delivery to help improve processes, governance and strategy to address financial and operational risks and drive business performance.

You will help financial institutions enhance performance, enable better decision-making and satisfy compliance demands by shaping their risk strategy, improving risk-adjusted performance and implementing pragmatic recommendations.

You would be expected to contribute in the following ways:

- Being a key team player in helping our financial services, fintech and digital banking clients uplift their regulatory compliance processes and controls, including development of regulatory policies and procedures and sharing of insights and best practices by leveraging the knowledge base and capabilities of our Global Fintech network
- Working with financial institutions on regulatory compliance matters such as advising on regulatory definitions and interpretations, performing quality reviews of existing risk processes and controls and developing relevant regulatory risk processes and controls to help manage the institutions' regulatory obligations
- Collaborate with clients to identify potential growth opportunities and establish new business lines in Singapore (e.g. review business plans and licence applications, review new products or services, define new target operating models, re-design current processes etc.)
- Working with our Solutions team on ideation and development of regulatory tools to enable our clients manage their regulatory risks efficiently
- Keep up-to-date with technology trends in the financial services industry and bring any learnings to the table as to drive the successful adoption of innovative solutions for clients
- Performing valuations of derivative positions for our banking, financial institution and corporate clients
- Conduct reviews and analysis of financial risks in various banking, treasury and trading organisations
- Developing and validating financial risk models using necessary statistical methodologies with the use of relevant analytical solutions
- Assessing of market data
- Working with large financial institutions to design and implement solutions that digitize internal risk and compliance procedures using various technologies like RPA, machine learning, natural language processing
- Supporting business development initiatives, including the preparation and presentation of proposals
- Working with project leads to help manage client stakeholders, project delivery timelines and delivery quality.

Consulting – ESG Consulting, Intern

The KPMG Financial Services Advisory's ESG Consulting team focuses on the strategic transformation of our Financial Services clients (i.e., banks, insurers and asset managers) across the broad agendas of sustainability and ESG. The financial sector plays a crucial role in mobilising capital to facilitate the transition to a net-zero economy. We support our financial services clients on multiple diverse consulting projects that include:

- Define the sustainability and Net Zero strategy
- Drive ESG target operating model design and operationalisation
- Establish policies and processes to embed ESG risk management practices into the business strategy and operating models
- Provide programme and change management support of complex ESG transformations

We are looking for motivated and passionate candidates to play a key role in our ESG consulting practice. As an FSA ESG Consulting intern, you will join experienced project teams who assist financial services clients both locally and regionally. You will have the opportunity to develop your business analysis skills and help to generate suitable recommendations for our Financial Services clients. Through the internship, you will gain insights to the trade secrets of being a successful consultant and learn relevant transferrable knowledge and skills related to Financial Services.

The ideal candidate should possess the following attributes:

- Strong academic credentials, pursuing a Bachelor's or Master's degree in relevant disciplines such as Environmental Science, Environmental Management, Environmental Engineering, Corporate Governance or Finance
- Independent individual who can work collaboratively with team members from diverse backgrounds
- Critical and analytical thinking skills to solve complex problem statements
- Any experience in ESG, consulting and FinTechs is a plus
- Native proficiency in both verbal and written English is essential (Other Southeast Asian language skills are an added advantage)

Internship Opportunities

Consulting – ESG Risk, Reporting & Resilience, Intern

KPMG in Singapore commenced work on ESG-related engagements as early as 2002, making it one of the first Big 4 firms to advise companies on their ESG journey in Singapore. The KPMG ESG team has the mission of driving large-scale economic transformation in Singapore and the region associated with the green transition. Built on strong connectivity within local and regional markets, as well as with KPMG's Global and Regional ESG Centres of Excellence, the KPMG ESG team houses highly technical ESG competencies and brings together best practices, all of which are directed to the co-creation of shared value with our business partners and clients.

