Internship Opportunities

Audit, Intern

Jumpstart your future with an internship at KPMG Singapore, where you will have the flexibility and power to create your own career journeys through our various internship programmes stretching from 10 weeks to 40 weeks long.

At KPMG, we will provide you with the opportunity to gain exposure to top companies within one of the key industry clusters we serve. You will be part of a dynamic and purpose driven firm where we inspire confidence and empower change. We are committed to helping you achieve your greatest potential by giving you the necessary support, training and practical experience. We are also focused on innovation, and we leverage on cutting-edge audit tools and technologies to automate audit processes and enhance the accuracy and productivity, so that you can concentrate on delivering high-value service to our clients. As a KPMG Intern, you will work collaboratively with a team of experienced audit professionals to solve real client problems. Interns will also be exposed to ample opportunities to network and make meaningful memories. The Audit Function is structured along five lines of businesses, each addressing the unique demands of a key industry cluster in the marketplace:

Diversified Industrials & Infrastructure

Manufacturing Distribution & Trading | Shipping, Marine & Offshore Marine | Building & Construction | Transport & Logistics | Diversified Industries | Energy & Natural Resources | Power & Utilities

Technology, Life Sciences & Aviation

Airlines | Telecommunication | Technology | E-commerce | Software & Business Services | Chemicals & Pharmaceuticals

Financial Services

Retail Banking | Wholesale Banking | Private Banking | Insurance | Investment Management and Funds | Real Estate Investment Trust

Real Estate, Consumer & Tourism

Real Estate | Investment Management | Hospitality & Tourism | Retail | Food & Beverage | Consumer Products | Healthcare | Education | Media & Entertainment

US Audit

US-based firms in technology, e-commerce, digital payments, electronics, and energy sectors etc.

The ideal candidate should possess the following attributes:

- Pursuing a bachelor's degree in accounting or finance related field
- A team player who can build accountability for delivering high quality and accurate work
- Business curiosity that encompasses the use of data
- Forward thinking and ready to embrace change and technological advancements in how you think, problem solve and approach tasks
- A keen learner who continuously strives for improvement
- Communicates and articulates confidently and concisely, both verbally and written

Internship Opportunities

Audit – Technology Assurance, Intern

At KPMG in Singapore, we understand that trust is paramount in today's rapidly evolving digital landscape. Trust in the reliability and integrity of data, and confidence that technology functions as intended is critical for organisations across all industry sectors. Our Technology Assurance team provides this assurance to stakeholders, which will range from your colleagues in financial audit teams to the C level executives in government agencies, banks, and private companies as they embark on their digital journey.

We have:

- Collaborative opportunities with Financial Audit colleagues to evaluate IT systems in the context of their impact on business processes and enhance audit quality.
- Engagements to provide assurance to third parties who require an independent party to review, assess and evaluate IT controls and/or compliance with IT-related regulations.
- Opportunities for you to identify and communicate technology-related findings and recommendations to stakeholders; assess the impact of these risks on the audit/assurance engagement and advise stakeholders accordingly.
- Exposure to diverse global and local businesses and technology used by these organisations, supported by innovative data and analytics technology and automated solutions like KPMG Clara.
- A dynamic culture where technical expertise is not mandatory; we value curiosity, agility, and a willingness to learn.
- Global and regional mobility opportunities to broaden your exposure.
- Internal and external training opportunities to equip you with the skills to succeed as a KPMG professional.

The role involves:

- Documenting understanding of client processes and IT systems, identifying risk points and controls.
- Executing and documenting testing of IT controls, identifying deficiencies, and supporting Data and Analytics (D&A) in audits including data extraction and analysis; utilise a range of technologies and data analysis tools to execute substantive IT Audit procedures, including SQL, Python, IDEA, Excel, Alteryx, QlikView and Power BI and assist in the preparation of the related documentation.
- Supporting system implementation and digital transformation reviews.
- Assisting with project management activities, communicating findings, and building client relationships.
- Learning new technologies and collaborating with cross-functional teams globally.
- Contributing innovative ideas to drive business transformation.

The ideal candidate should possess the following attributes:

- Studying a Bachelor's degree or higher in Management Information Systems, Accounting, Finance, or related fields is preferred.
- Strong analytical skills, technical aptitude, and critical thinking skills; demonstrated quality service mindset, proficiency in MS Office, and a desire to provide exceptional client experiences.
- Excellent communication, time management and leadership skills; flexible and adaptable team player; resourceful in delivering high quality work; ability to demonstrate project management skills is a plus.
- Exposure to ERP systems such as SAP, Oracle or Workday is preferred but not required.

Internship Opportunities

Tax – Corporate Tax Consulting, Intern

KPMG Tax Services assists organisations with their tax compliance obligations and in enhancing their commercial value through tax planning and incorporating tax strategies into an overall business strategy. Globalisation of businesses must be managed with international know-how and perspective. Through an in-depth understanding of our multinational clients' businesses and industries, KPMG Tax Services helps our clients identify tax-related challenges and opportunities.

Our Corporate Tax Consulting comprises different industry sectorisations and you will be allocated to one of the following:

- Asset Management & Real Estate
- Energy & Natural Resources
- Financial Services
- Infrastructure, Government & Healthcare

Your responsibilities include:

- Advising clients on projects such as mergers and acquisitions, cross border transactions, corporate restructuring, initial public offerings, tax due diligence, tax rulings, incentive planning and tax risk management
- Providing clients with tax efficient solutions which take into consideration sound knowledge of our clients' businesses
- Providing assistance and coordination for regional and/or global projects in various industries

The ideal candidate should possess the following attributes:

- Pursuing a Bachelor's degree in Accounting, Economics, Finance, Business or Law.
- Knowledge in taxation from an economic and legal perspective will be an advantage.
- A strong team player with a proven track record of academic and co-curricular achievements.
- Possess the ability to work independently, multitask and perform in a fast-paced environment.
- A fluent communicator with strong language skills.
- Strong organization skills with an eye for detail.
- Strong interpersonal and communication skills to work with colleagues from various levels and functions.

Internship Opportunities

Tax – Indirect Tax, Intern

Keeping abreast with Goods and Services Tax (GST) requirements are a constant challenge for many businesses. KPMG's Indirect Team is designed to provide clients with innovative and yet effective approaches to their indirect tax challenges.

Your responsibilities include:

- Conducting GST health checks on the GST returns of businesses.
- Reviewing and providing advice on the GST compliance processes.
- Preparing and reviewing clients' GST return worksheets and GST returns prior to submitting them to Inland Revenue Authority of Singapore (IRAS).
- Supporting consultancy in Singapore GST and assisting clients in making GST ruling applications to the IRAS.
- Working with seniors and managers to help corporate clients in reviewing GST transactions to facilitate compliance with the GST legislation.

The ideal candidate should possess the following attributes:

- Pursuing a Bachelor's degree in Accounting, Finance, Business or Law.
- A strong team player with a proven track record of academic and co-curricular achievements.
- Knowledge in local taxation laws will be an advantage
- Possess the ability to work independently, multitask and perform in a fast paced environment.
- Strong organization skills with an eye for detail.
- Strong interpersonal and communication skills to work with colleagues from various levels and functions.

Internship Opportunities

Tax – Research & Development (R&D) and Incentives Advisory, Intern

The R&D and Incentives Advisory team in Singapore comprises experienced consulting professionals with different technical expertise who work effectively together to assist local, national, and multinational companies across multiple industries to access various grants and incentives schemes that the Singapore Government offers, including making claims under the R&D tax incentive. As a vibrant, dynamic, and growing practice, we are seeking an Intern who is eager to grow with and contribute to the team.

What is in store for you?

- An exciting career opportunity in a leading practice.
- Exposure to high-impact projects in areas such as automation/digitalisation, technology development, business expansion into Singapore.
- Access to the latest market trends, industry developments and key emerging R&D innovations in Singapore.
- Opportunities to network and collaborate with various professionals from different industries.
- Enhance knowledge on financial and tax structures of the businesses' operations.

What does your role entail?

You will be part of a comprehensive end-to-end consulting process which includes the following key areas of contribution:

- **Understanding our client needs** - Alongside other members of an engagement team, participate in discussions with our clients to understand their envisioned business models and operational plans (including the qualitative and quantitative factors) in Singapore.
- **Preparation of engagement deliverables** - Strategize and prepare the necessary documentations / materials, such as business plans, project plans, technical descriptions.
- **Collaboration** – Partner with colleagues to ensure the delivery of timely and high-quality professional services to a wide myriad of clients.

The ideal candidate should possess the following attributes:

- Pursuing a Bachelor's or Master's degree in an Engineering, Science or Information Technology related discipline
- Have good project management, written and communication skills
- Have the ability to work effectively in an R&D and incentives team of professionals from diverse technical backgrounds.
- Be strongly driven and committed to deliver cutting-edge solutions for our clients in a wide spectrum of industries.

Internship Opportunities

Tax – Tax Technology & Transformation, Intern

We invite highly motivated and dynamic professionals with relevant experience to join our Tax practice. You will be part of the Tax Technology and Transformation team providing a cycle of innovative improvements for clients and other KPMG's tax services. As part of our team, you will create innovative digital solutions that boost productivity and performance, explore new business opportunities with emerging technologies, and deliver value to our clients. You will use your creativity, skills, and passion to shape the future of tax technology.

As a tax technologist, you will collaborate with users and clients to understand their needs and design solutions that enhance their tax functions. You will leverage your analytical and problem-solving skills to help them navigate the complex and dynamic tax landscape.

You will have the opportunity to grow and learn in a dynamic environment that embraces a growth mindset and challenges the status quo. You will be part of a team that values your feedback and ideas to redesign work processes for the better.

