Empowering leaders to lead through data and analytics

Organizations across industries have an opportunity to leverage their employee data to proactively make workforce decisions. This podcast explores the journey a major healthcare provider has embarked upon to empower its leaders with data and analytics, allowing managers to make better, more data-driven decisions about their people and teams. [Listen](#).

CEO Outlook: The changing role of humans in the cognitive era

Speak to any CEO about what artificial intelligence, machine learning, and cognitive computing mean for their organization, and it is clear that the question of talent management is far more important than the technology behind these new capabilities. KPMG CEO Outlook 2017 explores the evolving dynamic between humans and machines and how CEOs are cultivating talent for the future. [Learn more](#).

The power of trust in analytics

Trust is a growing issue as analytics goes mainstream not only across most sectors but also for regulators, policymakers, and those who safeguard consumer rights. Explore some of the critical questions and challenges emerging around trust such as the customer view, trusted data science, policy and regulation, and cybersecurity. [Learn more](#).
