

Discover KPMG's IFRS 17 Digital Learning Suite

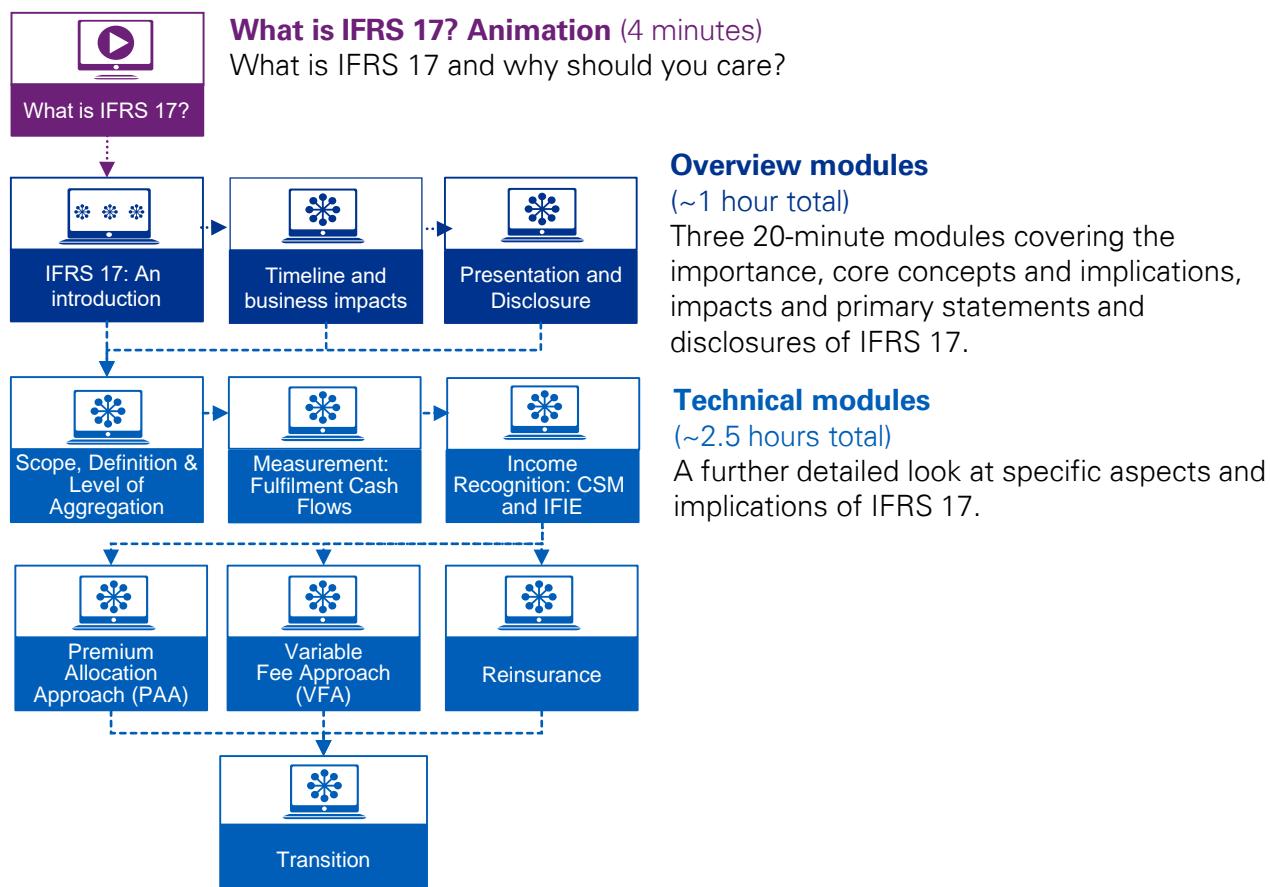

IFRS 17 will represent a significant change in terms of the calculation and presentation of Insurers' financials. This will have a direct impact on data, systems and processes, and significantly, profitability.

Due to the technical complexity of the standard, insurers will need to educate a range of stakeholders across their organisation, facilitating a clear understanding of the IFRS 17 requirements, and helping them to successfully embed the changes.

We are using our global subject matter expertise across the insurance industry partnered with our dedicated learning specialists to develop a suite of modules to support the transition.

What's covered?

Our IFRS 17 suite of digital learning modules consists of a 4-minute animation and ten 20-minute modules. The first three modules provide an overview of the Standard explaining the core concepts. Seven subsequent technical modules look at specific aspects and implications of IFRS 17. We break down this complex area into accessible and digestible learning modules that include real-world scenarios, financial examples and links to additional resources.

The KPMG approach

KPMG's IFRS 17 digital learning suite provides a flexible delivery approach to IFRS 17 training. Higher-level awareness can be provided to a wide set of stakeholders with more finance-specific employees receiving more tailored, relevant learner journeys. This focuses learner attention, saving time, whilst also ensuring consistent messaging across the business. When used as a formal training approach, it sets a base level of knowledge across the learner population, whilst providing a valuable reference resource to return to after the training is complete.

Our digital learning can be licensed to host on a client Learning Management System, or we can also deliver the IFRS 17 suite of digital modules through KPMG's secure online platform.

Speak to your KPMG contact to arrange free demo access to the IFRS 17 introduction modules.

Benefits to you

We have put our learners at the heart of our learning design. As technology evolves, so too does the way we consume information. We are used to shorter, more varied bursts of information that we consume at our own pace and in our own way.

We have developed a suite of digital learning modules that:

1. Cover the wide-ranging IFRS 17 content in short, targeted 20-minute modules to provide focus and aid retention.
2. Bring to life the real impacts of IFRS 17 for the learner through a variety of interactions including case studies, animated scenarios, and characters aligned to insurance role profiles.
3. Provide context to technical detail through easy-to-follow financial examples, with additional information from KPMG, the IASB and other sources, sign-posted throughout to promote self-directed learning.
4. Use a storytelling approach to keep learners engaged and motivated to continue to learn about IFRS 17 even after they have completed this training.