The successful candidate will:

- Assist in gathering and documenting business requirements, while also translating and simplifying them for technical teams
- Documenting requirements, defining scope and objectives and formulating systems to parallel overall business strategies
- Design, document and execute end to end test scenarios on various tax technology applications
- Support post go live activities by enhancing existing products and raising change requests

The ideal candidate should possess the following attributes:

- Pursuing a Bachelor's degree in Accounting or Finance-related fields; or
- Pursuing a Bachelor's degree in Information Systems with a keen interest in the professional services industry and in toB products
- Possess the ability to communicate effectively, both verbally and in writing
- Possess the ability to organise, coordinate, and execute on details and instructions
- Take initiative to understand the procedure and expected results, to interpret test results and log issues effectively
- Have a positive attitude, willingness to learn and take on responsibility that might be outside the scope of your current skills
- Have excellent self-motivation, enthusiasm and team spirit
- Candidates with similar experiences in digital transformation projects are welcomed to apply as well.

Internship Opportunities

Tax – Tax Reimagined, Intern

As an intern within the Tax Reimagined team, you will have the opportunity to learn and contribute to technology-enabled solutions across our tax practice. Working closely with experienced professionals, you will play a pivotal role in supporting the design, implementation, and management of tax technology solutions. Your role will involve collaborating with teams, gaining hands-on experience, and applying your skills to assist in optimizing tax processes and leveraging data analytics for insights.

As an intern, you will get the opportunity to:

- Assist in designing and implementing tax technology solutions aimed at enhancing efficiency and compliance.
- Collaborate with tax professionals and technology experts / cross functional teams to identify opportunities for technology integration and automation in the tax practice.
- Analyse client tax processes and challenges to help propose innovative technology-driven solutions.
- Participate in data gathering and analysis using tools like SQL, Alteryx to support data integrity and accuracy improvements.
- Contribute to the use of visual analytical tools such as PowerBi, Tableau, or others for generating insights.
- Support the implementation and integration of tax technology tools across various areas of tax practice.
- Engage in research to stay updated on tax regulations, industry trends, and emerging tax technology solutions.

The ideal candidate should possess the following attributes:

- Pursuing a Bachelor's or Master's degree in Accounting, Finance, Information Systems, Data Analytics, or a related field.
- Strong interest in tax technology, data analytics, or a related field.
- Eagerness to learn data analytics tools for data gathering and transformation.
- Strong analytical and problem-solving skills, with a passion for finding innovative solutions.
- Good organizational skills and the ability to manage multiple tasks and meet deadlines.
- Effective communication and teamwork skills for collaborating with colleagues and assisting with client interactions.
- Self-motivated with a willingness to contribute to a fast-paced and dynamic environment.

Join our dynamic Tax Reimagined team as an intern and gain valuable experience while contributing to the future of tax services through technology-driven solutions. Apply your passion for tax and data to help clients navigate complex tax landscapes and drive efficiencies.

Internship Opportunities

Consulting – Cyber Strategy & Governance, Intern

At KPMG, your long-term future is every bit as important to us as it is to you. That's why our aim is to give you experiences that will stay with you for a lifetime. Whether it's great training and development, working across functional sectors, mobility opportunities or corporate responsibility volunteering activities – you'll gain a wealth of experiences on which to build a rewarding career. We're proud of our culture – it's one that recognises hard work, encourages new ways of thinking and embraces diversity and inclusion. We have an innovative spirit which inspires what we do and how we do it – striving to be better lies at the heart of who we are.

Technology underpins many of the most influential organisations in the world and presents opportunities for businesses that want to seek out new markets and are prepared to invest in transformational change. The last ten years have seen a rapid emergence of new technology, greater connectivity for organisations and individuals, and a 24/7 approach to global commerce. However, this has left many organisations behind the curve and struggling to achieve their business aspirations without feeling exposed to risks.

We believe that by turning traditional thinking on its head, adopting a positive approach to managing risk, will set organisations free to achieve their business aspirations.

KPMG Cybersecurity professionals assist clients to address their concerns around Confidentiality, Integrity, Availability and Privacy of their technology, business systems, and information assets. Using a holistic view of how Technology and Business integrate, the Cyber team performs technology-risk focused assessments, technology compliance, IT/operational process reviews, and design of information risk & cyber security solutions.

We are looking for Interns to join a growing team to assist clients in the following area:

KPMG Cyber Strategy and Governance (S&G) professionals advise senior executives, including CEOs, CISOs and CIOs, on establishing resilient and effective cybersecurity security. This team helps organizations design their cyber operating models and define strategic approaches that integrate people, processes, and technology. You will work across industries to assess cyber risks, shape policies, and roll out governance frameworks that align with business objectives and regulatory requirements. Key areas of focus of Cyber S&G team include:

- Cyber Strategy development and implementation
- IT Governance, Access Management,
- Business Continuity & Crisis Management
- Cyber laws & regulatory compliance
- Technology Risk Management, and Third-party Risk
- Data Governance, Data Protection, and Privacy Management

The role involves:

- Assist in the development of cybersecurity strategies and operating models.
- Support assessments of clients' cybersecurity maturity, governance structures, and risk exposure.
- Contribute to the design of policies, frameworks, and roadmaps that enhance cyber resilience.
- Conduct research on emerging cyber threats, regulatory changes, and industry best practices.
- Prepare client deliverables such as reports, presentations, and dashboards.
- Collaborate with cross-functional teams to support project delivery and client engagement.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

The ideal candidate should possess:

- Degree in Cybersecurity / Information Security; OR
- Degree in Engineering with relevant skills / experience / aptitude to further development in the field of cybersecurity; OR
- Degree in Computer Science / IT with relevant skills / experience / aptitude to further development in the field of cybersecurity

Technical Skills:

- Basic understanding of cybersecurity principles, including risk management, governance, and compliance
- Familiarity with cybersecurity and governance frameworks such as NIST CSF, ISO 27001, or COBIT
- Awareness of IT governance and access management concepts, including identity and access controls
- Knowledge of business continuity and crisis management planning
- Understanding of cyber laws and regulatory compliance, especially in the context of data privacy (e.g., GDPR, PDPA)
- Basic familiarity with cloud platforms (AWS, Azure, GCP) and their security considerations
- Exposure to AI governance and data protection, including ethical considerations in AI use
- Participation in cybersecurity competitions, clubs, or capstone projects would be advantageous
- Prior hands-on experience in developing and implementing AI/ML solutions would be considered a strong advantage.
- Relevant certifications in cybersecurity, AI/ML, data analytics would be considered an advantage. Candidates without certifications but with equivalent skills or willingness to obtain them are also encouraged to apply.

Soft Skills:

- Strong analytical and problem-solving skills with the ability to think critically about risk and governance issues
- Effective communication skills, both written and verbal, for documentation and stakeholder interaction
- Team collaboration and willingness to work in cross-functional environments
- Curiosity and eagerness to learn, especially in fast-evolving areas like AI and cybersecurity
- Adaptability and resilience, especially in dynamic consulting environments
- Time management and organizational skills to handle multiple tasks and deadlines
- Initiative and self-motivation to pursue certifications, training, or side projects
- Both business and IT challenges, which will help you in designing strategy, policies and processes

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

Consulting – Cyber Response, Intern

At KPMG, your long-term future is every bit as important to us as it is to you. That's why our aim is to give you experiences that will stay with you for a lifetime. Whether it's great training and development, working across functional sectors, mobility opportunities or corporate responsibility volunteering activities – you'll gain a wealth of experiences on which to build a rewarding career. We're proud of our culture – it's one that recognises hard work, encourages new ways of thinking and embraces diversity and inclusion. We have an innovative spirit which inspires what we do and how we do it – striving to be better lies at the heart of who we are.

Technology underpins many of the most influential organisations in the world and presents opportunities for businesses that want to seek out new markets and are prepared to invest in transformational change. The last ten years have seen a rapid emergence of new technology, greater connectivity for organisations and individuals, and a 24/7 approach to global commerce. However, this has left many organisations behind the curve and struggling to achieve their business aspirations without feeling exposed to risks.

We believe that by turning traditional thinking on its head, adopting a positive approach to managing risk, will set organisations free to achieve their business aspirations.

KPMG Cybersecurity professionals assist clients to address their concerns around Confidentiality, Integrity, Availability and Privacy of their technology, business systems, and information assets. Using a holistic view of how Technology and Business integrate, the Cyber team performs technology-risk focused assessments, technology compliance, IT/operational process reviews, and design of information risk & cyber security solutions.

We are looking for interns to join a growing team to assist clients in the following area:

KPMG Cyber Response professionals work at the forefront of major cyber-attacks, supporting our clients as the "First Responders" to cyber security incidents and any major cyber emergency. Cyber Response helps clients who have experienced a cyber security incident or is suspecting an ongoing cyber-attack such as ransomware, business e-mail compromise, data-breach, security incidents in cloud, unauthorised access to IT resources or other kinds of network intrusion. We investigate the root cause of the incident and the extent of the breach, like data exfiltration, compromised accounts, identifying impacted hosts and servers, active threats and malicious files in the environment. We help clients with containment and remediation for effective and timely recovery from the incident and the restoration of the systems, expel intruders from the network, as well as provide practical recommendations on how to prevent further incidents.

KPMG Cyber Response also helps client with non-emergency engagements involving Compromise Assessment (CA) and Threat Hunting (TH). Such engagement helps detect threat and/or possible compromise during early stages of cyber-attack before disrupting major business operations. To support clients in enhancing their IR capabilities and security posture, KPMG also supports with other engagements like Table-Top Exercise (TTX), IR Training, Playbook development and Incident Response (IR) plan review.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

The role involves:

- The security professional will work closely with KPMG cyber security subject matter experts to design, implement, test and support solutions for KPMG's clients.
- The security professional will work closely with KPMG engagement managers to assist in log analysis, review of endpoint data to identify anomalies, indicators of compromise (IOCs), malicious files, and threat actor to determine the root cause and incident impact.
- Support in containment and eradication efforts.
- Assist with documenting findings and contribute to IR update calls.
- Collaborate with other cyber teams to deliver end-to-end incident response and recovery which may include supporting the delivery of Cyber OT/IoT security services like risk assessment, VAPT, OT cybersecurity audit and cybersecurity maturity assessment.
- Work closely with senior team members to assist with preparation of playbooks, TTX materials and business proposals.