The KPMG ESG team also supports functional professionals across audit, tax and advisory with proposals in this area from the bid stage and through to delivery. This involves helping teams in Singapore as well as other member firms to drive pursuit execution, form a strategic response and pitch for our largest and most important opportunities globally, followed by delivery support where required.

We work on ESG reporting, strategy, and other ESG-related advisory projects such as sustainable finance and ESG due diligence. We study trends to understand future directions of ESG in different industries and advise our clients as to the adequacy and effectiveness of their measures and strategy considerations. In light of the growing demands for climate change and ESG-related services, we are looking for an intern to join our KPMG ESG team.

Together with a team of ESG and other professionals within the firm, you will:

- Position KPMG as a leading firm for ESG services in Singapore and Southeast Asia, in collaboration with other Global and Regional ESG Centres of Excellence as well as cross-functional teams to ensure we have integrated and end-to-end offerings.
- Support business development activities including the development of proposals as well as thought leadership pieces, and other industry-driven engagements.
- Support the development and delivery of service offerings in areas such as:
 - ESG reporting, including gathering and collating relevant data on company's ESG metrics, conducting market research on industry reporting landscapes, and performing gap analyses against common reporting frameworks which may include those published by the Greenhouse Gas Protocol, the Carbon Disclosure Sustainability Accounting Standards Board, the International Integrated Reporting Council Framework, the Taskforce on Climate-related Financial Disclosures, the Taskforce on Nature-based Financial Disclosures, the International Sustainability Standards Board, the Global Reporting Initiative, the Sustainability Accounting Standards Board;
 - Other ESG advisory services relating to ESG reporting, including climate risk-related procedures such as scenario analysis, implementation of processes and controls to support high quality non-financial reporting, reviews of governance and risk frameworks and capacity-building workshops.
- Support the team in delivery of client engagements, ensuring high quality service and building relationships with a client-for-life approach, including:
 - Conducting desktop research on market and industry trends, including topics listed above
 - Assisting in data analysis and presentation preparation
 - Participating in relevant brainstorming sessions to generate market / industry insights
 - Coordinating with internal stakeholders on meeting / activity arrangements
 - Participating and assisting in team projects and other ad hoc duties assigned
 - Supporting in operational and administration tasks

Internship Opportunities

We are looking for a passionate and purposeful individual(s) who:

- Is strongly passionate about ESG issues and committed to making a difference in the corporate landscape.
- For interns who can commit for at least 24 weeks, we welcome candidates preferably pursuing a PhD/ Master's in Sustainability, Developmental Finance, Economics, Environmental Sciences, Social Sciences, Engineering
- For interns who can commit for 8 – 10 weeks, we welcome candidates preferably pursuing a bachelor's degree in Accounting, Business, Finance, Environmental Science, or Social Science.
- Has excellent knowledge of MS office, especially MS PowerPoint and Excel, and is adept at developing presentation materials to a high quality with a short turnaround.
- Has excellent interpersonal and communication (written and spoken) skills, enjoys working with people and is able to build relationships with and manage a range of different stakeholders, both external and internal.
- Is of a curious temperament, independent in learning, and a self-starter with good analytical and problem-solving skills.
- Has effective project management skills and is able to multi-task to deliver on varying priorities within a highly pressured and often shifting environment
- Position KPMG as a leading firm for ESG services in Singapore and Southeast Asia, in collaboration with other Global and Regional ESG Centres of Excellence as well as cross-functional teams to ensure we have integrated and end-to-end offerings.

KPMG in Singapore commenced work on ESG-related engagements as early as 2002, making it one of the first Big 4 firms to advise companies on their ESG journey in Singapore. The KPMG ESG team has the mission of driving large-scale economic transformation in Singapore and the region associated with the green transition. Built on strong connectivity within local and regional markets, as well as with KPMG's Global and Regional ESG Centres of Excellence, the KPMG ESG team houses highly technical ESG competencies and brings together best practices, all of which are directed to the co-creation of shared value with our business partners and clients.

