

Seamless and responsive

KPMG Powered Enterprise | Supply Chain

2021

The supply chain plays a more important role than ever in connecting the front, middle and back office in a modern enterprise. However, in future, supply chains may not be driven by products and processes, but by customer needs. They may not depend on capital-intensive fixed assets, but on a nimble network of trusted third-parties. Your supply chain function will need an overhaul to be ready.

But how do you get from where you are now to where you need to be?

Choose to embrace change

Faced with empowered customers, emerging technologies, cyber threats, severe periodic disruption and a battle for skills, COOs face important questions:

- Is my supply chain initiative focused on customer experience metrics?
- Does my end-to-end supply chain function as one virtual organisation?
- Can I see my total demand and supply picture at any point in time?
- How quickly can I identify and respond to a potential supply continuity issue?
- Are product movements driven by actual demand or by forecasted demand?

KPMG believes that successful supply chain functions of the future will have a combination of:

Platforms
empowered by as-a-service models

Workforce
with rapid re-skilling and hiring

Future ready capabilities
by embracing emerging tech

Micro supply chains
offering more localisation

Customer-centric offer
creating/maintaining a competitive advantage

Cognitive Decision Centers
complementing human decisions, supported by data

Introducing Powered Supply Chain

Powered Enterprise | Supply Chain is an outcome-driven solution designed to help your organisation address the key challenges in managing a complex, dynamic supply chain.

Within it, our KPMG Target Operating Model can help you to improve your supply chain function to better meet the demands of the organisation, while helping to maximise efficiency gains both now and in the future.

KPMG teams understand the human factors involved in business transformation. We can help inspire and empower your people to embrace change, as you align your transformation with industry disruption.

A pre-configured cloud solution, embedded with years of KPMG leading practice and enhanced with automation, Powered Supply Chain helps you to quickly transform and derive value from your move to the cloud.

It's not what you put into the cloud that matters, but what you get out of it

Powered Enterprise | Supply Chain provides:

- A jump start to your digital supply chain transformation
- Immediate access to leading practices, processes and supply chain service delivery models
- Technology-enabled efficiencies and insight
- A guided process with an array of supply chain assets and accelerators
- A positive customer experience
- Reduced implementation risks and increased speed to value

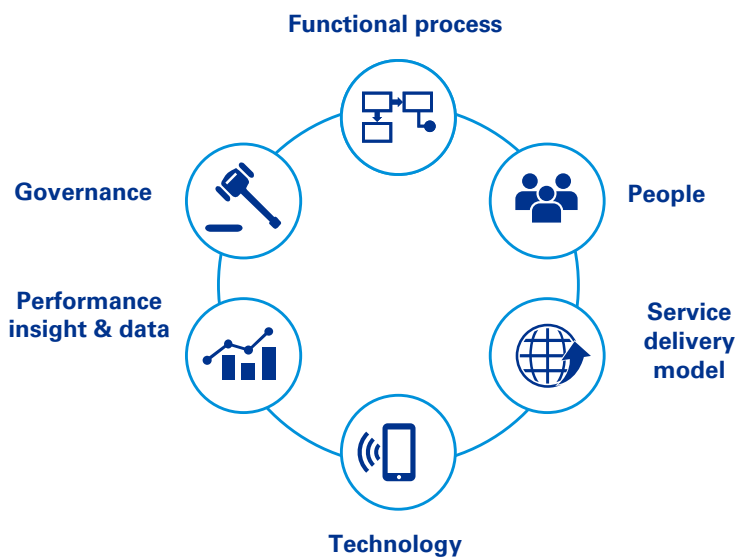

What's in the box?

Powered Supply Chain provides a combination of leading practices and processes, tested technology solutions and a next-generation delivery framework.

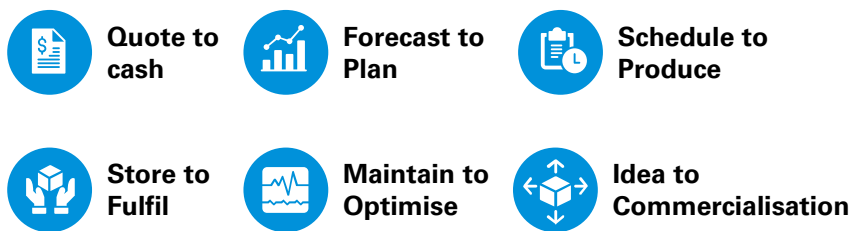

Adapted together with you, the pre-configured approach provides a fast-track towards value creation and benefits realisation.

- **KPMG Target Operating Model** shapes how transformation plays through every layer of your organisation. It's breadth ensures that the transformation is business and function led, enabled by technology
- **KPMG Powered Execution Suite** is an integrated platform of next generation tools to help deliver functional transformation
- **KPMG Powered Evolution** provides access to specialised resources to drive continuing evolution

The KPMG Target Operating Model

Powered Supply Chain scope

Imagine your Supply Chain function with...