The ideal candidate should possess:

- Degree in Cybersecurity / Information Security; OR
- Degree in Engineering with relevant skills / experience / aptitude to further development in the field of cybersecurity; OR
- Degree in Computer Science / IT with relevant skills / experience / aptitude to further development in the field of cybersecurity
- The ideal candidate should understand core cybersecurity principles, including threat vectors, vulnerabilities, and basic defence mechanisms.
- Awareness of standards and frameworks such as NIST, ISO 27001 and SANS PICERL model.
- Familiarity with Windows artifacts, endpoint logs, network device logs, experience in forensic Triage is preferred but not mandatory.
- Familiarity with the incident response lifecycle and ability to support containment and recovery efforts.
- Ability to contribute to incident reports, playbooks, TTX reports.
- Programming skills is preferred.
- Strong understanding of Operating Systems – Windows, Linux, Mac and cloud environments (Azure, AWS and Google) is preferred.
- Entry level certifications such as CompTIA Security+, CHFI, CEH or mid-level certifications from GIAC is desirable but not mandatory.

Soft Skills:

- Strong problem-solving skills with the ability to break down complex issues into smaller components.
- Ability to work as a part of larger team and independently.
- Clear verbal and written communication skills, especially while documenting findings or interacting with clients and team members.
- Demonstrates integrity, accountability, and a client-focused mindset.
- Eagerness to learn and grow in the cybersecurity domain through continuous learning, keen interest in research in evolving technologies and sharing across the larger team.

Technology underpins many of the most influential organisations in the world and presents opportunities for businesses that want to seek out new markets and are prepared to invest in transformational change. The last ten years have seen a rapid emergence of new technology, greater connectivity for organisations and individuals, and a 24/7 approach to global commerce. However, this has left many organisations behind the curve and struggling to achieve their business aspirations without feeling exposed to risks.

We believe that by turning traditional thinking on its head, adopting a positive approach to managing risk, will set organisations free to achieve their business aspirations.

KPMG Cybersecurity professionals assist clients to address their concerns around Confidentiality, Integrity, Availability and Privacy of their technology, business systems, and information assets. Using a holistic view of how Technology and Business integrate, the Cyber team performs technology-risk focused assessments, technology compliance, IT/operational process reviews, and design of information risk & cyber security solutions.

We are looking for Interns to join a growing team to assist clients in the following area:

KPMG Cyber Defence, we provide comprehensive security solutions including vulnerability assessment, application and network penetration testing, wireless and mobile security, cloud security evaluation, and system security testing. Our mission is to identify blind spots in defences and offer an in-depth assessment of previously overlooked weaknesses. We specialize in red teaming to simulate real-world attacks, and purple teaming to enhance the collaboration between offensive and defensive security teams.

As an Ethical Hacker/Penetration Tester, you will utilize the latest techniques and tools to pre-emptively test and challenge cyber security defences for our clients. You will be at the forefront of simulating advanced threat scenarios through red and purple teaming exercises, helping our clients redesign their defences to be more resilient against actual cyber-attacks.

The role involves:

- Conduct comprehensive vulnerability assessments and penetration tests across diverse platforms, including web and mobile applications, networks, wireless systems, cloud environments
- Engage in purple and red teaming exercises to rigorously test client defences and provide actionable insights into security posture enhancements.
- Develop detailed technical reports outlining findings, vulnerabilities, and recommended mitigations.
- Present findings and technical recommendations to senior management and clients in a clear and concise manner.
- Continually research and stay up to date with the latest cybersecurity trends, tools, and techniques.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

The ideal candidate should possess:

- Degree in Cybersecurity / Information Security; OR
- Degree in Engineering with relevant skills / experience / aptitude to further development in the field of cybersecurity; OR
- Degree in Computer Science / IT with relevant skills / experience / aptitude to further development in the field of cybersecurity
- Familiarity with multiple operating systems, including Windows, Linux, and macOS, and their related security mechanisms.
- Familiarity with scripting and programming languages such as Python, JavaScript, Bash, or PowerShell.
- Understanding of web protocols such as HTTP, HTTPS, and SSL/TLS, and how to secure web applications. Knowledge of common vulnerabilities and exploitation techniques, such as those listed in the OWASP Top Ten.
- Exposure to cloud computing environments like AWS, Azure, or Google Cloud, and a basic understanding of cloud security best practices.
- Basic proficiency in penetration testing tools such as Nmap, Metasploit, Burp Suite, Wireshark, and familiarity with Kali Linux.
- Understanding of large language models (LLMs) and their applications in cybersecurity.
- Certifications such as Offensive Security Certified Professional (OSCP), CREST Registered Tester (CRT), Certified Penetration Tester (CPTS), and Certified Bug Bounty Hunter (CBBH) are highly desirable. Candidates currently planning to pursue these certifications are encouraged to apply.
- Strong analytical and problem-solving abilities.
- Excellent communication skills with the capability to relay complex technical information clearly.
- Eagerness to learn and adapt to new technologies and methodologies.
- A proactive approach to identifying and addressing security challenges.

Internship Opportunities

Consulting – Cyber Transformation, Intern

At KPMG, your long-term future is every bit as important to us as it is to you. That's why our aim is to give you experiences that will stay with you for a lifetime. Whether it's great training and development, working across functional sectors, mobility opportunities or corporate responsibility volunteering activities – you'll gain a wealth of experiences on which to build a rewarding career. We're proud of our culture – it's one that recognises hard work, encourages new ways of thinking and embraces diversity and inclusion. We have an innovative spirit which inspires what we do and how we do it – striving to be better lies at the heart of who we are.

Technology underpins many of the most influential organisations in the world and presents opportunities for businesses that want to seek out new markets and are prepared to invest in transformational change. The last ten years have seen a rapid emergence of new technology, greater connectivity for organisations and individuals, and a 24/7 approach to global commerce. However, this has left many organisations behind the curve and struggling to achieve their business aspirations without feeling exposed to risks.

We believe that by turning traditional thinking on its head, adopting a positive approach to managing risk, will set organisations free to achieve their business aspirations.

KPMG Cybersecurity professionals assist clients to address their concerns around Confidentiality, Integrity, Availability and Privacy of their technology, business systems, and information assets. We are looking for Interns to join a growing team to assist clients in the following area:

KPMG Cyber Transformation Service professionals help organizations automate their cyber business processes by deploying technology solutions. They customize tech solutions to meet the specific needs of each client, and they work to ensure that the solutions are efficient and effective.

The role involves:

- Designing tech-enabled processes: Cyber transformation professionals work with clients to design new processes that are more efficient and secure. This may involve using automation, artificial intelligence, or other technologies to streamline processes and reduce the risk of human error.
- Deploying tech solutions: Once the new processes have been designed, cyber transformation professionals work to deploy the necessary technology solutions. This may involve build, configuring, customizing the solution or training the stakeholders on how to use the new technology solution to achieve business outcome.

We believe that by turning traditional thinking on its head, adopting a positive approach to managing risk, will set organisations free to achieve their business aspirations.

KPMG Cybersecurity professionals assist clients to address their concerns around Confidentiality, Integrity, Availability and Privacy of their technology, business systems, and information assets. Using a holistic view of how Technology and Business integrate, the Cyber team performs technology-risk focused assessments, technology compliance, IT/operational process reviews, and design of information risk & cyber security solutions.

We are looking for Interns to join a growing team to assist clients in the following area:

Cybersecurity in Operational Technology (OT) is a challenging but fulfilling field. One challenging aspect of this field is that it sits in intersection of two disciplines that usually do not intersect. Cybersecurity has its origins in Information Technology (IT), while OT system and Industrial Internet of Things (IIoT) are used by engineers to control and monitor physical processes. Professionals with expertise in both disciplines are rare. OT security is also a fulfilling field because we have been tasked by our clients to solve a broad range of issues including regulatory compliance, cyber risk assessments, penetration testing, red teaming, incident response and more. We have been successful in delivering quality services to our clients because of our ability to constantly evolve and the teamwork between a good blend of our cybersecurity and engineering professionals.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

The role involves:

- Most of your talent will be put to use in performing risk assessment or threat modelling for a variety of industry control systems, on-prem IT systems and those deployed on the cloud.
- Using your technical grounding in IT or OT/IIoT or Engineering or Cloud Computing, you will be tasked to digest sizeable amounts of information about complex systems (e.g. their network architecture, firewall rules etc) to assemble an accurate understanding of those systems and their parts;
- With a clear understanding of those systems, you will analyse and identify the cybersecurity risks associated to them e.g. how an attack might get into a network and cause disruption to operations or cause a dangerous situation in which safety might be compromised; You will interact with our clients to obtain information or clarifications, manage their expectations, provide clear explanations about your work; In many cases, you might provide recommendations that might improve the client's security posture but at the same, introduce change to their environment and current practices; In a similar fashion, you might be performing other assessment for different purposes e.g. in a compliance audit, you might be identify gaps between regulatory requirements and what is practiced in an OT or IT system; You will be working mostly project teams and supervised by more experienced members of the team e.g. Assistant Managers and Managers;
- Other than risk assessments, you will be part take in delivering a wide range of services to our clients;
- You will also work with subject matter experts in different areas of cybersecurity to deliver work to our clients e.g. you might work with our penetration testing team to deliver red teaming exercises to an owner/operator of a critical infrastructure

The ideal candidate should possess:

- Degree in Cybersecurity / Information Security; OR
- Degree in Engineering with relevant skills / experience / aptitude to further development in the field of cybersecurity; OR
- Degree in Computer Science / IT with relevant skills / experience / aptitude to further development in the field of cybersecurity; OR
- Experienced cybersecurity professionals with keen interest in OT/IIoT; OR
- Experienced SCADA or DCS engineers with relevant skills / experience / aptitude to further development in the field of cybersecurity;
- Experienced Internet of Things (IoT) developers / testers with relevant skills / experience / aptitude to further development in the field of cybersecurity;
- Certifications in cybersecurity e.g. CISSP, CISM etc might be advantageous;
- Certifications in OT cybersecurity e.g. GICSP, GRID, IEC62443 might be advantageous;

Internship Opportunities

Consulting – Governance and Risk, Intern

KPMG in Singapore's Governance and Risk (G&R) Business is a market leading practice that consults on solutions in managing and enhancing Governance, Risk and Compliance transformational activities. Working with top tier clients in both the private and public sector, we are trusted advisors in the field.

