

From geopolitical uncertainty to resilience

KPMG. Make the Difference.

September 2026

Geopolitical risk has evolved from a business concern into an operational resilience challenge, as organizations become increasingly dependent on global technology ecosystems, digital infrastructure and cross-border service providers.

Trade tensions, sanctions and political instability can disrupt supply chains and restrict market access, while cyberattacks on critical infrastructure and data-sovereignty disputes can bring operations to a standstill overnight. Adversaries are already pre-positioned within critical infrastructure, and regulators are increasingly holding executives and boards personally accountable when things go wrong. Organizations need a clear understanding where they are most exposed, prioritizing the risks that matter, and turning that insight into practical resilience measures.

How geopolitical drivers reshape your risk profile

Geopolitical drivers can materially alter an organization's risk profile by affecting its locations, critical dependencies and asset exposure. Understanding these impacts enables informed resilience and risk management decisions.

Are you prepared for what's next? Questions boards should ask

Conflicts & instability in physical and digital information domains	Economic & political pressure	Regulatory & legal fragmentation
What if a site, supplier or region goes dark overnight?	If a supplier is sanctioned tomorrow, how would we know?	Can we consistently meet the diverse security and compliance expectations across jurisdictions?
Could we be hit as collateral damage of an attack on others?	Could we survive without our biggest cloud/tech provider?	Could leadership be held accountable, and can the board prove it exercised appropriate oversight?
Could a state actor already be inside our network, unnoticed?	Could a foreign government access or control our data and systems?	Are we able to report an incident to all the relevant regulators within the required timeframe?

Our approach: from exposure to enterprise-ready action

Capabilities that turn geopolitical insight into operational resilience

With KPMG, understand your exposure, reduce critical dependencies and strengthen operational resilience.
