

KPMG Peer Bank

Introduction

The **KPMG Peer Bank** tool is a benchmarking solution for banks. It uses modern technology to analyse data – publicly available from the European Banking Authority (EBA), as well as the users own data. KPMG Peer Bank delivers comparative peer-to-peer insights for banks. It is designed to enable banks to answer the important question of **“How does my bank compare to others?”**. This can be done regionally, nationally, and by peer groups – pre-defined or customised.

KPMG Peer Bank has been built using data from the most recent EBA transparency exercises, which provide detailed bank-by-bank data on banks’ assets and liabilities, capital positions, risk exposure amounts, leverage exposures and sovereign exposures on over 125 banks across 27 countries from the European Union and European Economic Area.

Proposition

The key features of KPMG Peer Bank are mapped below:

The tool is applicable to all banks. Examples include:

Onboarding & Brexit banks

Banks who will become supervised by the ECB will undergo enhanced scrutiny, especially in the onboarding process. This tool can help explore who their peers are, in particular across Europe rather than just within their home country.

SSM & non-SSM banks

The ECB extensively performs peer analyses. With KPMG Peer Bank, banks are able to do similar peer comparisons. This tool can help to prepare for discussion with the ECB. Banks not included in the EBA Transparency Exercises can import their own data for such analyses.

Other banks worldwide

KPMG Peer Bank allows banks around the world who may wish to be benchmarked against European standards to introduce own data. Banks will be able to see visual comparisons on over 125 banks from Europe.

Investors

KPMG Peer Bank enables investors to better understand the latest competitive developments of the European banking market and how banks perform. RWA densities can equally be easily scrutinised.

Advantages of KPMG Peer Bank

- KPMG Peer Bank is updated with the latest published data from transparency exercises to enable users access to some of the most up-to-date information and benchmarks. Users can also tailor their own peer analyses with the latest technology.
- Users have the option to customise their own benchmark settings including the peer grouping in addition to the pre-set KPMG peer group (based the SSM modelling), and country benchmarks. Users can also import additional bank data into the tool and run personalised analysis.
- Benchmarking is not just a tool for competitive analysis. Supervisors have access to a broad set of data and are using it to evaluate the soundness of banks. KPMG has defined nearly 100 ratios based on available information that will help bank management not only to be prepared for supervisory dialogue but also to better understand its position against its peers.
- Finally, in comparison to other tools available, KPMG Peer Bank goes beyond the data, allowing an approach tailored to each banks criteria through the percentile analysis, the business classification and the peer group definition.

Pricing

What is the cost of KPMG Peer Bank?

Type of plan	Cost	Duration	Included	Upgrade
Standard	10.000€/bank	12 months	1 user account, full access 24/7, client service support, maintenance costs included, up to date insight into key performance and risk metrics, powerful graphics, the ability to import your own data and over 5 million data points for over 125 banks.