The incumbent will work closely with Consultants from our G&R business and gain deep seated exposure within engagement across project teams, working on specializations like Corporate Governance, Enterprise Risk Management, Internal Audit as well as niche and exciting fields like Sustainability Consulting. This opportunity opens a wealth of learning and networking opportunities as you build relationships with both internal stakeholders and clients alongside practical, first-hand experience into a career within Consulting, right from the get-go.

The role involves:

- Support our consultants in projects pertaining (but not limited to) developing frameworks to address new regulatory requirements, facilitating risk workshops and governance conversations with C-suite clients, highlighting improvement insights on business processes, advising on climate and sustainability related topics across the varied sectors such as Financial Services, Transport, Healthcare, Education, Real Estate, Government, etc.
- Build understanding of solutions and producing analysis, reports or presentations that outline findings and recommendations
- Deliver assignments to a high level of professionalism and client satisfaction
- Work with our consultants in assessing and developing sound and effective compliance, assurance and control framework
- Work on a range of engagements across the teams, including advisory, assurance and strategy development
- Facilitate and support meetings and workshops, including preparing workshop material, taking notes and meeting minutes
- Conduct core analyses as well as market research on Reporting

The ideal candidate should possess the following:

- Strong interest in Corporate Governance, Risk Management and Control
- Detail orientated with a penchant for curiosity
- Able to write clearly and articulate well
- Business & Accountancy students are encouraged to apply but otherwise open to graduating students from any discipline
- Relevant Data analytics skills will be advantageous (not a must-have)

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

Consulting – Forensic (Tech and Non-Tech), Intern

KPMG's Forensic practice consists of experienced professionals with a wealth of experience in investigations, AML/CTF, data analytics, FATCA/CRS, forensic technology and disputes. We have helped some of the world's biggest companies on some of the most important matters of public interest in Singapore.

We help clients deal with:

- Fraud, misconduct and corruption investigations
- Assess and improve client's AML controls and financial crime compliance
- Commercial disputes
- Regulatory compliance
- Managing risk on buying or selling a business, intellectual property and contract governance
- Preventing and detecting fraud and financial crime

We also deploy technology tools to help clients deal effectively with large amounts of data and documentation, to manage and disclose important material or highlight fraud, weaknesses and business opportunities from within corporate data.

Our Interns will be part of our Investigations and Disputes Advisory, AML, Data Analytics or Forensic Technology service lines. Associates can expect to:

- Gain hands-on experience in Forensic engagements which can range from fact-finding reviews into allegations of fraud and misconduct, assessing AML frameworks and systems, assisting in customer due diligence remediation and backlog reviews for transaction monitoring and screening alerts, and supporting complex investigations through digital forensic procedures and advanced data analytics
- Grow your network through participation in Forensic practice development with senior management, including drafting proposals, thought leadership and coordinating team building activities
- Gain insights into the methodology and approach used in conducting Forensic engagements
- Obtain an understanding of stakeholder management and project delivery
- Take responsibility in engagement planning and keep senior team members informed of significant developments and progress of the engagement
- Learn and understand how to build relationships with client contacts and maintain these relationships after the work has been completed

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

What skills and backgrounds are we looking for:

Our diverse team is built of people from professional backgrounds including accounting, law, economics, computer science and data analytics.

We are looking for individuals who possess:

- Undergraduate degrees with excellent academic records, in accounting or business-related degrees.
- Analytical skills to quickly synthesise quantitative and qualitative data and interpret it into meaningful insights.
- Strong attention to detail – Forensic is about finding the needle in the haystack! You should be comfortable with dealing with complex and sometimes imperfect data, to draw credible findings.
- Strong communication skills. You should be comfortable presenting your findings to your colleagues and clients in an interactive manner, both orally and in writing.
- Demonstrated ability to work in a cohesive team environment and be able to collaborate with a wide range of personalities.
- Time management skills. It is not uncommon to work on 2-3 projects at the same time. You should be able to understand priorities, be confident enough to clarify the priorities from senior team members and raise concerns if these are not achievable.
- A continuous desire to learn and grow. Forensic is always evolving, and we adapt to these changes. While you are expected to learn through research and experience, KPMG will provide opportunities to support your desire to learn and grow.
- Willing to participate in practice growth and development initiatives.
- Prior internship experience in areas related to Audit, AML, Forensic Accounting, Fraud & Financial Investigations, Business Intelligence, Internal Audit and Compliance would be an advantage but not essential.

For our Forensic (Tech Stream), we look for individuals with the below backgrounds for our technology stream:

- Undergraduate degrees with excellent academic records, in computer science, digital forensics, data analytics or related degrees.
- Be able to use forensic software to identify, collect, preserve and analyse electronic data from laptops, desktops, servers, cloud, backup tapes and mobile devices.
- Proficient working knowledge in evidence handling, chain-of-custody, acquisition techniques, analysis of digital evidence, forensic lab practices and procedures.
- Ability to code in any popular language is an advantage. This will help you in automating some of the routine tasks. Knowledge of database management and SQL is preferred.
- Good understanding of Microsoft Windows, Macintosh and other Operating Systems (OS). You should be able to understand and translate the artefacts extracted from the OS into investigation outcomes supported by detailed documentation.
- Any certifications in the field of cloud technologies, computer forensics and/or e-discovery will be an advantage.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

As a Tech Intern, what could my day-to-day tasks look like:

Data Analytics

As an Intern in the Data Analytics service line, your scope of work will include:

- Gain insights into how forensic professionals analyze and interpret data through exploratory data analysis, meaningful statistical models, and machine learning.
- Manage and work with large data sets from a wide variety of industries.
- Apply your knowledge in both accounting and data analytics to assigned tasks during your internship.
- Build rules and models that provide valuable insights from a forensic/fraud perspective.
- Develop solutions that support fraud investigation and monitoring.
- Support the development and delivery of presentations and product demonstrations.
- Participate in the documentation of processes and knowledge, including how-to guides, technical notes, and training materials.

The ideal candidate should be:

- Pursuing a degree or professional qualification in data science, computer science, or software engineering.
- Proficient in SQL and Python. Business/accounting knowledge is an advantage.

Forensic Technology

As an Intern in the Forensic Technology service line, your scope of work will include:

- Assist in the collection, preservation, and analysis of digital evidence from laptops, servers, mobile device and cloud platforms
- Help process and review large volumes of electronically stored information (ESI) using industry-leading eDiscovery tools
- Support investigations by identifying suspicious activities, deleted files and digital footprints
- Get hands-on experience with tools like EnCase, Nuix, Relativity and more
- Contribute to documentation and reports
- Collaborate with our team of experienced forensic technology professionals and learn from each other in a fast-paced environment
- Conduct research on forensic techniques to support ongoing investigations and improve team knowledge

The ideal candidate should be:

- Having a curious mind with strong interest in technology and digital investigations
- Pursuing degree in Computer Science, Cybersecurity or related fields
- Having basic knowledge of file systems, operating systems
- A team player who thrives in collaborative environments
- Bonus points if you have experimented with Python, PowerShell, or have a knack for Googling like a pro.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

As a Non-Tech Intern, what could my day-to-day tasks look like:

Forensic Investigation and Dispute Advisory

As an Intern in the investigations and dispute advisory service line, your scope of work will include:

- PAs an Intern in Forensic investigations and dispute advisory services, you will obtain:
- Hands-on experience by conducting reviews of documents and devices as part of our investigation and dispute advisory procedures;
- Insights into the methodology and approach used in conducting fraud investigations and dispute advisory services; and
- An understanding of stakeholder management and project delivery.

Anti Money-Laundering

As an Intern in the AML service line, your scope of work will include:

- Tackle financial crimes with hands-on experience: Collaborate and work closely with the AML/CFT team in supporting Financial Institutions and companies in their fight against financial crimes. You will be exposed to trainings with use of consistent methodologies to deliver value on engagements.
- Be at the forefront of stakeholder management: Liaise with internal stakeholders to ensure timely completion of tasks and handling of enquiries from both internal and external stakeholders. You will gain an understanding of stakeholder management and key elements of project delivery.
- Stay ahead with research: Assist in researching the latest technologies and emerging trends in Money laundering and Terrorism Financing. You will play a key role in ensuring we are updated in our go-to-market materials and presentations.
- Obtain exposure to other opportunities within Forensic: Assist in investigative work through reviews of documents and devices as part of our investigation and dispute advisory procedures

Requirements

- Undergraduate, pursuing either a degree in Accounting and/or Commerce or Business
- Proficient at Microsoft Office applications (e.g., Excel, Word and Powerpoint)
- Team player with strong interpersonal and collaborative skills
- Ability to work independently and meticulously to complete tasks in a timely manner

FATCA/CRS

As an Intern in the FATCA/CRS service line, your scope of work will include:

- Assists primarily in FATCA/CRS projects which can range from designing FATCA/CRS frameworks and assessing FATCA/CRS frameworks and systems, provide recommendations on FATCA/CRS Entity Classification, assist in registration and reporting obligation with local and US tax authority. As part of the delivery of the projects, the individual may need to perform sample testing, participate in client discussion, and assist in the preparation of deliverables to clients.
- Participates in effort to grow the FATCA/CRS service line together with Managers. Activities can include drafting proposals, thought leadership, training workshops etc.
- Works in other projects unrelated to FATCA/CRS such as fraud investigation, anti-money laundering and other regulatory compliance engagements.

