

Private Enterprise Barometer Pulse 2026

From pressure to repositioning: how UK private businesses are adapting

KPMG. Make the Difference.

Based on a **survey of 1,500 UK private enterprise leaders conducted in June 2026**, these findings provide a mid-year snapshot of the business environment. They highlight the key pressures businesses are currently facing and how these are shaping short-term priorities and longer-term planning.

Growth

Growth ambition remains strong despite lower confidence

32%
very confident

48%
confident

Growth confidence

80%

of businesses are confident in growth prospects

Confidence has declined
vs. Dec 2025 survey

87%

01

Growth activity and expansion behaviour remain **unchanged**

02

Businesses are continuing to pursue growth using **consistent strategies and funding models**

03

Resilience

Pressure remains the defining feature of the operating environment

Short-term risks facing UK businesses

Cost pressures have eased from

but remain the most cited risk

Looking beyond the short term

34%

of private businesses cite availability and cost of capital as a key long term factor

45%

cite stability of tax and regulatory environment

56%

cite UK economic outlook and productivity growth

What this shows

Risk is **multi-factor and distributed**, not concentrated in one issue

01

Cost pressure remains the consistent baseline condition

02

Economic outlook and regulatory stability are central to planning

03

Innovation

Where businesses are investing

Technology (e.g. AI, cyber, digital)

Workforce and skills

Innovation

Sustainability

Regulatory compliance

Innovation in practice: growth through development

63%

plan to create **new services** or product categories

Policy alignment

41%

prioritise **technology adoption** in the UK business environment

39%

prioritise **growth-focused investment and industrial strategy**

What this shows

Investment priorities are **shifting significantly toward technology**

01

Workforce and capability investment is rising alongside transformation

02

Policy expectations align closely with business investment focus

03

Productivity

Skills, capability and performance are central to long-term growth

Investment and capability priorities

prioritise workforce and skills investment

cite access to skills and talent as a long-term factor

prioritise skills, workforce and productivity in policy expectations

Constraint and pressure indicators

18%

cite labour availability and skills shortages as a short-term risk

A material shift in focus

Workforce investment up

+12pp

vs. Dec 2025 survey

Factors most likely to influence long term planning for growth, investment and exit

UK economic outlook and productivity growth

56%

Stability of the UK tax and regulatory environment

45%

Access to skills and talent over the medium to long term

36%

UK competitiveness in global markets

36%

What this shows

Skills appear across investment, constraints and policy priorities

01

Productivity is driven by a combination of workforce, capability and economic factors
