

4D Insight (4Di)

a KPMG Product

Develop your organisation's resilience through immersive exercising and learning

Building resilience is one of the main goals for both private and public organisations, along with governments and regulators.

Investing in your resilience capability means getting ready to manage and respond to 'low-probability, high-impact' events. The consequences of these events can range from service downtime and revenue loss to reputational damage, large fines and increased public scrutiny.

In order to maintain a resilient organisation testing and learning is required.

The challenge

- Increasing sophistication, unpredictability, and persistence of incidents
- Complex supply chains and higher interdependencies when responding to disruptive events
- Skills shortage and use of inflexible learning and exercising solutions
- Incident response increasingly dealt with remotely
- Time constraints, inefficiencies and costs associated with on-premise learning and exercising

The solution

4Di is a scenario-based digital simulation platform that builds the resilience of organisations in a versatile and dynamic format. It creates an immersive, engaging experience through which you can develop your organisation's readiness for any disruptive event and innovate the way you deliver learning within your organisation.

4Di creates a safe, evidence-based environment to prepare your organisation for any threat. By reducing the barrier to entry for exercising and learning, 4Di helps you build resilience across people, teams, and organisations at scale.

Key features

Simulate a time-pressured scenario while providing a safe learning environment for your team

Automatically capture and save data from all participants, ready for easy analysis

Completely customisable to any scenario, organisation and role profile

Dynamically modify scenarios and injects during live sessions

Intuitive platform with multiple functionalities embed including messaging, decision logs, video, mapping and live graphs

Versatile and adaptable to any scenario

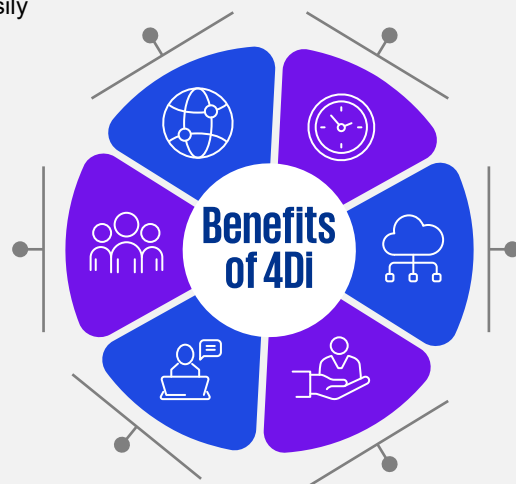

Web-based tool that can be used for any scenario and easily tailored to your organisation, with fully configurable set of inject templates.

Intuitive and immersive

Easy to use, intuitive platform that builds realism and replicates the pressures of live incidents. Designed to suit all role profiles and seniorities.

Data captured & analysed in real time

All data captured within the secure platform, providing access to real-time insights and enabling robust findings and recommendations about your organisation and its people.

Cost and time efficient

Bespoke exercises can be developed rapidly, significantly reducing the lead time and cost for scenario development with no dependency on active facilitation.

Scalable and accessible

Run multiple, remote sessions at one time across locations, upskilling your workforce wherever it's based. It's a secure, Cloud-based platform, accessible via any device with an internet connection.

People and organisation development

Generate individual and team-level metrics instantly. Plus get access to full Continuing Professional Development (CPD) records and personalised learning logs.

Why KPMG

KPMG has experience developing resilience with some of the world's largest global clients including financial services, consumer goods, energy firms and critical national infrastructure organisations and government.

We understand how to customise resilience exercising and learning programmes to achieve organisational objectives in alignment with industry standards and regulations.