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

Consulting – Technology Risk, Intern

As a Technology Risk intern, you will be an essential part of our Technology Risk team. You will collaborate with a dynamic team of experienced consultants and engage directly with our clients from different sectors, addressing their technology risk challenges and implementing robust risk management strategies. This role offers extensive learning opportunities, exposure to diverse projects across different geographical locations, and emerging technologies, and the chance to contribute to shaping the risk landscape for our clients and helping organizations navigate the digital landscape with confidence.

What you will do:

As a Technology Risk intern, your role will encompass a diverse range of responsibilities aimed at mitigating technology-related risks. Here's an overview of what you'll be doing in this exciting and dynamic position:

- You will be involved in end-to-end technology risk engagements, working alongside experienced team members to overlay point-of-views and industry insights via research and analysis, and formulate solutions and recommendations to address client's needs, challenges, and risks.
- Support the assessment of technology risks and evaluate the design and operation of controls related to complex IT environments and systems against KPMG's frameworks, regulatory and third-party frameworks; and assist in the development of risk-based IT internal audit programmes.
- Use advanced tools and technology to analyse and review data
- Attend meetings with clients to define problem statements, analyse key priorities/issues, and work with team members to conduct workshops, develop responses to client enquiries, produce documentation and reports.
- Assist the management team with business development activities including formulating KPMG's offerings and propositions, proposals, presentations and publications.
- Collaborate across global and advisory teams in technology consulting, cyber security, internal audit, and deals advisory to deliver holistic solutions and POVs to clients.

You should have:

- Tertiary qualifications in Computer Science, Information Technology, Information Systems, Business, Engineering, Mathematics, Accounting / Finance or related disciplines.
- Specific interest or past internship experience in IT audit/assurance, IT governance, IT internal controls, technology risk management, technology advisory, information security, data analytics and governance.
- A passion for technology, understanding of key technology trends, eagerness to learn emerging technologies and new skills quickly.
- Self-motivated individual with inquisitive, innovative and resourceful mindset, able to work under pressure with changing priorities.
- Strong analytical and problem-solving skills, demonstrated interpersonal, organisational, presentation and report writing skills with attention to details.

Internship Opportunities

Consulting – Insurance, Intern

We are seeking a motivated and detail-oriented university intern to join our dynamic insurance consulting team. This is an excellent opportunity for students interested in gaining real-world experience in the insurance and financial consulting industry. The intern will support ongoing client projects, contribute to internal research initiatives, and assist with the preparation of consulting deliverables.

As an intern, you will get the opportunity, but not limited to:

- **Research and Analysis:**
 - Assist in researching market trends, regulatory updates, and best practices in the insurance industry.
 - Support data analysis tasks to identify insights and trends for client reports.
- **Project Support:**
 - Collaborate with consultants to prepare presentations, reports, and proposals for clients.
 - Help gather and organize client data to support modeling and decision-making processes.
- **Administrative Assistance:**
 - Maintain project documentation and ensure timely updates to key stakeholders.
 - Coordinate meeting schedules, prepare agendas, and take minutes for internal and client meetings.
- **Knowledge Management:**
 - Assist in building and maintaining a repository of resources, templates, and research materials.
 - Document case studies and success stories from client engagements.
- **Collaboration:**
 - Work closely with team members across various functions, including actuarial, regulatory, and technology teams.
 - Participate in brainstorming sessions to contribute innovative ideas for solving client challenges.

The ideal candidate should possess the following attributes:

- Currently enrolled in a bachelor's or master's degree program in Business, Finance, Economics, Actuarial Science, Data Science, or a related field.
- Excellent communication and interpersonal skills.
- Proficiency in Microsoft Office Suite (Word, PowerPoint, Excel).
- Demonstrated ability to manage multiple tasks and meet deadlines in a fast-paced environment.
- Interest in the insurance or consulting industry is highly desirable.

Internship Opportunities

Consulting – Customer Transformation, Intern

At KPMG, our **Customer team** is at the forefront of innovation and excellence, driving impactful change for organisations worldwide. We collaborate with our colleagues within the Corporate Transformation division to deliver four key service pillars: CIO Advisory, Finance Transformation, Customer Transformation, and Org Transformation. These transformative pillars are supercharged by our Data & Analytics team, which turns raw data into actionable intelligence, and our Digital Village team, a hub of creativity where innovation and technology converge to deliver groundbreaking solutions.

We empower global clients across sectors, with a special emphasis on Financial Services, Public Sector and Healthcare & Life Sciences industries to make data-driven, customer-centric decisions that enhance customer satisfaction, loyalty, and business results. Our work revolves around designing and implementing strategies and technologies to deliver Total Experience (TX) – empowering organizations to create cohesive, outstanding experiences that resonate with their customers and drive value.

In addition to our core expertise, we are continuously exploring AI-driven solutions to help clients uncover deeper insights, deliver personalised experiences, and future-proof their customer strategies.

As an Intern in our Customer team, you will gain exposure in:

- **Customer Experience Strategy:** We design, assess, recommend and implement customer experiences that deliver business value best on our expertise and best-in-class principles. This involves analyzing Voice of Customer and Voice of Business through collecting large volumes of customer data, uncovering actionable insights, and advising on industry-specific strategies.
- **CRM Implementation:** We lead enterprise-wide transformations that bridge functional silos and drive large-scale digital initiatives. These projects focus on centralizing customer data and enhancing interactions to improve satisfaction, retention, and growth through personalized, data-driven engagement.
- **Marketing Strategy:** We empower clients to unlock the full potential of their marketing investments. We develop strategic roadmaps and actionable recommendations to optimize operations, ensuring efficiency, innovation, and measurable ROI.

Your responsibilities will include:

- Work in client engagements related to customer experience strategy, CRM implementation and digital marketing
- Contribute to data gathering, research and analysis to proposals and project deliverables
- Work closely with the project team to analyze business processes and requirements and identify opportunities for improvement and streamlining
- Support the consolidation, design, preparation, and analysis of reports and findings in a clear, logical and concise manner
- Build and maintain strong relationships with client stakeholders while actively identifying opportunities to enhance and expand collaboration.

With us you will get the opportunity to:

- Be involved in a wide range of advisory projects across industries
- Collaborate closely with senior stakeholders, experts both within KPMG and on the client-side
- Engage with cross-functional teams within the Advisory department to support projects in other domains

Turbocharge your career Be in Front ▶ with us

Internship Opportunities

- Receive direct coaching from experienced team members and guidance from managers, enabling you to accelerate your learning and smoothly transition into your new role
- Maintain up-to-date knowledge of trends and market information related to customer experience strategy and digital transformation
- Support the business development efforts to grow our Customer practice together with Senior Management. These can include proposals or thought leadership/ white papers, etc.
- Participate to practice development through in-house activities such as our Rec Club, Sports Teams or other initiatives to enhance our people's experience

The ideal candidate should possess the following attributes:

- Excellent academic background with at least a Bachelor's degree
- Strong analytical and problem-solving skills with the ability to analyze data and breakdown and solve problems through quantitative and qualitative thinking and analysis
- Excellent foundational skills including written and verbal communication skills (English), impactful client presence, compelling facilitation and presentation skills
- Strong team spirit with excellent interpersonal skills to build strong relationships with colleagues and clients alike
- Highly motivated individual with the ability to work independently in a fast-paced environment and adapt to changing priorities and projects
- Demonstrate a commitment to learning and growth, with an expectation to regularly pursue certifications in Salesforce, Microsoft, and other relevant platforms as part of our project requirements
- Show interest in latest technology developments such as AI or Data & Analytics
- Prior experience in Management Consulting, Technology Consulting, Customer Experience / Marketing Strategy or IT is preferred
- Native / Business fluency in English is a must, fluency in APAC language(s) will be valuable

Internship Opportunities

Consulting – Data & Cloud (Data Analyst), Intern

The KPMG financial services advisory team assists banks and capital market sectors in managing their day-to-day business challenges and developments. We support our financial services clients on multiple diverse consulting projects that include:

- Business growth (e.g. market entry, customer insights, merger and acquisitions support)
- Operational process improvements
- Organisation-wide functional (re)design
- Change management and project management
- Digital and technology enablement
- Programme management support
- Data driven transformation

As KPMG embarks on a rapid growth strategy to become the preferred data driven strategy execution firm in South East Asia, we established the propositions in data driven transformation, and cloud & data center-of-excellence for all the different line of businesses to serve our clients. The ideal candidate should have a keen interest in digital and data driven transformation while working for cloud providers, consulting firm or financial services organisations.

This role involves:

- An opportunity to assist with work across all aspects of data from engineering to building sophisticated visualisations, machine learning models and experiments
- Assist to perform exploratory data analysis, generate, and test working hypotheses to uncover interesting trends and observations
- Help to analyze and model structured data and implement algorithms to support analysis using advanced statistical and mathematical methods from statistics, machine learning, data mining, econometric and operations research
- Learn to leverage tools for data analytics (e.g. SQL, Python, R), visualization (e.g. Tableau, QlikView, PowerBI) and mapping (e.g. GIS) to conduct analysis, produce charts/graphs and reports/slide decks in support of client engagements

The ideal candidate should possess:

- Currently pursuing a Bachelor's Degree in Mathematics/Statistics, Computer Science, Information System, IT or equivalent
- Fluency in SQL or other data programming languages
- Demonstrate a keen interest in statistical and quantitative analysis and comfortable with working with large data-sets
- Experience using data visualisation tools (e.g. Tableau, QlikView, PowerBI) will be an advantage
- Demonstrate a keen interest and aptitude for learning new skills sets and taking on new roles/challenge
- Strong communication, written, analytical, organisational and problem-solving skills

Internship Opportunities

Consulting – Digital Village (Consulting), Intern

KPMG Digital Village is at the forefront of emerging technology, helping companies to transform through business model innovation and experience design. We are a dynamic tribe of entrepreneurs, designers, strategists and technologists, sharing a passion for innovation. Through ideation and collaboration, we identify new opportunities and deliver end to end solutions from design to development, enabling our clients to meet evolving customer demands.

