

# Clarity on KPMG Switzerland

Fostering Innovation. Driving Transformation.

## KPMG continues to grow

### Annual result 2018/19

KPMG Switzerland's performance in the past fiscal year ended 30 September 2019 was very good yet again and represents a new record high. It was shaped greatly by the digital transformation of Swiss companies, persistently low interest rates as well as enormous uncertainties in both the regulatory sphere and on the topic of trade policy.
