

CBAM Management

Optimizing return on investment during the build-phase

[Home](#) › [Services](#) › [Greenfield/Brownfield Investments and Market Entries in Germany](#) › [CBAM Management](#)

Optimizing return on investment during the build-phase involves effectively managing costs and ensuring timely completion of tasks.

Your key questions, challenges and objectives

- Is the CBAM relevant for the companies' imports in the EU, if so, what is the impact of the CBAM on your transactions?
- How and to whom can responsibilities for the CBAM be assigned and integrated in the organization?
- What measures can be taken to ensure compliance with the reporting requirements?
- How can the data relevant for the CBAM reporting requirements be obtained?

How we support

- Our experts can determine the relevance of the CBAM regulation for your company. We offer trainings for you and the respective stakeholders
- Our new tool Trade Data Check allows to assess the impact of the CBAM for your company and facilities complying with reporting obligations
- Analyzing your organizational procurement set up allows us to provide individual advice on how to integrate the CBAM reporting into your company