As an intern, you will get the opportunity to:

- Support project teams working with our corporate clients to understand and prioritise challenges and growth opportunities
- Support market research and user immersion to identify key pain points and unmet needs
- Contribute to the ideation of new products, services and business models
- Support the definition of the key features and functionalities of solutions
- Bring the proposed solution or business model to life through user personas and journey mapping
- Support the product development process by writing user stories, test scripts and performing user testing across mobile apps and web platforms
- Input into the design and strategy of pilots and launches of new products and services

The ideal candidate should possess the following attributes:

- Strong interest in GenAI and emerging technology
- Highly driven, 'can-do' attitude
- Creative approach towards problem solving
- Willingness and ability to take initiative and learn independently
- Highly collaborative team player

Internship Opportunities

Consulting – Digital Village (Developer), Intern

KPMG Digital Village team is at the forefront of emerging technology to bring the future of tomorrow to our clients today. At KPMG Digital Village, we empower end to end approach from design to development of the products for our clients mainly focused on emerging technology solutions. We advise our clients on applicable use cases of emerging technologies and enable the use of such technologies through development and co-creation to help our clients become disruptors and leaders in their respective industries.

As an intern, you will get the opportunity, but not limited to:

- Work with product team to develop and implement next-generation products
- Identify and address performance bottlenecks
- Participate in code reviews, prompt testing and system prompt evaluation
- Interact with other team members to incorporate their innovations and vice versa

The ideal candidate should possess the following attributes:

- Familiar with JavaScript, Python or an equivalent programming language with willingness to learn new paradigms and languages
- Familiar with GenAI development, data chunking, opensource LLM, RAG, adaptive routing techniques and prompt engineering
- Knowledge in HTML and CSS
- Familiarity with Git or any other source control methods
- Knowledge of data structures and algorithms
- Pursuing BS or MS degree in Computer Science or a related technical field is a plus but not required
- Able to thrive in a startup environment

Internship Opportunities

Consulting – Digital Village (Design), Intern

KPMG Digital Village is at the forefront of emerging technology, helping companies to transform through business model innovation and experience design. We are a dynamic tribe of entrepreneurs, designers, strategists and technologists, sharing a passion for innovation. Through ideation and collaboration, we identify new opportunities and deliver end to end solutions from design to development, enabling our clients to meet evolving customer demands.

Your role in the village:

As a UI/UX Design Intern, you will work closely with our project and client teams to identify existing pain points or growth opportunities. Using these insights, you will put on your thinking cap to design new user-friendly products or services.

As an intern, you will get the opportunity to:

- Collaborate with project and product managers, UI/UX designers, and developers to define and implement innovative solutions for the product direction, visuals and experience
- Support in executing all visual design stages from concept to final hand-off to product development
- Support in defining the visual direction and design requirements
- Help unify the design language and enhance digital experiences
- Keep on track with cutting edge technologies and UI trends
- Bring the proposed solution to life through user personas and journey mapping
- Support the product development process by writing user stories, test scripts, and performing user testing across mobile apps and web platforms
- Help manage the co-innovation process between our clients, our in-house designers and development teams, and external partners (i.e. start-ups and/or solution providers). This includes overseeing the following UI/UX design related activities:
 - Conducting user-driven immersion and requirements gathering
 - Ideating and designing of the product concept
 - Testing and validation of the solution prototype
 - Refinement of the solution prototype
 - Documentation of all design related deliverables (eg. immersion findings, design/brand/style guidelines, functional specification documents etc.)

The ideal candidate should possess:

- Strong interest in driving change and digital innovation
- Highly driven, 'can-do' attitude
- Creative approach towards problem solving
- Willingness and ability to take initiative and learn independently
- Highly collaborative team player
- Outstanding interpersonal and communication skills
- Understanding of human-centered design methodologies
- Experience in user interface design and rapid prototyping
- Foundational understanding of design tools such as: Figma, Adobe Photoshop, InDesign, illustrator etc.

Internship Opportunities

Consulting – Finance Advisory, Intern

At KPMG, our Finance Advisory practice partners with clients to transform the finance function and create strategic value through innovative, tailored solutions. We provide expert insights, inspire confidence and empower change to CFOs and the Finance Function. With passion and purpose, we support CFOs and finance leaders to enhance financial planning, analysis, reporting, and operations by leveraging innovative technology and process improvements. As part of our dynamic practice, you will help drive strategic change in finance operations and deliver impactful results.

As an intern in Finance Advisory, you will be supporting clients to rethink and reshape their finance processes, systems, and technologies. You will be part of multidisciplinary teams delivering advisory projects that blend finance expertise with digital innovation to drive automation, enhance decision-making and embed new operating models that support business goals. You will be exposed to diverse projects including finance process redesign, financial planning and analysis, financial close and consolidation, management reporting, operational finance and technology enablement – all essential for developing a modern finance function.

What you will do:

- Support finance transformation initiatives for clients by analysing current finance operations and identifying opportunities for improvement and digital enablement
- Collaborate with teams to develop finance process maps, workflows, and automation strategies that enhance efficiency and accuracy
- Assist in financial modelling, budgeting, and forecasting exercises to support strategic decision-making
- Leverage data analytics tools and technologies to extract insights and improve finance reporting and controls
- Participate in client meetings, workshops, and presentations, contributing ideas and gaining business exposure
- Support in reports preparation, documentation, and presentations for both internal and external stakeholders
- Support on initiatives on industry trends, emerging technologies, and regulatory changes impacting finance functions

Internship Opportunities

Consulting – Front Office Transformation, Intern

The financial services landscape is evolving at an unprecedented pace of change and KPMG is at the heart of this change.

Imagine if you could work with some of the world's largest banks and insurers to design innovative solutions to their business problems working with some of the world's largest technology companies, implement artificial intelligence solutions into an insurer, create new ecosystem business models and new customer experiences at banks. At KPMG, you don't need to imagine. You will work across a broad range of financial institutions, including central banks, insurers, investment banks, retail/commercial banks, and stock exchanges. You will be at the forefront of financial innovation and transformation. You will work with our partners, the likes of Microsoft and Google, to implement their technologies.

You will help organisations enhance their performance, enable better decision-making and satisfy demands by improving their customer experiences. You will be supported by a global network of experienced professionals and learn from them through local, regional and global learning around our cutting-edge thought leadership.

If you are a talented and driven individual, with a 'can-do mind' and of course possess a real passion for taking on a wide variety of different tasks, then KPMG is the right place for you. Whatever aspirations you have, at KPMG we provide you with real opportunities to fully realise your potential and build your soft and hard skills to enable you to become leaders of the future.

You would be expected to contribute in the following ways:

- Support work on projects with financial services clients, such as wealth managers / private banks / insurance firms to solve their business challenges in the areas of strategy, operations, technology etc.
- Collaborate on project delivery teams to identify current pain points / potential growth opportunities within our clients to close the gap between their current state and desired future state (e.g. define new business / operating models, re-design current processes, address regulatory requirements etc.)
- Support work on teams to develop business propositions and thought leadership to take to our clients
- Support Partners and staff on client management, and business development activities
- Keep up-to-date with key trends in the financial services industry to drive the successful adoption of innovative solutions for clients

We are looking for a candidate who possess:

- Excellent academic background. Currently pursuing a Bachelor or Master degree in relevant disciplines such as Finance / Banking / Management / Strategy or related.
- Strong functional knowledge, including but not limited to financial principles, strategy, project management etc.
- Ability to learn quickly, assess and solve complex business issues. Business analysis, critical thinking and stakeholder management skillsets is a plus
- Ability to work across KPMG and our clients at different levels in the organisation and with people from different cultures / backgrounds
- Experience in planning, executing and delivering complex projects is a plus
- Exceptional analytical, problem solving and presentation/report writing skills, combined with a good understanding of business dynamics and commercial value drivers
- High proficiency in both verbal and written English is essential

Internship Opportunities

Consulting – Risk & Regulatory Advisory, Intern

The financial services landscape is evolving at an unprecedented pace of change and KPMG is at the heart of this change. At KPMG, you will work across a broad range of financial institutions, including private banks, commercial banks, digital banks, capital markets intermediaries, payment services providers, and fintechs.

Our global network of experienced professionals offer tailored services to clients and provide deep industry knowledge, insightful opinions, and technology-enabled delivery to help improve processes, governance and strategy to address financial and operational risks and drive business performance.

You will help financial institutions enhance performance, enable better decision-making and satisfy compliance demands by shaping their risk strategy, improving risk-adjusted performance and implementing pragmatic recommendations.

