

Protect. Transform.

KPMG Powered Enterprise | Cyber enabled by Okta

2021

To disrupt you must transform

CEOs are no longer looking at cyber risk as a separate topic. More and more they have it embedded into their overall change programs and are beginning to make strategic decisions with cyber risk in mind.

CISOs have important questions

- Is it safe to move my identity and access management capabilities to the cloud?
- Can I align my application security strategy with industry standards?
- Does my access management solution meet the needs of my business?
- Is my organisation tracking pertinent security and risk indicators?
- How do I ensure my cyber access management solution is meeting my modern security needs?

Powered Cyber accelerates identity and access management transformation

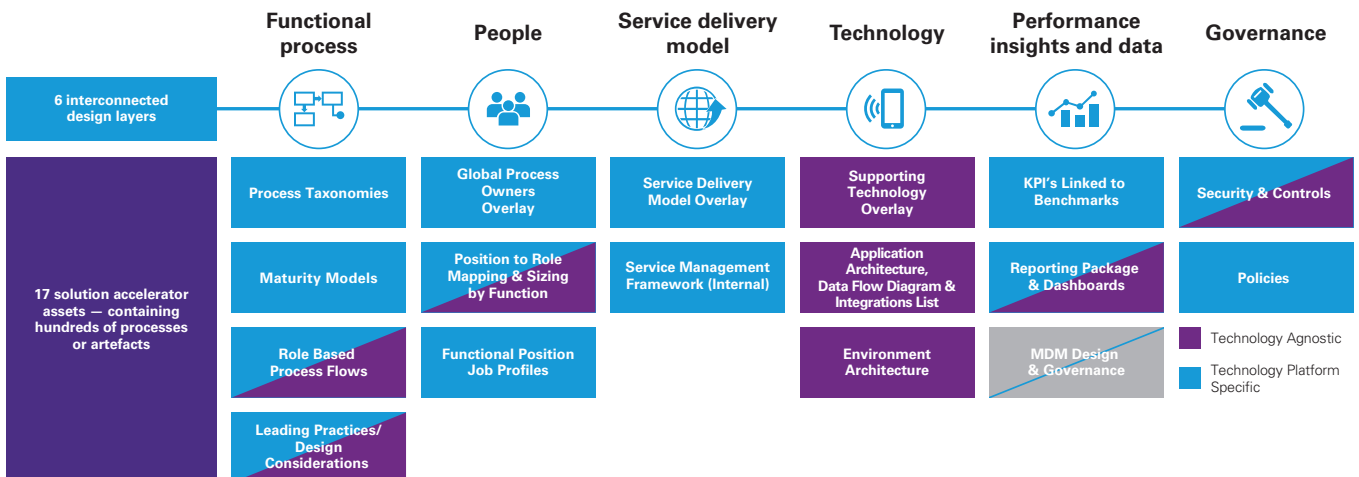

At the heart of KPMG Powered Enterprise | Cyber, KPMG’s platform for Identity Access Management (IAM) transformation, is a pre-built target operating model that compliments Okta in the cloud.

Powered Cyber enabled by Okta is an outcome-driven functional transformation proposition for the modern CISO organisation that prepares and protects your business for the digital future.

KPMG professionals understand the challenges with increased data complexity, lack of process standardisation and ineffective governance of service deployed for access management programs. The Access Management offering can help organisations better respond to risk reduction requirements and auditor expectations.

Effective IAM serves as a foundation for cyber security programs. With the Powered Cyber offering, we bring together our experience of delivering transformation programs in IAM with the proven Powered Enterprise methodology to deliver accelerated and sustainable change. Through accelerated delivery of IAM controls and capabilities, Powered Cyber can enable business outcomes and demonstrate rapid reduction of cyber security risks for your organisation.

KPMG Target Operating Model

It's not what you put in the cloud that matters, but what you get out of it.

Powered Enterprise | Cyber provides:

- Adoption through standardisation
- Replaces tactical processes
- Formalizes the process taxonomy and governance model for IAM services
- Solution focused instead of being cost or software package focused
- Diagnostics to drive better predictability of ROI's
- Standards-based integration allowing rapid adoption of services

What's in the box?

Powered Cyber provides a combination of leading practices and processes, proven technology solutions and a next-generation delivery framework.

- The **Target Operating Model** shapes how transformation plays through every layer of your organisation;
- the **Powered Execution Suite** is an integrated platform of next generation tools to help deliver functional transformation;
- and **Powered Evolution** provides access to specialised resources to drive continuing evolution.

Federal Communications Commission (FCC) **cut costs by 83 percent** by moving to cloud-based identity^(b).

Saved \$500,000 within the first nine months of using Okta due to their new seamless ability to log into the supplier's portal and order online^(c).