The KPMG ESG team also supports functional professionals across audit, tax and advisory with proposals in this area from the bid stage and through to delivery. This involves helping teams in Singapore as well as other member firms to drive pursuit execution, form a strategic response and pitch for our largest and most important opportunities globally, followed by delivery support where required.

We work on ESG reporting, strategy, and other ESG-related advisory projects such as sustainable finance and ESG due diligence. We study trends to understand future directions of ESG in different industries and advise our clients as to the adequacy and effectiveness of their measures and strategy considerations. In light of the growing demands for climate change and ESG-related services, we are looking for an intern to join our KPMG ESG team.

Together with a team of ESG and other professionals within the firm, you will:

- Position KPMG as a leading firm for ESG services in Singapore and Southeast Asia, in collaboration with other Global and Regional ESG Centres of Excellence as well as cross-functional teams to ensure we have integrated and end-to-end offerings.
- Support business development activities including the development of proposals as well as thought leadership pieces, and other industry-driven engagements.
- Support the development and delivery of service offerings in areas such as:
 - ESG strategy, including climate risk and biodiversity / circularity understanding, climate mitigation / adaptation, decarbonisation, and carbon value chain assessments; and
 - Other ESG-related advisory projects, such as sustainable finance, ESG due diligence, and impact assessments.
- Support the team in delivery of client engagements, ensuring high quality service and building relationships with a client-for-life approach, including:
 - Conducting desktop research on market and industry trends, including decarbonisation efforts, ESG technology and tools, and ESG investment practices.
 - Assisting in data analysis and presentation preparation
 - Participating in relevant brainstorming sessions to generate market / industry insights
 - Coordinating with internal stakeholders on meeting / activity arrangements
 - Participating and assisting in team projects and other ad hoc duties assigned
 - Supporting in operational and administration tasks

Internship Opportunities

Central Services – Clients & Markets (Account-Based Marketing and Sales Enablement), Intern

The Client & Markets team is KPMG in Singapore's brand hive, equipping our colleagues with the marketing tools to win clients and to position KPMG as an industry leader at the forefront of innovation and sustainability. The team creates buzz around our brand, strategise and communicate our firm's value proposition, working together to pollinate our brand, drive up its value and increase our market share.

In this exciting internship opportunity, we are looking for dynamic and motivated individuals to join our Clients & Markets (Account-Based Marketing and Sales Enablement) Team.

What is Account-Based Marketing (ABM)?

Account-Based Marketing (ABM) is a strategic approach to marketing where efforts are focused on targeting specific high-value accounts of our firm. It aligns sales and marketing to deliver personalized campaigns and solutions tailored to the needs and priorities of each target account. At KPMG Singapore, we're accelerating the rollout of key ABM initiatives for the firm's priority accounts, including dedicated account management microsites, joint events, whitepapers, speaking opportunities, sponsorships, and more.

What is Sales Enablement?

Sales Enablement focuses on equipping our people—particularly those engaging with our firm's priority accounts—with the tools, resources, insights, and training needed to effectively execute go-to-market (GTM) strategies. It empowers them to engage key accounts, drive conversions, and deliver value by aligning messaging, processes, and solutions with market needs. At KPMG Singapore, we have successfully implemented training programs and introduced essential sales tools. And we aim to further elevate these efforts by fostering a firm-wide 'everyone is a salesperson' mindset.

What does this mean for you?

You have an exciting opportunity to dive into the world of Account-Based Marketing (ABM) and Sales Enablement. You'll gain hands-on experience with new tools and technologies, supporting key ABM initiatives for the firm's priority accounts. Throughout your internship, you will collaborate with various teams across all functions, levels, and sectors of the firm, providing a unique insight into how different expertise areas work together. With a strong support system in place, you'll have the opportunity to develop valuable skills, contribute to impactful projects, and build happy memories while learning from experienced professionals.

