

Implementation of IT Systems and Modules

Optimizing return on investment during the build-phase

[Home](#) › [Services](#) › [Greenfield/Brownfield Investments and Market Entries in Germany](#) › [Implementation of IT Systems and Modules](#)

Optimizing return on investment during the build-phase involves effectively managing costs and ensuring timely completion of tasks.

Your key questions, challenges and objectives

- Standardization, harmonization and modernization of IT systems (including potential of automation, analytics and AI)
- Transition of IT systems into private and public cloud solutions, e.g. SAP RISE and SAP GROW for S/4HANA
- Cost & complexity reduction, efficiency & future readiness of complex global IT/ERP architectures
- IT enabled business transformation including global execution of roll-outs and localization

How we support

- Design and implementation of IT/ERP systems, especially SAP S/4HANA including SuccessFactors, ARIBA
- Leading edge best practices, predefines business processes and preconfigured ERP systems
- Specialized expertise and experience in all functions and all industries
- Consideration of national & global regulatory requirements, reporting needs (incl. ESG) and change management
- Global practices for all leading IT/ERP platforms (SAP, Microsoft, Oracle, Workday, Service Now ...)