You would be expected to contribute in the following ways:

- Being a key team player in helping our financial services, fintech and digital banking clients uplift their regulatory compliance processes and controls, including development of regulatory policies and procedures and sharing of insights and best practices by leveraging the knowledge base and capabilities of our Global Fintech network
- Working with financial institutions on regulatory compliance matters such as advising on regulatory definitions and interpretations, performing quality reviews of existing risk processes and controls and developing relevant regulatory risk processes and controls to help manage the institutions' regulatory obligations
- Collaborate with clients to identify potential growth opportunities and establish new business lines in Singapore (e.g. review business plans and licence applications, review new products or services, define new target operating models, re-design current processes etc.)
- Working with our Solutions team on ideation and development of regulatory tools to enable our clients manage their regulatory risks efficiently
- Keep up-to-date with technology trends in the financial services industry and bring any learnings to the table as to drive the successful adoption of innovative solutions for clients
- Performing valuations of derivative positions for our banking, financial institution and corporate clients
- Conduct reviews and analysis of financial risks in various banking, treasury and trading organisations
- Developing and validating financial risk models using necessary statistical methodologies with the use of relevant analytical solutions
- Assessing of market data
- Working with large financial institutions to design and implement solutions that digitize internal risk and compliance procedures using various technologies like RPA, machine learning, natural language processing
- Supporting business development initiatives, including the preparation and presentation of proposals
- Working with project leads to help manage client stakeholders, project delivery timelines and delivery quality.

Internship Opportunities

Consulting – ESG Risk, Reporting & Resilience, Intern

KPMG in Singapore commenced work on ESG-related engagements as early as 2002, making it one of the first Big 4 firms to advise companies on their ESG journey in Singapore. The KPMG ESG team has the mission of driving large-scale economic transformation in Singapore and the region associated with the green transition. Built on strong connectivity within local and regional markets, as well as with KPMG's Global and Regional ESG Centres of Excellence, the KPMG ESG team houses highly technical ESG competencies and brings together best practices, all of which are directed to the co-creation of shared value with our business partners and clients.

The KPMG ESG team also supports functional professionals across audit, tax and advisory with proposals in this area from the bid stage and through to delivery. This involves helping teams in Singapore as well as other member firms to drive pursuit execution, form a strategic response and pitch for our largest and most important opportunities globally, followed by delivery support where required.

We work on ESG reporting, strategy, and other ESG-related advisory projects such as sustainable finance and ESG due diligence. We study trends to understand future directions of ESG in different industries and advise our clients as to the adequacy and effectiveness of their measures and strategy considerations. In light of the growing demands for climate change and ESG-related services, we are looking for an intern to join our KPMG ESG team.

Together with a team of ESG and other professionals within the firm, you will:

- Position KPMG as a leading firm for ESG services in Singapore and Southeast Asia, in collaboration with other Global and Regional ESG Centres of Excellence as well as cross-functional teams to ensure we have integrated and end-to-end offerings.
- Support business development activities including the development of proposals as well as thought leadership pieces, and other industry-driven engagements.
- Support the development and delivery of service offerings in areas such as:
 - ESG reporting, including gathering and collating relevant data on company's ESG metrics, conducting market research on industry reporting landscapes, and performing gap analyses against common reporting frameworks which may include those published by the Greenhouse Gas Protocol, the Carbon Disclosure Sustainability Accounting Standards Board, the International Integrated Reporting Council Framework, the Taskforce on Climate-related Financial Disclosures, the Taskforce on Nature-based Financial Disclosures, the International Sustainability Standards Board, the Global Reporting Initiative, the Sustainability Accounting Standards Board;
 - Other ESG advisory services relating to ESG reporting, including climate risk-related procedures such as scenario analysis, implementation of processes and controls to support high quality non-financial reporting, reviews of governance and risk frameworks and capacity-building workshops.
- Support the team in delivery of client engagements, ensuring high quality service and building relationships with a client-for-life approach, including:
 - Conducting desktop research on market and industry trends, including topics listed above
 - Assisting in data analysis and presentation preparation
 - Participating in relevant brainstorming sessions to generate market / industry insights
 - Coordinating with internal stakeholders on meeting / activity arrangements
 - Participating and assisting in team projects and other ad hoc duties assigned
 - Supporting in operational and administration tasks

Internship Opportunities

We are looking for a passionate and purposeful individual(s) who:

- Is strongly passionate about ESG issues and committed to making a difference in the corporate landscape.
- For interns who can commit for at least 24 weeks, we welcome candidates preferably pursuing a PhD/ Master's in Sustainability, Developmental Finance, Economics, Environmental Sciences, Social Sciences, Engineering
- For interns who can commit for 8 – 10 weeks, we welcome candidates preferably pursuing a bachelor's degree in Accounting, Business, Finance, Environmental Science, or Social Science.
- Has excellent knowledge of MS office, especially MS PowerPoint and Excel, and is adept at developing presentation materials to a high quality with a short turnaround.
- Has excellent interpersonal and communication (written and spoken) skills, enjoys working with people and is able to build relationships with and manage a range of different stakeholders, both external and internal.
- Is of a curious temperament, independent in learning, and a self-starter with good analytical and problem-solving skills.
- Has effective project management skills and is able to multi-task to deliver on varying priorities within a highly pressured and often shifting environment
- Position KPMG as a leading firm for ESG services in Singapore and Southeast Asia, in collaboration with other Global and Regional ESG Centres of Excellence as well as cross-functional teams to ensure we have integrated and end-to-end offerings.

Consulting – Accounting Advisory Services (AAS), Intern

At KPMG, our Accounting Advisory practice serves as the trusted advisor to clients navigating complex accounting and financial reporting challenges. We provide expert guidance on accounting treatments, financial reporting processes, and regulatory compliance to help clients create value and build confidence in their financial statements. Our team supports clients across industries with major transactions, transformations, and evolving accounting standards, leveraging deep technical expertise and innovative solutions. By leveraging advanced technology and data-driven insights, we transform traditional accounting functions into strategic-enablers of business success.

As an Accounting Advisory Intern, you will have exposure to a broad spectrum of accounting advisory services. You will learn to address technical and complex accounting issues including acquisitions, divestitures, financial reporting under various accounting frameworks (IFRS, US GAAP) and enhancements, implementation of new accounting standards, IPO readiness, regulatory filings, and technology-driven process improvements. This role will blend accounting expertise with modern technologies to deliver impactful, smarter, faster solutions for client.

What you will do:

- Support clients in evaluating accounting treatments and improving financial reporting processes using technology-enabled approaches
- Assist in designing and implementing accounting policies, controls, and workflows that leverage automation and data analytics
- Collaborate with cross-functional teams to optimize accounting processes, enhance accuracy, and improve reporting efficiency
- Use tools like Excel, Power BI, and accounting software systems to analyze data, produce insights, and support decision-making
- Participate in client meetings, workshops, and presentations, contributing strategic ideas and presenting findings clearly
- Prepare comprehensive reports, documentation, and presentations for internal and external stakeholders
- Stay current with emerging technologies, regulatory changes, and industry best practices impacting accounting practices

The team provides advisory services across the lifecycle of infrastructure assets for public, private, and multilateral clients in all significant infrastructure sub-sectors with a geographical focus in Southeast Asia, the Middle East, and the Asia Pacific. In the Singapore office, our advisory service offerings are organized into three focus practices, namely Energy & Utilities (E&U), Transport & Mobility (T&M), and Infratech and Projects Advisory (IPA).

Infratech and Projects Advisory (IPA) assists clients with infrastructure planning and design, procurement and implementation strategy, technology strategy, digital transformation, governance & process controls, PMO setup & oversight, risk and maturity assessments, and performance improvement. We work with clients embarking on complex infrastructure projects or infrastructure owners looking to optimize the value of their assets. Through innovation, we are at the forefront of combining engineering and technology to deliver sustainable and impactful results to our clients.

As an intern, you will get the opportunity to learn and contribute in the following areas with guidance from your supervisors and team members:

- Have a keen interest in infrastructure, emerging technology, and data and a desire to learn new skills
- Providing strategic and commercial advice spanning the full lifecycle of infrastructure projects
- Supporting project/engagement management and fieldwork activities, including data collection, analysis, documentation, and client communication
- Assisting team with secondary research and analysis, report preparation, analysis, and insights development

Internship Opportunities

Deal Advisory – Transaction Services, Intern

As a Transaction Services Intern, you will be an integral part of our dynamic team, gaining hands-on experience and exposure to various aspects of merger & acquisition transactions. This internship offers a unique opportunity to work alongside industry experts and contribute to projects that shape the future of leading organisations across diverse sectors.

Working alongside seasoned professionals, you'll be involved in providing support for buy-side merger & acquisition and sell-side divestiture processes, with a primary focus on enhancing stakeholder value. This will involve identifying key risks and benefits early in the transaction life cycle. Our team offers comprehensive advisory services that span the entire transaction lifecycle. This includes financial due diligence, commercial due diligence, synergies assessments, operational due diligence, value creation, and post-deal integration & separation support.

We welcome aspiring candidates with a keen strong interest in M&A to submit their application.

Internship Opportunities

Deal Advisory – Turnaround and Restructuring Services, Intern

KPMG's Turnaround and Restructuring Services help businesses and their stakeholders to conceptualise and implement strategic, operational and financial change. These changes are due to a constantly evolving business lifecycle, with businesses facing issues such as right sizing and structuring for growth, underperformance, shortage of liquidity and insolvency. We manage some of the world's largest cross border insolvencies.

As an intern in the Turnaround and Restructuring Services department, you will be part of a team who are dedicated to their craft in bringing practical solutions to our clients and their stakeholders, with hands-on involvement in managing various administrations and the implementation of restructuring plans.

The ideal candidate should possess the following attributes:

- Be pursuing a good Accountancy Degree or a Business Degree;
- Be familiar with the applicable Singapore law on corporate restructuring and insolvency;
- Be able to work in teams with excellent interpersonal skills;
- Possess a strong understanding of business drivers and their fundamentals;
- Be resourceful, versatile, analytical and possess strong project management skills.
- Be familiar with data analytics tool such as Microsoft Power BI.

Internship Opportunities

Central Services – Clients & Markets (Employee Experience), Intern

KPMG in Singapore is part of a global network of independent professional services firms providing Audit, Tax and Advisory services. We operate in 145 countries and territories and in FY21 had more than 236,000 people working in member firms around the world. Each KPMG firm is a legally distinct and separate entity and describes itself as such. KPMG International Limited is a private English company limited by guarantee. KPMG International Limited and its related entities do not provide services to clients.