As an intern, you will be supporting the team with various tasks including:

- Assist with the development and rollout of key ABM initiatives, such as account management microsites, client events, and custom marketing materials.
- Support sales enablement efforts by managing resources, updating tools, and helping to create training content.
- Collaborate with cross-functional teams to gather insights and develop personalized campaigns for key accounts.
- Analyse campaign performance and providing actionable recommendations to optimize future efforts.
- Participate and assist in team projects and other ad hoc duties assigned

Central Services – IT Services, Enterprise Application & Engineering (Developer), Intern

The Information Technology Services (ITS) team provides essential technology-based services to internal clients. The ITS team work together to address both individual and firm-wide IT needs.

We are seeking a motivated and enthusiastic Application Team Intern to join our dynamic team. The ideal candidate will have a passion for technology and software development, with a keen interest in developing applications using the Power Apps low-code platform. This internship offers hands-on experience with JIRA, Confluence, Azure cloud services, and participation in various software development lifecycle activities.

As an intern, your duties will include but not limited to:

- **Develop Applications:** Use the Power Apps low-code platform or other tools to design, develop, and implement custom applications that meet business needs.
- **Collaborate with Teams:** Work closely with cross-functional teams, utilizing JIRA and Confluence to manage projects, track progress, and document processes.
- **Azure Cloud Services:** Gain exposure to Azure cloud services, assisting in configuration monitoring alerts on the cloud platform.
- **Software Development Lifecycle (SDLC):** Provide support in various phases of the SDLC, including requirements gathering, design, coding, testing, and deployment.

The ideal candidate should possess the following attributes:

- Currently pursuing a degree in Computer Science, Information Technology, or a related field.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Eagerness to learn and adapt to new technologies and tools.
- Attention to detail and a proactive approach to tasks.

What we offer:

- **Real-world Experience:** Work on meaningful projects that impact the business and gain valuable industry experience.
- **Mentorship:** Receive guidance and mentorship from experienced professionals in the field.
- **Growth Opportunities:** Potential for full-time opportunities based on performance and business needs.
- **Collaborative Environment:** Join a supportive and collaborative team that values innovation and continuous improvement.

Internship Opportunities

Central Services – Private Enterprise (E50), Intern

First established in 1995, the E50 Awards recognises local, privately held companies who have contributed to economic development in Singapore and abroad. It is jointly organised by The Business Times and KPMG, and supported by the Enterprise Singapore, Singapore Business Federation and Singapore Exchange Limited. The E50 Awards is sponsored by OCBC Bank.

As an intern, you will get the opportunity, but not limited to:

- To assist multiple companies in preparing their business cases to be submitted for the qualitative assessment
- Gain an understanding of the local enterprise marketplace and an opportunity to appreciate different industry nuances
- If requested by the company, you may assist them in the preparation for the presentation to the panel of judges during their face-to-face interviews

What do you need to do?

Upon allocation of company:

- Research the allocated companies' background
- Prepare outline for business case
- Arrange meeting with the allocated companies
- Prepare questions and list of information required and email them in advance

First meeting with company:

- Interview company representatives and clarify any queries
- Obtain all necessary information to write the case
- Discuss the angles and salient points to be included in the business case

After meeting with company:

- Formulate the business case
- Present to the company
- Make amendments, if any
- Finalize material for submission

You will be grouped in pairs. You may be asked to assist with the preparation of the presentation materials for their face-to-face interviews with the judging panel.

The ideal candidate should possess the following attributes:

- Knowledge in business administration, finance, marketing, risk management and accounting
- Ability to work in a team
- Good interpersonal, communication (oral and written) and presentation skills
- Good analytical and problem-solving skills
- Creativity and innovation
- Good project management skills – able to define and monitor timelines and deliverables
- Good understanding of industry trends and ability to develop a business case that highlights the company's competitive advantage to give it an edge above the others
