Transfer pricing

Botswana Transfer Pricing Legislation (TP) and Regulations came into effect on 1 July 2019. The Regulations, which are based on the OECD Guidelines, are cited in the Legislation as a relevant source of interpretation.

The law requires transactions between directly or indirectly connected persons to be consistent with the arm's length principle. TP applies to transactions with non-residents and transactions with Botswana resident IFSC accredited related companies.

The terms "connected person" and 'control' are defined in the Income Tax Act.

A transaction with a connected party is considered to be consistent with the arm's length principle if the conditions of the transaction do not differ from the conditions that would have applied between independent persons in a comparable transaction carried out in comparable circumstances.

Below is a list of some of TP documentation/information that taxpayers are required to submit within four months of the end of the financial year:

- An overview of the person's business operations, which includes, the history, recent evolution, general overview of the relevant markets of reference and an organizational chart;
- Description of the group's operational structure including general description of the role that each of the group members carries out with respect to the group's activities, which are

relevant to the controlled transaction;

- A general business strategy pursued which includes business restructuring or intangible transfer in the present or immediate past year and an explanation of the effects of such transaction;
- Details of the taxpayer's key competitors;
- Description of controlled transactions, including analysis of the comparability factors etc;
- The amount of intra-group payments and receipts for each category of controlled transactions broken down by the tax jurisdiction of the foreign payer or recipient;
- Copies of all material inter-company agreements;
- A detailed comparability and functional analysis and the relevant connected persons with respect to each documented category of controlled transactions;
- A summary of the important assumptions made in applying the transfer pricing methodology;
- Comparability analysis which includes details of industry and economic analysis, budgets or projections relied on; and
- Any other information that may have material impact on the determination of the taxpayer's compliance with the arm's length principle.

The Commissioner General is empowered to:

- request the taxpayer to submit the equivalent of an OECD Master File within 7 days from the date of the request in cases where transactions

with a connected person exceed BWP5 million; and

- restate taxable income in line with the arm's length principle.
- Failure to comply with transfer pricing legislation attracts the following penalties:
- the greater of BWP10,000 or 200% of the additional tax arising from a TP adjustment or;
 - an amount not exceeding BWP500,000 for failure to comply with TP documentation filing obligations which may be reduced to no less than BWP250,000 upon mitigation; and
 - criminal penalties, upon conviction, of up to BWP10,000 or imprisonment for one year for failure to furnish documentation or returns as required under the Income Tax Act or failure to comply any written notice from the Commissioner General.

Please note that a restatement of related party transactions by the Commissioner General may give rise to additional VAT, Withholding Tax and other tax liabilities plus penalties and interest charges.
