\*See next page for more details about a quick win solution on Supply Chain MIS implementation

# Operations MIS implementation to enhance value chain visibility for better data-driven decision making

## Supply Chain MIS toolkit

5 groups of dashboards covering end-to-end supply chain areas

- Plan
- Source
- Make
- Sales
- Deliver

Each group includes:

- Quick as-is diagnostics
- Plug and play templates
- Readymade dashboards with embedded business analytics engines
- Recommended KPI measurement

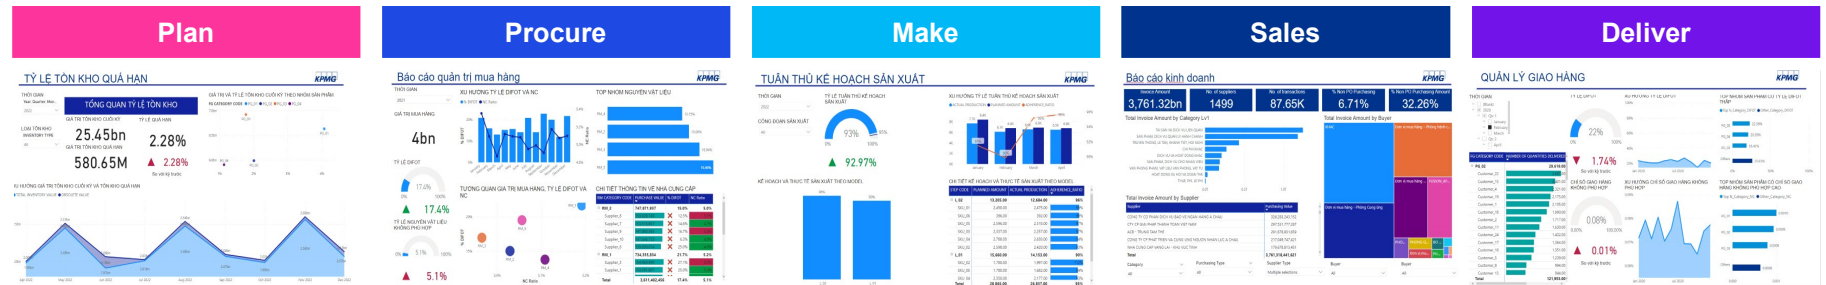

*\*KPMG can customize the toolkit based on client's industry and operations*

## Key stakeholders are engaged to maximize the value added

- Planning
- Procurement
- Production
- Maintenance
- Quality Control
- Distribution

## Customized Analytics Powered Dashboards capable of providing insights on supply chain performance in terms of 'What happened?', 'What will happen?' and 'What should we do?'

- ✓ What happened in the previous planning cycle?
- ✓ What will happen in the next planning cycle?
- ✓ What should we do to achieve our goals for the next planning cycle?

- ✓ What is previous procurement cycle performance?
- ✓ What will happen during the next procurement cycle due to planning output?
- ✓ What should we do to improve procurement efficiency and effectiveness?

- ✓ What happened during the previous production cycle?
- ✓ What will happen during the next production cycle due to planning output?
- ✓ What should we do to optimize production efficiency and effectiveness?

- ✓ What is previous period's performance?
- ✓ What is the trend in the market?
- ✓ How will the trend and planning impact the sales in the next cycle?

- ✓ What is previous delivery performance?
- ✓ What will happen during the next delivery cycle?
- ✓ What should we do to improve delivery efficiency and effectiveness?