The Client & Markets team is KPMG in Singapore's brand hive, equipping our colleagues with the marketing tools to win clients and to position KPMG as an industry leader at the forefront of innovation and sustainability. The team creates buzz around our brand, strategise and communicate our firm's value proposition, working together to pollinate our brand, drive up its value and increase our market share.

In this exciting internship opportunity, we are looking for dynamic and motivated individuals to join our Clients & Markets (Employee Experience) Team.

As an intern, you will be supporting the team with various tasks including:

- Support the development and implementation of internal campaigns and communications strategies aligned with our firm's culture, values, and strategic priorities.
- Assist in planning and creating engaging, multimodal internal communications materials, including internal social network posts, newsletters, EDMs and other collateral for employee experience campaigns and internal events such as town halls.
- Collaborate with various teams, including business units, HR, and marketing, to drive employee communications and employer branding activities.
- Ensure consistency and alignment of employee experience communications with the broader scope of campaigns, events and initiatives
- Contribute to the positive culture and change initiatives within the organisation.

The ideal candidate should possess the following attributes:

- Resourceful, well-organised, meticulous and good team player with a positive mindset, able to work collaboratively and build relationships across different teams and departments.
- Strong written and verbal communication skills, with the ability to adapt your writing style to different topics and audiences. Able to conduct research, conceptualise ideas, and create compelling narratives.
- Demonstrates keen interest in learning and leveraging latest technology such as generative AI platforms and tools to uplift work productivity and quality.
- Proficient in Microsoft 365 Apps. Knowledge of digital content creation (e.g. Canva, videos) and proficiency in relevant software is a plus.
- Excellent attention to detail, time management skills, and a sense of urgency, with a proactive mindset and a willingness to take initiative.
- Self-starter with ability to work independently, comfortable with multitasking in an outcomes driven environment

Internship Opportunities

Central Services – Clients & Markets (Account-Based Marketing and Sales Enablement), Intern

The Client & Markets team is KPMG in Singapore's brand hive, equipping our colleagues with the marketing tools to win clients and to position KPMG as an industry leader at the forefront of innovation and sustainability. The team creates buzz around our brand, strategise and communicate our firm's value proposition, working together to pollinate our brand, drive up its value and increase our market share.

In this exciting internship opportunity, we are looking for dynamic and motivated individuals to join our Clients & Markets (Account-Based Marketing and Sales Enablement) Team.

What is Account-Based Marketing (ABM)?

Account-Based Marketing (ABM) is a strategic approach to marketing where efforts are focused on targeting specific high-value accounts of our firm. It aligns sales and marketing to deliver personalized campaigns and solutions tailored to the needs and priorities of each target account. At KPMG Singapore, we're accelerating the rollout of key ABM initiatives for the firm's priority accounts, including dedicated account management microsites, joint events, whitepapers, speaking opportunities, sponsorships, and more.

What is Sales Enablement?

Sales Enablement focuses on equipping our people—particularly those engaging with our firm's priority accounts—with the tools, resources, insights, and training needed to effectively execute go-to-market (GTM) strategies. It empowers them to engage key accounts, drive conversions, and deliver value by aligning messaging, processes, and solutions with market needs. At KPMG Singapore, we have successfully implemented training programs and introduced essential sales tools. And we aim to further elevate these efforts by fostering a firm-wide 'everyone is a salesperson' mindset.

What does this mean for you?

You have an exciting opportunity to dive into the world of Account-Based Marketing (ABM) and Sales Enablement. You'll gain hands-on experience with new tools and technologies, supporting key ABM initiatives for the firm's priority accounts. Throughout your internship, you will collaborate with various teams across all functions, levels, and sectors of the firm, providing a unique insight into how different expertise areas work together. With a strong support system in place, you'll have the opportunity to develop valuable skills, contribute to impactful projects, and build happy memories while learning from experienced professionals.

As an intern, you will be supporting the team with various tasks including:

- Assist with the development and rollout of key ABM initiatives, such as account management microsites, client events, and custom marketing materials.
- Support sales enablement efforts by managing resources, updating tools, and helping to create training content.
- Collaborate with cross-functional teams to gather insights and develop personalized campaigns for key accounts.
- Analyse campaign performance and providing actionable recommendations to optimize future efforts.
- Participate and assist in team projects and other ad hoc duties assigned

Internship Opportunities

Central Services – Clients & Markets (Communications & Corporate Affairs), Intern

Join us at KPMG in Singapore and be a part of something bigger.

Are you enthusiastic about impactful storytelling, strategic content creation and creative problem-solving? KPMG in Singapore's Communications and Corporate Affairs team is seeking a passionate and driven intern to help us deliver innovative communication strategies that make a real difference. This is your chance to gain hands-on experience in a professional services environment, sharpen your skills and contribute to exciting projects that enhance the way we connect with clients and stakeholders.

In this exciting internship opportunity, we are looking for dynamic and motivated individuals to join our Clients & Markets, (Communications & Corporate Affairs) Team.

What you'll do:

This internship offers a dynamic experience, where you will collaborate with a talented team and take on meaningful responsibilities. Here's what you'll be doing:

- **Craft content that resonates.** Develop thought-provoking stories, impactful thought leadership pieces and key content that positions KPMG as a leader in the market.
- **Drive multichannel campaigns.** Create and execute creative campaigns across multichannel platforms, including videos, podcasts and digital initiatives, while spotlighting our subject matter experts.
- **Solve challenges creatively.** Support the conceptualisation and delivery of fresh approaches to communication challenges, helping elevate how we tell KPMG's story.
- **Contribute to national-level partnerships.** Assist in the implementation and management of strategic partnerships, gaining exposure to a diverse and high-profile portfolio of collaborations.
- **Deliver sustainability campaigns.** Take an active role in planning and executing ESG-related initiatives as part of our "Our Impact Plan," and produce engaging sustainability communications to amplify these efforts.

From brainstorming ideas to executing projects, you'll have the opportunity to shape impactful campaigns that leave a lasting impression.

Who we're looking for:

You're a self-starter with a passion for creativity and collaboration. Here's what sets you apart:

- Pursuing or recently graduated with a degree in Communications, Journalism, Public Relations, Marketing, Business/Finance, Sustainability, Economics, Political Science, or a related field.
- Strong writing and editing skills, with the ability to produce content that captivates and informs.
- An interest in corporate communications, campaign execution, and driving impactful storytelling.
- A natural problem solver who thrives on finding creative solutions.
- Proactive, organized, and able to juggle multiple tasks effortlessly while working in a fast-paced team environment.

Central Services – Clients & Markets (Our Impact Plan), Intern

KPMG in Singapore is seeking a dynamic and motivated intern to join our OIP (Our Impact Plan) Unit within the Corporate Affairs Team. This is a unique opportunity to gain hands-on experience in a professional services environment, supporting the execution of the firm's in-house sustainability programme.

In this exciting internship opportunity, we are looking for dynamic and motivated individuals to join our Clients & Markets (Our Impact Plan) Team.

As an intern, you will be supporting the team with various tasks including:

- Support the OIP Unit in executing activities related to the implementation of the OIP Programme including (but not limited to):
 - i. Data collation and analysis
 - ii. Working with the business on policy and procedure development and review
 - iii. Assisting in preparation for ESG assurance
 - iv. Research on sustainability related topics and goods and services vendors
 - v. Assistance in OIP related events
 - vi. Assistance with development of OIP reporting and presentations
 - vii. Testing and implementation of OIP related tools/technology
- Support the wider Corporate Affairs Team as needed in executing communications and strategic partnerships related activities

The ideal candidate should possess the following attributes:

- Currently pursuing a degree in Sustainability, or a related field.
- Strong communication skills.
- Keen interest in sustainability and ESG related initiatives and market trends.
- Proactive and able to manage multiple tasks effectively.
- Enthusiastic about learning and contributing to a dynamic team environment.

This internship provides an excellent opportunity to learn from experienced professionals and gain exposure to various facets of corporate communications. If you are passionate about communications and eager to develop your skills in a supportive and challenging environment, we invite you to apply.

Internship Opportunities

Central Services – IT Services (Enterprise Application & Engineering - Developer), Intern

The Information Technology Services (ITS) team provides essential technology-based services to internal clients. The ITS team work together to address both individual and firm-wide IT needs.

We are seeking a motivated and enthusiastic Application Team Intern to join our dynamic team. The ideal candidate will have a passion for technology and software development, with a keen interest in developing applications using the Power Apps low-code platform. This internship offers hands-on experience with JIRA, Confluence, Azure cloud services, and participation in various software development lifecycle activities.

As an intern, your duties will include but not limited to:

- **Develop Applications:** Use the Power Apps low-code platform or other tools to design, develop, and implement custom applications that meet business needs.
- **Collaborate with Teams:** Work closely with cross-functional teams, utilizing JIRA and Confluence to manage projects, track progress, and document processes.
- **Azure Cloud Services:** Gain exposure to Azure cloud services, assisting in configuration monitoring alerts on the cloud platform.
- **Software Development Lifecycle (SDLC):** Provide support in various phases of the SDLC, including requirements gathering, design, coding, testing, and deployment.

The ideal candidate should possess the following attributes:

- Currently pursuing a degree in Computer Science, Information Technology, or a related field.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Eagerness to learn and adapt to new technologies and tools.
- Attention to detail and a proactive approach to tasks.

What we offer:

- **Real-world Experience:** Work on meaningful projects that impact the business and gain valuable industry experience.
- **Mentorship:** Receive guidance and mentorship from experienced professionals in the field.
- **Growth Opportunities:** Potential for full-time opportunities based on performance and business needs.
- **Collaborative Environment:** Join a supportive and collaborative team that values innovation and continuous improvement.
