Each topic has been selected to drive meaningful engagement, reinforce best practices, and foster a culture of continuous learning. Delivered weekly, this ready-made program ensures your teams stay informed, vigilant, and empowered.

Here's what you can expect each week:

WEEK 1
**Cyber 101
Fundamentals**

WEEK 2
**AI Ethics
& Security**

WEEK 3
**'ishing'
Protection**

WEEK 4
**Family Safety &
Awareness**

1x Static Material

1 x Poster

1x Written Material

Article suitable for Email / SharePoint

1x Byte-Sized Video

2-3 Minutes in Length

MISSION 2 - THREAT DETECTION ACADEMY Cyber Awareness Sessions

\$12,000

Launch a **60-minute live, facilitator-led virtual training session** focused on the key themes of Cyber Security Action Month, including **AI, deepfakes, scams, phishing, family online safety** and practical ways to stay secure in an evolving threat landscape. This interactive session will provide employees with actionable guidance, real-world examples and the opportunity to pose questions directly to KPMG's cyber specialists.

MISSION 3 - EXECUTIVE COMMAND CENTRE Cyber Board Insights / Executive Level Training

\$15,000

Unleash strategic cyber insights designed for Boards and Executive leaders. An engaging 60-minute session designed for executive leaders to explore cyber governance topics such as AI governance, Board cyber obligations, third-party and data protection risks, and the emerging threats shaping organisational resilience and strategic decision-making.

MISSION 4 - ORBITAL OVERRIDE Cyber Escape Room

\$17,000

Experience cutting-edge training with a **one-day virtual or in-person session designed for maximizing fun for your entire workforce**. This immersive and gamified training experience will teach your staff the fundamentals of cyber security using a dynamic, team-based, and immersive approach.

Cyber Action Month Toolkit

LAUNCH AWARENESS. REACH RESILIENCE

Choose Your Mission. Strengthen Your Defence.

What is Cyber Action Month, and why is it important?

Cyber Security Action Month is a global initiative that helps organisations strengthen cyber resilience through education, awareness and action. It provides an opportunity to equip **employees, executives and trusted third parties** with the knowledge and skills to recognise evolving threats, adopt safer behaviours and contribute to a stronger security culture.

Your Mission...should you choose to accept it...

Our Cyber Security Action Month Toolkit includes three targeted missions designed to build awareness, reinforce secure behaviours and strengthen cyber leadership. Available individually or as a tailored package, the missions provide a layered approach that engages employees, leaders and executives across your organisation.

- **Mission 1:** Satellite Signal Boost – Drives awareness and engagement through weekly cyber communications.
- **Mission 2:** Threat Detection Academy – Builds knowledge and secure behaviours through interactive cyber awareness training.
- **Mission 3:** Executive Command Centre – Enhances cyber leadership, decision-making and governance oversight.
- **Mission 4:** Orbital Override – Immersive gamified team-based experience will teach the fundamentals of cyber security.

Combined, these missions help create a stronger cyber-aware culture across your organisation. For maximum flexibility, organisations can secure their preferred mission(s) ahead of Cyber Security Action Month and schedule delivery in October or later to align with organisational priorities, project timelines and budget cycles.

Our [Cyber] Human Risk Management Approach

KPMG's Cyber Human Risk Management (HRM) offering helps organisations reduce human-related cyber risk by turning awareness into measurable behaviour change. Through targeted education, behavioural insights and risk-driven interventions, HRM strengthens cyber resilience, builds a security-conscious culture and prepares organisations for emerging technologies, including AI. Our HRM offering is built around three key capability areas:

- **Cyber Learning Unlock (CLU):** Drive secure behaviours through targeted learning, awareness campaigns and culture change initiatives.
- **Insider Risk:** Reduce risks from human error, negligence and malicious activity through behavioural interventions and data-driven insights.
- **Future Ready:** Build AI literacy and future-focused cyber capability to help employees and leaders navigate emerging technologies and threats.

Whether you need a targeted engagement or a broader transformation program, HRM can be tailored to your organisation's priorities, maturity and risk profile.
