

# KPMG eDiscovery

KPMG eDiscovery combines the benefits of KPMG's multi-cloud SaaS technologies, subject matter expertise and managed services to deliver a market leading eDiscovery service. Our forensic insight and trusted, long-term partnership approach provide consistent quality globally, across one platform, on time and on budget.

## What sets us apart:

### On time, On budget

KPMG's high precision forensic approach leverages RelativityOne to solve complex data challenges across litigation, investigations and compliance matters. An extensive suite of custom tools and scripts for automation accelerates workflows and drives efficiency. KPMG's flexible commercial arrangements include fixed fee models without any hidden costs.

### Speed to insight

KPMG brings a suite of tools and analytical techniques to surface relevant documents and key insights quickly. We deploy a database of repeatable models and accelerators paired with TAR, Social Network Analysis, Behavioural Anomaly Detection and other cognitive solutions (such as voice to text and auto-translation).

### Keeping your data safe

KPMG delivers all services in ISO and SOC II compliant environments leveraging cloud and proactive cyber threat analysis and automation. Exercising proportionality in targeted remote and on-site collections is a key metric for the Forensic team. Our cryptographically secure environment for your data is market leading in terms of security.

### High quality globally

KPMG's Forensic Technology specialists leverage firm-wide capability, such as our Lighthouse data science team and a deep bench of industry experts. Our clients trust us to deliver consistently high quality globally from our network of 152 offices, 47 Forensic Technology practices and over 20 eDiscovery data centres worldwide.

Our dedicated eDiscovery team is experienced in working on a variety of electronic disclosure/discovery matters, ranging from large-scale commercial litigation and arbitration, to responses to global regulators and competition authorities, HR matters and internal investigations.

KPMG's wider Forensic practice brings expertise across a range of contentious matters, including Fraud, Bribery & Corruption, Accounting Misstatements, Competition Breaches, Money Laundering & Sanctions, Unauthorised Trading, Market Abuse and Asset Tracing. We draw on our internal databases of previous cases and typologies to assist you when it matters most.

Overleaf, we illustrate how KPMG eDiscovery can support you at the different stages of a matter.

## Key Features of KPMG eDiscovery:

### Multi-Cloud SaaS Technologies

KPMG eDiscovery combines the benefits of cloud technologies and solutions with our core cloud hosted platform, RelativityOne. That means that we seamlessly integrate software hosted across MS Azure, AWS and Google cloud environments to deliver the first multi-cloud SaaS platform dedicated to reactive and proactive Forensic Services globally.

### Cloud Migration Services

KPMG has a dedicated cloud migration team to assist you in migrating data from legacy systems to the cloud. We are a RelativityOne Certified Partner. The team advises and executes on cloud migration strategy, migration planning, programme management and technical implementation. We leverage our managed service expertise to help you optimise workflow and run your cloud eDiscovery solution on an ongoing basis.

### Managed Services

Our KPMG eDiscovery offering comprises a unique managed service model allowing you to outsource the eDiscovery process end-to-end. The solution is tailored to your specific needs whilst leveraging our repository of repeatable models, machine learning and automation scripts. Our experienced team will support you as a long term partner as well as in the tactical options needed for specific matters, providing peace of mind at every step of the process and minimising distraction to your core business.

### Subject Matter Expertise

KPMG's team of project managers, Relativity Certified Administrators, TAR and CPR specialists leverage firm-wide capability in advanced analytics and data science. As a leading global professional services firm, when you hire KPMG you also have access to a deep bench of expertise including: industry analysts, ex-traders, competition experts, investigators and lawyers.

### Long-Term, Trusted Partnership

We aim to develop a long term relationship with our clients so we become familiar with your data, people and processes as relevant to eDiscovery. That allows us to provide insightful advice, have low management overhead and be ready to deliver quickly with no learning curve. We prioritise the importance of learning from litigation, helping you to develop remedial actions where gaps in internal systems, controls and compliance programmes are identified. We can recommend proactive managed service solutions to enhance your compliance and control environment in order to reduce or prevent breaches or control breakdowns in the future.

### Consistent Service Globally

KPMG covers our clients' footprint with RelativityOne's Cloud locations, 20+ on-premise data centres and mobile technology platforms that are truly global. Our responsive, on-call, full service teams leverage deep forensics, subject matter expertise, automation and data science to minimise reputational risk and support client obligations wherever you are in the world.

### Data Privacy and Security

KPMG sizes collections and data processing with surgical precision, saving you money and ensuring compliance with local and global data protection requirements. KPMG is an IT security leader and adheres to the highest information protection standards and certifications assuring minimum breach exposure.

### Commercials

We provide a variety of commercial models to our clients. Our managed service offering can be delivered at fixed fee, free of hourly and hidden fees. Clients save due to efficiency gains from continuous process and technology improvement, and predictability and transparency of costs for budgeting purposes.
